***Please reply by EMail to: doc@dxnet.com ***
I will not reply to messages/replies/questions posted on the

Newsgroups.

Use this Duplexer for UHF-REPEATER, DUPLEXED UHF BASE or DUPLEXED MOBILE!

These Canadian made Duplexers have three precision cavities for the receiver and three precision cavities for the transmitter. I've used this same series Duplexer in Repeater Service for almost seven years on a high profile mountain top with no problems at all.

New, never used, tunes from 440MHz thru 470MHz. Will handle 50 watts continuous duty. 70 watts maximum intermittent duty.

I have one NEW and one USED Duplexer.

Price includes shipping and Insurance:
$150 new.
$125 Used

First come, basis only. Money Order or Certified Bank Check only.
Again, please respond by EMAIL rather than via the Newsgroups!

Thanks!

Tony

Due to a recent sale, I have a Kenwood KSC-14 Dual Bay rapid charger,
one Kenwood PB-32 6 volt battery and one Kenwood PB-34 9.6 volt battery.
The above items are used with Kenwood's Th22at, Th42at, Th79at, Th79aD.
To sell as a set for $175.00 o.b.o. shipped to lower 48. I have
box/manual for charger and may have original boxes for batteries.
Thanks and 73s,
Chris - N9PPX

I have for sale a Kenwood Th315at in MINT condition. It has encode PL,
10 memories, and a real front end on the receiver.(NO INTERMOD!) I am
the original owner, and I've had the radio for about 3 years. It's been
a coffee table radio, used to monitor a local repeater.
It comes with 3 12volt batteries, BC7 rapid charger, soft case(which it

has ALWAYS been in), boxes, manuals, rubberduck.

I'll sell it for $300.00 shipped to the lower 48 states.
I live in Milwaukee, WI.
Let me know....73s,

I am looking for a GE MASTR Exec II VHF (132-174 MHz). Or at least I
think that's the one. I have several of what I believe to be Exec I's
with the tube multipliers and final. I want to use the transmitter
from one of these but cannot use the one with tubes. I believe the
Exec II is all solid state.

Actually, all I need is the multiplier and final stages (I am
presuming it uses the same FM generator board (4EG21F10 or similar) as
the ones I have. If someone has yanked just these from a unit, that
would be fine.

Please Email me if you have these parts.

Paul, N1BUG

Hey folks, get over this spamming the newsgroup thing. Your even
sending them to the commercial group. the send to line that follows
this article is longer than the winter day. GET OVER IT and watch were
you send your replies to. I am a ham too, but this is getting
rediculus sending replies where they have no purpose.

Getting off my soap box now ... thank you

Try Mouser Electronics; I think their URL is www.mouser.com (duh!)
Also Newark Electronics has everything ever made (well, in the last 5
years)...kinda like a big brother of Mouser. Hope this helps.

***Please reply by EMail to: doc@dxnet.com ***
I will not reply to messages/replies/questions posted on the

Newsgroups.

I have New, never used "Six-Pack" Duplexers that tune from 440MHz thru 470MHz. I think are made by/for Cellwave. This Duplexer is designed for UHF-REPEATER, DUPLEXED UHF BASE or DUPLEXED MOBILE! The Duplexers have three precision cavities for the receiver and three precision cavities for the transmitter. Made in Canada because some had a Round while label with a red leaf and the word "CANADA" on them.

The Duplexers are rated at 50 watts continuous duty and 65 watts intermittent. The Ports are identified, but no mfg. label on the Duplexer(s) themselves.

Duplexers are basic black. 9" Long, 6" Wide, 1 1/2" Tall. Weight = 2 lbs!

CONNECTORS: TX Port= Type "N", Rx Port = BNC, ANT. Port = SO239 (SO239 is the mate to standard PL259).
(Note: All connectors are the preferred *Teflon type, silver).

These duplexers are "perfect" for repeater use. I'm sorry but I don't have more specs on the duplexers. I can tell you that they are the type used in **Telemobile Repeaters and specs for them are as follows:

Transmitter spurs >70bd below carrier and 5MHz split, duplexed.
Receiver selectivity 70db @ 30 khz
Image Rejection 75db
Spurious Rejection & Harmonic Rejection 80db typical

Now I DO realize that these ARE the Repeater specs, but the Repeater could never attain these specs without a good duplexer! I've used this same Duplexer for almost seven years now in a Repeater on a high profile mountain top here in Los Angeles.

**I've also seen similar duplexers in the LM3 and LM4 series Repeaters, a few UHF Johnson Repeaters and other Mobile Telephones.

$150, including Priority Mail Shipping and Insurance. I have two used

Duplexers of the same type for $125. First come, basis only. USPO Money Order, Money Order or Certified Bank Check only.

Again, please respond by EMAIL rather than via the Newsgroups!

I have for sale a Kenwood TH315at 220mhz HT in MINT condition. It has PL encode, 10 memories, and a real "front end" receiver.NO INTERMOD! I am the original owner, and I've had the radio for about 3 years. It's been a coffee table radio, used to monitor local repeaters.

It comes with THREE 12 volt batteries, Kenwood BC7 rapid charger, soft
case(which it has always been in), boxes, manuals, rubberduck.

I'll sell the whole package for $300.00 shipped to the lower 48 states.
Let me know via email....73s,
Chris - N9PPX

I have a Icom 211 2m allmode in working condition, and a Mirage 215G
allmode amp. 2 in 150 out.
the amp is in very good condition.
The radio has some dings here and there and the "rit" switch. (which i
never use) is broke.
The radio and amp work great though..

$500.00 obo or trade for 6m all mode........
Thanks

I'm looking for a owner's manual (or a good photo-copy), a rebuildable
ni-cad pack (or shell only), and belt belt clip.

If you have any of the above, or know of a source for them please e-mail me
at "goldwing@iquest.net"

Thanks in advance and 73's ..... Roger :-) N9PMC

Mel,

I dont have one, but you might pass a note along to Jim Moore WU3V (jim@usl.edu) and see if he's heard of anything. Jim runs the Packet Cluster down in Abbeville, La. and there's usually messages like that floating along there. Tell him I sent ya, and maybe he'll pass along access to the Net side of his gateway and letcha read the messages on his cluster.

Good luck

Charlie

I'm about to get my technicians license. is the HX-202 (radio shack) a
good handheld to start with? if not what is a good handheld and what can
I expect to pay for that handheld? what features should I look for and
what should I be cautious about? also where is a good place to get a
used handheld?
please e-mail me since I don't check the news groups very much.
thanks

All of the below for $450.00 + shipping, obo. Terms are COD
cash/money order.

The whole setup includes the manuals.

IC-Z1A Dual band handheld w/ 4.8V battery, face detachment kit,
        and fixed length antenna (FA-1443B)
IC-CP12 Cigarette lighter adapter
IC-BP173 9.6V NiCad battery
IC-BC79A Desktop rapid charger w/ AC adapter
IC-AD51 Desktop rapid charge adapter for the IC-BP173 9.6V NiCad
battery
MFJ-1712 dual band extending antenna for the Z1A

Earphone for listening to the Z1A quietly

Books:

ARRL General Class License Manual for the Radio Amateur
Now You're Talking: All You Need To Get Your First Ham Radio License

Everything is in perfect condition and was only used for 3 hours
total.
I'm selling it because I don't have time to study and get my license.
Instead, I'm going to take up photography.

I'll guarantee against DOA for 10 days. Warranty card included.

E-mail if interested.

Thanks,

Curtis

***Please reply by EMail to: doc@dxnet.com ***
I will not reply to messages/replies/questions posted on the

Newsgroups.

I received my second and last shipment of these very fine Duplexers.
I have only four Duplexers left.

These are new, never used "Six-Pack" Duplexers that tune from 440MHz thru 470MHz. Manufactured by Cellwave! This Duplexer is designed for UHF-REPEATER, DUPLEXED UHF BASE or DUPLEXED MOBILE!

The Duplexers have three precision cavities for the receiver and three precision cavities for the transmitter. Some have a Round while label with a red leaf and the word "CANADA" on them, indicating export to Canada is approved.

The Duplexers are rated at 50 watts continuous duty and 65 watts intermittent. The Ports are identified, but no mfg. label on the Duplexer(s) themselves.

Duplexers are basic black. 9" Long, 6" Wide, 1 1/2" Tall. Weight = 2 lbs!

CONNECTORS: TX Port= Type "N", Rx Port = BNC, ANT. Port = SO239
(SO239 is the mate to standard PL259).
(Note: All connectors are the preferred *Teflon type, silver).

These duplexers are "perfect" for repeater use. These are OEM

Duplexers and are used in Telemobile, EF Johnson, Pace and many other Repeaters and UHF duplexed operations.

Telemobile Repeater specs are as follows (sorry, these are the only technical specs. I can offer):

Transmitter spurs >70bd below carrier and 5MHz split, duplexed.
Receiver selectivity 70db @ 30 khz
Image Rejection 75db
Spurious Rejection & Harmonic Rejection 80db typical

Now I DO realize that these ARE the Repeater specs, but the Repeater could never attain these specs without a good duplexer! I've used this same Duplexer for almost seven years now in a Repeater on a high profile mountain top here in Los Angeles.

$150, includes Priority Mail Shipping and Insurance. First come, basis only. USPO Money Order, Money Order or Certified Bank Check only.

Again, please respond by EMAIL rather than via the Newsgroups!

David,
push KNOB & MON then power on then immediately hit your FW key which is
the Function button......

That does a CPU master reset....

Try the rec.radio.amateur.boatanchors newsgroup. (boatanchor is the
affectionate name given to old, heavy tube radios.) There are a lot of
enthusiasts of old radios on that group. Someone there can give you
info on your X-371.

Agreed.....

But runing up with a variac also reduces the fil voltage...so while it
puts less B+ on the caps it also reduces tube life...they dont like
being run at a lower voltage and develop "Cathode Scaling" (junk
deposited on the cathode that requires a period of OVERvoltage to
remove).

I always break the center tap of the B+ transformer and insert a series
of resistors, starting with 1Meg for a day, then 1/2 Meg..and so on thru
a few K until the Caps are fully reformed....

Of course if the poster of the origional int a teccie he could be
(un)pleasently shocked during the process!

I have for sale a Vibroplex chrome DELUXE iambic paddle with custom
chromed four-button memory keyer bar attached to right side. This is a
VERY beautiful paddle, in mint (absolutely like new) condition, with red
fingertips. Memory buttons (also red) are set up for AEA MorseMachine,
but will work with any modern memory keyer (or can be removed if you
wish). Very special... $125.00

Truly as new Kenwood TS-940S/at with IF-10B interface. Radio has been
COMPLETELY reliable, has never needed any work whatsoever. FLAWLESS.
Includes pair of 500hz cw filters and SP-940 speaker. 10-mil serial
number. MARS enabled (I am licensed MARS op). Original box &
manual..... $1450.

This handbook is probably a collectors item. Johnansen is the
original editor of the World Radio and TV Handbook (WRTH) that
we buy every year. This year being the 50th year of the WRTH's
publication, they had a historical article about Johnansen and

his Handbook.

Enjoy!

I've got a limited number of alkaline battery holders to fit Motorola
8000/9000 and equiv. cell phones. This is a great idea if you want to have
a "emergency back-up" battery for your phone. Fill this holder with 6 AA
alkaline batteries and slide it on your phone ..... that's all there is
to it !

Motorola 8000/9000 alkaline "pack" : $5.00 + $3.00 S&H = $8.00 (To your
door in Cont. U.S.)   ONLY HAVE 5 TO SELL !

Motorola 8000/9000 battery eliminator (for auto. cigar lighter outlet) :
$10.00 + $3.00 S&H = $13.00 ONLY HAVE 1 TO SELL !

Nokia 100 alkaline "pack" : $5.00 + $3.00 S&H = $8.00   ONLY HAVE 1 TO SELL

!

E-mail me to reserve yours ..... MONEY ORDERS ONLY, please. (any brand will do)

Thanks & enjoy !   :-)

Older, but perfect, Two meter all mode transceiver (looks new!). If
you can get by without all the bells and whistles, this rig is for
you. Transceiver is about ten years old, made by a Japanese company
named Fukuyama. Was imported into US, and sold by KLM. Later
versions had KLM nameplate on them. It is all solid state, phase
locked synthesized, with and additional four fixed freqs. Built in
12v/110v power supply. RIT, VXO, NB, Hi-Lo power switch, (10w/1w).
Freq. range 144-148Mhz. Dimensions are 4.5"x13"x12" deep. Includes

hand mike and manual. Does NOT have tone control. $269. plus
shipping. Ron, K4LWZ.

>E-Mail Rex@g0mwh.demon.co.uk

Hi Rex,

The effect on the cathode you are speaking of is from long-term variations of nominal operating voltage. As to the life expectancy, it is quite the opposite. The age of a filament varies by the fourth power of the current applied to it. A 5% reduction of current will lead to a 22% increase of life. However, this is not a practical application for us given such life considering measures also have an impact on the cathode's ability to boil electrons off into the plate current. The cathode scaling you speak of is oxidation and a sign of the cathode being cool. I've commonly "descaled" cathodes by applying 1-2 Kv between the cathode and the first grid for 10-20 seconds, and minutes for a tough dog. These measures are of course last resort attempts not ongoing maintenance items.

Another posting alerted our friend to the ground hazard that may exist. This is a very real threat (it is a 70 V problem derived from the early practice of tying both side of AC mains to common through noise capacitors). When I was in the Navy, I was in charge of a TV/Radio repair project the Navy put on for S.F. charities. We took in 300 TVs and 200 Radios and turned out 125 TVs and 180 Radios in two months with a budget of $50. This was, for my students and staff, the University of Hard Knocks advanced studies program. Real electronics, not blackboard electronics.

One student learned about this hazard the hard way. He assumed that because our ground buss was so long, that it would support TV signals by merely attaching the antenna lines to it. I commended my student for his intuition as he plugged in the TV. We watched as the insulation on the wire drooped off like snow from a telephone line; smoke followed, and then a cheery red glow. It was very instructive (and one reason why I taught my men to keep one hand in their pocket, or behind their back; at sea,

everything is at ground potential except you, the load).

I cleaned out some old boxes from a far corner of the basement oday, and I found the following old radio manuals. These are the operating/technical manuals that came with the gear (most of them contain schematics, tuning instructions, etc.). I don't want to make any money from them, but I do want to recover postage costs. I will supply any single manual for 5$.

"RCA MI-17400 Mobile Stations" for type CMCT-30A2T (trunk mount) and type CMCT-30A2F (dash mount)

"Motoroa PT Series Handy-Talkie" for PT200 & PT300 series

"Heathkit Assembly Manual SSB Transceiver SB-101"

"Maintenance of GE Accent 450 2 way radio"

"Technical Training Manual for VHF mobile radio type DT75"

"GE MASTR Progress Line personal series maintenance manual" for ET-90-A and ER-56-A

"Installation, operation & maintenance manual" for GE Progesss line models ET-90-A and ER-56-A

If no one requests them I will be tossing them out.

>dpoynter@avalon.nf.ca

Don - This sounds like an interesting radio. It shouldn't take much of an antenna for you to get European stations. You could get a 20 foot (7 meters) length of any kind of wire and hook it on to the antenna terminal(s) and see what happens. It would be helpful to know what kind of terminals are on the back of the radio. Also, when you start using it for more demanding applications (like SW), you might find that some of the tubes are too deteriorated to perform well. They may need testing and replacement.

What does the "International General Electric Radio Handbook" say about antennas? Is this a manual for this radio, or a general short wave manual?

Cheers

Dave, K9SW

Tony's For Sale/Trade List Ver 1.1 ;)

 Newbie needs to build up a shack.
 Looks like we're running low...lemme throw some more stuff in the mix.

Professor SF2 Super NES Backup Unit $175
 Brand-spanking-new Super Nintendo "Backup Unit." 32 MBIT. Buy at
 asking price, and I'll throw a few games in. Bought it a few weeks
 ago for my kids, now they want a nintendo-64. I told them this has
 to go. Has box,book,perfect like-new condition. I'll even throw in
 the software, and cable to hook it up to the PC, which cost extra!

This thing will even do Donkey Kong Country 1,2,3!

GENUINE IBM 9371-110. MicroChannel/370. $1500/OBO
Yup. You read correctly. This is sort of a "Developers's System" 370.
If you know what I'm talking about, you know it's a steal, If you don't,
then it's a ~250 pound 386/20, w/ 3MB RAM. 370 CPU has 8MB RAM on it.
Also, If
you know what it is, you know UPS won't haul it. Fits in the back of a
Bronco II,
BEHIND the back seat, though! ;) Has 3Com Ethernet card, IBM MCA SCSI
controller
with cache, IBM MultiProtocol Adapter (Sync/Async).

Banyan Vines Version 4.10/4.11 $250+MUCHO shipping
Has AT/MCA versions, plus all docs. Helluva shipping charge, though.
have a few keys, also included.

Box of Color Computer 2/3 stuff $200+shipping
Speech Synth, CC-80 Synth, Blank EPROM cartridges (ROMPaks),Eprom burner,
Video Digitizer, books,docs,ROMpaks, software,magazines,coco2, pupo KB
interface, *ALL* kinds of stuff! Floppy controllers,floppy drives...
Don;t wanna part it out. Wanna sell it out in one lump sum.

Box of MicroChannel cards. $500/OBO
Serious stuff. Digi MultiPort boards, Comtrol MultiPort boards, StarGate
MultiPort boards, 3 IBM ARTIC boards (2-512K, 1-1MB)(those are $250+/ea
USED),
IBM 2M VRAM XGA,Orchid RAM board, IBM RAM board, Future Domain SCSI
controller,
ALL kinds of stuff in that box!!!

DigiChannel/CX EISA system $500/OBO
with at least 32-Ports, possibly 48-ports. Doc's are there. works fine.

(74) 1MB 30Pin SIMMS for Mac (No Parity)- Offers?

Apple Newon MessagePad 110 System $OLD/waiting for $$$

Apple 2GS ROM-03 $300/obo
4MB RAM Card
Apple HS SCSI Card
External 80MB Hard Disk
Keyboard, Mouse, RGB Monitor
(2) 3.5" floppies
(1) 5.25" floppy

Apple 2GS ROM-01 Woz Edition $OLD

Apple MacSE $300/OBO
4MB RAM
80MB HD

 Keyboard, Mouse, Power Cord
 Runs Great, Looks OK.
 Decent Packet Station. Used as one, now I use Unix.

Kantronics KPC-2 $75/OBO
 Version 2.80 ROM (can be upgraded)
 additional ROM: Kantronics G8BPQ Kiss ROM
 Manual, and 2.80 addendum
 HT cable, wired for Icom IC-W2A
 AC Adapter
 Runs good. Used until I got an MFJ 1278

Drake ESR240A Earth Station Receiver $OLD

See anything? no? How about a silver & black 1973 Porsche 914/4? $2500

Things I need/Want to buy/trade for:

 1.Kenwood TSU-7 CTCSS Decoder board for TM-732A 2m/70cm Mobile
 2.Yaesu FT726R/736R, Icom IC-820H/821H, Kenwood TS-790,
      or other Full Duplex Satellite station
 3. Ten-Tec Kits: 1220,1230,1260 (2m/1.25m/6m) (pref unbuilt, but built OK)
 4. "personal" autopatch. one of the $100-200 (new) ones.
 4.Bought and Icom IC-T7A, but will look at Yaesu FT-50R with some acc.

Older, but perfect, Two meter all mode transceiver (looks new!). If
you can get by without all the bells and whistles, this rig is for
you. Transceiver is about ten years old, made by a Japanese company
named Fukuyama. Was imported into US, and sold by KLM. Later
versions had KLM nameplate on them. It is all solid state, phase
locked synthesized, with and additional four fixed freqs. Built in
12v/110v power supply. RIT, VXO, NB, Hi-Lo power switch, (10w/1w).
Freq. range 144-148Mhz. Dimensions are 4.5"x13"x12" deep. Includes
hand mike and manual. Does NOT have tone control. $269. plus
shipping. Ron, K4LWZ.

TWO (2) 2-METER 10-MEMORY SYNTHESIZED HANDHELDS FOR SALE

KENWOOD TR-2600 w/lots of accessories for *Very* extended handheld use.

Package includes the following:

2   Kenwood TR-2600 2-m Handhelds
    10 memories, scan, odd splits

    Touch-tone keypad, direct frequency entry

2   Custom deluxe leather carrying cases w/metal belt clips

6   PB-26 nicad battery packs, varying ages

2   EB-3 6-C cell alkaline battery packs (equivalent to 5000 MAh each)

1   6-AA cell alkaline battery pack (looks like PB-26)

1   SMC-30 Speaker Mike

1   Quick-Charge Base Stand ST-2

2   Standard Kenwood wall chargers for PB-26

2   Rubber duck antennas

1   Original factory manual

The first $325 will take the entire package, and I'll pay for shipping.

Please note that the two handhelds are in perfect operating condition
except that one handheld transmits in simplex only.

In addition, the matching Kenwood Vox Headset HMC-1 is also available.

Feel free to contact me at bashin@calweb.com, or telephone at
916-441-4096.

Thanks,

Bryan Bashin

Home Scanner - Pro2035 with installed Optoscan535 computer interface. 1000 channels, tripple conversion, auto-store while preventing storing duplicate channels, rotary dial or direct tuning, scan and search, "sound squelch" prevents lockup on undesired signals, hyperscan, detachable indoor antenna. connectors include BNC, external speaker, tape out, headphone. 25MHz to 12140 MHz at 80 channels per second. OptoScan535 (internal installed card) allows complete computer control, CTCSS, DCS, and DTMF (touch tone) decoding. Built in CI-V to RS232 serial interface. Allows Spectrum FCC database CD (included) download. Can also later add the Optoelectronics Scout (not in cluded - it will automatically tune the radio to the channel it picks up - called "reaction tuning.") Comes with four software programs. Software allows spectrum analyzing, graphs indicating "hits" to search for frequently used channels. Also includes audio tape pause interface and control. Scanner functions completely without computer too. All ready, just install software, plug it in to a comm port and turn it on. Pro-2035 catalog price $449.00, OptoScan535 price $219.60, OptoScan535 installation $50, Spectrum CD database $39 = $757.60. Asking $500 for bundle.

Baton Rouge, La.

Three years after setting up this station here in Baton Rouge, I've been transferred to FLa. I really would like to leave the antenna system intact when the house is sold, but if I have to, I'll sell it seperately or take it with me.

This is a charming 3Br/2Ba 1670 sq. ft. brick home on a 110' X 150' lot in an established subdivision which has NO ANTENNA RESTRICTIONS. The house was built in 1960, was completely remodeled three years ago, has a chain linked fenced back yard, 4 huge and beautiful "Live Oak" trees (2 in the front and 2 in the back), and is 2 blocks from the elementary school. With the property valued at $85,000, the taxes last year were $61.00.

The Antenna System consists of: Commercial grade extreme duty aluminum 80' self supporting motorized crank up tower which I had custom built. This is a triangular tower measuring 36" per side at the base. Rotor is a Yaesu variable speed G1000SDX. 15' of $10/ft. extreme heavy wall mast puts the KT34XA KLM beam (2 years old, had a mosely PRO67B up for first year) at about 92'. 10' below that is the Cushcraft "Skywalker" 2 element 40 meter beam (also 2 years old). An Ameritron five position switch box at the 40' level directs the 5 element 80 meter half wave sloper array (f to b ratio confirmed many times by DX stations to be at least 20db.) At the 80' level is a 13 element Cushcraft 2 meter beam on a seperate side mounted rotor. All coax (mil spec RG213) and other cabling is neatly bundled and enters the shack via the attic and internally through the inside of the walls. The ground system consists of 2,800 feet of #4 bare copper wire buried 6" deep in a grid with 10' centers throughout the entire yard. (the neighbors REALLY knew I was a lunitic when they saw me putting it in) All junctions are soldered...and the whole thing is tied to four 8' ground rods under the 6' deep tower foundation(6' X 6' X 6' of 4000lb psi peagravel concrete with 180 lbs of tied rebar), four ground rods at the far corners, and 2 rods on the sides of the house. I put this station on the air in Jan '93, and since that time I have compiled in leisure time 302 countries confirmed (all bands), 5 Band DXCC (plaque dated March 27, 1995), 216 confirmed on 40

meters, and 186 on 80 meters. Last year I strung up a 160 meter inverted vee for 2 week ends and won CQ 160 meter phone contest for the state of Louisiana.

The rest of the station which I'm taking with me regardless, is a Kenwood TS950SDX, Ameritron AL-1500, and several hundred pounds of various other junk.

The price for this very nice home with all antenna equipment mentioned above is $84,900.00. I might point out that property values in this part of the country are quite low compared to most of the rest of the country....as are the taxes. La. has a $75,000 "Homestead" Exemption, which means that the first $75,000 of a home's value is tax free.

The antenna System alone is $5,000.00 (I've got almost $9,000 in it) I'll take it down, you ship or haul it off.

I have for sale my Kenwood TS-940S w/built-in antenna tuner. This radio
is in absolutely flawless condition, as it came out of the carton when
new! Probably the finest example of pre-owned '940 available anywhere.
Includes:

IF-10B interface
Pair of 500hz cw filters
J-Com level interface (needed to connect directly to computer)
Microphone
Original cartons
Original manual

PRICE: $1350

Thanks for reading this. You may contact me either by phone at
516-754-6808, or email k2kv@netusa.net

Tony's For Sale/Trade List Ver 1.3 (2/22/97)

Hmmm.....Tough Crowd, Huh? OK...Let's do sum Mo'
I *STILL* need to build up a Ham Shack, though!

BellSouth/IBM Simon Cellular Phone/Organizer $300/OBO
Simon, leather case,stylus, 1MB PCMCIA card,
(2) reg. batteries, (2) high capacity batteries, Quick
Charger, Simon-to-PC connectivity kit. Works great!
E-mail,Appointment book,address book, sends *AND* receives faxes!
touchscreen! And it's a cellular phone, to boot! it's awesome!

RS HTX-404 440mHz Handheld. $125/OBO
Radio, ducky,strap, charger,NiCd Pack, AA-cell pack.

IPS PowerCard - $125/obo
now *THIS* is cool. It's a UPS on an ISA card.
Totally complete, with battery,card, PS cables,
software,etc. tested...works fine!

Mac IIci - $800/obo complete
68040/33mHz Accel Card
16MB RAM
420MB Hard Disk
MacOS 7.5.3 Update 2.0
3Com Ethernet Card (NuBus)
Aple 8/24-Bit Display Adapter
Apple Extended Keyboard
Apple Mouse
Apple 14" Monitor

Professor SF2 Super NES Backup Unit $150
Brand-spanking-new Super Nintendo "Backup Unit." 32 MBIT. Buy at
asking price, and I'll throw a few games in. Bought it a few weeks
ago for my kids, now they want a nintendo-64. I told them this has
to go. Has box,book,perfect like-new condition. I'll even throw in
the software, and cable to hook it up to the PC, which cost extra!
This thing will even do Donkey Kong Country 1,2,3!

GENUINE IBM 9371-110. MicroChannel/370. $1000/OBO
Yup. You read correctly. This is sort of a "Developers's System" 370.
If you know what I'm talking about, you know it's a steal, If you don't,
then it's a ~250 pound 386/20, w/ 3MB RAM. 370 CPU has 8MB RAM on it.
Also, If
you know what it is, you know UPS won't haul it. Fits in the back of a
Bronco II,
BEHIND the back seat, though! ;) Has 3Com Ethernet card, IBM MCA SCSI
controller

with cache, IBM MultiProtocol Adapter (Sync/Async).

Banyan Vines Version 4.10/4.11 $200+MUCHO shipping
Has AT/MCA versions, plus all docs. Helluva shipping charge, though.
have a few keys, also included.

Box of Color Computer 2/3 stuff $150+shipping
Speech Synth, CC-80 Synth, Blank EPROM cartridges (ROMPaks),Eprom burner,
Video Digitizer, books,docs,ROMpaks, software,magazines,coco2, pupo KB
interface, *ALL* kinds of stuff! Floppy controllers,floppy drives...
Don;t wanna part it out. Wanna sell it out in one lump sum.

Box of MicroChannel cards. $300/OBO
Serious stuff. Digi MultiPort boards, Comtrol MultiPort boards, StarGate
MultiPort boards, 3 IBM ARTIC boards (2-512K, 1-1MB)(those are $250+/ea
USED),
IBM 2M VRAM XGA,Orchid RAM board, IBM RAM board, Future Domain SCSI
controller,
ALL kinds of stuff in that box!!!

DigiChannel/CX EISA system $400/OBO
with at least 32-Ports, possibly 48-ports. Doc's are there. works fine.

(74) 1MB 30Pin SIMMS for Mac (No Parity)- Offers?

Apple 2GS ROM-03 $300/obo
4MB RAM Card
Apple HS SCSI Card
External 80MB Hard Disk
Keyboard, Mouse, RGB Monitor
(2) 3.5" floppies
(1) 5.25" floppy

Apple MacSE $300/OBO
4MB RAM
80MB HD
Keyboard, Mouse, Power Cord
Runs Great, Looks OK.
Decent Packet Station. Used as one, now I use Unix.

Kantronics KPC-2 $75/OBO ***Local Deal Pending
Version 2.80 ROM (can be upgraded)
additional ROM: Kantronics G8BPQ Kiss ROM
Manual, and 2.80 addendum
HT cable, wired for Icom IC-W2A
AC Adapter
Runs good. Used until I got an MFJ 1278

Things I need/Want to buy/trade for:

 1.Kenwood TSU-7 CTCSS Decoder board for TM-732A 2m/70cm Mobile
 2. access. for Yaesu FT-50R (FTT-12 Keypad, batteries, quickcharger,etc.)
 3.Yaesu FT726R/736R, Icom IC-820H/821H, Kenwood TS-790,
      or other Full Duplex Satellite station
 4. Ten-Tec TKits: 1220,1230,1260 (2m/1.25m/6m) (pref unbuilt, but built
OK)
 5. "personal" (non-repeater) phone patch/autopatch.

 All items guaranteed against DOA
 All items DO NOT include shipping

I am in need of a IC for a Motorola Moxy 150 Mhz radio. I have contacted
the Motorola service rep. in my area and I keep getting the runaround each

time I speak to them. I have been trying since May of last year to get this IC and usually I hear that "I'm sorry we forgot to order it for you" or "I lost the numbers you gave me". If someone has the ability to order this for me please let me know.

It is the desc. IC with the following numbers on it "M2078" and "274 H 8436". I have tried to cross this to another number but have had no sucess.

Please do not take me wrong I am not bashing Motorola, just tried of not geting the part that I needed.

Here is a list of the stuff that I will have for sale at the Charlotte Hamfest. If you want to get an advance
look at it or buy it before the hamfest give me a call. Better yet send your phone number over E Mail and I
will give you a call.

1. Collins Thirty S-One amplifier. 100 watts in produces 1300 watts out. Uses 4CX-1000 tube. In like new
condition with manual. $975 - very firm

2. Complete B&W slow scan setup. Robot 400 slow scan, Sanyo monitor and RCA camera. All of it like new with

manual. $275

3. Kenwood TS711-A all mode 2 meter transciever. Memories, SSB, funky offsets, this unit has it all. Just
like new with manual. $525 - don't even ask

4. Go into business with your own computer to program cellular phones. Loader phone, computer with software
installed and operating, cables for motorola bagphones and installed phones, diagrams to make cables for all
other motorola phones up to software version 95xx. This setup really does work, and I will give instruction in
how to use it. You can get your money back in one saturday at the flea market.
$850

5. CD ROM drive with interface card and sorftware. Works perfectly
$25

6. Star printer. Works perfectly, missing one piece of plastic.
$25

7. Okidata microline printer. Works great.
$10

8. Calcomp plotter, "E" size. Hangs on serial port, works perfectly. With manual (which cost me $130) and
serial connection. Emulates HP plotter. $200

9. IBM Selectric typewriter. Works fine, great for filling in forms.
$25

10. Modems - 1200 baud and 2400 baud. One US Robotics and One Hayes internal.
$10 each

11. Orchid Videola Premium Plus. Complete and working fine. Video capture and playback on you PC.
$175

12. PK-323 MBX. Just like new.
$175

Older, but perfect, Two meter all mode transceiver (looks new!). If you can get by without all the bells and whistles, this rig is for you. Transceiver is about ten years old, made by a Japanese company named Fukuyama. Was imported into US, and sold by KLM. Later versions had KLM nameplate on them. It is all solid state, phase locked synthesized, with and additional four fixed freqs. Built in 12v/110v power supply. RIT, VXO, NB, Hi-Lo power switch, (10w/1w). Freq. range 144-148Mhz. Dimensions are 4.5"x13"x12" deep. Includes hand mike and manual. Does NOT have tone control. $275. plus shipping. Ron, K4LWZ.

Actually, the KLM Multi2000 was imported and sold during the era of
1977- 1778 ... the importation of the "Multi"-labelled unit (as
opposed to the "KLM"-labelled unit) predates that.

Hello everyone,
I need instruction manuals for the following:
1) Heathkit SB-200 HF amp
2) Yaesu FT-101

A photocopy would be fine as long as it's a good copy.

I would pay for the orignal or the copy charge plus shipping.
Please e-mail me direct at: mrusso@hoflink.com

Thanks, Mark N2FLF

Looking for something cheap. Dual-band would be nice. Must support CTCSS and PL tones.

Remember, I'm a college student.... I can't afford much

thanks,
Dan

WELL HERE GOES!!! I'm sure I'll get harassed like crazy for this...
Well, I got the mod to work.... FROM 50-999mhz.... NOW heres the problem.... I CANT TRASMIT anywhere.....The ptt light doesnt even light up... When I hit my 'knob' button to make settings and you're supposed to hit PTT to confirm & save it... I have to hold the KNOB down to save it.... I'm sick.....I should've left well enough alone!
CAN ANYONE HELP ME?????? PLEASE??????? I've learned my lesson!!!

If I can just get it to transmit where its supposed to I'll he a happy ham!!

THANK YOU!!

MARK WATSON

NOPE....not locked......I was on the phone with yaesu for about 30mins
today trying to figure it out......I mailed it in to them to repair..
Didnt tell them the cell mod was done, just that I got it for a christ-
mas present and it suddenly stopped transmitting........If they can
get it back to normal I'll leave well enough alone!! :) Like I said
the mod worked perfectly but I must have either accidently powered it
on the incorrect way or something..... normally when you change settings
via the knob and go to the menu.. you normally would push the ptt to
save & confirm the setting, well it wouldnt even do that.. The ptt
didnt work at all........We'll see....Like I said I fedexed it today..
hopefully I'll have it back in a few weeks in working order!!!

Thanks for the post..

MARK

Unfortunately you will most likely get a nice note telling you that you
have voided your warranty. The mod is probably the first thing they will
look for and in the unlikely event they do just fix it, they will be
required to undo the mod when they send it back to you.

Joe

I would like to purchase one Hammarlund HQ180A/C in nice original
unmodified condition with manual. Need not be working. Please let me
know what you have and the price.

thanks,

Barney

The IF-10B is very difficult to find and worth quite a bit when you do.
The two CW filters will cost your around $140 used and the SP-940 speaker
comes with switchable audio filters and goes for around $150 when you can
find them used.

So while a really clean 940SAT usually goes for about $1100, those extras
can reasonably take the price up into the $1450 range. If the rig has a
high serial number, the seller might be able to get his asking price. More
than likely, though, he may find he has to come down closer to $1250-1300
for a quick sale.

I would take a guess and say that the problem is probably the actual switch
inside the radio, since the three button switches on the FT-50R (10R etc)

have a tendancy to go bad and require replacing.
I've done the cel mod to my radio and have had no problems, however over time I have had my LAMP button and my PTT button go bad, thus need replacing the switch inside.

Have fun.

Can't help you. I'd like to buy a FT50 if I could get it to go down to 70mhz. I fly R/C on 72 and it would be handy to listen to signals down there...

Check PTT Lock function. Also, try CPU reset, and remember, a LOW
battery may make rig receive normally, but not transmit.

Good Luck!

This is my first time posting to a NewsGroup, so I hope I get it right! I have an old radio that belonged to my father and I would like to know more about it (when made, amount produced, value etc.) Can anyone out there help? Its a General Electric X-371 Receiver. It is a large table top radio 24inches wide, 15inches high, 15inches deep and weighs about 50lbs. It has a magahony cabinet with front speaker and shows 12 bands in a semi-circle in a front window. With it I have a booklet called "International General Electric Radio Handbook" produced by World Radio Handbook, this was prepared by O.Lund.Johnansen of Hellerup, Denmark. This radio would have arrived in our house about 1957-58. I live in Newfoundland in Canada and am interested in setting up the radio to listen to shortwave, and I would like help on type of antenna which would be best, cheapest, easiest to set up? Any help would be appreciated, thanks

That's sounds like a great radio. It was probably built before WWII,
in the 1930's. If the tubes are still good (and they *should* be), it
will give you many hours of pleasure. I would use a long wire antenna,
and be sure to ground the chassis IF there is a connection on the back
of the chassis. Be careful, though, some of these radios had a *HOT*
chassis (one side of the 115 v line is on the chassis)

>Don Poynter
>dpoynter@avalon.nf.ca

Hi Don,

The simple antenna solution is to hang as much wire in the sky as possible.
Make it easy on yourself at first, and do it in stages until you see no
further improvment at the lowest frequency you are interested in.

There is a more serious issue to be taken care of before the antenna. If
this rig has not been turned on in a number of years, there may be a fire
hazard. The filter caps in the power supply are undoubtedly getting on,
and these items do not last forever. Flipping on the radio may give you a
hiss and several stations, and give the impression of being in a working
state. This may be a false security. There may also be no problem. The
compelling evidence will be a small explosion (fully contained within the
radio) and smoke and/or flames afterward if not unplugged.

The technical solution is to plug the radio into a variac and sloooowly
raise the variac output over a period of hours (or days) from 0 to 115VAC.
This will allow the old electrolytics to re-form their chemistry (if you
are lucky) and let life continue as though no years have passed. Many of
these radios work quite well after this slow wakeup call. Simple evidence

of how robust they are is in the amount of 60/120 Hz hum you hear with
everything turned all the way down. This can vary from zilch to Mt. Saint
Helens rumble. Anything above 3 on the richter scale suggests replacement
of these power components ($20 for parts (before markup) and $100 labor).

73's and happy DX'ing

ec.radio.amateur.homebrew,rec.radio.swap

(G4BXD,106312,1035@compuserv.com) posted a message to
rec.radio.swap (8 dec 1996 16:57:51 GMT) looking for Command set bits
and
pieces. I tried to respond but cannot reach your email.
I tried using the Ham Callsign search servers but couldn't find
you listed there either..

This is what I have. All responses welcome.
I have a command set - R-27/ARC-5. It's got the following six tubes:

Tube Nr.	Condition
12SK7	- good
12SF7	- good
12V6	- good
12SQ7	- good
12SK8	- Unknown*
12SK7	- Bad**

*TV-7D/U nor the Simpson Model 1000 tube tester has setting to test the
12SK8.
** One of the 12SK7 Tubes is bad.

The cabinet is still intact, but it's missing the lid(?) that goes on
top over the tube compartment, and there is no dynamotor. The inside is
clean - no burned parts, etc. Don't know if it works or not.

The whole thing weighs 7 pounds.I'm asking $45.00 plus shipping and
handling.

I also have two of the large three-ganged variables from a couple
of Command sets that were parted out. I am asking
$5.00 ea + shipping and handling.

I've another R-27 chassis with caps, a few Coils,
and the varible condenser tuning unit and dial.
$8.00 + Shipping and handling.

Greg

Greg,
You would have better luck if you looked at the tube tester's entry for a 12K8 (the 12 volt equivalent of the 6K8 converter/oscillator tube). That's probably why you didn't find it in the list. The tube has a grid cap on top; ergo, no 'S' in the name. The 'S' denoted 'single-ended' tubes that had no grid or plate caps.

Hope this helps.

TWO (2) 2-METER 10-MEMORY SYNTHESIZED HANDHELDS FOR SALE

KENWOOD TR-2600 w/lots of accessories for *Very* extended handheld use.

Package includes the following:

2 Kenwood TR-2600 2-m Handhelds
10 memories, scan, odd splits
Touch-tone keypad, direct frequency entry

2 Custom deluxe leather carrying cases w/metal belt clips

6 PB-26 nicad battery packs, varying ages

2 EB-3 6-C cell alkaline battery packs (equivalent to 5000 MAh each)

1 6-AA cell alkaline battery pack (looks like PB-26)

1 SMC-30 Speaker Mike

1 Quick-Charge Base Stand ST-2

2 Standard Kenwood wall chargers for PB-26

2 Rubber duck antennas

1 Original factory manual

The first $325 will take the entire package, and I'll pay for shipping.

Please note that the two handhelds are in perfect operating condition
except that one handheld transmits in simplex only.

In addition, the matching Kenwood Vox Headset HMC-1 is also available.

Feel free to contact me at bashin@calweb..com, or telephone at
916-441-4096.

Thanks,

Bryan Bashin

FOR SALE:

Double-Pole - Double-Throw Knife Switches
these are great for use in 450 or 300 ohm
ladder line antenna systems, to switch
between two antennas or from one antenna to
two different tuners, etc... they are made
in USA by Leviton, plastic base, all brass
metal parts, 1.25" x 2.25" in size, 6/32 brass
screws for connections. I have seen similar
ones at radio shack (for switching tv lead-in),
but these Levitons are a LOT more heavy duty.
I have used them at KW levels with no problems.
I have about 50 of them left...
I'll mail you 3 switchs for $10. postpaid (USA).

I have for sale a standard C168A 2 meter HT. It has extended receive and AM
Aircraft also. It has a brand new 1000 mAh long life battery. I also have
the battery tray that holds alkalines or nicads, the recharge adapter and
the wall cube for it. I also have the drop in quick charger and all the
boxes and manuals all in fine working order.

The only flaw is the "F" or function button opposite the PTT button popped
off, however the button underneath is very accessabile and usable and
protected and works...more of a cosmetic thing really..

Selling it because as of January 1 our fire department is going 800 mhz so
I need that capability or I would keep it as it has the best sensativity
and selectivity of the past 10 others that I have had..

:This is what I have. All responses welcome.
:I have a command set - R-27/ARC-5. It's got the following six tubes:
:Tube Nr. Condition
:12SK7 - good
:12SF7 - good
:12V6 - good
:12SQ7 - good
:12SK8 - Unknown*
:12SK7 - Bad**
:
:The cabinet is still intact, but it's missing the lid(?) that goes on
:top over the tube compartment, and there is no dynamotor. The inside is
:clean - no burned parts, etc. Don't know if it works or not.
:
:The whole thing weighs 7 pounds.I'm asking $45.00 plus shipping and
:handling.

I have two command receivers that are complete except for dynamotor
and are in good working order. If one in unknown condition with a known
faulty tube is worth $45 does that make mine worth $60 each?

One covers 190 to 550 Khz and the other covers 3 to 6 Mhz.

Barry

I have a matched pair of new Motorola
MRF-247 transistors, I bought these
from RF Parts a few years ago to repair
a 160 watt 2m amp....never got around to
doing the job. I want $40.00 for the
pair... i'll pay the postage.

newsgroups: alt.radio.scanner,rec.radio.scanner,rec.ham-radio.swap,rec.radio.amateur.swap

OK, here's the deal. I have an IBM ThinkPad 720 mono that is collecting dust.

The package I have includes: laptop (486/50, 12/240, all ext. ports, 1.44 floppy, 2 PCMCIA slots), AC adaptor/charger, 3 extra batteries, 2 extra 160mb hard drives, 2 docking stations (both with full set of ports, SCSI-2, 2 expansion slots, 5 1/4" drive bay. One has 2x IBM SCSI CD-ROM.), external battery charger, and hardshell carry case with handles and wheels. Everything

is in excellent condition. Current value on today's used market is about $1200 for everything. Would prefer to keep package together, buyer pays shipping.

What I would be willing to trade for: cash, BC 9000xlt, 2m/70cm handheld, AOR

AR8000, PRO26, PRO2006, BC 3000XLT, digital general coverage receiver, and possibly other items. Will accept combination of above or other arrangement to equal value of laptop and accessories.

Please email offers and questions. Thanks.

The whole setup includes the manuals.

IC-Z1A Dual band handheld w/ 4.8V battery, face detachment kit,
        and fixed length antenna (FA-1443B)
IC-CP12 Cigarette lighter adapter
IC-BP173 9.6V NiCad battery
IC-BC79A Desktop rapid charger w/ AC adapter
IC-AD51 Desktop rapid charge adapter for the IC-BP173 9.6V NiCad
battery
MFJ-1712 dual band extending antenna for the Z1A
Earphone for listening to the Z1A quietly

Books:

ARRL General Class License Manual for the Radio Amateur
Now You're Talking: All You Need To Get Your First Ham Radio License

Everything is in perfect condition and was only used for 3 hours
total.
I'm selling it because I don't have time to study and get my license.
Instead, I'm going to take up photography.

I'll guarantee against DOA for 10 days. Warranty card included.

All of the above for $500.00 + shipping, obo. Terms are COD
cash/money order.

Thanks,

Curtis

OK, here's the deal. I have an IBM ThinkPad 720 mono that is collecting dust.

The package I have includes: laptop (486/50, 12/240, all ext. ports, 1.44 floppy, 2 PCMCIA slots), AC adaptor/charger, 3 extra batteries, 2 extra 160mb hard drives, 2 docking stations (both with full set of ports, SCSI-2, 2 expansion slots, 5 1/4" drive bay. One has 2x IBM SCSI CD-ROM.), external battery charger, and hardshell carry case with handles and wheels. Everything

is in excellent condition. Current value on today's used market is about $1200 for everything. Would prefer to keep package together, buyer pays

shipping.

What I would be willing to trade for: cash, BC 9000xlt, 2m/70cm handheld, AOR

AR8000, PRO26, PRO2006, BC 3000XLT, Icom R7000, digital general coverage receiver, and
possibly other items. Will accept combination of above or other arrangement to equal value of laptop and accessories.

Please email offers and questions. Thanks.

HELP!! I need to sell ALL my HF equipment. Here's a list;
Kenwood TS-690 w/internal tuner (tuner inop) $1000
Kenwood IF232 Computer interface $75
Kenwood SP-23 Speaker $50
JPS NRF-7 $150

Kenwood MC-60 Desk Mic $75
MFJ 962 Versa Tuner III 1.5KW $100
Astron VS-35M Power Supply $150

MFJ 1270C TNC $75

Motorola Mocom 30 VHF (for packet) $25
Motorola Micor 70cm (needs converting) $25
GE Master II (?) 6m (commercial, needs conv)$40

I need to sell ALL of this equipment... I don't really want to but i have legal fees to take care of....

My e-mail address is;

jaykq4ms@ipass.net
or
kq4ms@juno.com

Might be some other things that I've forgotten.

Also, I can be reached at (919) 664-9384. Thats a digital pager. Page me and I'll get back to you ASAP.

Thanks
Jay

For Sale:

Sunair GSL-1900A Kilowatt Linear Power Amplifier. Consists of the LPA-1900A RF
PA and the PS-1900A power supply unit. This set easlily delivers full rated
power on all bands. Asking price: $2000.00. I prefer pickup from my QTH in
Sacramento, CA. If I have to ship it, you pay shipping from zip 95826. The rf
deck will be about 90 lbs packed for shipping and the power supply will be
about 150 lbs packed for shipping. (since UPS has a max weight of 150 lbs,
I may have to remove the choke from the power supply and ship separately)

For those not already familiar with this unit, some specs from the manual are
listed below.

    Covers 1.6 to 30Mhz (continuous) in 8 bands.
    Conservatively rated at 1Kw PEP for SSB,
        1 Kw for CW, and 1Kw average for AM.

(the book says 300 to 400 for AM carrier only, then
limit the total power with modulation to 1Kw).
Requires 40 watts PEP input to drive to full output.
Automatic tuning (plate and load). Tuning time 3 seconds, nominal.
Uses 4CX1500B, Pi-L output network, and 50 ohm passive input
(no tuning needed for input).
Very low distortion.
Intermodulation distortion: better than -30 db
Harmonic distortion: better than -55db
Power supply strappable for 120 or 240v operation 50-60 hz.
and power consumption is approx 3Kw. (240v operation is
highly recommended and is current strapped for it).

A copy of the Operation and Maintenance Manual will be included. The interconnect cables between the rf deck and power supply were not available at a reasonable cost (Sunair wanted $1200 for just the cable with connectors) so I made an easily restorable modification. The units are in good condition cosmetically and fully operational.
Also, I have contructed an interface unit that works with my Yaesu FT-747 for
operating the amplifier. It provides the remote power control, band selection,
and tune functions that would normally be provided a Sunair exciter. This is
included with the purchase of the amplifier. The interface unit can be easily
adapted to work with almost any tranceiver.

Please respond via E-mail to the below address.

For Sale:

4CX1500B/8660 and air system socket, $300 plus shipping
from zip 95826.

I have three of these sets.

They are pulls and have been tested in an operational
Sunair 1 Kw amplifier. Full power out, 160m thru 10m
into dummy load.

The sockets do not have any markings on them, but
after comparing them to the Eimac catalog, they appear
to be SK-800B sockets with 1500pf screen bypass capacitor.

Please respond via E-mail at the below address.

Thanks.

For Sale:

Sunair GSL-1900A Kilowatt Linear Power Amplifier Consists
of the LPA-1900A RF PA and the PS-1900A power supply unit.
This set easlily delivers full rated power on all bands.
Asking price: $2000.00. I prefer pickup from my QTH in
Sacramento, CA. If I have to ship it, you pay shipping
from zip 95826. The rf deck will be about 90 lbs packed
for shipping and the power supply will be about 150 lbs
packed for shipping. (since UPS has a max weight of 150 lbs,
I may have to remove the choke from the power supply and ship
separately)

For those not already familiar with this unit, some specs from
the manual are listed below.

    Covers 1.6 to 30Mhz (continuous) in 8 bands.
    Conservatively rated at 1Kw PEP for SSB,
        1 Kw for CW, and 1Kw average for AM.
        (the book says 300 to 400 for AM carrier only, then
        limit the total power with modulation to 1Kw).
    Requires 40 watts PEP input to drive to full output.
    Automatic tuning (plate and load). Tuning time 3 seconds, nominal.
    Uses 4CX1500B, Pi-L output network, and 50 ohm passive input
        (no tuning needed for input).
    Very low distortion.
        Intermodulation distortion: better than -30 db
        Harmonic distortion: better than -55db
    Power supply strappable for 120 or 240v operation 50-60 hz.
        and power consumption is approx 3Kw. (240v operation is
        highly recommended and is current strapped for it).

A copy of the Operation and Maintenance Manual will be included.
The interconnect cables between the rf deck and power supply were
not available at a reasonable cost (Sunair wanted $1200 for just
the cable with connectors) so I made an easily restorable modification.
The units are in good condition cosmetically and fully operational.
Also, I have contructed an interface unit that works with my Yaesu
FT-747 for operating the amplifier. It provides the remote power
control, band selection, and tune functions that would normally be
provided a Sunair exciter. This is included with the purchase of
the amplifier.

Please respond via E-mail to the below address.

I posted this before but here it goes again.

I added a 'forsale' and 'wanted' section to my web page. Any person can
read all the forsale or wanted listings. One can also add there own
listings. It's free and works. It's not as fast moving as the news
groups but it might be someday.

www.mich.com/~darrell

check it out......

Curiosity question....
How are computers and scanners realted,
via the above softwares?
Thanks

Hi,
My 20 watt transceiver has a burned out transformer . To purchase one new
it will cost me quite a few dollars.
Is there anyone in the Sydney area that could fix it for me......or is
willing to sell me a second hand cheap unit (as spares).

Please mail me at

conn@magna.com.au

Thanks in advance

Now THIS is a good one!!!!! nyuk,nyuk,nyuk
He means HAM RADIO, not the kind you eat on Easter.
Good try Ken, but this just ain't the right NG for you,
but if you like good food, stick around :-}
Try rec.radio.scanner.

Might want to try radio shack... the last sales paper I received had the
HTX-202 and 404 at $189.00 each... I haven't seen but 1 used one cheaper
than that.

Later,
Dave

Price it out yourself!!!
This is a Christmas giveaway. The Icom ICR71A is in immaculate condition.

The matching speaker ICSP3 is also.

The Datong FL3 is a $200.00 {Check prices at International Radio, Grove, or Gilfer} filter just by itself, it includes the power cube ac supply. In addition I have a Autek Research QF1A filter.

Selling it as a package and throwing in the Icom Remote control which I never used.

Package is $800.00. Serious offers only. All transactions will be by UPS COD.

TWO (2) 2-METER 10-MEMORY SYNTHESIZED HANDHELDS FOR SALE

KENWOOD TR-2600 w/lots of accessories for *Very* extended handheld use.

Package includes the following:

2 Kenwood TR-2600 2-m Handhelds
10 memories, scan, odd splits
Touch-tone keypad, direct frequency entry

2 Custom deluxe leather carrying cases w/metal belt clips

6 PB-26 nicad battery packs, varying ages

2 EB-3 6-C cell alkaline battery packs (equivalent to 5000 MAh each)

1 6-AA cell alkaline battery pack (looks like PB-26)

1 SMC-30 Speaker Mike

1 Quick-Charge Base Stand ST-2

2 Standard Kenwood wall chargers for PB-26

2 Rubber duck antennas

1 Original factory manual

The first $350 will take the entire package, and I'll pay for shipping.

Please note that the two handhelds are in perfect operating condition
except that one handheld transmits in simplex only.

In addition, the matching Kenwood Vox Headset HMC-1 is also available for
an additional $30.

Feel free to contact me at bashin@calweb.com, or telephone at
916-441-4096.

Thanks,

Bryan Bashin

Hello,
     I have a Yaesu FT 77 and a Kenwood PS 30 power supply for
sale.
     FT 77 is a fully solid state rig
     100 watts on CW, USB, LSB
     Has a narrow band CW filter
     Has all amateur bands including the WARC bands
     Comes with the original manual
     Hand mic, mobile bracket
     Power supply cable (banana plug)
     Mint condition, no scratches or dinks

The knwd PS 30 power supply that I use supplies 13.8vdc, 20 amps. The pwr
supply in also in mint condition, still in original package. Asking $475

plus shipping, for both.
I will pitch in the following free: 20m and 40m dipole precut wires (avg 12), connectors, RG 58 coaxial cable, dog bone insulators. Reply to sjayasha@nmsu.edu. Tnx.

But I already have Netel at 9.9 cents per minute, no minimum usage, free calling card with no access fee (higher rate), free 800 or 888 number, $100 cash paid upon signing up (toward the multilevel commissions). I get a paltry few dollars of payback, because I don't market the program. Station calls to Great Brittain are 35 cents per minute.

I would like to buy any of the Icom bookshelf portables. Must be clean,
unmodified, working, and have manuals. Rigs include:

IC-502A
IC-502
IC-202S
IC-202
IC-215
IC-402

I would also buy any accessories, either with the rigs, or separately,
including:

Amplifiers: IC-20L, IC-30L, IC-50L
Power Supplies: IC-3PA, IC-3PS
Mounting brackets

I know nothing of this particular long distance carrier, but I can say that anyone who does not investigate alternatives to MCI, AT&T and Sprint are paying too much, particularly if you make any great number of calls during the day rate period. Flat rate pricing of 9.9 Cents to 10.9 cents per minute, coupled with 6 second billing increments, have saved me a small bundle. Most of these companies are resellers, and their traffic often goes over one of the big three, or the almost as big fourth major network, WorldCom

Hello,

You may remember reading my original post about stolen
radio equipment.

I have located the serial number for the equipment:

Yaesu FT11R   S/N 3N050963
ICOM 901 CONTROL HEAD   S/N 002424
Bel 620i Radar Detector   S/N J126030

These items were stolen from my Automobile in late
December 1996, in Richardson Texas.
Lute Rileys Honda

This is pretty much a waste of time.... however,
there's always a chance...

Thanks,

Douglas Ring

For Sale:

Kenwood AT-180 Tuner, this tuner matchs the TS-180,
(it is indentical to the AT-230 except for color and
nameplate). Tunes 160-10 meters, has SWR-Power-output
metering, antenna switch controls two coax fed antennas
and an end-fed wire. it has few scratchs on the sides, but
it's clean and works perfectly.....$100.00

Kenwood VFO-180 External VFO, again this matchs the
TS-180S, but will work on TS-120/TS-130/TS-530/TS-830
radios also, with cable, again the sides are scratched
up but it is clean and works perfectly...$65.00

i'll also need $6.00 extra to ship either unit...

Especially on the IC901 head...you KNOW they threw that away.... Pity too.....Kenwoods are like that...no good without the head and the factory wont sell you a new one!

I have the folling to sell as a package:
    1- ICOM ICW21A (Dual Band Handheld)
        Will recieve from 50mhz-999mhz
        5watt,Dual Band, Battery Pack
    1- ICOM SpeakerMike - W/DTMF Pad
    1- ICOM Spare Battery Pack (W/Microphone in Battery)
    1- ICOM/KENDOO Rapid Charger (1 Hour)
    1- ICOM Case for Radio
    1- 35Watt Amp/PreAMP

I have the original boxes and all the manuals. This unit is in perfect shape.
Would make a great mobile rig (giving you 35 watts of output).

$250.00 takes it all including shipping.

Complete HF station for sale. This will be sold as a lot ONLY,not parted out,so don't ask!
1. Kenwood TS-140S, Original owner,all mods done,bought new in 1992.Also included an MC-60 put together from spare part at hamfests. And a homemade relay box for amplifier. 700$
2.Ameritron AL-811 amplifier retubed with svetlanas at christmas,800 watts out,1 k in a pinch. Needs 2 parasitic resistors replaced from age, but operates fine as is. 4 extra used 811's 450$
3.Drake MN2000 tuner. This was unused until I purchased it in 1996. Will tune 2k 10-80 meters,all day. SWR and relative reading wattmeter built in. The meters work,they are all I have in-line. 200$
The total is 1350$ cod,you pay shipping. Serious inquiries only via e-mail. If you want to hear the station on hf,request a sked in general class portion. I'm redoing the station here with a digital rig hence the sale. Will be listing today on old gear net on 7275. 73 Jim KD4CDB

Hello,

I'm looking for an ICOM 901 Control head. Mine
was stolen.... and instead of parting with the rest
of the radio for little or nothing, I'd like to get
another control head.

Please reply to dsring@swbell.net

Thanks,

Douglas Ring

I HAVE TWO VHF (150-174MHZ), 110 WATT, GE DELTA SX MOBILES. THESE ARE
COMPLETE WITH S-990 CONTROL HEADS, CABLES, MIKE, AND SPEAKER.
THE 990 CONTROL HEADS ARE 128 CHANNELS HEADS WITH SCAN, SCAN
ADD/DELETE, DUAL PRIORITY, SQUELCH CONTROL, AND MODE SELECTION.
THE RADIO ALSO HAS AN ADDITIONAL 32 CHANNELS THAT MAY BE
PROGRAMED (150 CHANNELS TOTAL)!

I AM ASKING $350.00 EACH PLUS SHIPPING.

I CAN PROGRAM THESE RADIOS FOR $30.00 EACH.

E-MAIL ME IF INTERESTED.

TWO (2) 2-METER 10-MEMORY SYNTHESIZED HANDHELDS FOR SALE

KENWOOD TR-2600 w/lots of accessories for *Very* extended handheld use.

Package includes the following:

2 Kenwood TR-2600 2-m Handhelds
10 memories, scan, odd splits
Touch-tone keypad, direct frequency entry

2 Custom deluxe leather carrying cases w/metal belt clips

6 PB-26 nicad battery packs, varying ages

2 EB-3 6-C cell alkaline battery packs (equivalent to 5000 MAh each)

1 6-AA cell alkaline battery pack (looks like PB-26)

1 SMC-30 Speaker Mike

1 Quick-Charge Base Stand ST-2

2 Standard Kenwood wall chargers for PB-26

2 Rubber duck antennas

1 Original factory manual

The first $325 will take the entire package, and I'll pay for shipping.

Please note that the two handhelds are in perfect operating condition except that one handheld transmits in simplex only.

In addition, the matching Kenwood Vox Headset HMC-1 is also available.

Feel free to contact me at bashin@calweb.com, or telephone at
916-441-4096.

Thanks,

Bryan Bashin

newsgroups: rec.ham-radio.swap,rec.radio.swap

I just purchased a remanufactured HTX-212 mobile rig from the Radio Shack outlet store about 2 months ago. Since then, I have aquired a TR-9130 allmode rig and have no use for the 212.

I would like to sell it as soon as possible, so the best offer over $125.00 gets it (plus shipping). It has all the manuals and the box and is in great condition. I have used the radio several times and can assure you of its function and appearance.

****
I also have an AR-270 dual-band Cushcraft verical for sale. It's the smaller of the 270's but has been a good antenna. First $25 (plus shipping) gets it.

****
I have a Radio Shack DSP unit in need of repair. It needs the audio amp chip replaced (RS Part No. MX-3881 I believe). I haven't had time to repair it, and I have since aquired another working unit. The part is still available and can be ordered from any Radio Shack. I'd like $15 for it.

If interested in any of these items, please send email to (n7ory@primenet.com).

Rob Neff (N7ORY)

I need a Riders Vol 8 F-M page 9 and 10 or a clear
copy. I am trying to restore a Fairbanks-Morse
console with shortwave. Happy to pay any reasonable
cost.
Thanks and 73 Gary N9ZSV/KT gpewitt@execpc.com

Looking to buy the following for a FT-50R if anyone has extras or no
need for them any longer.. E-DC-5B cigarette lighter adapter,CSC-68
soft case to hold FNB-41 and MH-34B4B microphone.. I will buy all or
individual pieces.. Must be in excellent condition.. Would prefer COD
and I'll pay COD fee...

Please call or email

<Picture>***Road Trip To Dayton***<Picture>

The SCARS club is planning a trip to the May 1997 Dayton Hamvention and you
can be a part of it (you don't have to be a club member to go).

The trip will include a chartered bus from the Fort Mill / Charlotte area to Dayton, accomodations at Dayton University for 3 nights (May 15th through the 18th), and the hamfest ticket all for only $162.00 !!!

Thats right, you've often heard of the worlds largest hamfest and now you can be a part of all the action, but, you need to respond quickly as we are limited in the number of people that can go so if you are interested, fill out the form below and a member of our club will contact you with all the details.

Just Announced!!!!

The SCARS club will be holding a raffle for 2 complete packages as mentioned above to the Dayton Hamfest as well as $150 in spending cash (or the cash equivalent for non-hams). This raffle is limited to 200 tickets at only $5 each. If you are interested in purchasing a ticket (these will go fast !!!), send e-mail to Jerry Moore (AE4PB) vigilant@cetlink.net

See You In Dayton !!!!!

I have the following Ham Gear FOR SALE....

Kenwood TS-450AT w/ narrow SB Filter and Heil Desk Mic. It's in Mint Condition and works fine. Price: $ 750.00 + shipping

Nye Viking Roller Inductor Tuner Model MB-V-A . Great Shape & Works Fine. Price: $ 400.00 + shipping

Henry 2k-4 Console Amp. Has new transformer. Works Great and Looks just as good. Because of size this is pickup only.... Price: $ 750.00

Reason for selling is that I just got married a few months ago and either the Ham Gear or me go.

Make all replys to:

farmboy@rollanet.org

Thanks for reading....

Jim

Hey, fair is fair, make her give up all her hobbies too, and see what she says
then. It goes both ways.

Bill

Jim:

     Come to rural Alaska. Leave wife behind. Bring gear.
Lotsa girls here look for he-man with big toys. I have spoken.

I'd be interested in trading a like new in the box AOR AR-2700 scanner
for similar condition 1 or 2 MEG HP200LX with documentation.

Reply by email is preferred.

Thanks,

--Bill

SCANNER SPECIFICATIONS

Frequency coverage:	500 kHz- 1300 MHz *
Modes:	AM, FM, WFM
Sensitivity:	10-1000 MHz: .5uV NFM
Tuning Steps:	5,6.25,9,10,12.5,20,25 30,50,100 kHz
Memory Channels:	500 total, 10 banks of 50 channels
Search Banks:	10
Scan/Search:	30 cps

Sleep Timer
Optional computer control
Illuminated keypad & display
Optional Digital Voice Recording
Permanent on screen battery indicator
Auto Mode bandplan data (with override)
Size/Weight 153mm(h) x 63mm(w) x 40mm(d) 315 grammes

ACCESSORIES
Comes with rubber duck antenna, telescopic antenna, rechargable batteries,wall adapter/charger, cigarette lighter plug, belt clip, carrying strap and earphone.

Hm. rfg.@.nome...net

I doubt if most systems could handle that. I think you should be
using rfgatnomedotnet.

Sounds like she's got to go!:-)))

Actually try using my line " At least I'm home and you know what(and

whom)I'm doing! and always remember the alternative is that I could be
OUT " and leave out to her imagination !

John

I have a pair of 6146B Final tubes for sale. Worked fine when removed
from service. I no longer own the transmitter they came from, so the
tubes are for sale.

$18US + shipping.

Absolutely mint TS50S, with mike, manual, bracket, and cables, in
original box. Looks and operates as brand new. Used less than 3
hours. Only selling because my new vehicle plans were cancelled.
$699. Ron, K4LWZ.

Very nice Toshiba T1000-SE laptop, 8088 with 640k; additional 2mb
ram card installed. BRAND NEW battery. Has 3 1/2 in. disk drive,
but no hard drive. Don't think a hard drive can be added without a
lot of trouble, if at all. Light weight and compact, with very good
mono display. A nice, basic laptop, if you can get by without a
hard drive. Great for a student, packet operation, or logging.
Complete with AC module. What have you got to SWAP? Ron, K4LWZ.

I have a set Vol 1 & 2 of Canadian Air Force Signal Training Manuals
that were used to train Radio/Radar Techs in WW2. Covers are in poor
condition... all pages intact... and handwritten notes throughout.

Very detailed treatment of electromagnetic theory, Field Theory,
AC Circuits, Tubes, Oscillators, Receivers, Transmitters, Antennas,
Wireless Transmission Phenomena, Direction Finding,
Batteries & Power Supplies

$10 O.B.O. + Shipping if required

  Yep, these are not the newsgroups (especially the new
rec.radio.amateur.boatanchors) to get sympathy for that kind of comment.
You gotta keep your priorities in order. :-)

In about May, I sold a 6 element verticle HF antenna to someone
in Austin. However, at that time, I did not have the bottom piece
of the antenna.

If I sold you this antenna, I would like to get the missing piece
to you, as I have found it.

I am selling a National HRO-M. This classic receiver comes with 8 coil
sets (48-96KC, 100-200KC, 180-430KC, .9-2.05MC, 1.7-4.0MC, 3.5-7.3MC,
7.0-14.4MC, and 14.0-30MC). It has a wood rack that holds seven of the
coil sets. The receiver appears to be complete but does not have
an external power supply or speaker with it. It is untested. There is
one control on the front panel that I believe has been added.

You can see a picture of this set, and some other Nationals I am
selling, at my website:
http://www.geocities.com/SiliconValley/3839/radio_fs.html

I am taking offers on this receiver until Sunday, October 27, 1996. So
far, the highest offer is only $150.

I am taking offers on a rare National AGS-X receiver until Sunday, October 27, 1996. It has a complete set of 9 coil sets (1.7-2.0MC, 3.5-4.0MC, 7.0-7.3MC, 14.0-14.4MC, A, B, C, D, E). It also has a SPU697? rack mounted power supply, a National rack mount, 2 National rack mount panels for the extra coils, and an original instruction book. It is in very nice original condition and is untested. Paint and lettering are very nice, no rust, and the chassis is in excellent unrestored condition with all original tube shields, capacitors, a Bliley crystal, and the dust cover. There is not a speaker included.

You can see a picture of this set, and some other Nationals I am selling, at my website:
http://www.geocities.com/SiliconValley/3839/radio_fs.html

Hah, my wife is happy when I'm playing with the radio, or the computer. At least she KNOWS I'm not with another woman, which I might well be in someones case.

Bill

I just purchased a working Cushman CE5 Monitor. The deviation scope and

450 plug works well but 25 meg and 150 meg plugins are not doing well.
Also the A17 PPL board is hosed. I need some help in resurrectiong this
vintage piece of FM test gear.

If anyone can point me toward any commercial outfits that might still
support this monitor or better might have parts, manuals, and/or plugins,
I'd be most greatful.

Followup directed to: rec.radio.amateur.equipment but email CC would be
appreciated.

Too light for a boatanchor. Add a few bricks.
That's the main problem with all this newfangled equipment. Too light.
And too small, too! I believe they should charge by the pound for radio
equipment. Much more equitable.

I'm glad you guys just reminded me, I have one of those that stays in
the other room! I forgot about her a couple of years ago. I wonder if
she's still there? ;->

It doesn't have to be an either/or thing. . .
Put the ham gear in storage until you decide to leave.

For Sale:
Cetec Vega Audio Line Driver Card; Qty. 6, Model LD-606 w/ Model 211PS Rack Mounting Panel with Power Supply. - NEW -

These cards are multipurpose audio distribution amplifier cards with two transformer-isolated inputs, one operational-amplifier auxiliary/summing junction input, and four high-level transformer-isolated outputs. They are intended to perform a wide variety of line-receiving, summing, audio distribution and line driving functions. They may be user-configured by means of on-card jumper blocks which determine the operating mode of the card. Some possible configurations:

- One input drives all four outputs.
- Each transformer-isolated input drives two outputs
- One input drives two outputs; the other two each drive one output.
- The summing input sums up to twelve audio signals (with external summing resistors) and drives from one to four outputs.
- The two transformer-isolated inputs may be summed with the single-ended input and used to drive all four outputs.

Specs:
Voltage: +10 to +18 Vdc
Current: Approx 50 mA
Input Z: 10K/600
S/N: >66 dB
Output Z: 300, 600, 2400
Max. Out: Approx +18 dBm
Freq. Res: 100 Hz to 10 KHz.

My small Kenwood TouchTone microphone (model MC-48B)
has lost it's ability to make tones when the center horizontal
row (numbers 4,5,6) are pressed. And my fingers are too fat
to get inside the thing to fake a repair. So...

Anybody got a small Kenwood mic such as the MC-48 that
they would like to exchange for cash?

Thanks in advance

de A Redshirt in Rocklin

Take five minutes to read this and it WILL change your life.

The Internet has grown tremendously. It doubles in size every 4 months. think about it. You see those 'Make.Money.Fast' posts more and more. That's ... because it WORKS ! So I thought, all those new users might make it work. And I decided to try it out, a few months ago. Besides, whats $5.00, I spend more than that in the morning on my way to work on coffee and cigs for the day. So I sent in my money and posted. Everyone was calling it a scam, but there are SO many new users from AOL, Netcom, etc. they will join in and make it work for you.

Well, two weeks later, I began recieving bucks in the mail! I couldn't believe it! Not just a little, I mean big bucks! At first only a few hundred dollars, then a week later, a couple of thousand, then BOOM. By the end of the fourth week, I had recieved nearly $47,000.00. It came from all over the world. And every bit of it perfectly legal and on the up and up. I've been able to pay off all my bills and still had enough left over for a nice vacation for me and my family.

Not only does it work for me, it works for other folks as well. Markus Valppu says he made $57,883 in four weeks. Dave Manning claims he made $53,664 in the same amount of time. Dan Shepstone says it was only $17,000 for him. Do I know these folks? No, but when I read how they say they did it, it made sense to me. Enough sense that I'm taking a similar chance with $5 of my own bucks. Not a big chance, I admit--but one with incredible potential, because $5 is all anyone ever invests in this system. Period. That's all Markus, Dave, or Dan invested, yet their $5 netted them tens of thousands of dollars each, in a safe, legal, completely legitimate way. Here's how it works in 3 easy steps:

STEP 1.

Invest your $5 by writing your name and address on five seperate pieces of paper along with the words: "PLEASE ADD ME TO YOUR MAILING LIST." (In this way, you're not just sending a dollar to someone; you're paying for a legitimate service.) Fold a $1 bill, money order, or bank note inside each paper, and mail them by standard U. S. Mail to the following five addresses:

1- Fern Suarez
Mallorca 112
Hato Rey, P.R., USA, 00917

2- Philippe
2104 De Mexico
Chomedey, Laval
Quebec, Canada
H7M 3C6

3- Natalie Jansen
Lancveldlaan 18
5671 CN Nuenen
Holland

4- Chad Collier
2785 Cold Springs Rd. #49
Placerville, CA 95667

5- Steve Boltinghouse
1009 Bird St.
Hannibal, MO 63401

STEP 2.

Now remove the top name from the list, and move the other names up.This way, #5 becomes #4 and so on. Put your name in as the fifth one on the list.

STEP 3.

Post the article to at least 250 newsgroups. There are at least 19000 newsgroups at any given moment in time. Try posting to as many newsgroups as you can. Remember the more groups you post to, the more people will see your article and send you cash!

STEP 4.

You are now in business for yourself, and should start seeing returns within 7 to 14 days! Remember, the Internet is new and huge. There is no way you can lose.

Now here is how and why this system works:

Out of every block of 250 posts I made, I got back 5 responses. Yes, thats right,only 5. You make $5.00 in cash, not checks or money orders, but real cash with your name at #5.

Each additional person who sent you $1.00 now also makes 250 additional postings with your name at #4, 1000 postings. On

average then, 50 people will send you $1.00 with your name at #4,....$50.00 in your pocket!

Now these 50 new people will make 250 postings each with your name at #3 or 10,000 postings. Average return, 500 people= $500. They make 250 postings each with your name at #2= 100,000 postings=5000 returns at $1.00 each=$5,000.00 in cash!

Finally, 5,000 people make 250 postings each with your name at #1 and you get a return of $60,000 before your name drops off the list.And that's only if everyone down the line makes only 250 postings each! Your total income for this one cycle is $55,000.

From time to time when you see your name is no longer on the list, you take the latest posting you can find and start all over again.

The end result depends on you. You must follow through and repost this article everywhere you can think of. The more postings you make, the more cash ends up in your mailbox. It's too easy and too cheap to pass up!!!

So thats it. Pretty simple sounding stuff, huh? But believe me, it works. There are millions of people surfing the net every day, all day, all over the world. And 100,000 new people get on the net every day. You know that, you've seen the stories in the paper. So, my friend, read and follow the simple instructions and play fair. Thats the key, and thats all there is to it. Print this out right now so you can refer back to this article easily. Try to keep an eye on all the postings you made to make sure everyone is playing fairly. You know where your name should be.

If you're really not sure or still think this can't be for real, then don't do it. But please print this article and pass it along to someone you know who really needs the bucks, and see what happens.

REMEMBER....HONESTY IS THE BEST POLICY.YOU DON'T NEED TO CHEAT THE BASIC IDEA TO MAKE THE BUCKS!
GOOD LUCK TO ALL, AND PLEASE PLAY FAIR AND YOU WILL WIN AND MAKE SOME REAL INSTANT FREE CASH!

*** By the way, if you try to deceive people by posting the messages with your name in the list and not sending the bucks to the people already included, you will not get much. I know someone who did this and only got about $150 (and that's after two months). Then he sent the 5 bills, people added him to their lists, and in 4-5 weeks he had over $10,000!

TRY IT AND YOU'LL BE HAPPY!!! :o) !!!!!!!!!!

In article <395.654193326831@news.nemonet.com> sbolting@nemonet.com (Stephen Boltinghouse) writes:

> Take five minutes to read this and it WILL change your life.

Why is it that with this sort of scheme it *always* takes only five minutes and *always* only costs you five bucks?

> The Internet has grown tremendously. It doubles in size every 4 months.
> think about it. You see those 'Make.Money.Fast' posts more and more.
> That's ... because it WORKS !

It rather seems that every 4 months somewhere on this planet a new batch
of high school students gets access to the internet for the first time in their
lives,
and what's the first thing they do: yes, they post this silly crap! Do yer
homework
instead, mate!

> So I thought, all those new users might
> make it work. And I decided to try it out, a few months ago. Besides,

I have the following for sale. I have reduced the price to sell
quickly. The price for the unit is $600, if you would like to make a
offer I would be willing to listen to the offer. But I would really
like to get at lease $600 for this unit. Please send e-mail replies to
the 2 addresses below. I will try to check newsgroups, but e-mail will
probably get to me alot faster.

$2500 New, selling quick for $600

Replies to:
tpickett@tir.com
tim@tpickett.agn.net

Toshiba T1910CS Intel 486/33 MHz Laptop Computer System
VGA Active Matric Color Screen with external port for VGA monitor
Full Keyboard with external port for another keyboard
Snap on Trackball Mouse with external port for another mouse
2.5 Hour Battery with adaptor for charging and running without battery
4 Meg of memory built in has memory card slot for you to add more
210 Meg Hard Drive built into the unit
Expantion slot for adding just about anything type II or III
Carrying Case
Windows 95 installed
For $50 I have a 14,400 baud modem card that plugs right in
(If somebody really wants it, I might give the modem with the laptop)
I have extra 120 Meg Hard Drive I can give you for FREE
Has all the serial, printer, vga, mouse, etc, ports on the unit

Please e-mail me today with your questions or offers, I need to move
this unit quickly. Thanks...

Chris,
I've noticed this post more than once - obviously no one is interested
at the prices you are asking. Since MVP's, Exec 2's, and Mstr 2's are
going for around $50, I can see why.

I might be interested in trading you a UHF Delta, 550 head, and the
manual with the ham band programming codes (a rare item) for your low
band Delta and the Lunchbox, but otherwise you're too pricy.

Sorry but the Delta has already gone for asking price. As for the other
radios, these are not direct out of service radio but radios that have
been realigned to the 6 meter ham band and come complete, ready to run.
Sure you can buy a radio for $50.00. Then add channel elements tx/rx,
remote head, cable, mic, plus the multi channel board, etc. etc.

Take five minutes to read this and it WILL change your life.

The Internet has grown tremendously. It doubles in size every 4 months. think about it. You see those 'Make.Money.Fast' posts more and more. That's ... because it WORKS ! So I thought, all those new users might make it work. And I decided to try it out, a few months ago. Besides, whats $5.00, I spend more than that in the morning on my way to work on coffee and cigs for the day. So I sent in my money and posted. Everyone was calling it a scam, but there are SO many new users from AOL, Netcom, etc. they will join in and make it work for you.

Well, two weeks later, I began recieving bucks in the mail! I couldn't believe it! Not just a little, I mean big bucks! At first only a few hundred dollars, then a week later, a couple of thousand, then BOOM. By

the end of the fourth week, I had recieved nearly $47,000.00. It came from all over the world. And every bit of it perfectly legal and on the up and up. I've been able to pay off all my bills and still had enough left over for a nice vacation for me and my family.

Not only does it work for me, it works for other folks as well. Markus Valppu says he made $57,883 in four weeks. Dave Manning claims he made $53,664 in the same amount of time. Dan Shepstone says it was only $17,000 for him. Do I know these folks? No, but when I read how they say they did it, it made sense to me. Enough sense that I'm taking a similar chance with $5 of my own bucks. Not a big chance, I admit--but one with incredible potential, because $5 is all anyone ever invests in this system. Period. That's all Markus, Dave, or Dan invested, yet their $5 netted them tens of thousands of dollars each, in a safe, legal, completely legitimate way. Here's how it works in 3 easy steps:

STEP 1.

Invest your $5 by writing your name and address on five seperate pieces of paper along with the words: "PLEASE ADD ME TO YOUR MAILING LIST." (In this way, you're not just sending a dollar to someone; you're paying for a legitimate service.) Fold a $1 bill, money order, or bank note inside each paper, and mail them by standard U. S. Mail to the following five addresses:

1- Fern Suarez
Mallorca 112
Hato Rey, P.R., USA, 00917

2- Philippe
2104 De Mexico
Chomedey, Laval
Quebec, Canada
H7M 3C6

3- Natalie Jansen
Lancveldlaan 18
5671 CN Nuenen
Holland

4- Chad Collier
2785 Cold Springs Rd. #49
Placerville, CA 95667

5- Steve Boltinghouse
1009 Bird St.
Hannibal, MO 63401

STEP 2.

Now remove the top name from the list, and move the other names up.This way, #5 becomes #4 and so on. Put your name in as the fifth one on the list.

STEP 3.

Post the article to at least 250 newsgroups. There are at least 19000 newsgroups at any given moment in time. Try posting to as many newsgroups as you can. Remember the more groups you post to, the more people will see your article and send you cash!

STEP 4.

You are now in business for yourself, and should start seeing returns within 7 to 14 days! Remember, the Internet is new and huge. There is no way you can lose.

Now here is how and why this system works:

Out of every block of 250 posts I made, I got back 5 responses. Yes, thats right,only 5. You make $5.00 in cash, not checks or money orders, but real cash with your name at #5.

Each additional person who sent you $1.00 now also makes 250 additional postings with your name at #4, 1000 postings. On average then, 50 people will send you $1.00 with your name at #4,....$50.00 in your pocket!

Now these 50 new people will make 250 postings each with your name at #3 or 10,000 postings. Average return, 500 people= $500. They make 250 postings each with your name at #2= 100,000 postings=5000 returns at $1.00 each=$5,000.00 in cash!

Finally, 5,000 people make 250 postings each with your name at #1 and you get a return of $60,000 before your name drops off the list.And that's only if everyone down the line makes only 250 postings each! Your total income for this one cycle is $55,000.

From time to time when you see your name is no longer on the list, you take the latest posting you can find and start all over again.

> The end result depends on you. You must follow through and repost this article everywhere you can think of. The more postings you make, the more cash ends up in your mailbox. It's too easy and too cheap to pass up!!!

So thats it. Pretty simple sounding stuff, huh? But believe me, it works. There are millions of people surfing the net every day, all day, all over the world. And 100,000 new people get on the net every day. You know that, you've seen the stories in the paper. So, my friend, read and follow the simple instructions and play fair. Thats the key, and thats all there is to it. Print this out right now so you can refer back to this article easily. Try to keep

an eye on all the postings you made to make sure everyone is playing fairly. You know where your name should be.

If you're really not sure or still think this can't be for real, then don't do it. But please print this article and pass it along to someone you know who really needs the bucks, and see what happens.

REMEMBER....HONESTY IS THE BEST POLICY.YOU DON'T NEED TO CHEAT THE BASIC IDEA TO MAKE THE BUCKS! GOOD LUCK TO ALL, AND PLEASE PLAY FAIR AND YOU WILL WIN AND MAKE SOME REAL INSTANT FREE CASH!

*** By the way, if you try to deceive people by posting the messages with your name in the list and not sending the bucks to the people already included, you will not get much. I know someone who did this and only got about $150 (and that's after two months). Then he sent the 5 bills, people added him to their lists, and in 4-5 weeks he had over $10,000!

TRY IT AND YOU'LL BE HAPPY!!! :o) !!!!!!!!!!

I am looking to buy a clean, low-hours, Kenwood TS-450, with antenna tuner. Would like to find one in the Dallas, Tx area, but would consider a purchas from other areas of the country.

Located in Garland (Dallas, TX).

Hi all - I've got 2 Drake radios I would like to swap -

First is a TR4-C transceiver, with AC4, MS4, & org. manual. Excellent
condition.

Second, is a R4-A receiver, with MS-4, and org. manual. Excellent
condition, and super clean.

Both radios work excellent.

I'm not sure what I want in trade. I just like to play with radios I've never tried before:- Make an offer - I'll consider just about anything - I have many hobbies besides amateur radio - I'm interested in HF gear (new or old), scanner equipment, photography equip, pistols/rifles/shotguns, computer gear....etc., etc., etc....

If your don't want - maybe I do :-

E-mail only. Thanks.

Very nice Toshiba laptop, 8088 with 640k; additional 2mb ram card installed. BRAND NEW battery. Has 3 1/2 in. disk drive, but no hard drive. Don't think a hard drive can be added without a lot of trouble, if at all. Light weight and compact, with very good mono display. A nice, cheap laptop, if you can get by without a hard

drive. Great for a student, packet operation, or logging. Complete
with AC module. New cost was almost $5000, but now you can get it
for a paltry $225 shipped to you, lower 48. Ron, K4LWZ.

I am looking for a set of knobs for a 600-series Zenith Trans-Oceanic radio. The ones I have have lost all the gold paint, and I need a new set. The ON-OFF knob has a small flag that covers the "ON" indicator when the set is off.

Any help appreciated.

Thanks,

Bobby

The QSY Society, a new Amateur Radio Organization for the Putnam,
Dutchess and Westchester area will hold its first meeting on Wednesday,
September 11, 1996, 7:30 PM, at the Carmel Ambulance Corps Headquarters
on Vink
Drive in Carmel, NY. (Behind the Carmel Firehouse on Route 52)

The primary goal of the group will be to fill an existing void by
providing an enjoyable forum for the discussion of technical, operating
and social topics of interest to radio amateurs.

Join us and share the Amateur Radio Experience.

My parents have sold their house, and I have Ham equipment and parts
that I am no longer using, and I have no place to store..... therefore
they got to go!

4 Octal Plugs with caps (brand new) and sockets (used)
Great for cabling connectors - e.x
Power Supply cable to radio/transmitter etc.
Quick disconnect between rotor control and rotor (tv/ham/cb rotors)
Best protection against lightning strikes is to disconnect

$2 + postage/shipping if required

You know, this is why we created Ham Radio Online. Ham Radio is actually a heck of a lot of fun!!!! And we are trying our best to report on the fun that most hams (who have not discovered the Internet :)) are having on the air, building antennas, tinkering with equipment, or slogging through a forest on a volunteer search/rescue mission.

Stop on by and enjoy our web site, http://www.hamradio-online.com - now read in 43 countries around the globe.

Ham radio is so much fun that I gave up sex just to call CQ contest
and pass routine traffic.

MAKE YOUR OWN CABLE DESCRAMBLER - CHEAP!

Making your own Cable Test Box is simple!
Convert any cable box to a Cable Test Box, in no time!

If you've seen ads for converters that sell for up to
four hundred dollars, you know that this is a great deal.
(It does the same thing.) All modules are priced from
about ten to forty dollars!

Once you know how to get the the correct module, it's
simple to install, and they descramble all channels
on all systems. Don't be ripped off any more!

For more information, and a complete list of companies
that sell Test Modules, send Cash or Money order for
$5.00 to:

Yes, This is a more positive role for HF

people. The HF bands will soon be recovering
from the Southern winter so those signals
from the antipodies will be coming through.
Take a look for the home-stations, mobiles.
During the third weekend of October is JOTA,
where amateur radio combines with the
scouting troops and camps, so another
opportunity for some pleasant operations,
with the Worlds Youth - in scouting.
On one occassion I QSO'ed to Tatum Park,
near Mancester, UK. during the period. 73
Winton at ZL3AO.

I have a pair of 6146B Final tubes for sale. Worked fine when removed
from service. I no longer own the transmitter they came from, so the
tubes are for sale.

$18US + shipping.

I am looking for a "clamshell" battery pack for use with the Yaesu FT 727 HT. This pack opens up and holds alkaline batteries. The Nicad battery pack part # is FNB-4. I don't know what the part # is for the Clamshell.

Thanks...73 Joe N7JEH

I have a pair of 6146B Final tubes for sale. Worked fine when removed
from service. I no longer own the transmitter they came from, so the
tubes are for sale.

$18US + shipping.

Heathkit PN 404-284-1 and 404-283.Crystal Fileter assemblies plus
swithces, caps and resistor as originallyinstalled. Just pulled from

old SB-101 chassis.

Fifteen Dollars (US$) for the two and I pay shipping anywhere in US or
Canada

Joe,

The Alkaline Cell pack is the FNB5A. It is a 6 "AA" cell pack that is
the same color as the FT727R HT. I don't know if they made one for the
FT209 Series (different color). Check with some of the smaller dealers.
May still have some. Try Yaesu parts as well. May be still in stock.
They still had parts last month for my FT290R (rig is at least 15 years
old!!)

Good Luck.

73,

Gary, N7ARE

I am serious about purchasing the folowing items and would ask if
you can take a minute and have a look and let me know after if you have
any of these items you would accept an offer on.

RCA ribbon Microphones model 77,44,KU2A,KU3A,BK-5
Neumann/Telefunken microphones model;
U-47/48,M-49/50,U-67,M-269,Km-54,56,Elam 250 or 251
Pultec EQP-1a3,MEQ-5 tube equalizer
RCA BA-6 or BA-86 Limiter
Universal Audio/Urei Broadcastcast limiter model LA-3A,LA-4,1176,1178,
UA175,UA176
Teletronix LA-2a Levelling Amp
TAB/Siemens V-72,V-76 microphone pre-amps
AKG C-12,C-12a, or C-24 Condenser mic

Let me know about any of these items you may have,the condition and
I will return the mail . Thanks for your time.

Case scuffed, smoked near radio *Warning* case may have traces of nicotine , Antenna
replaced.
Radio works just fine.
Side band with BFO was able to recieve rtty and wefax with PK232.
Radio doesn't like being near PC monitor but I think thats the same for all dx390s.
I have seen the radio sell at Radio Shack for 159$ new.

Will sell to best offer (Keeps the price net police off me heh heh)
Will also consider reasonable trades. Don't over look this.. this radio is a fine picnik table radio has great Fm reception and nice sound.
No mods have been done to this radio.
Don't miss this deal if you are just starting out..

Selling because I got an Drake R8A to replace it.

Hello all and I would like to welcome all to my pages.
http://www.moonstar.com/~wa4pgm/

I have many different subjects and hope you will find something
useful. Things will be changing in the future, hopefully for

the better. I have more time now to work on my page. Just
trying to think of something unique.

Thanks all who have took a visit and also for your comments.

Very nice Toshiba laptop, 8088 with 640k, additional 2Mb ram card
installed. Has 3 1/2 disk drive, but no hard drive (don't think
hard drive could be added without a lot of trouble, if at all).
Light weight and compact, with very good mono display. A great
cheap laptop, if you can get by without a hard drive. Great for
student, packet, or logging. Battery is 6 months old, and fine.
Complete with AC module. New cost was almost $5000, but now you can
get it for a paltry $200.! Ron, K4LWZ.

I am looking for a 451X Tower- (I think that's the right p/n)
It is a 40' crankup tower that when nested is only 10' high

Does anyone have one they want to unload?

Please forward any info to

t[illegible]s

I have two UHF Motorola VISAR portables for sale as follows :

1) 1 UHF 16 Channel Motorola VISAR with DTMF keypad. Model# H05RDH9AA7AN Covers 403-470 Mhz split. Unit comes with dual rapid charger, 2 high capacity NiMH batteries, helical (stubby) antenna, soft case and manual. Unit is in as-new condition and I can program the unit with frequencies/ quick call tones of your choice. $455.00

2) 1 UHF 16 Channel VISAR without DTMF keypad. Model#H05SDD9AA4AN Covers 450-512 Mhz split. Unit comes with dual rapid charger, 1 high and 1 ultra-high capacity NiMH battery, helical (stubby) antenna, soft case, and manual. Unit also has a 25 month mail-in service contract and I will supply paper work for same. Unit is in as new condition $500.00

If you need any additional info then let me know -Thnx   Bill

From: johnsw@mhv.net (Bill Johnson)
Subject: F.S. - Universal M-400 Decoder with computer interface for pager decoding
Date: 1996/07/21
Message-ID: <31f298ce.1549448@news.mhv.net>#1/1
X-Deja-AN: 169918333
organization: MHVNet, the Mid Hudson Valley's Internet connection
newsgroups: rec.radio.scanner,rec.radio.swap,alt.radio.scanner,rec.ham-radio.swap

I have a Universal M-400 multi mode decoder for sale complete with CI-400 computer interface for monitoring / logging of pager data to screen and/or disk and /or printer. The unit is the latest software version - Version 2.0 and will decode the following:

Shortwave capabilities:	VHF-UHF Capabilities:
Baudot	ACRS
ASCII	POSAG pager data
Sitor A&B	GOLAY pager data
FEC-A	CTCSS (PL) Decoding
SWEDE-ARQ	DCS (PL) Decoding
Fax (To Printer)	DTMF Decoding

The CI-400 interface interfaces the M-400 with your pc via an interface card for your pc and its associated software. Once these are installed, all the paging data is fed to your pc's display and you can set your pc to alarm when your preprogrammed cap code(s) are detected and the message will be highlighted, and/or saved to disk/printer for later viewing. Works real well ..... If you not sure what the unit's about check Groves home page for a complete description or e-mail me for any questions ..... Unit is in excellent condition and comes complete with manuals, software, interface, cables and a/c adapter. $325 for all

Bill

Plug the base unit into your Scanner, Shortwave, or Ham rig.
Listen with the mobile unit--the size of a cigarrette pack--and you
head phones as you walk around the house, out in the garage, or around
the yard. Also provides privacy when you listen after hours while
your spouse snoozes. Clear, uninterrupted sound within a 1/4 mile of
the base station--farther with unobstructed, line of sight
transmission.

Leaving the hobby:

>>dbx 128 Unit<<
This unit was originally designed for processing signals in audiophile
equipment--although I used it with my simple "micro-broadcasting" AM
station to insure a strong signal without overmodulating. Compress
the dynamic range of your broadcast before it goes out over the air.

This is the same technology radio stations have used for years to even
out the "loud" and "soft" passages in their audio feed. Further,
threshold compression can limit overly loud passages to keep from
overmodulating the signal--significantly reducing distortion from too
"hot" a signal. RCA Jacks IN/OUT.

         dbx Model 128 ("dbx II")

         compander features:
         - Linear and above threshold compression/expansion
         - Sensitivity 10mv to 2v range
         - Pre/Post Dynamic Range enhancement
         - Noise reduction

         $100/obo.

I have one of these units (mobile unit with plug for earphones etc. instead of headphone receiver combo). I use it all the time. Good for keeping the computer noise generator away from your radio, so you can listen and surf at the same time. Works with most lawnmowers, too ;->

I got mine at "Nobody Beats The Whiz" electronics store.

Where can i find a mobile antenna base that will easily swing down 90 degrees
to lie flat along the roof?

I want to mount it outside the drivers window, on the gutter or roof, and be
able to reach out the window to lay the antenna flat as necessary.

I am sure i have seen something like this. It was some kind of ball-joint
with detents at 90 deg. to hold the antenna in place.

It should be able to hold a standard 5/8 wave 2-m antenna.

I need to get this soon for an upcoming road trip. Thanks much for any help
in finding this antenna.

This is my first reply to a news group. What does this have to do with
DX. I have been reading the rec.radio.amateur.dx stuff for about a week
now and notice little DX info is reported here. Is this intended to be a
source for DX? If not let me know so I can stop wasting my time. de
Bernie, WR3E.

You have noticed a common usenet problem... some 20.000 newsgroups
were created for discussion about many different topics, yet some
people cannot be bothered to check if their posting matches the topic
of the newsgroup before posting.
The result is often called "noise", and the "signal/noise ratio" of a
newsgroup can be varying, much like the s/n ratio when receiving a DX
station.

Then there are those loud mouth postings, like Dave's. Those guys want
to let the world know they have something *very important* to tell, and
post it in as many newsgroups they can think of. Those postings are
allmost certainly off-topic.

I'm afraid it is difficult to overcome. You will just have to live
with it, and select news software that allows you to quickly skim
articles to see if they are in the "signal" or in the "noise" category.
Some news software will also allow you to automatically skip articles
that are posted to many newsgroups. That will help you to avoid some
of the utter garbage (like "visit my page!" or "make money fast!").

73,
Rob

From: johnsw@mhv.net (Bill Johnson)
Subject: F.S. - Universal M-400 Decoder with computer interface for pager decoding
Date: 1996/08/03
Message-ID: <3202b5e3.2683666@news.mhv.net>#1/1
X-Deja-AN: 171671555
organization: MHVNet, the Mid Hudson Valley's Internet connection
newsgroups: rec.radio.scanner,rec.radio.swap,alt.radio.scanner,rec.ham-radio.swap

I have a Universal M-400 multi mode decoder for sale complete with
CI-400 computer interface for monitoring / logging of pager data to
screen and/or disk and /or printer. The unit is the latest software

version - Version 2.0 and will decode the following:

Shortwave capabilities:	VHF-UHF Capabilities:
Baudot	ACRS
ASCII	POSAG pager data
Sitor A&B	GOLAY pager data
FEC-A	CTCSS (PL) Decoding
SWEDE-ARQ	DCS (PL) Decoding
Fax (To Printer)	DTMF Decoding

The CI-400 interface interfaces the M-400 with your pc via an interface card for your pc and its associated software. Once these are installed, all the paging data is fed to your pc's display and you can set your pc to alarm when your preprogrammed cap code(s) are detected and the message will be highlighted, and/or saved to disk/printer for later viewing. Works real well ..... If you not sure what the unit's about check Groves home page for a complete description or e-mail me for any questions ..... Unit is in excellent condition and comes complete with manuals, software, interface, cables and a/c adapter. $325 for all

Hello World,

Just a quick message to let you know that I have updated my homepage which
contains a whole lot of links for Amateur Radio, Electronics, Computers and
other various links.

For a looksie, take a ride to http://gold.iap.net.au/~fraser

You won't be disappointed.

73's to all.

I have a pair of 6146B Final tubes for sale. Worked fine when removed
from service. I no longer own the transmitter they came from, so the
tubes are for sale.

$20US + shipping.

Meissner Signal Shifter Coil Sets

The following coil sets were scrounged at an old surplus market.
I have one of each set, new old stock, in the original Meissner
(Orange and Black) Boxes, some are in Thordarson Boxes,
all with the tissue wrapping around the individual coils.
****
Listed below by
[type], [freq range], [Mfr Part Number]
[a one or two line description]
[condition] [my part number] [asking price], [(quantity on hand) as of (date)].
****
Coil, RF 1785KC - 2110KC   18-2900
1785KC - 2110KC RF Coil Set for Meissner Signal Shifter.
Set of three coils; Osc Grid, Buffer/Doubler, Osc. PlateCoil.
NOS 414 $ 12.00 (qty on hand: 1 as of 8/15/96)

Coil,RF   160 Meter Band   18-2902
160 Meter Band RF Coil Set for Meissner Signal Shifter.
Set of three coils; Osc Grid, Buffer/Doubler, Osc. Plate Coil
NOS 415 $ 12.00 (qty on hand: 1 as of 8/15/96)

Coil, RF   80 Meter Band   18-2904
80 Meter Band RF Coil Set for Meissner Signal Shifter.
Set of three coils; Osc Grid, Buffer/Doubler, Osc. Plate Coil.
NOS 416 $ 12.00 (qty on hand: 1 as of 8/15/96)

Coil,RF   10 Meter Band   18-2914
10 Meter Band RF Coil Set for Meissner Signal Shifter.
Set of three coils; Osc Grid, Buffer/Doubler, Osc. Plate Coil.
NOS 417 $ 12.00 (qty on hand: 1 as of 8/15/96)

Coil, RF   2820KC - 3320KC   18-2953
2820KC - 3320KC RF Coil Set for Meissner Signal Shifter.
Set of three coils; Osc Grid, Buffer/Doubler, Osc. Plate Coil.
NOS 418 $ 12.00 (qty on hand: 1 as of 8/15/96)

Coil, RF   3975KC - 4620KC   18-2955
3975KC - 4620KC RF Coil Set for Meissner Signal Shifter.
Set of three coils; Osc Grid, Buffer/Doubler, Osc. Plate Coil.
NOS 419 $ 12.00   (qty on hand: 1 as of 8/15/96)

Coil, RF   8830KC - 10360KC 18-2960

Hello, I have a very nice Yaesu FT 767GX for sale. All Mode 160-10M.This radio

has all of the bells and whistles, internal power supply, built in antenna tuner, digital watt-meter, speech processor, notch filter, and lots more. It Recvs and transmits on all frequencies between 1-30 MHZ. This radio has the ability to talk on 6m, 2m, and 70cm (AM,FM,CW,SSB) with optional modules. None are included. I will sell this radio for $1150 shipped and insured to your door or I will consider trades. Please reply to Amy@azstarnet.com with offers, questions etc.

Thx

> Ralph@TeamInfinity.com

The sketch looks just like the "Scantenna" a commercial product that
does work wonderfully. They advertise in PopComm every month. The unit
is housed in a plastic case. It would probably cost you nearly as much
to build one considering the complexity of the gearing for the tuning
device. I've had mine for many years and am using it currenty with a
GE Superradio III. Probably the most inexpensive combo around for
AM DXing. The SRIII is going for around $40 in the Baltimore area
and the Scantenna around $30 (Mail order only)

By the way if you live in the Baltimore area listen to High tech talk
on WCBM 680 on Saturday afternoons starting at 2 pm, theres a store
near BWI that advertises on the show that has a similar antenna
to the Scantenna available at their store that has a no questions
asked moneyback guarantee

Charlie

reply-to: woody1@teleport.com
newsgroups: rec.ham-radio.swap,in.ham-radio,

Is there anyone who can offer some advice on why it is my
sound card will not work with the current version of Super Morse?

I have checked addresses, autoexec.bat strings etc. I followed all
of the authors notes in the compressed file package and I am unable
to get this booger to work.

If someone has found a special trick for those of us who are using
a 486DX4-120 by AMD, and a MMPRO16 Sound Blaster card I would certainly
appreciate any advice. The small PC speaker does work by the way but
is to faint to practice code. Using a jumper from the mother board to the
sound card doesn't seem to help any.

Send help to woody1@teleport.com

Thanks again.

Brian

KLM Multi 2700 2 meter all mode: USB, LSB, CW, AM, NBFW, WBFM.
Selectable 1 or 10 watts, RIT and VXO tuning, variable RF gain. Two
VFO's, built in 110v/12v supplies. Built in separate 10 meter
receiver for satillite downlinks. Rig is in mint condition, and in
daily use. Includes hand mike, cables, operating manuals, and very
complete technical manual. Does not have memories; think it was
built just before memories became the norm. The unit is very solid,
a little smaller than a large HF rig, such as a Kenwood 950. If you

want all modes on 2, you can't beat this rig for the money! $325
shipped to you! (If you want COD, you pay COD fees) Ron, K4LWZ.

I am looking for a 451X Tower- (I think that's the
right p/n)
It is a 40' crankup tower that when nested is only
10' high

Does anyone have one they want to unload?

Please forward any info to

t�s

I've reduced the prices to my minimums. These are lowest I'll take, if you are interested, pay that price. Sorry if it causes a problem, but Austin Texas area only. Thanks, 73, Glen KB5URZ

(2) large (about 1'x4') solar panal	$30	each
(2) 2M jpole	$ 5	each
SCA Receiver (single freq)	$20	
2M 1/4 wave perm-mount antenna	$ 7	(never opened)
2M 1/4 wave mag-mount antenna	$10	
G5RV antenna	$25	(never opened)
PK232MBX	$225	(practically new)
has upgrade as well as orig. proms		
XT Chassis, board,		
amber monitor, kbd	free	(not working)
Micor 2M radio	$70	(set to packet freq.)
Micor 2M linear amp	$50	(converted from 2M radio)
Scanner antenna	$25	
72" by 30 table	$35	this is a GREAT table
with 3ft high shelfing,		
Grounding bars, power strip		
Great for office, workshop		
or ham shack		
Also,		
3/4 umatic, Sony model 2860(?) edit deck	$40	
with manual, spare motor		
Cannon L2 with tripod&wheels, fluid head,	$5000	
and 2 Sony Hi-8 edit decks, cables and		
19" toshiba TV, hard camera case		
(3) 2500Watt 110v dimmers with 2 TV style flood lights,	$50	
all are grid mount.

I have a ranger 2970,   100 watt,10-11 meter , for sale.
This radio was $539.00 new. I still is new, but I will sacrifice
for $250.00 OBO.
ALSO have a new 20 Watt external power supply for $75.00 OBO

Will consider $300.00 for Entire setup with
panasonic external speaker unit.

All Offers considered. Also consider swap for good Handheld's

Contact Art via;
a_sweet@psych.ucsb.edu

Thanks,
Art

I am looking for a 451X Tower- (I think that's the
right p/n)
It is a 40' crankup tower that when nested is only
10' high

Does anyone have one they want to unload?

Please forward any info to

t[illegible]s

Facinating!!!

Page 3 of the 230 Heath Manual...

The Amplifier is rated at a power INPUT of 1200 watts peak envelope power for voice operation on SSB, at 1000 watts for CW, or at 400 watts for RTTY or SSTV.

So you have found a way to get 100% effeciency from the amplifier.
Let me know how, I've been using mine all wrong I guess...
I only get 500 watts out from mine.

Tom

I sorry, am I missing something here?? Don't you usally drive an amp with something like 80-100 watts from your xtmr or transceiver. And then don't the amp manufactures state power as the input to the final stage of the amplifier??

I have a few Triad toroidal transformers.
They are potted and include app notes for building a
200ma, 600V inverter using 12volt battery input.
inverter requires two transistors and a couple resistors and caps.
$10/each plus postage.
I have aabout half a dozen to sell.
Just the thing to get that old tube gear going mobile
or that odd 'B' battery replaced with something that will
run from an easier to get battery.

Hi everybody,

First of all thank you for taking time to read my message. My name is Jason and I live on the Island of Malta, in the middle of the Mediterranian Sea. I would be looking for a Meduim or Heavy Duty Rotator, to use with my VHF antennas. I shall be putting up 2 Cushcraft 18 Element Yagis (2M) stacked on top of each other as well as a 4 element beam for 6M and finally a 23 element for 70cm.

I also would like to hear from anybody who has any linears or preamps for the above bands.

Whilst hoping to hear from you soon, I thank you in advance.

73's for now
de Jason

For sale - excellent ICOM IC-730 four-conversion solid-state transceiver

Ham bands only, 80-10 including WARC. Includes optional FL-30 and FL-45 filters for passband tuning and narrow CW, DC power cable (if you need it; if not, I can use it) stock hand mike, SM-5 desk mike, manual, box, etc. - the whole works. A great inexpensive starter, all-purpose, fixed/portable/mobile rig. This was my first hf transceiver and it served me really well.

I really do not want to sell, but I have recently upgraded and cannot justify keeping this one as a backup (don't ya know I have an xyl!).

$500.00 US plus you pay shipping via your favorite method (or pick up)

Please reply via email, or call (201)627-8432 and leave a message.

Thanks!

misc.forsale:39502 ba.market.misc:10865 chi.forsale:4365 la.forsale:1984

Would Barry Britton please send me e-mail with his address. I have a
manual for him that he asked for!

Forsale, one very nicely assembled W9GR Digital Signal Processor as featured
in the September 1992 issues of both QST and QEX magazines. $195/bo.

The DSP has 10 different filters to choose from. What's more
these filters really work! I've used them on 20 meters many
a time, and they really make a difference in pulling in weak
signals. They are way better than a noise blanker, and can also
improve your notch filter immensely.

Filter #1 Combination noise reducer and automatic notch filter.

Filter #2 Switchable simultaneous automatic notch and denoiser filter

Filter #3 Optimized denoiser filter only

Filter #4 Optimized automatic notch filter

Filter #5-9 CW filters (I have not used these extensively)

Filter #5 400 Hz Linear Phase CW Filter (200Hz bandwidth)

Filter #6 600 Hz Linear Phase CW Filter (200Hz bandwidth)

Filter #7 750 Hz Linear Phase CW Filter (200Hz bandwidth)

Filter #8 1000 Hz Linear Phase CW Filter (200Hz bandwidth)

Filter #9 750 Hz Linear Phase CW Filter (30Hz bandwidth)

Filter #10 HF packet (1600/1800 Hz) or RTTY (2125/2295 Hz) bandpass
filter. The front panel mode switch selects either the packet tones

or the RTTY tones.

I nolonger have any HF equipment, so while the DSP is a pride and joy,
it's pointless for me to keep it, and I need the money.

I have a couple power transformers, good for about 1200 volts
at 1 amp continuous. $20 each.

Stancor transformer, 1200 volts center-tap @ 200 mills, 5 volts @ 3
amps and two 6.3 volt at 3 amp windings...$10. Will throw in two
Stancor 5-henry filter chokes with this one.

Stancor 5-volt @ 10 amp filament transformer, $3.

Call 716-654-2487 days or 716-381-3102 evenings/weekends for more info.

73...Jim N2VNO

I just bought one off the net in the $150-$185 price range, with extra
batterys and all the original stuff. I'd buy another one in that range
(with a few extras).

Yaesu FT-902DM HF Transceiver.
Excellent condition.
Xmit/Recv 160 to 10 meter Ham Band only.
Including the WARC bands.

Includes DC and AC power systems.
Original equipment hand microphone.
Has built in Curtis Keyer.

Also has the Optional AM filter.

Also includes a new spare set of 6146B's
Final amplifier tubes.

Has both the operators manual and the
service manuals.

If interested call Don O'Donnell N5AWN
at (210) 824-2545.

I am looking for a scanner - 50 channels would be fine, general coverage
(i.e. ham, police, fire, 46 MHz, etc.). Handheld or base. $150 or under.

Travis

Forsale, one very nicely assembled W9GR Digital Signal Processor as featured
in the September 1992 issues of both QST and QEX magazines. $195/bo.

The DSP has 10 different filters to choose from. What's more
these filters really work! I've used them on 20 meters many
a time, and they really make a difference in pulling in weak
signals. They are way better than a noise blanker, and can also
improve your notch filter immensely.

Filter #1 Combination noise reducer and automatic notch filter.

Filter #2 Switchable simultaneous automatic notch and denoiser filter

Filter #3 Optimized denoiser filter only

Filter #4 Optimized automatic notch filter

Filter #5-9 CW filters (I have not used these extensively)

Filter #5 400 Hz Linear Phase CW Filter (200Hz bandwidth)

Filter #6 600 Hz Linear Phase CW Filter (200Hz bandwidth)

Filter #7 750 Hz Linear Phase CW Filter (200Hz bandwidth)

Filter #8 1000 Hz Linear Phase CW Filter (200Hz bandwidth)

Filter #9 750 Hz Linear Phase CW Filter (30Hz bandwidth)

Filter #10 HF packet (1600/1800 Hz) or RTTY (2125/2295 Hz) bandpass
filter. The front panel mode switch selects either the packet tones
or the RTTY tones.

I nolonger have any HF equipment, so while the DSP is a pride and joy,
it's pointless for me to keep it, and I need the money.

The West Valley Amateur Radio Assn (WVARA) in San Jose, California is
selling our Kenwood TS-830S HF radio.

The radio is in perfect/excelent operating condition. We are selling it
because it is not practical for club station use, where many of our
members are not able to operate such a complicated radio.

If you are interested in it, please e-mail me at twise@sparta.sjsu.edu
for our asking price and more information.

Thanks,
Travis Wise KB8FOU

The West Valley Amateur Radio Assn, WVARA, in San Jose, CA is selling a
Kenwood TS-700 all mode VHF radio.

The radio does not work, but we are not interested in repairing it.

We are interested in selling it very inexpensively.

If you are interested, please contact me for more information.

Thanks,

I was mistaken - when I posted this message, I was going by what our club
equipment coordinator reported to me, and he didn't realize the rig had
a tube final. The radio is in perfect operating condition, it just
requires a person with knowledge about operating a tube-type radio to run
it. We are asking $500-$600 starting. Travis

Unfortunately, I think you are mistaken as to which radio has the tube final.
The Kenwood TS-700 is all solid state. The TS-830 has a tube driver and
two tube final. I am also interested in the TS-700 drop me a note at
daleh@skypoint.com. Thanks

=========="Travis A. Wise", 2/5/95==========
The West Valley Amateur Radio Assn, WVARA, in San Jose, CA is selling a
Kenwood TS-700 all mode VHF radio.

The radio does not work, but we are not interested in repairing it.

We are interested in selling it very inexpensively.

If you are interested, please contact me for more information.

Thanks,
Travis KB8FOU

I have 2 radios sitting around that I need to sell for the $$

ICOM W2A   2 meter/70 cm dual band Handheld
with leater case (never been out of), mobil power adapter, mini speaker
mike.. also

ALINCO DR-592 2 meter/70 cm dual band mobile. With comet duplexer.

Both radios extended recieve and transmitt for CAP and other uses. Both
in excelent shape.. I am open to any offers in price, I have not been
keeping up with radio prices so any reasonable offer I will consider
since the need for $$ has grown greater than the Radios... Please E-mail
rather than post in news... thanks David N7OAN

You want a beautiful old LED digital wristwatch?!?

I have a 1972 PULSAR first generation LED digital watch for sale.
Case is carved out of a SOLID stainless steel block!
Bracelet style band, also solid stainless.
Crystal is a THICK synthetic dark red ruby.
Push to read time display and time set switches are magnetic, which activate internal reed switches,.(NO HOLES IN CASE AT ALL!)
Waterproof to 600 feet!
100% operational and in excellent condition!
Will accept all reasonable and fair offers not less than $150.
Thanks!
Please email "jeffl@servprod.inel.gov" or JLATER@aol.com

Well after several months, your minimum price is at least getting closer to
the watch's book value. ;-)

I have a public service band (VHF) handheld radio that I would like to
trade for a nice 2m/70cm HT. I would consider selling it, but I'd
rather trade.

Radio

- Bendix King LHP 5141
  16 channel, scanning, priority functions, belt clip, field
  programmable

- Alkaline battery pack (uses 10 AAs)
- Desktop Rapid Charger
- Low Capacity Nicad battery (may be fried)
- Clip/Collar Mic
- Instruction Manual
- Programming Manual

Apparently, this radio can also be modified for use on non-commercial freqs, but I haven't done it.

I've got a pair of Motorola UHF HT-220's for sale complete with batteries
(several) chargers (2) and such. Both are in great condition and work well.

They are single freq and set up kinda strange with reversed pairs, but they
do talk to each other.

I am not sure what they are worth, but make me an offer! I'll sell or trade
for amateur radio equipment or?

Email me at: djk@primenet.com

Posted for the Salem Amateur Radio Club
==========

We are looking for an automatic antenna tuner
to go along with a rig we are "loaning" McKay High
School in Salem, Oregon.

This will promote and support the schools' newly established
radio club until fundraisers can be done to purchase
their own equipment.

We are looking for a tuner that supports 10 through 80 meters.
Two types we are interested in is:
AT-500
SGC-230

If you have one you wish to part with, the club has been authorized
to purchase one of these for a set amount.

Please reply to Woody1@teleport.com

Thanks
Brian

Kenwood TS-940SAT Station For Sale
++++++++++++++++++++++++++

Kenwood TS-940SAT Transceiver, MINT, LOADED, in
original box. Virtually unused. (I moved 3 years ago
and still don't have my antennas up). Call for
full details. $1995 Canadian Funds/$1395 U.S. Funds.

The Livermore ARC holds one the first Sunday of each month.
Unfortunately, I don't remember the details -- maybe someone on the
net can help.

It is held at the parking lot of the Los Positas (sp?) community
college. Exit off I-580 (I don't remember the exit but there are signs which
say so), turn north and follow the posted signs (ham swap). Start time is
6 AM.

For sale: Intech D132 logic analyzer
           $325 FOB Princeton, NJ
  Contact: Gregory Melden
            gjmelden@phoenix.princeton.edu
            (609) 924-2661 hm, (609) 258-5327 office

        Features: D132 analyzer expanded to 64 channels
                     at 100MHz (10nS) asychronous
                   8 channels high resolution--400MHz (2.5nS)
                     sychronous
                   Memory: 512 x 64 channels (or 1024 x 32),
                     2048 x 8 (high resolution)--rather meager
                     by today's standards
                   Self prompting menu control
                   Asynchronous, synchronous, state only, multiple,
                     OR, transitional clocking
                   Eight levels sequential trigger
                   Save eight setup procedures
                   Display expansion; x1, x2, x5, x10
                   State and timing displays of captured information
                   Multiple external clock inputs
              =>   Sorry, no probes.

  Specifications:
     SIGNAL INPUTS: 72, including 64 data, 4 external clocks,
                     4 clock qualifiers
         Impedance: 1Mohm, 7.5 pf at probe tip (sorry, no probes)
         Thresholds: Selectable in groups of four channels
                      TTL (+1.4V), ECL (-1.3V).
                      Variable +/- 6.3V in 100mV increments
         Minimum Detectable Pulse: 5nS at 200mV around threshold
         Organization: 16 channel blocks with a clock and
                        qualifier for each block
         Maximum Voltage: +/- 50V continuous, +/- 100V transient
     SAMPLING
         Internal Clock: Selectable from 10nS (100 MHz) to
                          100mS (10 Hz) in a 1-2-5 sequence
         External Clock: Selectable positive or negative edge
                          DC to 100 MHz rate, minimum pulse width 4nS
         Multiple Clock: Each pod (16 channels) can be independently
                          clocked either asynchronously or synchronously
         OR Clock: OR clocking on two clocks. Positive or negative
                    edge DC to 100 MHz rate, min pulse width 7nS
         Transitional Clock: Positive and negative edge

High Resolution: 2.5nS (400 MHZ) on 8 channels. 4 channel blocks

Setup Time: Data must be present 2nS before clock edge.

Hold Time: Data must be present 2nS after clock edge

Skew: Channel to Channel 2nS typical

TRIGGER

Width: Each trigger event may be specified as a 16, 32, 48, or 64 bit wide word. Each pod (16 channels) can be triggered independent from other pods.

Input: Binary or hexadecimal

Sequential: 8 sequential trigger events

Multiple: Each pod (16 channels) can be triggered independent from all other pods

Trigger Timer: Trigger on events greater than or less than 1 to 15 clocks

Pretrigger Mode: Record window positioned around trigger event

Delay Mode: Record window delayed up to 65,535 clocks or events

Repeat Mode: Auto arm after last trigger event

Auto Mode: Continuously capture and display data with or without a trigger event

Status: Status display monitors trigger events completed and pending

MEMORY

Size: 64 bits x 512 words or 32 bits x 1024 words

Store: Second memory stores all recorded data

Compare/Noncompare: Compare in timing, binary, hex, octal, decimal. Auto halt on compare or noncompare. Any portion of memory may be selected for compare or noncompare using R and S cursors

Setup: Up to 8 separate Logic Analyzer setups can be saved

DISPLAY

CRT: Integral 7" CRT display.

Menu: Interactive self-prompting menu for trigger, sample, and display specifications. Reverse video indicates programmable fields. Status display monitors overall machine operation after arming.

Data List: Selectable binary, hex, octal, decimal, by individual channels or by pod (16 channels)

Timing: 16 channel format. Horizontal expansion X1, X2, X5, X10. Channels can be individually selected and arranged next to each other for comparison. Reference (R) and Set (S) cursors. Difference between R and S shown in samples (external clock) or time (internal clock). Trigger marker identifies trigger point

EXTERNAL INTERFACE

Video Out: Composite video out via rear panel BNC connector

Trigger In: TTL active low trigger in, via rear panel BNC connector

Trigger Out: TTL active low after Pod 1 trigger sequence complete, via rear panel BNC connector

Arm In: 50mS pulse TTL active low, via rear panel BNC

MISCELLANEOUS

```
        Size:  7" H x 17.25" W x 22" D
        Weight:  40 lbs.
        Power:  110-220V, 50-60 Hz, 600W
        Temperature:  0-50 C, operating
        Shock and Vibration:  Meets or exceeds MIL-T-28800C Type
                              III Class 5 vibration 2g, shock 30g,
                              altitude 30,000 ft.
    OPTIONS AVAILABLE FROM INTECH (not included with this sale)
        Manual ~$50.00
        Non-volatile memory:  Saves Logic Analyzer setups during
                              power off for up to 2 years
        PROBES
          Probe Pod:  16 channel plus clock and qualifier.  Length
                      6 feet.
          Individual Probes:  16 channel plus clock and qualifier.
                              Length 6 feet.
          Microprocessor Probes:  8 and 16 bit CPUs
        Bus Connection:  RS232C, IEEE-488, compatible, via rear
                         panal connectors.

Check out the Livermore flea market that is held on the first
Sunday of the month. This is held 12 times a year. Also
the Foothill flea market that starts in March thru September. This
is held on the second saturday of the month.

Lines: 18

Hello all,

The Pennsylvania State University Amateur Radio Club is looking to sell off
a Dentron MLA-2500B 2kW Linear Amplifier. The reason we are selling it is
because with two HF stations, we only need two HF Linears. We are doing it
in an attempt to raise some funds to purchase some new equpiment.

The amplifier works very well, and has nothing wrong with it... The tubes
are not new, but they have MANY MANY hours of life left to them.

We are trying to feel the market out right now. Please make us an offer.
Do it via internet or packet, through jmr@ruth.ece.psu.edu or
N3HQD@W3YA.PA.USA.NOAM. These people (Joe and John, respectively) will
handle your offer and be in contact with you. Thanks!

Subject: AMTOR/RTTY controller wanted
Message-ID: <1994Jan15.004440.3499@tower>
Date: 15 Jan 94 00:44:40 -0500
Lines: 19

I'm looking for a __cheap__ AMTOR controller. I want to get back on the

air, but I can't afford the price of a new controller, or even most used ones. I don't need packet capability, and I doubt that I can afford anything with CLOVER or PACTOR, so all I'm looking for is something that will give me AMTOR (and Baudot RTTY, if possible).

If you just got a new bells-and-whistles all-mode controller, and you can't find anyone who wants your old, obsolete, AMTOR-only controller, send me some EMAIL and let me know what you want for it. But keep in mind that I wouldn't be begging like this if I could afford typical prices.

Thanks,

Bob Johnson

I have a friend. He is a disabled person due to cerebral paralysis. His foots
are not working, hands are more or less OK but he could not make
precision jobs with them.
He has about 10 years an SWL receiver and dreams to be a ham.
There are two obstacles to this.
First- he most probably cannot properly use any morse key and the rules
of ARRL as I know demand the demonstrration of knowlege of morse code.
Second- he spend all his small disability pension to his study in the
university and cannnot afford to pay for any transiever a thousand dollars.

It you can give any ideas hov to hep him it would be great.

Igor
UY5XT

P.S. You can think looking on my call that a said about a Ukrainian student.
No. He is the native American student of California...

Hello Igor. Sure, I can help. First of all, the FCC now allows special
provisions for handicapped people who cannot take an ordinary morse code test.
Either no code or a modified code test (I trust you know already about a
no code technician exam). Secondly, contact "Handi-Hams, C/O Courage
Center, 3915 Golden Valley Rd., Golden Valley, MN. 55422. They will modify
Ten Tech equipment for your friend's disability and may also be able to
loan him a unit until he can afford it himself. 73's...

Subject: Buying an HT -- Advice Wanted
Date: 28 Mar 1994 06:59:32 GMT
Organization: Columbia University
Lines: 18

Distribution: usa
Message-ID: <2n5v8k$6dv@apakabar.cc.columbia.edu>
NNTP-Posting-Host: bonjour.cc.columbia.edu

I am interested in purchasing an HT would like some advice as to what are good models and the costs I am likely to run into. I plan on also using the HT as a scanner, so it must be able to pick up local police, fire, etc. as well as aircraft frequencies. I understand many HTs can get these frequencies but they need to be "modified" before hand, about how much does this cost? I have heard of dual-band HTs but am not totally sure as to what this means -- any helpful comments? One other consideration, I guess I might as well get a fairly powerful model as well (5 watts?) -- additional options (like getting cellular frequencies, a keypad with hundreds of features are nice, but not necessary. Where is the best and cheapest place to get such equipment? Also willing to buy a used model. Please email any responses.

Thanks in advance,

Marc Wollemborg

Bearcat 200channel scanner (Handheld xlt200)

Previously offered for $250

Danmark sells this unit (modified not to recieve Celllular phones)
for $150

I was told "$225" is a "fair" price to ask

Due to problems with $$ here, I'm short on time to wait for someone
to want the radio bad enough to pay $225.
The radio is in good condition and has served its purpose with me.
I've moved on to a mobile scanner with (*catch this*) less channels :)

Therefor, I'd like to offer this radio to the first person willing to
pay $175 plus shipping from Cleveland Ohio. (About $5?)
Your choice of shipping.

If you're interested you can reply via email here.
-if- you have a problem sending mail here, I can also
be reached at ak667@po.cwru.edu

73s, de n8ynr

I am interested in buying a Sony ICF2010 for my parents. If you have
one for sale, please send me an email with condition, accessories and
your asking price.

```

Qty of 2 SFO992B 9Mhz SSB Crystal Filters (one Dentron, one Showa) $10 each

One working Heath 5.0-5.5 Mhz Solid State VFO Part # 110-48 (TRW 800668) for 50 ohm loads. $15 each

Pair of HV BNC connectors (UG-934/U Male, UG-931/U Female sets) $5 each set

Open Air Miniature Trimmers
(3) 3.1-31.9pf (160-130) Singles. $2 each
1 each 160-211, MACBF-11 Butterfly. $2 each
(2) 2.7-19.6pf 160-110 Singles. $2 each
(2) 160-311 Differentials. $4 each
(2) 160-205 Butterfly $2 each

All for $20

Lastly 5 1-6pf Tubular Glass Brass Piston Trimmers. .25" Dia x 1.25" Long
$3 for all

Xref: bga.com rec.radio.swap:3683 rec.collecting:4071 ne.forsale:4929

FOR SALE: FOR SALE: FOR SALE: FOR SALE: FOR SALE: FOR SALE: FOR SALE:

SPECIAL FORCES RADIO SET T-784/GRC-109 Transmitter. CIA nomenclature: RS-1
Small 1950s - 60s "Cold War" vintage Special Forces "spy" radio transmitter.
Covers 3 - 22 MHz in 4 bands, Crystal controlled Pierce oscillator (6AC7).
10 - 15 Watts (2E26 final!) output and Transmitter Pi-network tunes long-wire
antenna from 72 - 1200 Ohms. Has tuning chart, precision tuning controls
which tune each if the three stages individually for maximum neon bulb
brilliance - was designed to be operated by someone with little previous
training. Constructed with highest quality components and mounted in
waterproof case suitable for burial or underground storage. Has a built-in
precision Morse Code key and a KEYER port for use with the AN/GRA-71 keyer
(not readily available) which used to send high-speed bursts of Morse Code
at speeds up to 300 WPM! Completely refurbished by US Army Depot and are
like new. Military tag says it was made by Admiral Corp. This beauty is
a real collector piece and fully usable too!.

This kind of radio equipment is generally very difficult to find and usually
pieces are very expensive especially in serviceable condition. Several hundred
of these sets were released by the government. A dealer from Toronto sells
the complete sets for $350.00. There was a full write-up on the AN/GRC-109
radio set in ELECTRIC RADIO Number 54, October 1993. The set is described
(as the RADIO STATION; RS-1) in CIA SPECIAL WEAPONS & EQUIPMENT - Spy Devices
of the Cold War by H. Keith Melton.

Will sell for $65.00 plus actual UPS shipping costs. Send e-mail for more
information.

NOTE: The R-1004/GRC-190 receiver and the PP-2685/GRC-109 power supply
are available along with documentation.

FOR SALE:

UHF receive downconverter: Use with amateur 2-meter scanning radio,
handy-talkie,etc.

This neat little converter allows you to scan 460 - 464 and 480 - 484
MHz public service bands on any radio that can scan from 144 - 148 MHz.
The converter was made by MC Squared Engineering and is the model HC-U2
with a new AAA battery. It mounts on the BNC connector on top of the
handy talkie and has a female BNC antenna on top that connects to an
external antenna or rubber duckie. Its like new and works perfectly.
Price $35.00 + ups.

  with internal calibration at 7.63V
  OK, RM, TB

1 HP 120AR Oscilloscope 1MHz single channel easy to use scope
  OK, RM, TB

1 HP 650A test oscillator sine waves 8Hz to 11MHz, fully adjustable 0-3Vrms
into 600ohms.
OK, RM, TB
ASK$ 495

2 AN/USM - 338 Military "portable" Oscilliscope manufactured by HP
2 channel, good to 75MHz (mil spec to 50Mhz), with probes & power cords.
OK, PT
ASK$ 250 each

1 Fluke 8000A/01 3.5 digit multimeter calibrated 93-349
with manual & built-in battery pack (4x1.2V Dcells)
OK, BT, PT, MIL$ 679
ASK$ 199

3 AN/PSM 6 portable military analog multimeters, battery powered
missing some accessories
OK, BT, PT, MIL$ 250

2 Weston Model 633 AC clamp volt-ammeter 50-70Hz, Amps to 1000A, Volts to 600V
A & M Instrument, 1 set volt probes, 1 instruction sheet, 1 metal case
OK, PT

1 Varian Associates Partial Pressure Guage Model 974-0036
measures vacuum in Torr
NTT, RM

1 VIC - Vacuum Instrument Company Ionization Guage Control
NT, JK, TB, RM

1 Fluke 893A/01/02 AC/DC Differential Voltmeter
with options -01 battery pack, -02 recorder output
NTT, PT
ASK$ 349

1 Honeywell 1858 Visicorder, Light Beam Oscillographic Recorder
calibrated 10/03/90, no plug ins.
NT, MIL$ 11412.76
ASK$ 925

1 Pacific Instruments Cabinet-Bench MP-1036CP
logic tester, clock speeds 10^0 thru 10^5 Hz, with +-15V, +-20V, +5V
Pulsers, logic switches, and breadboard. AC powered
NTT, MIL$ 200

2 Fluke 8300A digital Voltmeter
NTT, MIL$ 592.25
ASK$ 495

2 Two Channel Tachistoscope
Scientific Prototype Mfg Corp
flash rates from 1mS.

NTT

1 ESI 240 Resistance Bridge, missing 3 nuts
NTT, RM, MIL$ 3162.10
ASK$ 149

1 A & M Instrument Model 5000 Frequency Meter Set 60+-2 & 400+-20Hz, 105-125VAC
NW: 60Hz, NT: 400Hz, PT, MIL$ 803.94

1 Heathkit Oscilloscope
NW, TB

1 Systron Donner model 6152A Frequency Counter calibrated 91-171
NTT, MIL$ 1983

I have the following power supplies available for sale or trade
Please tell me if you are interested in anything. Items listed as NTT
I can test for you, if you are interested.
I can provide additional details on any particular item of interest.
For trade, I'm looking for tube tester, LCR bridge, Gauss Meter, Megometer
I'm selling on a best offer basis, please, no joke bids.
Terms: check or money order in advance, freight charges collect on delivery.

Please respond to Eric Taylor via e-mail: et@csn.org
or phone 303-431-4904

Codes: NT   - Not Tested, but looks good
       NTT - Not Tested but Testable
       OK   - tested; works OK, in good condition
       NW   - tested; Not Working
       JK   - JunK: needs repairs.
       RM   - Rack Mount
       TB   - Tube Based circuitry
       BT   - Bench Top equipment
       PT   - PorTable
       HP   - Hewlett-Packard
       GR   - General Radio
       NEW - new, unused
       MIL$ - Military value
       ASK$ - what I'm asking for it: a current fair market value
       NEW$ - list price when new

Notes: no manuals, unless noted otherwise.
       no connectors, probes, or cables unless noted otherwise.

Power Supplies

Posting for a former ham friend here at work--don't reply to
me--contact him. TNX. Bob Niemi W9FNJ

None of the gear has been checked out--was working when last

used (many years ago). This is all tube equipment!!   Make
an offer.

Heath DX-20 CW transmitter, (if I recall, has a tube lineup something
like 6AG7/6L6, Class C only, 80,40,20,15,11-10 meters, pi-net out, xtal only)
some scratches, and marks.   \
                                           \- vintage flag

Heath HR-10B receiver, 80,40,20,15,10 ham bands only, bfo, calibrator, S meter
decent appearance, pretty panel, dusty, but would probably clean up nice.

Contact Ron Syphard, phone (608) 884 8887 (leave message on machine)
or Email (be sure to leave your phone number) syphard%astroatc@spool.cs.wisc.edu

Azden PCS-6000H 2 meter mobile tranceiver w/antenna
 - 45 watts with 10W low power setting
 - 20 channel memory with scan.
 - Very easy to program.
 - Wide frequency coverage (receive 118-135.995 MHz AM aircraft
   band, 140-173 MHz FM with transmit over 140-149.995 MHz).
 - Built-in tone encoder, numeric keypad on mic
 - Mobile antenna. Base loaded with 5/8 wave stainless whip.

Both are about 4 years old and in perfect working condition. I sold
the truck they were in and don't plan to replace it.

The comparable current model is $340 from Azden + about $50 for the antenna from a mail-order company.

Will sell both for $200, and I'll pay shipping anywhere in the U.S.

No risk purchase: charge it to your Visa, MasterCard or American Express card. If you're not satisfied, the credit card company will ensure that you get your money back.

FOR SALE: FOR SALE: FOR SALE: FOR SALE: FOR SALE: FOR SALE: FOR SALE:

SPECIAL FORCES RADIO SET T-784/GRC-109 Transmitter. CIA nomenclature: RS-1
Small 1950s - 60s "Cold War" vintage Special Forces "spy" radio transmitter.
Covers 3 - 22 MHz in 4 bands, Crystal controlled Pierce oscillator (6AC7).
10 - 15 Watts (2E26 final!) output and Transmitter Pi-network tunes long-wire
antenna from 72 - 1200 Ohms. Has tuning chart, precision tuning controls

which tune each if the three stages individually for maximum neon bulb brilliance - was designed to be operated by someone with little previous training. Constructed with highest quality components and mounted in waterproof case suitable for burial or underground storage. Has a built-in precision Morse Code key and a KEYER port for use with the AN/GRA-71 keyer (not readily available) which used to send high-speed bursts of Morse Code at speeds up to 300 WPM! Completely refurbished by US Army Depot and are like new. Military tag says it was made by Admiral Corp. This beauty is a real collector piece and fully usable by anyone with an Amateur Radio license!

This kind of radio equipment is generally very difficult to find and usually pieces are very expensive especially in serviceable condition. Several hundred of these sets were released by the government. A dealer from Toronto sells the complete sets for $350.00. There was a full write-up on the AN/GRC-109 radio set in ELECTRIC RADIO Number 54, October 1993. The set is described (as the RADIO STATION; RS-1) in CIA SPECIAL WEAPONS & EQUIPMENT - Spy Devices of the Cold War by H. Keith Melton.

When I'm not playing radio on 40CW with them, I use my GRC-109 Transmitter and matching Receiver for bookends in my office! They never fail to provoke questions from visitors.

Will sell the T-784/GRC-109 for $65.00 plus actual UPS shipping costs. Send e-mail for more information.

NOTE: The R-1004/GRC-190 receiver and the PP-2685/GRC-109 power supply are occasionally available along with documentation.

     (Michael Crestohl) writes...

>SPECIAL FORCES RADIO SET T-784/GRC-109 Transmitter. CIA nomenclature: RS-1
                ^^^^^^^^^^^^^ ^^^^^^^^^^
(other stuff about tx...)

>This kind of radio equipment is generally very difficult to find and usually
>pieces are very expensive especially in serviceable condition. Several hundred

(More stuff...)

>Will sell the T-784/GRC-109 for $65.00 plus actual UPS shipping costs.

     That's funny...Fair Radio has had them in the last 3 or 4 catalogs I've gotten from them...and if they run out of an item, they don't print it in the catalog...(I.E. the 10 or so prc-104's they had last spring...in the supplment, but not in the catalog...)

     Their price: $24.95 (Used)

>NOTE: The R-1004/GRC-190 receiver and the PP-2685/GRC-109 power supply
>are occasionally available along with documentation.

     Also from the Fair Radio catalog:
          R-1004: $59.50 (Used-reparable)
          PP-2685: $24.95 (Used)
          PP-2684: (6V/13amp input) $25.00 (Used)
     Along with all sorts of other accessories...
     Just passing along a data point for those that are unfamiliar with other military radio sources...(And the initiated know that even the Fair Radio Sales prices are usually considered high...)
     I do not work for them (and they couldn't pay me enough to anyway...:-) and have no affiliation with them other than I sometimes buy from them as a *last* resort (and I have to be really needing a radio or part pretty bad to call them...) :-)

I have an HP Portable Plus laptop computer for sale.
This would be a nice computer for packet.

The portable plus is an older MSDOS laptop.

Features: (I don't have it here to check the specifics on RAM and dos ver.)
DOS 2.2 (I think) in ROM.
Lotus 123 in ROM
terminal emulator in ROM.
Serial port
big LCD screen
HPIL interface (standard low power serial link)
solid state disk
about 400k ram
software to connect to a host PC for downloading to the ram disk

external floppy drive HP 9121

Down side: It needs a new battery and HPIL
            cables to connect the disk drive.
         Uses HP format floppies are not

Looking for $60

I also have the following to sell:

Commodore 64 and accessories. Many games, Koala pad, modem
    disk drive blows fuse, and has not been troubleshot $65
Zenith color video camera, works great $75
Quattro Pro 4.0 plastic unopened, but no box $20

If I do not sell this in the next week, it will go into
storage for the next 2 years. I am looking for a buyer that will
pick the computer up between Acton or Bedford MA.

From: fcr@ll.mit.edu (Frank Robey)
Subject: TS 820S for sale
Message-ID: <1994Jul18.154944.1781@ll.mit.edu>
Summary: Good HF rig
Originator: fcr@ll.mit.edu (Frank Robey)
Sender: news@ll.mit.edu
Organization: MIT Lincoln Laboratory
Distribution: ne
Date: Mon, 18 Jul 94 15:49:44 GMT
Lines: 33

I have a Kenwood TS-820S HF transceiver with the matching VFO-820 for sale.
The TS-820S is solid-state, with tube final and driver. The 820S has the
digital readout.

160, 80, 40, 20, 15 and 10 meters.
Also covers WWV (15 MHz) receive only.
  tunes 500kHz segment in each band.
CW, USB, LSB, FSK modes.

The radio is real clean. The only problem that I have with
it now is that one panel light is burnt out. I have the new bulb,

I just haven't put it in.

When I got the radio, it had what I have found out is the standard 820S
digital display anomalies. I cleaned the connectors on the display,
and that seemed to fix the problem.
I think that the radio is 8-10 years old.
I have not operated it in the last year except to make sure that it
still works.

I am looking for $375 in order to sell this radio quickly.

I am moving out of town, and already have a radio to use when I get
there. If I do not sell this in the next week, it will go into
storage for the next 2 years. I am looking for a buyer that will
pick the radio up between Acton or Bedford MA.

I have a few bits of amateur radio gear for sale, all together. I'd prefer to
sell to someone in the bay area that could pick it up.

Heathkit HG-10 VFO
Heathkit HW-16 xcvr
(MFJ?) SWR Meter

This is a CW (morse code) rig similar to one I used in high school to talk to
people all over the world. Everything seems to be in good working order.

$80 if you pick it up in Mountain View.

ANTENNAS FOR SALE
==========

1) Telex Hy-Gain DB-10/15 Dual Band Yagi
     3 elements on 10M, 3 elements on 15M
     Full legal limit. Ideal for use with a
     20M monobander. BRAND NEW sealed carton.
     $300 U.S.

2)   Cushcraft 20M 3Element Monobander
     BRAND NEW sealed carton.
     $250 U.S.

3)   Cushcraft R-7 Vertical 40-10M
     BRAND NEW, partially assembled, complete.
     Pickup only. $345 U.S.

4)   Diamond X-500HNA VHF/UHF Fibreglass Colinear.
     This is the BIG one. Great for serious VHFers
      or for a repeater/packet node. BRAND NEW, sealed.
     $275 U.S.

5)   Diamond X-50 VHF/UHF Fibreglass Colinear.
      This is the wee one. Great for serious VHFers
      with smaller aspirations. BRAND NEW, sealed.
      $120 U.S.

6) Carol RG-8X Coaxial Cable, 95% braid. Full reels only of 1000 feet. $190 U.S. per reel (8 available)

7) Telex HyGain T2X Tailtwister Rotor. Too small for my antenna array. Up for one season only. Being factory reconditioned to new condition by Telex HyGain. $425 U.S.

All units are FOB Toronto, Ontario but might be persuaded to ship from Buffalo, N.Y. on one of my regular trips for Ted's Hot Dogs.

Forsale, one very nicely assembled W9GR Digital Signal Processor as featured in the September 1992 issues of both QST and QEX magazines. $195/bo.

The DSP has 10 different filters to choose from. What's more these filters really work! I've used them on 20 meters many a time, and they really make a difference in pulling in weak signals. They are way better than a noise blanker, and can also improve your notch filter immensely.

Filter #1 Combination noise reducer and automatic notch filter.

Filter #2 Switchable simultaneous automatic notch and denoiser filter

Filter #3 Optimized denoiser filter only

Filter #4 Optimized automatic notch filter

Filter #5-9 CW filters (I have not used these extensively)

Filter #5 400 Hz Linear Phase CW Filter (200Hz bandwidth)

Filter #6 600 Hz Linear Phase CW Filter (200Hz bandwidth)

Filter #7 750 Hz Linear Phase CW Filter (200Hz bandwidth)

Filter #8 1000 Hz Linear Phase CW Filter (200Hz bandwidth)

Filter #9 750 Hz Linear Phase CW Filter (30Hz bandwidth)

Filter #10 HF packet (1600/1800 Hz) or RTTY (2125/2295 Hz) bandpass filter. The front panel mode switch selects either the packet tones or the RTTY tones.

I nolonger have any HF equipment, so while the DSP is a pride and joy, it's pointless for me to keep it, and I need the money.

Hello to all who read this message.

I am letting you all know that the Burnaby Radio communications WWW page
is
now running stable, you should be able to check it out at any time.

Some of you had problems before accessing our WWW page, but that problem
should be over now. We have changed servers so our WWW Page should work
all
the time now.

The page is at "http://www.burnabyradio.com/ham/brc.html"

We are: Burnaby Radio Communications Ltd.
         4257 E. Hastings Street
         Burnaby, B.C. Canada
         V5C 2J5
      Phone: (604)298-5444

Fax: (604)298-5455
BBS: (604)298-3283

WWW: http://www.burnabyradio.com/ham/brc.html

Please visit us!!!

And please fill out our form, and you will receive our latest price list.

Thanks.

Have you ever bought anything from Oklahoma Comm Center (1-800-765-HAMS)??

I'm looking at buying a radio mail order from them. They are $30 cheaper than most other stores with free shipping and I'm not sure of thier reliability.

They are WAY up on the north side of OKC (maybe even Edmond) and I'm way down
on the south side. But I've bought several things from them, no problem.
They have a small display area, but are basically geared to mail order.

They've been in business for a few years now. They try to stay competitive
even when Hams want the wholesale price. I've seen em sell a radio for
five bucks over wholesale. I guess there's money in volume...

I've dealt with OCC on 3 occaisions, beginning about Sept. 1994. I have no
complaints with them. I can't speak about return policies or anything, since
I've had no need to return, but I'd encourage you to buy from there.

I have purchased two radios form Oklahoma Comm and have been very happy
with the service, price and the way that I was treated. I don't believe
you can go wrong with them.

I buy ALL my equipment there. I have shoped around, but with their
prices and they pay shipping, they are my ONLY store now....73

I LIVE in OKC, and I buy from them regularly. For the most part
they're nice guys, and they seem to work hard to take care of their
customers. I've made the same discovery, i.e., they're cheaper than
most of the other mail order places. Give them a try, I don't think
you'll be disappointed. Tell them KC5KBC/John gave them a thumb's up!

Add me to the list of satisfied customers - I called to order a used radio
last tuesday, and it was in my hands on Friday (in Denver). The shipment
included MORE accessories than they originally claimed, they didn't charge
for shipment, everything was in excellent shape and well packaged. Definately
pleased at this end.

Hi Greg,

I live a few miles from Oklahoma Comm Center and drop by often for a chat with Mike and Tony. They are the two guys you will most often deal with when calling on the phone. They are both knowledgeable active hams and are glad to share their experiences to help you pick out the rig that is right for you. I have never seen a better price on equipment or support for the buyer. I will admit that they are more geared for mail order than counter sales and if you walk into the showroom, you might wait awhile before they get around to helping you. If you are looking for reassurance, you have it. They are on the up and up and serious about selling you ham gear now and in the future.

P.S. - If you talk to Mike, tell him Glenn said he is a bottomfeeder. If you talk to Tony, have him pass the message to mike. o<:-)%

with base or for pleasure boater who requires these already programmed
frequencies.

Technical specs sheet on the Monogram Radio:

Dimensions: 51mm X 152mm X 210mm
Channels: 16
Weight: 1.9Kg with mike
Battery Drain: .4A standby
               .8A receive
                8A transmit
Programming: PC programming
Frequency Range: This unit tuned for VHF low (148Mhz to 165Mhz)
RF Power: 40W adjustable
FM Hum and Noise: -45dB
Spurious and Harmonics: -70dBc
Channel Spacing: 25kHz
Audio Distortion: <3% @ 1000Hz
RF Out/Input Impedance: 50 Ohms
Sensitivity: .3 microvolt
Selectivity: -70dB
Intermoduation: -70dB

Product Features:
Channel Guard/Digital Channel Guard
Fluorescent Disply
Dual Priority Scan

Sythesized

Field PC Programmable: Microprocessor design provides for personality
programming using an IBM/compatible PC.

Asking $300 cdn (current US Exchange is aprox 38% in your favour)

open to offers of trade for Amateur equipment, like 2M mobile, 6m Mobile,
HF mobile, etc.

newsgroups: rec.radio.amateur.swap,rec.radio.swap,rec.ham-radio.swap

Excellent short wave receiver for SWL or Ham radio.

Many think this R-390A/URR is the best SWL receiver ever made. This
one is a late model (one of the last production runs), made by EAC.
It is big, heavy, uses tubes. Quality look, feel, and performance.
110 or 220 VAC. Even has ovens for oscillator stability.

Has 6 IF selectivity filters (0.1, 1, 2, 4, 8 and 16 KHz).

Also 2 audio filter positions (Wide and Narrow).

2 meters (Line Level, Carrier Level).

Total of 17 knobs (Line Meter sw, Line Gain ctl, Ant Trim ctl, AGC sw,
Limiter ctl, Audio Response sw, Break-In sw, Bandwidth sw, BFO Pitch
ctl, Function sw, BFO sw, Dial Lock ctl, Zero Adj ctl, Local Gain ctl,
RF Gain ctl, Megacycle Change ctl, Kilocycle Change ctl)

Rack mount style (no cabinet, but has all covers). 19 in wide, 10.5 high, about 15 deep.

No speaker. No manual (Fair radio sales has manual).

It is unusually clean, near-new appearance. I can furnish photos with SASE - ask.

$300 plus UPS if shipped.

I want to buy a CW filter for my ICOM Ham Radio.

This can be the 9 MHz series, like the

FL32 (500 Hz BW), or the
FL63 (250 Hz BW),

Or, the FL52A (500Hz BW) for the 455KHz IF.

These fit several of the ICOM radios. Mine is the 751.

How much?

Hi there... I was wondering if you had any motorola Ht's on the 500 mhz
band... my explorer group has recieved authorization from the Police
dept to use their frequencies, and we could really use a few for field
events... We will need one multi channel radio, and the rest can be
dual, or single channel.... Thanks...
 Please send your prices to...

Mike -
Caveat empmtor (buyer beware). Make sure the PD radio shop will pop for the channel elements for any radios you purchase or check the price for "crystalling" the radios - the cost can be prohibitive and, therefore, you might look into buying new or late model used programmable radios. Make sure they support the coding features your department uses PL tone, CTCSS tones, whatever it might be.

Aloha, y'all...

I am looking for a reasonably priced Drake SW8. Does anyone out there have one for sale?

I am interested also in finding out the best prices for new SW8s
as well.

Does anyone know what kind of internal AM antenna the SW8 has?
Is it a ferrite loop? I need to know if I can use my inductive
loop with it. Also, how do you like it? (I have a Drake R8 and
enjoy it immensely).

Thanks in advance....

Aloha...

I'm not so sure my first attempt got out, so here it is again.
Apologies if you recieved this twice.

I am looking for a reliable, reasonably priced SW8. Anyone have
one they would like to sell?

Also, what is the best going new price for the SW8?

Third, what kind of internal antenna does it have for the AM band?
Is it a ferrite loop? I have an inductive loop and wondered if I
would be able to use it on an SW8.

Also, if any SW8 owners have comments good or bad, I'd be interested
to hear them. Thanks in advance.

Aloha,

Patrick Mason

in a c. crane company catalog it sales for 699.95.
it has a outside mounted antenna mounted in the front of the unit.

I want to buy a CW filter for my ICOM Ham Radio.

I need the FL52A (500Hz BW) for the 455KHz IF.

These fit several of the ICOM radios.

How much?

3	6C4		1	50C5	
2	6CB6		3	350B	WESTERN ELECTRIC
1	6CV5	HEWLETT PACKARD	1	35C5	HITACHI
1	6CW4		1	5814A	SONOTONE
1	6DC6		1	5963	
1	6DJ8	GE	1	7189	GE
1	6E5		1	7199	RAYTHEON
2	6J6	GE	1	738	AMPREX
1	6K6		1	7868	
2	6V6				

I also have the following tube related stuff

RCA Receiving tube manual RC23 8-64. Fair condition complete except
    for last page and back cover.
18 misc 7 pin tube sockets.
20 8 pin tube sockets mostly ceramic.
40 misc 9 pin sockets.
7 7 pin socket straightener (looks like a metal tube)
5 9 pin socket straightener (looks like a metal tube)
1 7 pin tube straightener

The above tubes and supplies are for sale on a bid basis. I would prefer to sell as a complete lot. Bids on a portion of the above will be considered, but there will be a minimum order of $20. Submit bids and I will sort out the bids in a week or so.

I also have the following test equipment and power supplies for sale. I will take offers on these.

HP312A Wave Analyzer 225
HP400E Voltmeter 100
HP412AR Vacuum Tube Voltmeter 100
HP740A Voltmeter / Standard 150
HP1740A Oscilloscope 350
HP1900A Pulse Generator with 225
        1905A Rate Generator
        1908A Delay Generator
        1915A Variable Transistion Output
HP1905 Rate Generator
Frequency 25 Hz to 25 MHz
Period Jitter < 0.1%
Rise Time < 5ns.
Width < 10 ns.
HP1908A Delay Generator
Delay Range 15 ns. to 10 ms.
Jitter < 0.1%
Rate Input 0 to 25 MHz
1915A Variable Transistion Output
Amplitude +/- 1.25V to +/- 25V into 50 Ohm (x2 open circuit)
Transistion Time 7ns. to 1ms.
Baseline offset +/- 1.5V

HP3312A Function Generator $695
Outputs sine, square, rectangular, +/- ramp, AM, FM, sweep, triggered, gated
Range .1 Hz. to 13 MHz in 8 decade ranges
Output +/- 10 V into 50 Ohm (x 2 open circuit)
Flatness sine wave < +/- 3% 10Hz to 100kHz
Attenuator 1:1 to 100:1 in decade steps > 10:1 continious control
DC Offste +/- 5V into 50 Ohm
Modulation Types internal or external AM, FM, sweep, triggered, gated, or burst
AM Modulation 0 to 100% .01Hz to 10 kHz int DC to 1 Mhz ext
FM Modulation 0 to +/- 5% int. DC to 50 kHz ext.
Sweep > 100:1

I have the following Hewlett Packard Digital meters for sale.

HP3457A Digital Multimeter $1300
HP3457A Digital Multimeter No Serial Number $ 800
6 1/2 digit GPIB Digital voltmeter. Full scale D.C. and true RMS A.C. ranges from 30mV. to 300V. Resistance 30 Ohm to 3 GOhm.
D.C. Current 300uA and 3A. Frequency measurement 10 Hz. to 1.5 Mhz.
Math functions include NULL, SCALE, OFFSET, THERMISTOR LINEARIZATION,

DB,
DBM, LIMIT TESTING, and STATISTICS. These are complete units with manual.
Like new condition. Ask for details.

HP3469A Digital Multimeter 75
3 1/2 digit multimeter. D.C. Volts 100 Mv to 1000 V. A.C. Volts 1 Mv to 1000V 20Hz to 4Mhz, to 10Mhz on 10Mv to 1V range. D.C. Current 1 uA to 10mA. Resistance 1 Ohm to 10 MOhm. This is an older unit, has a replacment panel meter in it. This is among the most sensitive general purpose multimeters built. With manual.

HP3478A Digital Multimeter No Serial Number $ 300
5 1/2 digit GPIB Digital multimeter. Full scale D.C. ranges from 30mV. to 300V. True RMS A.C. 300mV to 300V. Resistance 30 Ohm to 30 MOhm.
A.C. and D.C. Current 300mA and 3A. These are complete units with manual.
Like new condition. Ask for details.

HP3490A Digital Multimeter $ 200
5 1/2 digit multimeter. D.C. volts .1V to 1000V. A.C. 1V to 1000V. Ohms 100 to 10M. With manual.

HP3810B Total Station Electronic Distance Meter $3000

HP5246L with 5253A plugin 500 Mhz. Counter $175
HP5246L Basic Counter
Frequency Range dc to 50 MHz,
Time Base .1uS to 1S
Coupling A.C. D.C.
Sensitivity 100 mV.
HP5253A Hetrodyne Converter
Frequency Range 50 MHz to 512 Mhz
Sensitivity - 13 dBm to + 13 dBm
Coupling A.C. 50 Ohm

The following are B size HP VXI cards
- E1364 16 Channel General Purpose Relay 100
- E1332 Counter Timmer 300
- E1361 Relay Matrix 2ea 100
- E1326 5 1/2 Digit Multimeter 400

I have 3 Western Electric 350B tubes that I am taking bids on.
The current bids range between $4 and $85 each. I am wondering
what they are and what they are worth.

Thanks

Ray

Trying to raise money to buy another vehicle:

SCSI ZIP disk drive. 100 meg removable drive. DB25 SCSI connector
cable. All original disks including Win95 drivers and two 100 Meg
(DOS formatted) removeable disks. Original boxes and materials.
One disk currently includes the ZIP utils for DOS, the other has
almost the entire slackware 3.0 install files. (all but Q? kernels)
Can erase if necessary. About 1 month old - like new condition.
(eventually upgrading to Jaz)
                        $180 o.b.o. with both disks

Alinco DJ-580T 144MHz/440MHz dual bander
     broadband coverage of both amateur bands
     speaker mic
     charging stand
     high performance dualbander whip (5dB)
     manual(s)
     modified for aircraft (AM) xmit/rcv and 800MHz rcv
                        $275 o.b.o. for all

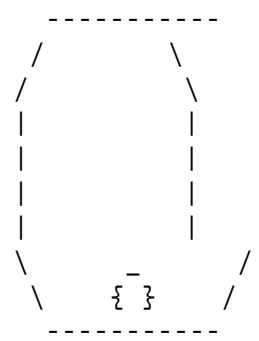
radio.packet,rec.radio.scanner,rec.radio.shortwave

HOW DO I make this INCREDIBLE AM RADIO BOOSTER, for AM DXing ?



Simple Sketch

I am looking for actual plans to build the above AM Antenna Booster device. It is a REMARKABLE device in that it takes no power or batteries, does not actually attach to your AM radio in any way, just needs to be near it, and IT BOOSTS FARAWAY AM RADIO signals like you would not believe ! It also appears to be incredibly simple to build, if only I knew how.

This device, which I have seen once is made of wood, the large cirlce is a hoop of (perfectly circluar unlike the drawing) and about 18 inches in diameter, and the hoop width is about 3 inches, there is a band covered with cork in the middle of this hoop I presume covering copper windings.

The small circle in the bottom of the larger hoop is a small cylindrical device of unknown composition. The axis of the hoop and the small cylinder are parallel. The small cylinder in tangent to the hoop's inside.

There is also a dial that I assume tunes the device.

I hear that it is an inductively coupled LC resonator (equivalent to a small loop) which should be regarded as the primary of a tuned RF transformer, the secondary for which is the ferrite-cored loop within your ordinary AM radio.

They further went on to say that as such one needs to couple them (your AM radio and this device) in the appropriate manner, depending on the orientation of the ferrite in the AM radio (they find its not necessary to put the secondary (your AM radio) into the loop).

Any help and actual plans would be GREATLY APPRECIATED:

Ralph@TeamInfinity.com

I have forsale an Astron RS-35M power supply. It
outputs 13.8v DC for use with Ham gear or anything
else. Furthur, it provides clean, filtered, current at
up to 35 amps! Enough "juice" for even the most
demanding stations. It was bought new last year, and
I have all the original manuals, schematics, etc. It
has crow bar short circuit protection as well. It also
have two accurate front mounted panel meters, one
displays the current voltage and the other one
displays the ammount of current currently (no pun
intended) being drawn. They really help in
monitoring the station conditions.

I am selling this one as I do not need anything as
large as 35 amps for my packet station -- a mere 5 or
7 amps will suffice. So if you have a good smaller
supply, and want to trade-up, I would be interested.
Otherwise, the price is $150 plus shipping or BEST
offer. I believe this to be a fair price, since Astron
makes probably the finest power supplies around,
and the meters add to the value of the product.

Thanks,
Seenu

I have for sale a Santec ST-20T 2 meter HT for sale.
It is truly an excellent HT. I am currently using it
for packet with my AEA TNC. It is in great shape
too! It features:

- 142.000 - 150.995 Mhz Coverage
- 10 Memory Channels
- CTCSS Tone encoding
  (with memory)
- Scaning in many diff. modes
- DTMF Tone encoding (with
  memory)
- PLL Tranceiver Circuit
- 5 watts HIGH power, and
  500mw LOW power settings
- Operates on anything from
  7.5V to 16V for flexibility
- Full LCD frequency and status
  readout
- Lightweight
- Programmable custom offsets any
  repeater.
- LCD display is backlit for nightime
  useage.
- Adjustable squelch and volume
  controls.
- Accepts standard ICOM series of
  batteries for compatiblity.
- Plus much, much more...

Also comes with :

- Hi-gain "rubber-duck" antenna
- 300 maH Battery Pack
- ICOM BP-4 Battery Case

(allows you to use rechargeable
ni-cad batteries with your HT)
* MFJ-313 VHF Converter
(allows use of HT from 154-
164Mhz)
* HM-15 Speaker Microphone
(allows you to keep HT in pouch
while you remotely use it, nice!)
* Leather carrying case for HT

I am selling this equipment simply because I want to buy a 440mHz HT to use with some of the local repeaters. As such, I would like to sell this for cash. Comes with schematic, complete owner's manual, etc.. Ready to go! Will sell to first $225 or best offer. Keep in mind that this does come with the BP-4 battery case and Speaker Mike and MFJ VHF Converter and leather carrying case.

Thanks,
Seenu

I also have an AEA AT-300 antenna tuner for sale.
Perhaps the best description for it comes from it's
box:

"The AT-300 Antenna Tuner optimizes the
performance of your antenna and transmitter by
providing adjustable impedance matching.   The AT-
300 also measures the power and SWR which allows
you to tune the SWR to the lowest ratio possible for
the selected frequency. With ease of opertation in
mind, the AT-300 also features a precision-

frequency compensated dual-movement SWR meter,
and an adjustable high/low poewr selector. The low-
pass design provides harmonic attenuation for lower
TVI potentials. This also enables you to match a
much wider range of antenna impedances."

Features:

- Back lit SWR meter
- Has balanced output as well as SO239 connectors
- Can handle three antennas and a dummy load! Has tuner bypass feature.
- Can handle up to 300 watts, continuously.
- Low power setting allows efficient useage for QRP operations.

I'll also throw in a Heath Kit RF Cantenna dummy
load. The dummy load allows you to tune your
transmitter without actually transmitting. I'd like to
get $125 or best offer on this high-end tuner and
dummy load.

Thanks,
Seenu

Sony ICF-2010 receiver for sale.

Portable general coverage receiver with direct frequency entry
and display, 4 programmable timers and builtin antennas. Band
coverage:

    AIR 116-136 MHz
    FM   76 - 108 MHz
    AM   .150 - 29.9999 MHz

Will receive AM/FM/USB/LSB/CW. Has sychronous detection to help

reduce distortion and adjacent frequency interference. I have
original box, manual, and a dust cover.

$250 shipped COD or trade for a multi-mode 70cm rig such as the
FT-790, or a transverter for 23 cm or 13 cm.

73,
Todd

Anyone know of any mods for the Yaesu FT-530 HT?

Also, I would be interested in buying any Yauesu accessories anyone
has available, including batteries, speaker-mics, etc.. Let me know
what you have.

Thanks,
Seenu

I have for sale a Santec ST-20T 2 meter HT for sale.
It is truly an excellent HT. I am currently using it
for packet with my AEA TNC. It is in great shape
too! It features:

* 142.000 - 150.995 Mhz Coverage
* 10 Memory Channels
* CTCSS Tone encoding (with memory)
* Scaning in many diff. modes
* DTMF Tone encoding (with memory)
* PLL Tranceiver Circuit
* 5 watts HIGH power, and 500mw LOW power settings
* Operates on anything from 7.5V to 16V for flexibility
* Full LCD frequency and status readout
* Lightweight
* Programmable custom offsets any repeater.
* LCD display is backlit for nightime useage.
* Adjustable squelch and volume controls.
* Accepts standard ICOM series of batteries for compatiblity.
* Plus much, much more...

Also comes with :

* Hi-gain "rubber-duck" antenna
* 300 maH Battery Pack
* ICOM BP-4 Battery Case (allows you to use rechargeable ni-cad batteries with your HT)
* MFJ-313 VHF Converter (allows use of HT from 154-164Mhz)

    *   HM-15 Speaker Microphone
         (allows you to keep HT in pouch
         while you remotely use it, nice!)
    *   Leather carrying case for HT

I am selling this equipment simply because I want to
buy a 440mHz HT to use with some of the local
repeaters. As such, I would like to sell this for cash.
Comes with schematic, complete owner's manual,
etc.. Ready to go! Will sell to first $225 or best
offer. Keep in mind that this does come with the BP-
4 battery case and Speaker Mike and MFJ VHF
Converter and leather carrying case.

Thanks,
Seenu
(smh1@crux1.cit.cornell.edu)

PRICE REDUCED!!! PRICE SLASHED!!

This HT will go to the first $199 for the
entire package, or best offer.

========== ITEMS LISTED THIS WEEK ==========

KD4GAN Dennis 919-848-4883 before 2:30 PM M-F before 10 PM on weekends Raleigh

For sale: 1) Kenwood TH45AT HT, 440-450 MHz, 14 memories, wall charger, 7.2v 600 mAh battery pack. $225.

2) DC1 DC adapter for above radio. $22.

3) 3) PG3E cigarette lighter cord with filter for the DC1. $22.

4) BT6 empty battery case holds 6 AA cells for above radio. $20.

5) PG2V DC cable for the DC1 adapter. $10.

6) KNB5A 7.2 V, 800 mAh nicad battery pack, new. $50.

All accessories will fit the TH45AT, the TH25AT and TH55AT.
Will also consider a trade for a 2 meter HT of equivalent value.

KD4FSN Chris 919-833-4438 please leave a message Raleigh

For sale: 1) PC tape backup unit. 5.25" half height using 10 meg DC-1000 cartridges. Runs from your floppy controller. Comes with 10 to 15 cartridges and software drivers. $40.

KD4NMH Sam 919-380-0743 Cary

Wanted: 1) HF antenna tuner.

Emily 919-851-9667 or KD4WTJ Phil 919-380-0485 or RARS BBS Cary

Wanted: 1) 2 meter crystal pairs for 146.04, 146.88, 147.15, 147.225 repeaters and any other Raleigh/Cary frequencies for a Regency 2 meter rig.

KD4WTJ Phil 919-380-0485 or RARS BBS Cary

Wanted: 1) 150' of #6 wire for equipment grounding purposes.

KS2Z Todd 919-954-0649 Raleigh

Wanted: 1) 2 meter mobile rig. More power the better. The less expensive the better.

KD4TEB Gary 919-528-2105 please leave a message Creedmore

For sale: 1) A pair of Tandy DT-100 dumb terminals. Manufactured by Wyse for Tandy and emulate the Wyse model 70 terminals. Full on board system set up when you power up. Work well with TNCs for packet. Never used, virtually new. $50 each.

AB4OZ Allen 919-787-1111 Raleigh

For sale: 1) Ringo Ranger 2 meter antenna. $35.

2) Ringo Ranger 220 MHz antenna. $30.

3) VIC-20 computer with cassette recorder and some tapes. Includes a printer interface which is a serial to parallel converter. $35.

4) Intel MCS51 system design kit. 12" by 15" open board with keyboard and 1 line LED display. In working condition. $25.

5) Tandy model 100 laptop computer with a disk drive/ video interface. The interface plugs into the computer and has a 5.25" disk drive and an output for a monochrome monitor with a choice of 40 or 80 column display. The package includes a VM2 monochrome monitor, data cassette recorder, bar code wand for scanning in bar coded programs, cable for the internal 300 baud modem, a serial port for an external modem, a Centronics compatible parallel port and software including a built in text editor, BASIC and a terminal emulation program and more. $195.

6) Commodore 64 with Oki printer. About 20 games on disks. Comes with a disk drive but the drive does not work. $45.

N4ZBB Ken 919-851-3744 please leave a message Raleigh
packet cluster or internet cnc23a@bnr.ca

For sale: 1) Hand held AM aircraft transceiver. Narco 800HT with new battery pack. Comes with charger. $300.

2) Chinon CDS-431 CD ROM drive with SCSI interface and extra cady. Comes with software for installation into your system, and an Encyclopedia. MPC compatible, continuous 150K per second throughput. $250.

KD4EWG Kelly 919-870-0315 Raleigh

For sale: 1) Uniden BC760XLT 100 channel mobile/base scanner. Covers 29-54 MHz, 118-174 MHz, 406-512 MHz, and 806

956 MHz. Comes with mobile mount, cable, indoor telescoping antenna and Antenna Specialists trunk lid mount mobile center loaded scanner antenna. $220.

KB4RZ Rick 919-782-1616 Raleigh

Wanted: 1) Keyboard and documentation for a Panasonic Senior Partner portable computer. The computer has a 9" monitor, a pair of floppy drives and a printer all built in. The model number is RLH7000WA.

Rusty Bryttan home 919-942-4741 between 6 and 11 PM, work 919-992-2620 Chapel Hill

Free 1) Video tape recorder model Concord VTR-800. Black and white only, 1/2 inch tape. Condition unknown.

2) Motorola CCD camera model 51120C black and white. Comes with a pair of spare vidicon tubes and manual. Camera not working.

3) Motorola 15" monochrome video monitor with white phosphor. Positive video input, open frame with external power supply. Working, no documentation.

4) DEC dual data cassette tape drive model TU60. No documentation. Condition unknown.

5) Pair of Shugart SA-801 8" single sided floppy drives. In a case with power supply. Assumed to work. Willing to photocopy Shugart SA-800 documentation if desired.

Subject: cellular phone alternative
Lines: 8

I recently ran across a device that will allow remote phone service (without di
rect use of a landline) without requiring cellular phones or cellular service.
Unfortunately, it is not licensed for use in the US by the FCC, and is for expo
rt only. If there is anyone on-line outside the US who is interested, I would
be happy to forward on the manufacturer.
This would be ideal for countries with non-exisent, unreliable, or expensive
cellular phone service.

AB4OZ Allen 919-787-1111 Raleigh

For sale: 1) Tokyo High Power HL-30V 2 meter amplifier. 1 watt in produces 5 out, 15 watts in produces 35 out, very small, FM only. $50.

K4SVS Lloyd 919-772-1622 Garner

For sale: 1) Kenwood TS700SP all mode (AM FM CW SSB) 2 meter transceiver with built in digital frequency readout, operates on AC or DC. Includes a mic $350.

2) Kenwood VFO-700S remote 2 meter VFO. Works with the TS700 or TS700SP. $50.

Items 1 and 2 together for $375.

KD4RGA Darrell 919-477-1078 Durham

Wanted: 1) Assembly/tuning information for an Avanti model MR101 10 meter vertical antenna.

KB4MDZ Chuck 919-467-5787 before 10 PM Cary

For sale: 1) Kenwood TH21BT small 2 meter HT, 1 watt and 150 mw out, includes an extra PB21 battery pack with new nicad cells with increased capacity to 220 mAh up from 180 mAh, two wall chargers, CTCSS encode dip switch, RCA style connector to BNC adapter for use on the antenna connector, service manual. $170.

KC4YIN RE 919-772-4648 please leave a message Garner

For sale: 1) Kenwood 241A 2 meter mobile rig. Output is 50, 25 and 5 watts. Includes a DTMF mic, rig is very compact. Less than 1 year old, good condition. $275.

2) Kenwood RC20 remote control head for the above rig with extra long cables. $125.

Items 1 and 2 together for $375.

3) 2 meter 5 element beam antenna. $50 or best offer.

K4UL Roy 919-893-5485 Buies Creek

For sale: 1) Connect Systems repeater auto patch. Works well. With manual. $125.

N4ELM Dave 919-872-8520 evenings after 4 PM Raleigh

For sale: 1) Kenwood TS50S HF mobile rig. 100 watts out, covers
              160-10 meters, general coverage receiver. Operates
              on AM, FM, SSB and CW. Many features, practically
              new (acquired in April '93). Comes with the box,
              manual, standard mic, DC cord and an extra DC cord.
              $1000 or best offer.

           2) Icom IC2AT 2 meter HT. 1.5 watts out with the
              included BP3 battery pack. Rubber duck antenna, plug
              in wall charger, DC1 12 volt converter, CP1
              cigarette lighter adapter, HM9 speaker mic, original
              Icom leather case, box and manual. Excellent
              condition. $200 or best offer.

           3) NEC ultralight laptop computer. 8.5" X 11", 1" high
              when closed, 8086 processor, 640 KB RAM, 2 meg ram
              disk, 1 serial and 1 parallel port, internal 2400
              baud modem, backlight LCD screen, DOS 3.3, Laplink
              software and ROM menuing system. Has been
              retrofitted with a standard 9 pin male connector on
              the serial port. Internal battery is dead but works
              fine from an external 12 volt source. Comes with
              power cables to connect to 12 volts. Been used on
              packet. $200 or best offer.

Wanted: 1) 9600 baud (preferably) pocket modem for use with a
              palmtop computer. Should be self powered (battery)
              with a 9 pin DB type connector.

AIOK   Jerry   919-870-7005   Raleigh

Wanted: 1) Need to borrow a 2 meter rig for about 3 weeks for
              Skywarn packet testing.

    ============== ITEMS LISTED THIS WEEK ==============

KD4BFJ   Brian   919-554-1279 or internet brianh@exide.com
         Wake Forest

For sale: 1) Epson 8088 PC with 640 KB RAM, monochrome display
              and a pair of 360K floppies. $100, negotiable.

           2) 80286 10 MHz motherboard with 1 MB RAM, 150 watt
              power supply and case. No cards or disk drives. $75,
              negotiable.

K4GHJ   Don   919-782-5776   Raleigh

For sale: 1) Star NX1000C Rainbow color printer in excellent condition $95.

KE4CDI Charles 919-639-1049 Pleasant Grove

Wanted: 1) 2 channel 6 meter rig in the $35 to $50 range.

KD4QZZ Harry 919-772-8925 Raleigh

Wanted: 1) 2 meter directional antenna for SSB work.

2) 70 cm directional antenna.

3) 70 cm vertical.

4) UHF TV band antenna.

5) Light duty antenna rotor.

6) 2 meter synthesized transceiver for packet use.

AB4OZ Allen 919-787-1111 Raleigh

For sale: 1) A pair of Toshiba laptops, a model 1000 and a model 1100. Both have a single 720K floppy drive, 640 K RAM, internal 1200 bps modem, a serial and a parallel port. The parallel port will run a Toshiba add on disk drive. Each machine includes a battery charger. The model 1100 can support a second internal disk drive. The model 1000 includes a non volatile RAM disk. $185 each or a special price for the pair.

Wanted/Trade: 1) Have a Seagate model ST225 20 Mb hard drive to trade for a working 1.2 Mb or 1.4 Mb floppy drive.

KA1NSI Mike 919-897-4817 Angier

For sale: 1) Kenwood TS140 all mode all band HF transceiver in excellent condition. $625

KJ4SO Woody 919-870-1044 days, 919-848-1844 evenings Raleigh

For sale: 1) Kenwood TH415A 440 MHz HT less than a year old, like new condition. Has a low power position, DTMF pad, built in CTCSS encode (decode not installed). Includes wall charger, standard 8.4 volt, 500 mAh battery (provides 2.5 watts out), SC12 soft case, box and manuals. $250 for the package

2) Accessories for a Kenwood TH415A: BC7 drop in quick charger, PB1 12 volt 800 mAh (provides 5 watt

output), PB4 7.2 volt 1600 mAh battery, SC13 large
soft case (fits the rig with the large battery
packs). $175 for the package.

Items 1, and 2 together for $300.

Wanted: 1) FM adapter for an Icom 551 or 551D 6 meter multi
mode rig.

KD4DSJ David 919-822-5031 Fayetteville

For sale: 1) Alinco DJ180 2 meter HT. Like new with box, manual,
wall charger, MFJ speaker mic, Alinco DC adapter and
2 power cords. $200 for the package.

KD4KMI Rodney 919-364-7420 Rougemont

For sale: 1) Pyramid Gold series regulated power supply model
PS14G, 13.8 volts 10/12 amps. $45.

KB4MDZ Chuck 919-467-5787 before 10 PM Cary

For sale: 1) Kenwood TH21BT small 2 meter HT, 1 watt and 150 mw
out, includes the standard and an extra PB21 battery
pack, both with new nicad cells with increased
capacity to 220 mAh up from 180 mAh, two wall
chargers, CTCSS encode dip switch, RCA style
connector to BNC adapter for use on the antenna
connector, service manual. $170.

Subject: Trade: My 2m Multi-mode for your 2m FM only rig
Message-ID: <CC7s9r.Kr4@chinet.chinet.com>
Followup-To: rec.radio.swap
Summary: Trade Icom IC-245 for FM only rig
Organization: Abacus Computers - You Can Count On Us
Distribution: usa
Date: Mon, 23 Aug 1993 13:32:15 GMT
Lines: 27

I am using SSB and CW less that I thought, seems I work FM & Packet and
I can't put up both a vertically and a horizontally polarized antenna.
So, I am looking to trade my Icom IC-245 2m FM/CW/SSB rig for an
FM only rig.

Details of the IC-245:

    144-147.999Mhz
    10 Watts/1 Watt
    FM/SSB/CW
    Tuning in 5Khz FM, .1Khz CW & SSB
    Digital Tuning/Dual VFO's/Any offset
    (Uses both VFO's during repeater operation)
    RIT, AGC (Fast/slow)
    Mobile mounting bracket & mike
    Power: 12VDC @ 5 Amps

Looking for: Any FM only unit with digital tuning. Would like, but not
needed: Memories, CSTSS, DMTF, 25 watts, AC power (dream), etc.

Please email me or contact me at the number in my .signature. If needed, a
little cash could flow in either direction to complete the trade.

From: acp@cray.com (Anthony Peterson)
Subject: WANTED: Fisher R-200-B FM-AM Multi-Band Shortwave Tuner
Message-ID: <1993Aug23.112844.27329@hemlock.cray.com>
Lines: 18
Nntp-Posting-Host: palm24
Organization: Cray Research, Inc.
Date: 23 Aug 93 11:28:44 CDT

I'm looking for a Fisher R-200-B FM-Stereo, AM Multi-Band
Short Wave Tuner.

This tuner was made in the mid-sixties and featured 3 short
wave bands as well as the traditional AM and FM bands. It's
appearance is quite similar to other tuners of that vintage.

Other Fisher components I'm looking for are the model 400-CX
Stereo Master Control (Pre-Amp) and the model SA-1000 Stereo
Power Amp.

If you should have any of these components or know of where I
might be able to find them I'd appreciate hearing from you.

Thanks

Tony Peterson (612) 422-8889 or (612) 683-5621 acp@palm.cray.com

ICOM IC-R1 for sale

I have an ICOM IC-R1 handheld communications receiver for sale. I bought this on a whim in Japan 2 years ago. I was amazed at it's size, capability, and quality. But...I hardly use it. It is in perfect condition, although the internal NiCad battery is getting a bit weak. Here are a few specs from memory:

100 discrete frequency memories
10 scan bands
2-905 MHz coverage (no gaps)dor full performance, , reduced performance
100kHz - 1300 MHz
AM, FM, Wideband FM demodulation
Lots of other bells and whistles - clock wakeup, memory scans, etc.

2 caveats - the original manual is in Japanese (I have a faxed xeroxed English version - readable but poor quality), and the battery charger input voltage is 100 VAC. I have a stepdown transformer (120-100 V) so I used this charger. I'm sure a 120 V charger is available. I have a carrying case and a few additional antennas, adaptors, etc. that would come in handy.

I called a local radio store, and new ones go for $489. I'm asking $375 OBO. Contact Steve at 408-738-2888 x5080 days.

The English manual is available from ICOM parts for about $5. ICOM updated
their Japanese manual last year but not the English translation. If you
read Japanese, the Japanese manual contains additional operating information.

The 100 Volt charger works just fine on 120 volts. No stepdown transformer
is required. I have purchased a few stepdown transformers, however, I discovered
that Japanese consumer stuff runs just fine on US voltages.

Want to trade all of the following + or
- cash for a 50's or 60's convertable
car in useable shape for cruising.

I gathered all of this equipment in order
to do 2-way radio repair in my home, since
I now work for the State of Florida, I
have no need for it.

1. Marconi TF-2015 RF am-fm-cw generator
   10-520 Mhz. w/int. modulation, very
   clean output w/manual.

2. Tektronix 465 scope w/digital storage,
   100+ mhz dual trace w/probes

3. McGraw-Edison #920 FM Deviation meter
   25-1000 Mhz.

4. Keithley #179 Digital Voltmeter (trms)
   bench type, AC only

5. Ramsey CT-50 frequency counter

6. Eico 950B Resistance-Capacitance-comparator
   Bridge

7. Hickock frequency counter 4 cps to 1 Mhz.

8. motorola 2-tone audio generator model
   S-1333 w/delay

9. Ohmite Resistor cabinet w/assorted resistors

10. Motorola 15 Amp 13.8 vdc power supply w/crowbar

11. Paco C-25 capacitor checker

12. Seco Variac

13. Weller Bench soldering iron

14. Heathkit AC VTVM

15. Bird #43 Wattmeter w/leather case
    and 9 elements

All of the above are in working order

and are located near FT. Myers, Florida

thanks

Jim N4JDP (813) 675-6885 6-9 PM Eastern or weekends

I only check my mail approx. 1-2 times a week,
so call on phone if possible.

I have a Tektronix 465 100 Mhz.

scope in very good condition.
It was a special order by General
Electric for one of their test benches,
it has a digital storage unit on top
instead of the DMM.

It has dual trace, delayed sweep and
many other functions of which I have
not had a use.

I have the front cover and a 10:1 probe
for it.

I was asking $650, but since have been
able to sell some of my other equipment
and can now let it go for $475 + shipping.

It is located just East of Fort Myers, Fl.

Marconi Instruments
Model # TF-2015

RF AM/FM signal generator

compact size

very clean output, can be used as IF injection

10-520 Mhz.

nice small signal generator, I have used it
for repair of Vhf and UHF commercial receivers.

I now have access to equipment at
work and this unit sits idle

$350 + shipping

Due to some major changes in my life I am forced to
sell all of my nearly new ham radio gear. All of the
equipment is less than one year old, and was purchased by
me.

Here is the list:

Kenwood TS-690 -	$ 1,075.
MFJ 948 Tuner	$ 75.
Astron RS-35m Power Supply	$ 95.
Kantronics KPC-3	$ 65.
Alinco DJ-580 Dual Band HT	$ 275.
MFJ - 1796 multi band vertical Antenna	$ 100.

Does anyone know any radio swap meet in the bay area, I went to a
swap meet at Ampex about two year ago and would like to know if
there is any scheduled radio swap meet recently.

Thanks.

Keywords: Printing Calculator

Bear with me for posting to a group that may not be for this purpose but
I'm desperate to find several of these pocket sizeed older printing calculators.
Prefer working condition but would consider dead ones that are complete units.

Need - Casio CP-10 or Radio Shack EC 3008 (pocket sized & rechargable)
     (Have time mode; can print current time on tape)

If anyone has one that's just gathering dust, please contact me. Post
to the group, e-mail or phone.

OR, does anyone know of any other battery powered calculator currently
available on the market which provides printing the time??

Thanks,
Jim Stoner   Day - 408-276-5298, Eve - 510-256-0935

I have various hardware items for amateur satellite radio for
sale/trade/etc. I am basically trying to get rid of them, but still would
like to see a fair price.

For sale:
        10' steel tripod and mast
        Alliance AZ rotator and controller
        Kenpro EL rotator and controller (also fiberglass boom)
        18 element 435 MHz CP beam (RH and/or LH sense, 12V remote)
        50+' 9915 coax
        50+' coax -- semi-hardline...but not sure of type off hand

I will deliver them anywhere (in general PNW area). Make offer...(yes, I
usually like to see the prices posted as well).

Call (503) 222-7493
or e-mail   harden@romulus.reed.edu
            harden@cc.pdx.edu
Thanks de Doug N6WFD

Subject: Discone Antenna, Antenna Tuner, & Active Antenna FOR SALE
Message-ID: <1992Jun5.192552.15544@chinet.chi.il.us>
Date: Fri, 5 Jun 1992 19:25:52 GMT
Distribution: usa

Organization: Abacus Computers - You Can Count On Us
Lines: 38

For sale to raise money for other Ham equipment:

     Radio Shack Discone Antenna (Retail $59.95)
     o Full range VHF-UHF receiver antenna
     o Transmit on 2M, 220Mhz, 440Mhz, and 23cm
     o Chrome steel construction
     o PL259 connector
     o Ideal for scanner or multi-band Xmit
     o Never installed out of doors, MINT condition
     o New as of last Xmas
     o Price $45.00 + Shipping

     Grove "Minituner" (Retail $69.95)
     o Receiver tunner covers .1 to 30 Mhz
     o Prevents overload and intermod problems
     o Ideal for use with most SWL receivers
     o A basic tunable front end for your receiver
     o Complete with PL-259 connector in and 1' Coax out
     o Needs no power supply
     o Has bypass & ground positions
     o Price $30.00 + Shipping

     Heathkit Active Antenna
     o Active Antenna for .1Mhz to 30 Mhz
     o Includes 9VDC power supply
     o Has 12" whip for indoor use,
     o PL-259 connector to connect to external antenna or wire
     o Price $10.00 + Shipping

The Discone was a mistaken gift from a well meaning friend, the other two,
I don't need since I got a transceiver with an MJF antenna tunner.
Shipping will be from Winchester, VA via UPS. Flexable payment methods,
COD, money order, certified check, or personal check with 7 days to clear,
all OK. I trust you if you trust me.

Subject: TVRO Dish - Paraclipse 12FT H-H For Sale
Message-ID: <Bpw4F5.MH8@gator.rn.com>
Organization: The Gator BBS -- Email/News/BBS 219-289-0777
Date: Mon, 15 Jun 1992 14:04:16 GMT
Lines: 34

12 foot Paraclipse Horizon to Horizon TVRO Dish

comes complete with:
          24V COG H-H Belt Drive
          Feed Cover
          Seavey ESR-124 Ku/C band feed
          M/A-COM 85 degree C band LNB
          Panasonic 2.5db KU LNB
          Guide wires
          Installation Manual

This Dish is 4 years old -- and hasn't been used since November
of 1990 --

Paraclipse is a commercial grade dish -- not a consumer item! It
is designed for Hotels, Apartments, Night Clubs, etc. - however it
works exellent in home TVRO installations (but is of much higher
quality than the typical home TVRO dish - this dish is built like
a tank!)

Location: South Bend, IN - 90 miles east of chicago, 112 miles north
          of Indianapolis, 32 miles northwest of Fort Wayne, IN

This dish is NOT SHIPPABLE YOU MUST PICK IT UP!

A pickup truck with lots of rope would be ideal for moving this dish.

Included as a bonus is an 6 foot perf alum dish with extender panels
which creates an 8 foot dish made by US Steel -- so you get both dishes,
feedhorn and LNB's for $400 (retail is $1950, wholesale is $1300)

I am looking to buy a used TNC for VHF packet. Something like the PK-88
would be fine. Internal IBM PC type TNC's are no good to me as I have an
Amiga computer.

If you have a used TNC for sale, please contact me via email. I want to
spend under $100.00.

I have a Japan Radio Co. NRD-525 communications receiver in beautiful
shape, hardly used, in original box with manuals and accessories.

0.09-34 MHz continuous, RTTY, CW, USB, LSB, AM, FM, FAX. 200 memories,
two internal clocks, flywheel and keypad access, and probably one of
the best passband filters on the market. The radio has installed the

optional computer-control card, and includes the serial cable.

$750 o.b.o. (retail with the computer interface is over $1,000)

I have a D&A Manufacturing linear amplifier (model KWD 1000).

I would like to know about how easy it is to retune to 10 meters, and
how clean its output is. If retuning and cleaning its output (if
necessary) is impractical (or not worth the expense due to its worth),
I would also like to know about how much it is worth and the best
means of selling it. I am interested in an HF amplifier.

Is anyone familiar with the beast?

For Sale: Excellent condition Kenwood 940S/AT HF RIG.

Features:

   SSB, AM, FM, CW, RTTY
   250 W SSB, CW; 140W AM
   Built in 20-150 impedance antenna tuner
   Built in power supply
   40 memories, two VFOs
   Various filters, etc (Notch, AF, SSB Slope, etc)

This unit has been used very infrequently. I'd estimate less than
40 hours total use. I cannot even transmit with it. Includes:

  Owners manual
  Power Cable
  Nice dust cover (didn't come with it orignally)

For $1600 or best offer. Price includes shipping COD UPS Insured.

I'll throw in 50' RG58X cable and some braided antenna wire, too. And
Also including the MC-60A microphone which has remote tuner.

$1600- no reasonable offer refused.

Cheers,

Doug

A really good price on a damn good radio, I might add.

I own an NRD525 and a 535D. THey are really fine radios....

This is a second posting. Asking $1500.- o.b.o. for my Racal R6790 HF
receiver.

Frequency coverage is 0.5 to 30 MHz synthesized in 1Hz steps.
LCD display - keypad for data entry
19" rack mount - die-cast chassis
Modes are CW(A1), AM(A3), LSB/USB(A3J), FM(F3), and optional ISB(A3B).
BFO +/-8kHz in 10Hz steps
7 sets of filters installed - 0.3, 1.0, 3.2, 6 and 16kHz & SSB 3kHz
       each side.
First IF is 40.455MHz
Second IF is 455kHz - output 300mV on 50 Ohm
Audio out is 2x600 Ohm and 1 Watt at 8 Ohm
Technical handbook with schematics is included.

I have the following 8-bit computers forsale or trade:

Franklin ACE 1000 (Apple II compatible)
     dual 5 1/4" internal drives
     built in speaker
     video out
     joystick
     printer card and ribbon cable (terminates to centronics)
     AppliCard (TM) CP/M expansion card
     db expansion card (??? - has one male & one female RCA on it)
needs some minor repairs to the power supply

NEC Personal Computer 88
     serial & parallel ports
     four expansion slots
     three seperate monitor outputs (analog, etc.)
     external Epson dual 5 1/4" floppy
     basic built in in ROM (?)

If you are interested in any of these machines, please make me an offer.
I would be interested in getting the following if anyone is looking to
do a trade:

     QRP low band ham rig(s) - CW and perhaps SSB - .25-5 watts
     PacComm HandiPacket pocket TNC with K.I.S.S. mode
     Kawai K1 or K1 II rack mount or module version synth
     Roland Sound Canvas (SC-55 or SC-155)

I have not problem with sweetening any trades with cash.

Make me an offer....

swood

If it's still around, I'd give you $50 for the Franklin. I think replacement
power supplies are still available, so I could get it fixed up. I've
gone through two supplies in 8 years on my II+, and they are fairly easy
to replace. Does the Franklin take a similarly shaped supply? (i.e. about
a foot long by 3 inches high by 3 inches wide?)

I am looking for a source to purchase crystals for a 2M rig.
Right now, I would like to find 7.18+, 7.24+, and 6.94-.
Anyone know of a company selling these or of an individual
that does the same? Thanks.

12 foot Paraclipse Horizon to Horizon TVRO Dish

comes complete with:
          24V COG H-H Belt Drive
          Feed Cover
          Seavey ESR-124 Ku/C band feed
          M/A-COM 85 degree C band LNB
          Panasonic 2.5db KU LNB
          Guide wires
          Installation Manual

This Dish is 4 years old -- and hasn't been used since November
of 1990 --

Paraclipse is a commercial grade dish -- not a consumer item! It
is designed for Hotels, Apartments, Night Clubs, etc. - however it
works exellent in home TVRO installations (but is of much higher
quality than the typical home TVRO dish - this dish is built like
a tank!)

Location: South Bend, IN

This dish is NOT SHIPPABLE YOU MUST PICK IT UP!

Included as a bonus is an 6 foot perf alum dish with extender panels
which creates an 8 foot dish made by US Steel -- so you get both dishes,
feedhorn and LNB's for $400 (retail is $1950, wholesale is $1300)

Subject: For Sale: Kenwood 599D Pair (Amateur Radio Rig)
Message-ID: <Gordon.Edwards.49.0@AtlantaGA.NCR.COM>
Date: 3 Sep 92 03:34:16 GMT
Sender: uucp@ncratl.AtlantaGA.NCR.COM
Organization: NCR Engineering and Manufacturing Atlanta -- Atlanta, GA
Lines: 55

For Sale:

Kenwood 599D Pair (R-599D Receiver and T-599D Transmitter).

The R-599D Receiver:

   Receives: The 1.8, 3.5, 7.0, 14.0, 21.0, 28.0, 28.5, 29.1 MHz Bands
             CB (26.80 MHz - 27.40 MHz), and WWV (10.00 MHz).

   Modes: SSB, CW, AM, and FM.

   Dimensions: 10-1/8" W x 5-1/2" H x 12-7/32" D (inches)
               270 W x 140 H x 310 D (mm)

   Weight: 12.5 lbs (5.7 kg)

   More specs available.

The T-599D Transmitter:

   Transmits: The 3.5, 7.0, 14.0, 21.0, 28.0, 28.5, and 29.1 MHz Bands.

   Mode: SSB, CW, and AM.

   Plate Power Input: 200 watts PEP for SSB operation.
                      160 watts DC for CW operation.
                       80 watts DC for AM operation.

   Dimensions: 10-5/8" W x 5-1/2" H x 12-3/16" D (inches)
               270 W x 140 H x 310 D (mm)

   Weight: 27 lbs (12.5 kg)

   More specs available.

The units can operate together as a transceiver or independently.

The 599D pair is in execellent condition and still look like new.
I still have the original boxes, manual, and even a magazine
advertisement for them. They're plated with silver on the front with
black knobs. A kenwood speaker (matches the styling of the sets) is
included as well as an SWR meter.

Will sell all of the above (as a set only) for $300.

FYI: I'm selling them because I'm a full-time student at Tech and
work part time and simply don't have any time at all to even consider
using them.

Call me at 404-381-8595 (home) or leave a message at 404-623-7015.

tadams
From: tadams@sbctri.sbc.com (Tom. Adams 529-7860)
Subject: Many very Early SAM Photofacts for sale
Message-ID: <1992Sep27.021526.5098@sbctri.sbc.com>
Organization: Southwestern Bell Technology Resources, St.Louis, MO
Date: Sun, 27 Sep 92 02:15:26 GMT
Lines: 19

I have Howard W. Sams Radio Engineer's photofact folders for sale.
Each folder contains schematics and service instructions for dozens
of radios, tv's, etc.

They are virtually complete (less than 10 missing) from Folder Set
No. 1 (Oct 1947), through number 523 (March 1961), a few of the early
envelopes are missing, but contents seem intact. There are about a
hundred others ranging from 525 through 1068 and some miscellaneous
binders and indexes.

I want to sell these as a set, and will consider offers above $225 or
really interesting trades.

Offers out of the local area should add the cost of shipping the
contents of two four drawer file cabinets (I'd suggest USPS book rate).

Lines: 27

I am looking for a working VHF model Yaesu FTC-2205 radio modified by
YAESU for Telco service and marketed under the name: "Traveler SMART/IMTS
Portable Telephone".

Yaesu took a good HAM work-horse and added on some extra microprocessor
circuitry to make it scan the telco channels and respond to IMTS/MTS/SMART
signalling protocols.

It can be distinguished from the normal HAM unit by the fact that it has
an LCD display and a touch-tone pad with 16 buttons sticking out of the
front face of the unit.

If you have one (preferably working), please let me know. Also looking for
a charger (of course), and maybe the hand spkr/mike.

The hand-held mike is a YM-44; charger models are any of: NC-7; NC-8A;
NC-9B; NC1A; NC-3A or PA-3.

Hey you packeteers, I've got a mint condition TANDY Model 100 Portable
Computer. It has 32K with built-in scheduler, text editor, telecom,
and address book. It has a 300 baud modem, leatherette case, hard case,
and recharger/power supply. I also have the accompanying thermal
printer and cable.

I got this as part of a bundle with a XT machine. If you are
interested, please email your offer soon, as I presently have
4 offers awaiting my response. Thank you.

Hi,

I have some central questions about connecting
two hosts via some protocol, without using
the telephone-net :

I want to connect two or more hosts (running
Unix) with either TCP/IP or ka9q or something
by transmitting the data 'through the air'!

So I wanted to know, what hardware equipment
I will need, and I also wanted to know what
is the correct term for this (ham-radio?
packet-radio? cb?)

Anyway, I don't want to spend too much money
on the radio hardware (less than DM 300, that
are US$ 200).

I intended to use so called CB-units (don't
know the correct english term).

So, if you have some material about this
or if you can answer my questions or if
you can tell me where to find a FAQ for
tis group, please emal me or post to this
group...

Radio Snack PRO-37 200 channel programmable scanner--$150. This is
less than half of what I paid for it just months ago. It is like new,
in the box. It was the top of the line when I bought it. Includes 200MHz
frequencies.

I'm interested in old toy shortwave kits and sets - the kind
Lafayette, Philmore, Radio Shack, Sears, etc. used to sell.

I already have a Radio Shack P-Box and the "Globe Patrol" superregen;
please email me with what you have for sale or trade.

I am looking for a 2 meter hand held used radio. I am hoping that I can find

an inexpensive one that doesn't eat batteries ore require constant charging.

Thanks, please email if possible, as I'm just getting used to reading
these newsgroups. You can email to the above, or to:

tedm@tsoft.net

Thanks.

Ted

    ================== ITEM UPDATES ================

KD4WSD   Ed   919-781-2996   Raleigh
  FOUND   1) 2 meter HT with good battery pack and external power
              jack in the $150 range. Have a variety of BNC jacks
              to offer in partial swap.

    =============== ITEMS LISTED THIS WEEK ===============

WB5M   Rich   919-528-2110 before 9:30 PM   Wake Forest
For sale: 1) Aluminum tubing for HF Yagis. Telescoping element
              tubing for a 4 element 10 meter and a 4 element 15
              meter Yagi. Element material only, no booms. $30 for
              the 10 meter element set and $40 for the 15 meter
              element set, negotiable.
Wanted: 1) 50' of 450 ohm ladder line.

KD4LLQ Bill 919-832-7975 Raleigh
Wanted: 1) 10 dual banana plugs.

N4LWK Gary 919-599-8879 Roxboro
For sale: 1) Yaesu FT411E 2 meter HT. 50 memories, extended receive and other features, with the NC29 rapid charger, speaker mic and 3 battery packs. $310

KD4SLD Tim 919-467-0446 Cary
Wanted: 1) PS430 AC power supply.
2) MC42S hand mic with up/down frequency control.
3) MC60A desk mic.
All for the Kenwood TS430S HF rig.

KD4WTJ Phil 919-380-0485 or RARS BBS Cary
Wanted: 1) 4 Amp 12 volt regulated supply for HT operation.

KD4WSD Ed 919-781-2996 Raleigh
Wanted: 1) 2 meter 12" rubber duck antenna.
2) 2 meter base antenna.

KD4WSA Chip 919-848-6605 home, 919-481-5312 work, RARS BBS, W4DW packet cluster, K4IWW-2 BBS, KD4JML-1 and the 04/64 RARS repeater. Raleigh
Wanted: 1) Code Practice Oscillator.
2) Speaker for mobile mounting to connect to the Icom 2SAT HT.
3) Icom speaker mic to fit the 2AT with separate plugs so that I can plug in only the mic lead and leave the speaker output jack on the HT free for a separate external speaker (item 2 above).

KD4EWF Mike 919-552-3146 between 9 AM and noon Fuquay-Varina
For sale: 1) 10" monochrome security monitor with PL-259 connectors, 75 ohm input and 2 surveillance cameras with adjustable lenses. $125 for all, negotiable.

KD4BFJ Brian 919-831-1009 or Woody at 919-848-1844 Raleigh
For sale: 1) AMATEUR TELEVISION WORKBOOK. 216 pages of excellent technical ATV info. $18.

KD4FSN Chris 919-833-4438 please leave a message Raleigh
For sale: 1) Cushcraft Ringo Ranger AR2X 2 meter vertical antenna, 4.5 dB gain referenced to a dipole. $20.

WD4KSE Mark 919-677-1525 evenings, 919-549-1117 days Cary
Wanted: 1) 13" CRT (color picture tube) for a Mitsubishi Multisync monitor model AUM1371A. The tube is an AT1459ZAB22-A, an AT1429 type tube will also work.

KD4JMK Ken 919-596-1161 Durham
Wanted: 1) Operators manual for a Zenith Data Systems ZF017142

portable computer with plasma display.

KD4WSC David 919-556-7728 Youngsville
Wanted: 1) 2 meter amplifier, 10 watts in, 100 to 150 watts
out. Linear service for SSB operation.

N0RXK John 919-732-5020 Hillsboro
Wanted: 1) Yaesu solid state HF rig with WARC bands in the $600
to $800 range. The Yaesu 757 or equivalent would be
ideal.

========== ITEM UPDATES ==========

KD4WJK John 919-846-7931 Raleigh
Sold 1) Hustler FX2, deluxe 2 meter 5/8 wave mag mount
antenna $15.

========== ITEMS LISTED THIS WEEK ==========

N0FSD Bill 919-878-9587 Raleigh
For sale: 1) Macintosh software, large selection. Please call for
details.
Wanted: 1) Medium power AM tube type transmitter, needn't work.
Need some of the high level plate modulation
components.

KD4EWG Kelly 919-870-0315 Raleigh
Wanted: 1) Low pass filter similar to a B&W for HF (1.8 MHz

through 30 MHz) to cure some TVI problems.
2) Antenna tuner similar to a Versatuner. Want something for field or camping use.
3) Log book.

WB5M Rich 919-528-2110 before 9:30 PM Wake Forest
For sale: 1) Cushcraft A4 HF triband Yagi antenna covers 10, 15 and 20 meters. 4 elements on 18' boom. Comes with the 40 meter add on kit that turns the driven element into a rotateable 40 meter dipole. $275.

WA4NID Dave 919-286-0157 Durham
Wanted: 1) Basic TNC for local packet use.

KD4GAN Dennis 919-848-4883 before 2:30 PM M-F before 10 PM on weekends Raleigh
For sale: 1) Kenwood TH45AT HT, 440-450 MHz, 14 memories, wall charger, 7.2v 600 mAh battery pack. $225.
2) DC1 DC adapter for above radio. $20.
3) 3) PG3E cigarette lighter cord with filter for the DC1. $20.
4) BT6 empty battery case holds 6 AA cells for above radio. $20.
5) PG2V DC cable for the DC1 adapter. $9.
6) KNB5A 7.2 V, 800 mAh nicad battery pack, new. $50.
All accessories will fit the TH45AT, the TH25AT and TH55AT.
Will also consider a trade for a 2 meter HT of equivalent value.
Wanted: 1) 12 V @ 12 amp or greater regulated DC power supply in working order.
2) 2 meter HT for $275 or less.

KD4IRV Larry 919-851-4586 please leave a message. Raleigh
For sale: 1) Drake TR4 HF transceiver and power supply. Works great. $275.

AB4FR Clay 919-846-7499 Raleigh
For sale: 1) Tandy 1400 laptop computer pair of 720 kb 3.5" drives.
2) MFJ-1278 multimode data controller. HF/VHF, RTTY, packet, CW, and more. Two ports.
3) Santec 20T HT. Low power 0.5 watts, high power 5 watts, TT pad and memories.
Would prefer to sell all three as a package. Please call for prices.

KD4DQY Bob 919-479-1322 after 6 PM Durham
For sale: 1) IBM PC XT with 20 Mb hard drive, 2 meg of RAM, 1.2 Mb and 1.44 Mb floppies, graphics/mono monitor, DOS 3.3, clock, misc. software, new roll around computer desk, Intel above board +8 board with an additional 2 meg of RAM. In excellent condition. $500 firm.

WD4KSE Mark 919-677-1525 evenings Cary

Wanted: 1) Power/SWR meter covering 50 MHz through 450 MHz, 900
              MHz desirable. Should work with power levels of 4 to
              5 watts for HT work.

I also have a TRAC Contest Memory Keyer for sale.
It is about 1 year old as well. Comes with manual
too.

- Dot-Dash memory
- Selectable iambic operation
- Sidetone with speaker

* Volume and Speed controls
* Fine tuning controls for tone and speed.
* Weight Control
* Tune Function (for tube rigs)
* Keying for grid block and solid state rigs.
* Deluxe 3 conductor 1.4" key jack
* 1/4" jack for output to rig.
* Selectable pos. or neg. keying.
* TWO full 50 character message memories.
* Store and Play functions
* Reset function
* Unique repeat function

Overall, it is the ultimate keyer for CW and it works very well. You can power it off of 12 VDC or from an internally mounted 9V battery. I paid $125.00 for it, however, I will take $59 or best offer for it.

Thanks,
Seenu

I also have an AEA AT-300 antenna tuner for sale.
Perhaps the best description for it comes from it's
box:

"The AT-300 Antenna Tuner optimizes the performance of your antenna and transmitter by providing adjustable impedance matching. The AT-300 also measures the power and SWR which allows you to tune the SWR to the lowest ratio possible for the selected frequency. With ease of opertation in mind, the AT-300 also features a precision-frequency compensated dual-movement SWR meter, and an adjustable high/low poewr selector. The low-pass design provides harmonic attenuation for lower TVI potentials. This also enables you to match a much wider range of antenna impedances."

Features:

* Back lit SWR meter
* Has balanced output as well as SO239 connectors
* Can handle three antennas and a dummy load! Has tuner bypass feature.
* Can handle up to 300 watts, continuously.
* Low power setting allows efficient useage for QRP operations.

I'll also throw in a Heath Kit RF Cantenna dummy load. The dummy load allows you to tune your transmitter without actually transmitting. I'd like to get $125 or best offer on this high-end tuner and dummy load.

Thanks,
Seenu

I have for sale a Santec ST-20T 2 meter HT for sale.
It is truly an excellent HT. I am currently using it
for packet with my AEA TNC. It is in great shape
too! It features:

- 142.000 - 150.995 Mhz Coverage
- 10 Memory Channels
- CTCSS Tone encoding (with memory)
- Scaning in many diff. modes
- DTMF Tone encoding (with memory)
- PLL Tranceiver Circuit
- 5 watts HIGH power, and 500mw LOW power settings
- Operates on anything from 7.5V to 16V for flexibility
- Full LCD frequency and status readout
- Lightweight
- Programmable custom offsets any repeater.
- LCD display is backlit for nightime useage.
- Adjustable squelch and volume controls.
- Accepts standard ICOM series of batteries for compatiblity.
- Plus much, much more...

Also comes with :

- Hi-gain "rubber-duck" antenna
- 300 maH Battery Pack
- ICOM BP-4 Battery Case (allows you to use rechargeable ni-cad batteries with your HT)
- MFJ-313 VHF Converter (allows use of HT from 154-164Mhz)
- HM-15 Speaker Microphone (allows you to keep HT in pouch while you remotely use it, nice!)
- Leather carrying case for HT

I am selling this equipment simply because I want to
buy a 440mHz HT to use with some of the local
repeaters. As such, I would like to sell this for cash.
Comes with schematic, complete owner's manual,
etc.. Ready to go! Will sell to first $225 or best
offer. Keep in mind that this does come with the BP-
4 battery case and Speaker Mike and MFJ VHF
Converter and leather carrying case.

Thanks,
Seenu

For Sale (or trade I guess for that matter)...

  Two solid state power amplifiers:

144-148 MHz Amplifier/Preamp $45

  Can be driven by 2M HT in low power mode and produces approximately 35 watts output on transmit. This amplifier runs Class C so is not suitable for SSB use. It also has a built-in preamplifier with about 15 dB of gain and 2-3 dB NF for receive. Keying is RF actuated. The power train in the PA is made from an older GE commercial transceiver output deck. I have another entire deck for spare parts which I will include. Connectors are SMB for the Transceiver connection and BNC on the antenna side.

  This amplifier needs 12-14VDC at several amperes to operate.

  I used this unit for several months as part of a 2M packet station where it performed very well.

1240-1300 MHz Amplifier $65

  This amplifier uses a NEC NEL-1306 to drive an NEL-1320 output stage. It has active bias and can be used in linear service as well as for FM. It produces 10 watts of output for .5 watts of input and 15+ watts of output when driven with 1W or more. I used this as part of a mode L (1269 uplink/ 435 downlink) Oscar station.

  This amplifier needs 12-14VDC at 3-4A to operate.

I am selling it for the price of the power devices alone.

I'll pay UPS within US. If after receipt you don't want it(them)
you pay return.
  For more details please send USMail, e-mail or landline.

Hello all,

With all this recent interest in amateur radio, I am inquiring to all those
out there who have recently purchased a new receiver....once you get bored
with it, *I'd* like to buy it from you. I am in the market for a cheap but
capable radio...I am poor college student (hence I have not much money)
studying electrical engineering (hence the desire for the radio).

Please keep this post - until you are ready to sell your stuff!

Thanks....

Are you an experimenter, a fab technician or just a wierdo who likes little plastic and metal boxes?

If you can answer yes to this question, or even if you can't, these items may be for you!

I have the following Radio Shack project boxes for sale:

Quan	P/N	Description	Width	Height	Depth	Retail
10	270-251A	Deluxe Metal Utility Cabinet	3-1/4	2-3/16	4	2.99
8	270-252A	Deluxe Metal Utility Cabinet	4	2-3/8	5-7/8	3.99
18	270-250	Instrument Case	5-5/8	2-7/8	5-1/8	4.99
2	270-286	Aluminum Utility Case	4-3/4	1-9/16	4-1/2	?
11	270-210	Project Enclosure	5-1/2	1-13/16	4-1/8	3.29

(Note: the retail prices on these boxes is as a couple of years ago...Radio Shack has a new line of project boxes with higher prices now. Besides, where would you rather do business...at Radio Shack, or on the net? :))

Make an offer...on one, two, thirty or all of them.

Just *think* of all the neat stuff you'll be able to build 'n box!

Hi!
    A friend of mine runs a small electronics repair shop. In the
course of his business, he ended up with a 1966 Tektronix TYPE 536
o-scope. As you prbobably know, tektronix o-scopes tend to have
plug-in modules for the vert. trace, horiz. trace, and who knows what
else. The o-scope that my friend has appears to work except for the
fact that it has two vertical trace modules rather than a horizontal
and a vertical.
    Does anyone out there have a horizontal/time trace module for a
1966 TYPE 536 Tektronix o-scope? My friend suggested that I mention
the fact that the modules for this o-scope are 9 1/4 inches deep.

FOR SALE: Realistic PRO-2006 Scanner

In excellent condition, fully operative, complete with box and manuals.

Specs:

- 400 channel memory
- 13 or 26 channels/sec speed (I've seen mods to increase)
- AM, NBFM, WBFM
- Search in .5, 12.5, or 50KHz (sometimes 30KHz)
- Individual channel lockout
- 10 Monitor memories
- 25-520MHz, 760-1300Mhz (see below)
- etc, etc...

Modifications:

I have restored continuous hi-band coverage (760-1300Mhz), which brought back the 30Mhz scan step in the cellular bands, but I can reconnect the diode if you would like. :)

To compliment the line-level out jack, I added a squelch-controlled relay to turn a device on and off, usually a tape deck. It works fine, and is installed neatly in the rear (submini phono jack). It lets you record a no-blanks tape of transmissions. Great for infrequently used frequencies; set it up before you leave, and listen to the condensed version when you get home.

Also, while I had the squelch-lock line handy, I added a "squelch open" light to the top of the unit. This is great if you have more than one scanner in the room, and want to know at a glance which is receiving.

These are all very simple mods, and cleanly done.

Terms:

I will pay UPS COD insured shipping to anywhere, or if you are in the San Diego area, I can deliver. For COD, you would have a cashier's check ready to give to the postman. This method has always worked fine for me in the past, so I like it, but am open to ideas.

And finally, PRICE:
     $320, includes shipping. Best offer taken.
     (Radio shack: $399, Mail order: ~$389 + shipping)

     I need the money for a computer upgrade, and WILL sell this
     scanner for the highest offer I get, so feel free to offer
     anything. I will also consider trades for computer hardware.
     Low offers are not insults, so send or call.

don't have my Heath catalog handy, but... I think the "over $300" is for the
PK-232 clone, and the HK21 is about $200 new... for whatever its worth, they
are very good, only found one "bug" in mine; if you set "check" = 0 (so
that you aren't verifying your link every so often), then your mailbox
disconnects people as soon as they connect... Obviously, some bright
programmer;decided to save a register by dual use of one...

One can use if for a portable packet station with the terminal that showed up
in QEX, and a handie-talkie, and have ton of fun.

cheers

mintaka!ogicse!plains!ulmer
From: ulmer@plains.NoDak.edu (Eric Ulmer)
Newsgroups: rec.ham-radio.swap
Subject: Gear wanted for club
Summary: College fraternity starting ham shack
Keywords: free, cheap, generous, good guy, friendly
Message-ID: <7949@plains.NoDak.edu>

Date: 4 Feb 91 17:31:12 GMT
Organization: Pi Kappa Phi, UND.
Lines: 37

My name is Eric Ulmer and I'm president of our fraternity here at
the University of North Dakota (a school famed for Aviation). I'm currently
working on setting up a ham shack to help other members get their tickets
and get those first few qso's. Our vice-president Mike Hanson (N0FWD) is
also active in our class. A few fathers have expressed interest and are
donating equipment such as cable and a 2m rig. We have a heath-kit HW-16
which is mine, but are looking for a more stable radio or an antenna tuner
and other supplies. The reasons Mike and I decided to start this program is
that greeks have a stereotypical image of brainless activity. HF experience
will help the members in their aviation should they decide to ferry
aircraft to europe. Ham radio seems to be dying, if more organizations
could support ham radio we could keep more of that band-width. after all,
70% of house representitives were in a general college fraternity, and some
75%+ of senate members were also. George Bush (Delta Kappa Epsilon) and
Dan Quayle (Delta Kappa Epsilon) are in a fraternity.
I'm not saying that one of the members of our chapter will be a senator, but
if this catches on... who knows?

 Leaders in ham radio = more bandwidth = more pull = more people.

 Interested in helping out?

Pi Kappa Phi Ham Shack
407 Cambridge St
Grand Forks, ND 58203
(701) 775-3124

tube stuff welcomed, we have some of the older guides and will instruct
tubes mostly with some solid state at the end.

I have the following scope for sale:

Hewlett-Packard 1202A Oscilloscope
100uV sensitivity
500kHz Max. freq.
single trace

$80.

I've been told that it's a special purpose scope, good for audio, but
the 500kHz limit is insufficient for video signals. Its sensitivity is good.

The scope is not very old (~15yr.), and I believe it's solid state.

I will entertain offers.

I am a relatively new ham. I got my novice in December and my Tech in January. I am looking for a good used HF radio to get me going talking around the world. I would prefer if it covered the WARC bands and had a digital display for frequency but these are not essential. I went to the marlboro flea market and saw a Kenwood TS530S in good condition. I think I might be interested in one of those if anyone has one. I am in no hurry and plan to attend the many flea markets coming up this spring.

I am a new HAM and a member of the Northeastern Radio Club. We have a repeater we are trying to get setup on 145.31
We are using two antennas about 100ft away from each other (at the far corners of a rooftop on campus) and we are still experiencing desense and intermodulation interference. We are looking for anyone who might have an extra 2m Duplexer.

We are operating on negative duplex. Once we remove the interference we will be able to run 45watts instead of 2!

Any donations or information would be greatly appreciated!

Oh i should tell you that we are using two 2m radios not a repeater box.

Thanks in advance!

     Jeffrey Perry

HI,
I am looking for a short wave receiver , that is portable.
I have looked at the Sony 2010 and the Grundig 500.
Does anyone out there have one of these they are looking to sell ?
Thanks,

HI,
I am looking for a short wave receiver , that is portable. I have
looked at the Sony 2010 and the Grundig 500. I have also heard that
the Sony 2001 is almost the same as the Sony 2010, is that the case ?
Does the 2001 have the synchronous detector, are the specs the same
overall ?
Does anyone out there have one of these they are looking to
sell ? (Now that the war is over)

 Thanks,

Sorry if this seems to be in the wrong newsgroup. I have posted it to the groups that seem to be the closest to the type of info I need.

I am running the Operations department at a large SF convention. We have always had a problem with communications between various members of our committee, as they tend to get spread all to-hell-and-gone all over the hotel/convention facilities. We have tried using radios, but they have many short comings that I will not go into here.

What I would like to use is a self contained Pager/beeper system. This would be a system where we possed not only the beepers, but the transmitting base station as well. It would be a short range, local system. We have had problems with getting outside phone lines, so a normal pager system wouldn't work. Plus most of the companies I have contacted will only rent pagers by the year. A few companies said they *might* be able to rent them to us for a period as short as a month. We would ideally like to rent them for just a week/weekend.

I orriginally started looking into this because I knew that Radio Shack made the exact system I wanted. It was a base station with 8 buttons that sold for about $100.00 and each pager was an additional $30.00. It had a range of about 2 miles and appeared to operate on CB frequency using digital encoding. The problem is, THEY STOPPED SELLING THE DAMNED THING A YEAR AND A HALF AGO! Argh. You *can* still buy the pagers as replacement items, but you cannot buy the base station. Argh^2.

I have called dozens of companies and the *only* thing I have been able to find is a system made by Motorola called the "People Finder". It has a base unit and separate recievers, but it costs about $1500 for the base and $300 each for the pagers!

So, my questions for the net are:

1.) Does anyone out there know of a system that will do what I have described, but at a more resonable price? All it has to do is beep the pagers. No phone numbers, no voice message, no LCD displays, nothing fancy, just a plain simple beep.

2.) Does anyone have one of the Radio Shack systems that they would like to sell?

3.) Does anyone know of any company that *rents* the Motorola system?

4.) Any other Ideas on how to solve this problem?

Thanks
Please respond by email. I don't have time between now and the convention to keep up on all the newsgroups. I will post a summary if I get enough response.

To those who wanted my HAM and SWL gear (SB-102, GR-64, Hallicrafters
SX-62, Telefunken "allegro"), but never heard back from me:

Thanks for your responses to my posting. I regret that it took me so long
to reply, but I was a bit overwhelmed by E-mail offers and after sorting
through the mail, I decided to prioritize them. Several guys said, in
effect, "I definitely WANT that ...", and these got first priority. Of
that list, I used the date/time stamps to establish a first come - first
served system. Perhaps I could have started a bidding process, but that
would have been too cumbersome and (since I didn't say "or best offer")
rather in bad form.

As you may have guessed, the item(s) you were interested in got taken by
earlier or more eager birds. However, if a deal were to fall through,
you may get another chance at your selection. I'm keeping all the mail
until everything is gone. I regret not responding in person to each of
you, not to mention the wasted bandwidth.

Also, I'll restrict such postings to the "swap" groups in the future.

Thank you again, and 73.

Sincerely,

Brian Adams N7DEY

The ICOM R70 is the predecessor to the R71a. It is a fine tabletop receiver suitable for DXing, receiving RTTY, SSB, etc. It makes a great step if you want to move into the world of tabletop receivers without spending megabucks.

Performance is similar to the R71A but the R70 doesn't have the convienience features such as direct keypad entry and memories. It does have PLL tuning, pass band tuning, notch filter, more.

Free to anyone who wants them:

3 Kennedy mag tape drives with only the motors removed.
All other items (big transformer, some 48,000 microfarad capacitors,
vacuum systems on two of them with AC motors) are still
present. Other goodies are there which I haven't tallied,
such as switches and power transistors and various PC board
mounted pots and such.

The tape drives are deliverable to Davis/Sacramento areas,
Berkeley, and possibly San Francisco.

Please reply to: chafe@aggie.ucdavis.edu

I recently bought some HF gear and am in need of manuals for them.
Are there any vendors who sell owner's manuals and shop manuals.
Alternatively if someone who has the manuals could photocopy and send
it to me, I would be more than happy to pay for the costs of copying
and mailing. Below is a list of the manufacturers and equipment.
Thanks.

Manufacturer: Yaesu
Item   : FT-101B Transceiver

Manufacturer: Yaesu
Item   : YO-100 Monitor Scope

Manufacturer: Yaesu
Item   : Landliner   (phone patch/external speaker)

Manufacturer: Yaesu
Item   : FV-101 External VFO

Manufacturer: Reliable Electronics Design Company
Item   : REDCO-C40 Frequency Counter

Manufacturer: Reliable Electronics Design Company
Item   : Model RPS-1/C-40 Power Supply   (for above unit)

Manufacturer: ?Turner?
Item   : Turner Expander 500 Microphone

Manufacturer: D&A Manufacturing Co.
Item   : Warrior KWD 1000   (I think this is a linear amp but not sure)

Manufacturer: D&A Manufacturing Co.
Item   : Warrior 220 Power Supply   (for above unit)

I am going to be spending my summer on Mackinac Island and thus I am
going to want to keep in touch with home. Seeing as how my brother is
a ham and also real avid with packet, and that I have a computer as well
as all the available software, I thought that I might as well finish my
station.

     So anyway, I am in the marked for a simple HT (preferably a
thumb wheel or even a switchable crystal model) at a low price. I am
also looking for a simple TNC that will support K.I.S.S. I will
probably end up buying one of those new, but I might as well ask...

I am looking for some small transmitters that can run on battery power
so that I can do some special operations from Mackinac Island this
summer while I am working on the Island. I would prefer something
either in a monobander on 10 or 15 meters. I did once have a Kenwood
TS120 and I would really like to have either one of those or a TS130
again. Most importantly, I need something that can work on SSB/CW
modes and will run on battery power.

I would especially be interested in anyone that has any of the QRP
Handheld 10 and 15 meter transceivers.

I have an Icom R71A receiver for sale. It is one of the older ones (~3yrs)
that still has the Pass Band Tuning control on it (nice feature I might add).
It has the FM unit installed, as well as the FL44 SSB filter. The filter
was installed by EEB as part of their "high performance option" package.
It works very well but has a few minor cosmetic blemishes (minor scratches
around the screw holes, a few stress cracks around the screw holes in the

clear plastic frame that covers the frequency display)

Price: $600

I also have a PK232MBX with the June 1990 ROM upgrade (the unit was purchased new in April or March of 1990). It also has the MacRatt software for use with a Macintosh. I have some PD software for use with the PC, but I haven't tried it on a PC yet. The PK232 will work for Ham use (that's what it was designed for) but I have only used it for FAX and RTTY monitoring.

Price with software, and manuals: $275

Both units come with the original shipping cartons, manuals etc. The Icom also has the factory service manual.

The pair makes a nice RTTY monitoring post possible for a decent price. All of the RTTY and FAX loggings I have reported have been made with one or both of them (always the PK232, sometimes with the Icom, sometimes with my Racal 6790).

For those of you that are interested in transmitter hunting, I have got a
deal for you:

Optoelectronics model 1300A/H hand held frequency counter with the following
accessories:
Carrying case
3 antennas: TA100S, RD11, RD800

I bought it in August from Universal for $159.95 + $11.95 + $59.95
                                          ctr   case   ant's

It covers 1mhz - 1300 mhz. It is in perfect condition and the first $160 takes it all.

Of course the docs and the charger for the built-in NiCds are included.

From the context and the name, I can guess what EDMEESE does; the
question is, if such a program already exists, where can I find it
(unfortunately, no FTP access here)?

The following equipment has been sold:

     Icom R71A Receiver

PK232MBX TNC
Optoelectronics 1300 H/A counter
One of the two R390A's

I still have one R390A for $300. It is unmodified, straight out of a DOD whse
and works great.

Many thanks for all the inquiries.

I would like to buy a computer interface for my Racal RA6790 receiver. It is
not the RA6790GM model, but the older RA6790 instead. If you have one or know
of one's availability, please drop me a line or call.

2 TRS-80 Model 4P computers with LSDOS 6.3 and/or Montezuma Micro CP/M
$200 each

1 Kaypro 10 with more software than I'd care to list.
Make me an offer I can't refuse

1 TIPC with 10M internal HD, Color Monitor, much software
$500 or best offer

1 Hayes Smartmodem 1200
Best offer

1 Radio Shack DWP-210 Daisy Wheel Printer
$150 or best offer

Radio gear:

1 Heathkit HW-12 (80M SSB) with HP-23 power supply

1 Flesher Corp TU-170A RTTY Terminal Unit

1 Crown Microproducts ROM-116/MOD III (For TRS-80 Model III)
with software (also works on Model 4/4P in Model III mode)

ALL radio gear is best offer.
Transceiver requires proof of license.
Shipping costs might be negotiable.

Now comes the want ad:

Used, good condition, Mosley TA-31 rotatable 3-band dipole sorely
needed.

-> I am posting this for our Amateur Radio Club the 'River City ARCS'!
-> Have two(2) 'Systron Donner' Model 1626-01 MicroWave synthesizers (Sweep
-> Generators) for sale! They cover the range of 40 MHz to 27Ghz, have a
-> Digital Readout with DBM meter(Digital), and a IEEE 488 Remote Control Port.
-> They were Built in September 1982 and the warranty ended September 1983.
-> I understand that when they were new they cost around $20,000!

The above equipment has been sold!!! It sold in less than 12 hours from Posting
here on the net!!!   Thanks to all who contacted us, it was on a FCFS.
                                        (First Come First Sold)

ITEMS FOR SALE
===== === ====

(3) General Electric MARC V 800 MHz Trunked Mobile Radios. These radios
    are 60 watts, prom programmed, and can be heavily customized.
    Groups, tones, frequencies, etc. are all programmed via prom and
    completely custom. Makes a great business radio system. Could be
    simplex or can operate through a repeater. Freq. splits are
    possible. Units are standard size, and shape (Like a CB).
    Includes mike, and power connector and wire.

(1) GE MARC V - - - Same as above but has a DTMF handset (w/PTT butt.) and DTMF keypad on front. Sloped front panel, but identical to others in all other respects.

Asking $150 (ppd.) for single units, $185 for DTMF model.

(1) Ramsey Model 2200 Osilloscope. Dual Trace, all normal functions. Perfect condition, VERY low hours. Plain and simple, no frills, but works perfectly. Will throw in many different leads. Asking $200.

(1) Digiac Model #4015 Digital to analog Converter. NEVER USED. PERFECT OUT OF THE BOX CONDITION. No specs, however. $80

(1) Astron Model #RS-12A Power Supply. 13.8V, 9 amps continuous. 12A ICS 50 % Duty Cycle. 13 pounds. Excellent condition. $40 + shipping

(1) Motorola MITREK trunk mount transmitter. Low band, 100 watts output. Model #T51JJA4000CK. Contacted a Motorola rep today and he said this radio is worth $2500 new, with control head and mike. He will be calling me back with prices on them, but will sell as is (trans. only) for $300. Excellent condition, works fine. With a little investment for a control head, this could bring big money.

(1) Radio Shack Navaho CB Base Station. 40 Channels, low hours, perfect condition. $20 + shipping.

(1) Electron Processing TS-1 Tapesaver. Record all activity on your radio. VOX. PERFECT Condition. $30 + shipping. ($50 w/tape recorder)

(1) Helix Type Military SATCOM Antenna. This is a tripod (incl.) mounted helix antenna, cut for 240 - 270 MHz, specifically SATCOM. Professionally built, the antenna offers 10 dB's of gain. This baby REALLY drags in those weak SATCOM signals. Includes built in elevation meter to assist in pointing. Approx. 6 ft boom, 40 inch reflector. GREAT antenna. I paid $275 for this, and it stayed in my attic. Never went outside. I will throw in 35 ft of BELDEN 9913 with N connectors, and shipping to the contiguous 48 states, for $175.

(1) Trunk Mount Cellular (or business band) Antenna. 3 dB's of gain, this was never opened. Includes 15ft of cable and 1 N connector. $30 ppd.

(1) Roof mount cellular (or business band) antenna. Silver, with 1" silver (chrome) base. ALSO NEVER USED. 3 dB's of gain. 15 ft of cable. $30 ppd.

Thats it. PLEASE respond by EMAIL only as this is best for a quick

response. Will deal slightly on these items, but not much. However, I do
want to move them.. Just cleaning out and I need the space. Make an
offer.

I am looking for a reasonably priced source for NEC 41137 GaAsFETS.
Any equivalent version is also acceptable. Ideal price would be
in the $2.50 each range. Plastic package type preferred.

I`am happy to anounce, that you now can get the best and most used
packet radio program, from iesd.auc.dk (130.225.48.4)
as anonymous ftp.

The program is placed at
/pub/ham-radio
And the name is
pcmb510.lzh

If you use it please E-mail, to me so that we can send you information
about neu things....or developments of this fine program..

There is also developt a remote contole program to Kenwood radio`s
but there is not English docomentation..... but it will come

Hallo Welcome to PCMBOX.

*** PCMBOX Copyright (c) 1990 OZ1HMN ***

What is PCMBOX ????

PCMBOX is a Packet terminal program with many features including mini mailbox, 21 commands based on the // principle.

PCMBOX is written in Turbo Pascal(tm) by OZ1HMN and is a shareware program fully Copyrigthed by OZ1HMN. It is forbidden to sell and may not be used to any commersial purposes.

Now some of the features:

Yapp is supported in terminal as well as in mailbox mode.

A log is updated every time you connect someone, and a seperate log file for mailbox users.

You can call an External program within PCMBOX.

You can connect via the routing list (Alt-C).

Setup of your favorit editor.

Setup of your favorit viewer.

Create a mail file within PCMBOX.

RX buffer containing op to 400 lines.

Trace (look for) specific text received, and then beep.

And now a dump of the 3 help screens:

```

How about rec.radio.amateur.policy?

My only objection to the new newsgroup is that it has all the earmarks of sticking one's head in the sand rather than coming to grips with the fact that when ham radio dies (and it probably will) it will be for political reasons. We ignore that side of the hobby at our peril.

The technoids go on and on wonderfully about their ideas for the design of the Phantasmagorical Data Engine with the blind faith assumption that when they're done, we'll have amateur bands to use it in. I don't think we can assume that, and sticking those who write about it in a "newsghetto" so they can be ignored more easily will be counterproductive in the long run. Penny wise and pound foolish, as it were.

  Fine, so why did you have to post this message plus 5 parts of the actual
  program? Posting to all of the above list of newsgroups seems like a bit
  of overkill. In the future please post only the announcement and send the
  files by e-mail or post in a binary newsgroup. Not everyone needs or wants
  your software that reads these newsgroups, not to mention soem of us have
  computers that use other operating systems (Like AmigaDOS).

If anyone has a standalone (or add on for an Eldorado) Transfer Oscillator,
for me to use with my frequency counter, I'd like to be able to cover
up to 10.5GHz. If you have such a unit gathering dust, or if you've got one
that might need a little work, please contact me.

Thanks in advance.

I'm not arguing with the logic of the mechanics. I'm arguing against the attitude that produced the desire for the new mechanics. I believe that it is dangerous to believe that ignoring the very real political problems we face will make them go away.

Hello World

Here is again a great program, witch my friend Lars have made. You
can get it by anonymous ftp from:

iesd.auc.dk (130.225.38.4)
username: ftp or anonymous
password: our username..

Filename: tsrem.exe and this text tsrem.txt
path   : /pub/ham-radio

Lars is soon going to make a new version of this program, so if you
out there E-mail me inprovement I'am soure Lars will be happy.

God lock and a happy chrismas

Peter Sunesen

GREAT - LOOK HERE - Some news for TS440 owners.

>>> TSRem Copyright (c) 1990 by ARCOSOFT - Lars Rasmussen <<<

TSRem is shareware an may not be used to any commercial purposes.

TSRem is capable of remote controle your TS440 from the PC via
one seriel port (COM1-4). Working all in text mode. No graphics.

On the normal program screen you have the following informations:

Contents of VFO A.
Contents of VFO B.
Contents of a group of 10 M. CH. with a comment to every M.CH.
All the informations in the TS440 display including RX and
TX frequency at the same time.
Mode of modulation.
Steprate 10 Hz - 1 MHz.

TSRem has 2 ways of operation:

1) Status display for TS440 settings. While you control TS440
   in the normal way, by twisting knobs and so on, the PC
   displays updated info 1 sec. after you have pushed a button.

2) Remote control of TS440. Control the TS440 from the PC's
   keyboard. The force of the program.

Memory channels.

You can write a comment of 28 chr. to every memory channel.
Save memory contents to a disk file.
Load disk file into memory.
Print the memory file to the printer on LPT1.

It takes no more than 10 sec. to load or save a file, including
reading or programming the memory in TS440. You can then have
eg. a memory file for every operating mode, 100 memories for

FAX or CW, or 100 memories for every band you will work on.

Furthermore:

Built in scanner. Scans the programmed M.CH. in 3 speeds.
Built in HELP menu.
It's possible to switch between COM1 to COM4 in TSRem.
Selectable IRQ for COM3 and COM4.

At the moment there is no English manual, but thats one of the first improvements to come.

If yoy find this program of any interrest, please send a donnation to:

I have a 2 meter linear amplifier for sale. It is 1 year old. Made by Ramsey Electronics. Model PA-1. Drive minimum is 1 w. Also has a 10db preamp. Has a gain ratio of 8 to one and will put out up to 40watts. 5watts in give you

40 watts, 1watt in gives you 8 watts out. In excellent condition.

Reason for selling: Removed my Handi Talkie from the car which I used with the linear and replaced it with a new mobile rig that runs up to 50watts.

Asking $45 which includes shipping.

Nntp-Posting-Host: thesis1.hsch.utexas.edu
Originator: jmaynard@thesis1.hsch.utexas.edu

There has been much discussion on this subject, and what started out as a simple call for a new group has mushroomed into a complete reorganization of the rec.ham-radio.* hierarchy. This posting reflects my understanding of the current consensus of opinion on the subject, and is intended to serve as the basis for further discussion. I gratefully acknowledge the help of many folks around the net, especially Paul Flaherty, who suggested the original reorganization from which this grew; he and I have discussed this posting, and it carries his approval.

THE CURRENT PROPOSAL:
==========

The following groups are to be renamed:
rec.ham-radio   => rec.radio.amateur[.misc]
rec.ham-radio.packet => rec.radio.amateur.packet
rec.ham-radio.swap   => rec.radio.swap
Groups will be renamed by creating the replacement group, asking site admins to alias the old group to the new one, and rmgrouping the old group after traffic in it has died down. This method has been shown to work in other hierarchies.

The following groups are to be created:
rec.radio.amateur.legal
This group is intended to contain any and all discussion about legal issues pertaining to amateur radio, including, but not limited to, rules, regulations, laws, and legal actions by and against amateur radio operators. This group is to be unmoderated.

rec.radio.cb
This group is intended to contain discussions related to Citizens' Band radio. This group will be unmoderated.

RATIONALE:
==========
1. Why move the groups at all? The primary motivation is to make it easier for interested people to find newsgroups related to ham radio. The rec.radio hierarchy was created after rec.ham-radio (net.ham-radio before the Great Renaming). It is an inconsistency in the namespace to have groups for similar purposes separated from each other, and that makes it harder for new users to find the desired groups. Further, this allows a change from ham radio to amateur radio (see next topic).

2. Why .amateur instead of .ham? It has been pointed out in discussion that "ham radio" is primarily an American term, and carries little meaning outside the US. In addition, there are negative connotations attached to "ham" that don't apply to "amateur". Some confusion also exists in the public mind about just what a "ham radio operator" is, as evidenced by the occasional "ham operator jams aircraft frequencies!" when the person in question has never been a licensed amateur radio operator.

3. Why a .legal group? A significant part of the traffic in rec.ham-radio is concerned with legal issues. This includes substantially all of the flamage, which has in the recent past included such subjects as whether or not it's legal to order a pizza via an amateur repeater, the proposal to add a class of license that does not require knowledge of the International Morse Code, and the legality of modifying amateur equipment to transmit outside the amateur bands. The new group is intended to move the flames and the long discussions that never seem to get anywhere out of the main group.

4. Why use the name .legal, instead of .rules, .regs, .regulations, etc.? The group is intended to contain any and all discussion about any legal issues pertaining to amateur radio. This includes not just

rules and regulations of the FCC and other national regulatory bodies, but also laws affecting hams (such as the infamous New Jersey scanner law), lawsuits over nuisance issues, antenna ordinances, and the like. .legal is the best description of the intended division of existing traffic I could come up with.

5. Why not a .tech group? There are two reasons for this one. The first is that there's more to ham radio that's non-inflammatory than just technical discussions, and the object of a new group is to move the flames, not run away from them. A .tech group would leave those of us who are interested in more than just technical discussions, yet not in the seemingly endless legal discussions, left to wade through the flames. Second, Brian Kantor, who maintains the info-hams mailing list, has said that info-hams will continue to gateway rec.ham-radio (and, presumably, rec.radio.amateur[.misc]) only, and moving the technical postings off would deprive those on the mailing list.

OPEN ISSUES:
============
1. rec.radio.amateur or rec.radio.amateur.misc? Both have been proposed, and I don't have a strong preference either way. The final proposal will reflect whatever the consensus of the discussion is.

2. rec.radio.amateur.packet or rec.radio.amateur.digital? I do have a preference here, but am willing to change my mind if a consensus is reached that .digital is a better idea.

PLANS:
======
Assuming a consensus is reached by then, I intend to adhere to the schedule I set originally: discussion to run through 31 December, with the vote starting then and running through 21 January. There have been a couple of other reorganizations in the recent past, and I'll follow the precedent they set in regard to voting: an individual vote is required for each proposed group. In addition, I like Kent Paul Dolan's format for the comp.sys.amiga reorganization vote, and will use it for this vote (though I'll put the ballot at the top of the Call for Votes). I intend to count votes automagically with some sort of Unix-type tool (probably awk); votes that the awk script rejects will either be fixed if their meaning is unambiguous, or returned with a request for clarification if not. Other than that, votes will be acknowledged en masse about halfway through the voting period, and not by mail. Votes will be sent to this site, and probably to my account here. (Don't send me votes yet; I can't accept them.)

It looks like we can bring this to a successful conclusion, especiallly if everyone maintains the same high standard of calm, reasoned discussion that's been shown so far. Please post any discussion to news.groups as well as rec.ham-radio, as per the guidelines.

I am looking for a 2m rig (HT style preferred) with which to enter the world of packet. I have a pk232 and PC clone with terminal software but don't know exactly what to look for in the radio. Cost is probably the highest priority for me. Can anyone recommend a rig of this nature that they have used and find to be reliable? Additionally, does anyone have a low-cost rig like this for sale?

Any and all helpful replies would be appreciated.

Thanks,
   Alan

Hi:

Sounds like you need something other than ham radio. Ham radio
is "amateur radio", and according to FCC rules and international
treaties "cannot be used for the regular business communications
of any organization", commercial or non-commercial.

You need to check with someone familiar with the communications
laws in the country you will be operating in. For instance,
a friend of mine was working with Witness for Peace in Nicaragua,
and the government there assigned several shortwave frequencies
that they could use for two-way voice communications. They
used high frequency radios, like one would use with amateur
radio, but on frequencies appropriate for the use.

If you want to use VHF radios with a repeater, you could probably

contract with a company in Costa Rica that provides this
kind of service.

Hi,
     I guess the Subject says almost all. I am looking for a set of

manuals for a Singer/Alfred 6600 Sweeper with a 6606D Plug-in.

In addition, I am looking for any of the higher frequency plug-ins for the sweeper.

If you have any manuals or plug-ins for the above sweeper please contact me. Thanx.

Icom sells the EX-309 interface, but I am unaware of any software for it. I hate to pay that much $$ for the interface if it is nothing but a level converter. If anyoune has any info on the Ex-309 or software control of the 751A, please E-mail or post. If there is any interest, I will sumarize to the net.

It is nothing but a level converter. Make your own for a lot cheaper. Also, the software is not very difficult. There has been stuff posted and other software is available. I have distributed a simple hack I wrote for the PC that loads memories from a file.

FOR SALE:

If anyone would like a cheap CIV interface complete with LEDs to blink and look cool I have about a dozen RS-232 "repeaters". These are a tiny black box with LEDs and two connectors (One DTE and one DCE) and

a small wall-tumor power supply.

I will sell these and the wiring diagram (2 cuts and one add plus the
mini-phone to the radio) for $15 each, including postage. Enclose a
disk and I can pass on any source code for CIV control that I have.

My address is 107 Oak Ridge Drive, Ayer MA, 01432.

Now that Sweden has 6 meter operation, Peder, SM0MEM, would like to get on. He
has his
heart set on an ICOM IC-502, and is willing to pay a fair price for one in good
condition.

I've agreed to help him, so you, the seller, would not have to deal with
international shipping and
currency exchange, etc.

For years, I have wanted a spectrum analyzer for my very own.
Tucket surplus has Tektronix units that plug into their 530/540-series
oscilloscope mainframes. Are these a good buy? I'm looking at a
TEK 1L20 10 MHz to 4.2 GHz unit for $550. Is this similar in
performance to, say, an HP 8555 (except for frequency range)?
What kind of IF bandwidth does it have?

Thanks.

(I originally posted some of this stuff nthese a couple of months ago,
 but the local network was in a state of flux. Things have since
 straightened themselves out)

I have the following items for sale. I would rather consider some
form of trade for a working 16-bit MFM PC-AT hard/floppy controller.

2 Mitac Floppy Drives for an Apple][. Condition unknown, should work.
  $20/each or best offer

2 256K Sipp Cartridges - unused - $10/each or best offer

1 1200 Baud Modem - does NOT use hayes command set, works quite well,
  some documentation - $30 or best offer

Thanks in advance.

Try ELI Heffron and Sons in Cambridge (138 Hampshire (I think)). They have
all sorts of components, computer bits, test equipment and similar stuff.
Not that much audio gear, but you never know what you may find.

When I travel in a foreign country, I like to have a small portable, maybe pocket
size, battery powered short wave radio to listen. Would anyone in the net like to

make recommendations on this? The budget for such a radio is under U$200. I have seen some SONY SW/FM/AM radios in this price range, but not sure how well it is.

Can you help me with a service-manual for the Compaq Deskpro CM monitor?

I have bought an old Compaq Deskpro CM monitor that don't function properly. I want to repair this, but don't have a service manual.

(The Norwegian Compaq importer can't (or won't) obtain service manuals for any Compaq products - of reasons unknown to me. This is a large contrast to the Norwegian Philips importer that sells service-manuals for their monitors at a price of less than NKR 100.- (less than $14.-)).

I hope it isn't similar difficult to obtain service-manuals for Compaq-products in the rest of the world.

Here I give you all the data I have:

    Compaq Deskpro CM
    Serial 7023161MF563
    Made in Japan
    Manufactured January 1987

If anybody can help me, please send email to: geirha@ifi.uio.no

Yours Sincerely,
Geir Egil Hauge

I too am interested for similar reasons. The $200 limit may be foolish
given how important SW was to those trapped in Kuwait. I'm considering the
Sony 7600 which may be a little heavy but has very good sensitivity and (I
think) can be used as a clock radio.

I hope someone with experience can tell us what they wanted or liked most
in the way of features.

I would like to sell the Tektronix 7L14 spectrum analyser which
I have had for many years and not been able to use it as I
orignally planned.

Its a module unit that plugs into a tektronix oscilloscope 7606
series of mainframe.

This unit is in excellent(read it brand new) condition and has never

really been used. I would have this unit recalibrated from
a reputed lab before I sell it (that costs couple hundred dollars).

I dont know whats the going price of this unit is now adays
but a year or so earlier I saw it listed used for $10K to 12K.
The reason I did not sell it because the used test-equipment
guy was paying me 6K for this unit which I thought is too
low and would rather keep it.

Now the chances are remote that I would be able to use it (dream of
starting of my own company) I would like to get rid of it.

Before I start talking to brokers again I would try to see if I can get
a reasonable offer from anybody out there . If you know whts the going
price of this unit pls let me know.

Make me a reasanable offer.. and you can have it

Anis

I bought a few hundred enclosures that just happen to have some 300 baud
modems stuck in them. So I have some modem boards that may be of
interest to experimentors. These boards contain the following parts:

1   Rockwell 6502-II microprocessor
1   Rockwell 6522-31 parallel port ?
1   IMP 8333aya Uart
1   6116 2k X 8 Static RAM
1   INSOUTH HM-061 touch tone generator
1   Exar 2221 FSK decoder chip
1   MMI 6331 (static ram power manager ?)
1   600 ohm line transformer
1   SPDT 5 volt coil line relay.
1   socket for 2732 eprom
1   RJ-11 jack
1   5 pin DIN jack
1   lithium battery socket
1   11.931 mhz crystal

Plus a variety of transistors, capacitors and LEDS. Some boards have the RAM and/or the transformer removed. An LM7805 voltage regulator riveted to the case is also removed from all boards. I have an image of the eprom on disk in case anyone is interesting in playing with it. These boards were removed from what appears to be working 300 baud modems aimed at the C-64 market. The digital interface is a 5 pin DIN connector.
The boards have a copyright notice by Control Video Corp.
There is no documentation and no further information is available.

The components are not socketed but are fairly easy to remove using the torch-and-slap or similiar process. We've stripped several for the memories.

I'm selling these board at $1.50 each or 10 for $10 plus shipping.
I'll get even cheaper if you want REAL quantity. (I've got plenty :-)
I'd suggest including a couple of dollars shipping for one board and about 4 dollars for 10 boards. Add a dollar if you want a PC compatable disk containing the rom image.

FOR SALE!!
--- ----

 (1) ASTRON RS-12A Power Supply. 9 Amps Continuous Duty. 12 Amps ICS. 13

Pounds. $35 plus shipping. Barely used in PERFECT condition.

(3) BK Precision Model 820 Digital Capacitance Meters. Use to check all capacitors from miniature discs to pole mounted power types. Reads from .1pF to 1 Farad in ten ranges. Resolves to .1pF for a maximum count of 9999 with 0.5% accuracy. Bright easy to read 4 digit LED display. Has inputs for test leads. These meters have NEVER been used and are BRAND NEW in original boxes with all warranty cards and manuals. Are sold nationally by JENSEN for $249. I will sell them for $150 a piece (plus shipping)...

(2) Beckman Industrial Model 310 Digital Multi Meters. Feature overload protection on voltage ranges, 1500V continuous, 6kV transient. Each meter meets mil-spec for shock and vibration. Basic DC accuracy of 0.25%. Test leads and manual included. These are also BRAND NEW, and COMPLETELY UNUSED. Also in original boxes. Sold by JENSEN for $165, will sell for $100 a piece.

(4) General Electric MARC V 800 MHz Trunked Mobile Radios. These have been removed from service because the company went out of business. All radios have been tested and are in good condition. Have called l.e.d., TX l.e.d., busy l.e.d., special call option, alarm, etc. All radios include microphone. These would make an excellent addition to a small business that needs 2 way communication. These radios coupled with local repeater service (usually about $60 a month for 4 radios) would be ideal to keep in touch with fleet vehicles. Will sell all 4 radios for $350, or $100 each. (Shipping not included.)

(1) RAMSEY 20 MHz Oscilloscope. Built in component checker. Z-Axis input. Low power consumption. TV Video Sync Filter. High Sensitivity X-Y Mode. Front panel trace rotator. Includes 2 test probes. In good condition. Barely used....Will sell for $150 plus shipping.

All items are available for immediate C.O.D. shipment. Please respond only by mail to "seanp%undrground@amix.commodore.com". Any questions should also be directed to that address.

I am in need of a copy of The Boomless Quad article that appeared in CQ
mag. somewhere between April-June of 1981-1983. I am not sure of the date
exactly but I am sure it was in CQ because I built it some years ago.
If anyone has the issue in question, I would like to arrange for a copy
of it. I am particularly interested in the dimensions since I would like
to rebuild the elements and put it up. Please contact me via e-mail or
write me at: P.O.Box 1286 Lakewood, NJ 08701
AMPR: KA2RAF@NN2Z.NJ.USA
I am willing to pay any expenses for the copying/postage
Thanks very much, 73 de Chris

Organization: IJCR.Fidonet.Org: Institute Of Judaic-Christian Research
Lines: 26

I have a Uniden handie-talkie for sale. It was originally a commercial
band radio, but has been modified to work on the 440MHz band. Comes
with 2 battery packs, 1 large and 1 smaller, plus the charger. With the
large battery it's about 5 watts out, 3 watts with the smaller battery
pack. There's a button on top of the radio to switch down to 1 watt
output for power conservation. It has 8 programmable channels, each of
which can have separate transmit and recieve frequencies for a
repeater, or they can be the same for simplex.
This is a sturdy and durable little radio that could take some abuse
and use. It is in excellent working condition. If you want the radio
for sure, tell me what frequencies to program the channels for and I'll

do it before I send it. Remember, I need both transmit and recieve
frequencies.
 I'll take $200 or best offer. I'll pay shipping.
Reply in this echo, please.

 Am looking for some IF banpass crystal filters for a Drake R7 receiver.
Have several R7 sharp filters (300 and 500 Hz) for trade on a broader AM
filter such as 6 or 8 Khz. Or, will purchase at a reasonable price.

Message-ID: <1990Dec29.183956.16148@chinet.chi.il.us>
Date: 29 Dec 90 18:39:56 GMT
Organization: Chinet - Public Access UNIX
Lines: 15

Am selling, or will trade, two dedicated commercial RTTY receivers - Frederick Model 1500A receivers. Optimized for HF RTTY reception, the receivers are crystal controlled (I have crystals in the radio for PRENSA LATINO, TASS, etc.), 19" rack mounts by 1.5" tall. A demodulator is feed from the 1500A's audio output.

Both units are set up for diversity reception (nice 3" package) and seems to be constructed very well. Am asking $275 each or $500 for both...

I have a project that requires a low power AM or FM transmitter with
decent audio quality. This transmitter must be legal (Part 15) to
operate, or be able to be made legal under the FCC license free
statutes.

Transmitters like this are in use on college campuses, and similar
situations where coverage of a single building is required. They feed
the signal into the power lines, and hence do not radiate beyond the
building.

I saw two such units at a recent hamfest, and almost bought them, but
did not have a need for them at that time. (I.e. I kick myself) the
prices were very reasonable.

If someone on the net has such a unit for sale (LPB or PANAXIS or
similar type system) at a price that will not break my modest bankbook,
please send EMAIL to

flash@lopez.UUCP

Thanks!

For Sale or Trade:

Regency (Wilson) Model MCPH256A Commercial Grade Handi Talkie.
FCC Type Accepted for Commercial Land Mobile Service Applications.

This is an older type Handi-Talkie that is crystal controlled on both
transmit and receive. I have installed 6 sets of 2-Meter crystals and
retuned the unit for use on 2-Meters. (I have an FCC First Class Phone
Ticket and have worked with commercial gear for 17 years).

The unit has the following crystal pairs installed:
TRANSMIT   RECEIVE

146.46   146.46
146.01   146.61
146.03   146.73
1146.19   146.79
146.07   146.67
147.69   147.09

Unit comes with good nicad pack (installed),nicad charger, rubber duck
antenna, owner's manual, and factory service manual. Controls are off/on/
volume, squelch, high/low power switch and 6 channel selector.
Make a cash offer or will consider a trade for an antenna tuner.
(MFJ, Dentron, Johnson etc).
(We can negotiate the cash difference)

  I have a Laser Diode Laboratories, Inc. (now Laser Diode, Inc.) LD-60
  single heterojunction GaAs laser diode for sale. This was purchased
  new and tested but never built into anything. It's rated at 2+ Watts
  at a 0.1% duty cycle with a threshold current of 3 Amps. The package
  is coaxial with an 8-32 screw stud for the negative terminal. Wavelength
  is 904 nm at 25 deg. C. That is well into the infrared so it should be
  good for some communications projects or maybe a laser pointer for Cmdr.

Gordy LaForge. I also have a 4 page spec. sheet and a reprint of the Scientific American article explaining simple driver and detector circuits. $15. Reply by e-mail. -Ken WB0QNA

I am looking for a general coverage transceiver for 1.8 - 30 mhz for ham and
MARS use, with antenna/transmission line matching unit and PS. CW/SSB/FSK(?).
100 watts out, 100% duty cycle for prolonged RTTY/AMTOR/PACKET use.

I am also looking for a general coverage 142-150 mhz allmode rig (Same
application), 10 watts minimum, CW/SSB/FM.

I make a church mouse look rich, so don't offer to sell me an IC-781. [:-)

First response here or E-mail/Netmail. If it is promising, I call you on the
telephone to haggle.

I am also looking for one of these for my IC730. Does anyone
know of any aftermarket ones that will fit the IC730, since the
FL45 is discontinued?

Xref: gmdzi news.announce.newgroups:785 rec.ham-radio:18872 rec.ham-radio.swap:900
rec.ham-radio.packet:3355

This is a formal call for votes for the proposed reorganization of
rec.ham-radio.*. The discussion period started on December 4, 1990, and

has run for just over the required 30 days (extended from the original ending time of 31 December 1990 due to the Christmas and New Year's holidays). Please read this entire posting before sending in your vote; the ballot to be used is at the end.

THE PROPOSAL:
==========
The following groups are to be renamed:
rec.ham-radio   => rec.radio.amateur.misc
rec.ham-radio.packet => rec.radio.amateur.packet
rec.ham-radio.swap   => rec.radio.swap
Groups will be renamed by creating the replacement group, asking site admins to alias the old group to the new one, and rmgrouping the old group after traffic in it has died down, hopefully about a month later. This method has been shown to work in other hierarchies.

The following groups are to be created:
rec.radio.amateur.policy
This group is intended to contain any and all discussion about policy issues pertaining to amateur radio, including, but not limited to, rules, regulations, laws, and legal actions by and against amateur radio operators. This group is to be unmoderated.

rec.radio.cb
This group is intended to contain discussions related to Citizens' Band radio. This group will be unmoderated.

RATIONALE:
==========
1. Why move the groups at all? The primary motivation is to make it easier for interested people to find newsgroups related to ham radio. The rec.radio hierarchy was created after rec.ham-radio (net.ham-radio before the Great Renaming). It is an inconsistency in the namespace to have groups for similar purposes separated from each other, and that makes it harder for new users to find the desired groups. Further, this allows a change from ham radio to amateur radio (see next topic).

2. Why .amateur instead of .ham? It has been pointed out in discussion that "ham radio" is primarily an American term, and carries little meaning outside the US. In addition, there are negative connotations attached to "ham" that don't apply to "amateur". Some confusion also exists in the public mind about just what a "ham radio operator" is, as evidenced by the occasional "ham operator jams aircraft frequencies!" when the person in question has never been a licensed amateur radio operator.

3. Why a .policy group? A significant part of the traffic in rec.ham-radio is concerned with issues of policy. This includes substantially all of the flamage, which has in the recent past included such subjects as whether or not it's legal to order a pizza via an amateur repeater, the proposal to add a class of license that does not require knowledge of the International Morse Code, and the legality of modifying amateur equipment to transmit outside the

amateur bands. The new group is intended to move the flames and the long discussions that never seem to get anywhere out of the main group.

4. Why use the name .policy, instead of .rules, .regs, .regulations, etc.? The group is intended to contain any and all discussion about any policy issues pertaining to amateur radio. This includes not just rules and regulations of the FCC and other national regulatory bodies, but also laws affecting hams (such as the infamous New Jersey scanner law), lawsuits over nuisance issues, antenna ordinances, frequency coordination and band planning, and the like. .policy is the best name that has been suggested for the group out of many possibilities.

5. Why not a .tech group? There are two reasons for this one. The first is that there's more to ham radio that's non-inflammatory than just technical discussions, and the object of a new group is to move the flames, not run away from them. A .tech group would leave those of us who are interested in more than just technical discussions, yet not in the seemingly endless legal discussions, left to wade through the flames. Second, Brian Kantor, who maintains the info-hams mailing list, has said that info-hams will continue to gateway rec.ham-radio (and, presumably, rec.radio.amateur.misc) only, and moving the technical postings off would deprive those on the mailing list.

6. Why create a .cb group? There is currently no place for Citizens' Band radio discussions explicit in the hierarchy. These postings currently wind up in rec.ham-radio, where they tend to generate flamage all out of proportion to their volume.

THE MECHANICS OF THE VOTE:

The voting period will run from Monday, 7 January 1991 until Monday, 28 January 1991. Only votes received during that period will be counted. Each proposal is a separate vote, and must be voted on separately under the Guidelines for Group Creation (which have been applied to renames as well in the past).

Please edit and send in the ballot below. Each ballot will be stripped of all but the From: line and the lines containing valid votes by an automatic process; I won't see any comments included. No individual acknowledgments will be mailed. Votes will be acknowledged en masse in a posting on Thursday, 18 January 1991, and complete vote results will be posted on Tuesday, 29 January 1991.

For each proposal, indicate your choice of a yes vote or a no vote by placing a Y or N, respectively, at the beginning of the line. The first character on the line that is either a Y or an N (case doesn't matter) will be counted as your vote on that proposal. You may abstain from any particular vote by deleting the line entirely from the ballot. An invalid line (one not containing a Y or an N before the "Proposal #n:" tag) will be treated as an abstention, as well. Mail the completed ballot to me at

this address, jmaynard@thesis1.hsch.utexas.edu, with the characters "VOTE" somewhere in the Subject: line. (Again, case doesn't matter.) Replying to this message with your newsreader's mail reply command ("R" in rn, readnews, vnews, and vn; I don't know nn's commamd) will work fine. Votes posted to the net will be summarily ignored and may earn the poster a free flame from the net.police.

THE BALLOT:
==========
 ?   Proposal #1: Rename rec.ham-radio to rec.radio.amateur.misc
 ?   Proposal #2: Rename rec.ham-radio.packet to rec.radio.amateur.packet
 ?   Proposal #3: Rename rec.ham-radio.swap to rec.radio.swap
 ?   Proposal #4: Create rec.radio.amateur.policy
 ?   Proposal #5: Create rec.radio.cb

Any one out there know of iny scrap yards that might have electronic
parts in Wilmington, DE. I am most interested in power transformers,
and capaciters. A place where old TVs go to die would do verry well.

I am also interested in any information about catgalogues that contain
specification data for PLL chips and other RF ICs. This documentation
is very hard to find here in Wilmington.

I hope that this isn't an inappropriate post, but I figure that hams are
more likely than most people to be able to use this:

I have a 19" color remote Magnavox TV which is 3 years old, but it needs a
new flyback transformer which the repair shop tells me will cost $160.
For $50 or so, I will ship it to you UPS if you think you can make use of
it.

I have a Brooks SRX-205AA Satellite Receiver for sale....

Package includes: SRX-205AA Receiver
                    SRX-205 Remote Control
                    Panasonic LNB (Low Noise Block Converter)

Note: I will break the package up if need be.

Receiver Features:

- Synthesized channel tuning
- Synthesized dual audio tuning
- Phase-locked loop demodulation

- Programmable stereo sub-carrier demodulators
- Electronic and motor-driven polarizer control with format reversal
- Digital clock, channel, audio sub-carrier display
- Signal level meter
- Built-in RF modulator
- Channel scanning
- Video inversion
- Wireless infra-red Remote Control
- Full function Local Keyboard
- Remote Volume/mute

If you are interested please contact me via e-mail or telephone:

Let me preface this by saying that I have absolutely NO experience whatsoever in the HAM radio arena other than a degree of facination and occasionally listening in as several of my friends enjoyed their radios.

Having said that, I know that HAMs tend to be very friendly and helpful folks, so I will throw my question (request?) at you in the hope that perhaps you can point me in the right direction or offer some suggestions. Thanks, and be kind to my mistakes!

Now, to the issue at hand. I have a friend who is heavily into HAM and is searching for some software for the Amiga 1000 that would allow him to use it with his radio (at this time I can't recall exactly what that make and model of his radio is... nuts ... well at least I know that it has the necessary port on it and mentions that ability to make such a connection in the manuals) for RTTY or any of a number of other things he mentioned that I didn't quite follow.

I realize this request is sketchy, but if anyone out there in net.land knows of any such software, of perhaps an FTP site where something like this might exist, or even any tips or pointers on how one might go about writing such software, I would be most thankful! If possible, reply by e-mail to the address below, as I don't generally read this newsgroup.

Thanks!

Broadcast to list 16 January 1991

Station LY2WW in Vilnius, one of the important links between Lithuania and the outside world, was captured and destroyed by Soviet troops. At this point the fate of the operators is not known.

It is feared that the Soviets were alerted to the existence and importance of this station through widespread publicity on amateur radio nets and listservers.

BALT-L is itself operating under wartime guidelines. We will not identify sources for information coming from the Baltic States. We will definitely not be publicising targets for Soviet reprisals, or identifying radio fgrequencies for the benfit of jammers.

We can only appeal to everybody handling information on these acts of war against the Baltic nations to consider their responsibilities for their actions.

Does anyone have several pieces MC 1524G Op-Amps?
It's an obsolete 1 Watt amplifier in TO can. I have tried to purchase this component through Motorola and most distributors within the U.S. but no-one seems to have it. My hope is that this message reaches someone who has one/some pieces in his/her 'swap-box'. I accept ANY CONDITION. The only thing that matters is that the die inside is identifyable as a MC 1524.

Please also note not to mix up this Motorola 1524 with Pulse Width Modulators from other vendors i.e. SG 1524 ...

**** FOR SALE ****

Hewlett Packard 8510 Network Analyzer
Complete System

An associate of mine just recently closed his company, and is looking
to sell a complete Netork analyzer/S-parameter test station. Operates
from 45 MHz to 26.5 GHz. Includes:

HP 8510A Network Analyzer (w/opt. 010)
HP 8513A Relection Test Set (45MHz-26.5GHz)
HP 8541A Synthesized Sweeper (10MHz-26.5GHz)
.
.
NUMEROUS cal kits, adapters, repair kits, etc. Too much to list.

The HP LIST price for JUST THE FIRST THREE ITEMS above is $112,200.
If you have an interest in the equipment, send a note to me at:
hh2@prism.gatech.edu. I will be able to give you a complete list
of what's available, and take offers on the equipement.

rec.ham-radio.swap:920
Nntp-Posting-Host: thesis1.hsch.utexas.edu

Originator: jmaynard@thesis1.hsch.utexas.edu

This is a formal call for votes for the proposed reorganization of rec.ham-radio.*. The discussion period started on December 4, 1990, and has run for just over the required 30 days (extended from the original ending time of 31 December 1990 due to the Christmas and New Year's holidays). Please read this entire posting before sending in your vote; the ballot to be used is at the end. I'm processing ballots automatically, and not following the instructions below may result in your vote not getting counted.

THE PROPOSAL:
=============
The following groups are to be renamed:
rec.ham-radio   => rec.radio.amateur.misc
rec.ham-radio.packet => rec.radio.amateur.packet
rec.ham-radio.swap   => rec.radio.swap
Groups will be renamed by creating the replacement group, asking site admins to alias the old group to the new one, and rmgrouping the old group after traffic in it has died down, hopefully about a month later. This method has been shown to work in other hierarchies.

The following groups are to be created:
rec.radio.amateur.policy
This group is intended to contain any and all discussion about policy issues pertaining to amateur radio, including, but not limited to, rules, regulations, laws, and legal actions by and against amateur radio operators. This group is to be unmoderated.

rec.radio.cb
This group is intended to contain discussions related to Citizens' Band radio. This group will be unmoderated.

RATIONALE:
==========
1. Why move the groups at all? The primary motivation is to make it easier for interested people to find newsgroups related to ham radio. The rec.radio hierarchy was created after rec.ham-radio (net.ham-radio before the Great Renaming). It is an inconsistency in the namespace to have groups for similar purposes separated from each other, and that makes it harder for new users to find the desired groups. Further, this allows a change from ham radio to amateur radio (see next topic).

2. Why .amateur instead of .ham? It has been pointed out in discussion that "ham radio" is primarily an American term, and carries little meaning outside the US. In addition, there are negative connotations attached to "ham" that don't apply to "amateur". Some confusion also exists in the public mind about just what a "ham radio operator" is, as evidenced by the occasional "ham operator jams aircraft frequencies!" when the person in question has never been a licensed amateur radio operator.

3. Why a .policy group? A significant part of the traffic in

rec.ham-radio is concerned with issues of policy. This includes substantially all of the flamage, which has in the recent past included such subjects as whether or not it's legal to order a pizza via an amateur repeater, the proposal to add a class of license that does not require knowledge of the International Morse Code, and the legality of modifying amateur equipment to transmit outside the amateur bands. The new group is intended to move the flames and the long discussions that never seem to get anywhere out of the main group.

4. Why use the name .policy, instead of .rules, .regs, .regulations, etc.? The group is intended to contain any and all discussion about any policy issues pertaining to amateur radio. This includes not just rules and regulations of the FCC and other national regulatory bodies, but also laws affecting hams (such as the infamous New Jersey scanner law), lawsuits over nuisance issues, antenna ordinances, frequency coordination and band planning, and the like. .policy is the best name that has been suggested for the group out of many possibilities.

5. Why not a .tech group? There are two reasons for this one. The first is that there's more to ham radio that's non-inflammatory than just technical discussions, and the object of a new group is to move the flames, not run away from them. A .tech group would leave those of us who are interested in more than just technical discussions, yet not in the seemingly endless legal discussions, left to wade through the flames. Second, Brian Kantor, who maintains the info-hams mailing list, has said that info-hams will continue to gateway rec.ham-radio (and, presumably, rec.radio.amateur.misc) only, and moving the technical postings off would deprive those on the mailing list.

6. Why create a .cb group? There is currently no place for Citizens' Band radio discussions explicit in the hierarchy. These postings currently wind up in rec.ham-radio, where they tend to generate flamage all out of proportion to their volume.

THE MECHANICS OF THE VOTE:

The voting period will run from Monday, 7 January 1991 until Monday, 28 January 1991. Only votes received during that period will be counted. Each proposal is a separate vote, and must be voted on separately under the Guidelines for Group Creation (which have been applied to renames as well in the past).

Please edit and send in the ballot below. Each ballot will be stripped of all but the From: line and the lines containing valid votes by an automatic process; I won't see any comments included. No individual acknowledgments will be mailed. Votes will be acknowledged en masse in a posting on Thursday, 18 January 1991, and complete vote results will be posted on Tuesday, 29 January 1991.

For each proposal, indicate your choice of a yes vote or a no vote by

placing a Y or N, respectively, at the beginning of the line. The first character on the line that is either a Y or an N (case doesn't matter) will be counted as your vote on that proposal. You may abstain from any particular vote by deleting the line entirely from the ballot. An invalid line (one not containing a Y or an N before the "Proposal #n:" tag) will be treated as an abstention, as well. Mail the completed ballot to me at this address, jmaynard@thesis1.hsch.utexas.edu, with the characters "VOTE" somewhere in the Subject: line. (Again, case doesn't matter.) Replying to this message with your newsreader's mail reply command ("R" in rn, readnews, vnews, and vn; I don't know nn's commamd) will work fine. Votes posted to the net will be summarily ignored and may earn the poster a free flame from the net.police.

THE BALLOT:
==========
 ?   Proposal #1: Rename rec.ham-radio to rec.radio.amateur.misc
 ?   Proposal #2: Rename rec.ham-radio.packet to rec.radio.amateur.packet
 ?   Proposal #3: Rename rec.ham-radio.swap to rec.radio.swap
 ?   Proposal #4: Create rec.radio.amateur.policy
 ?   Proposal #5: Create rec.radio.cb

Does anybody have data regarding older transformers made in the days of tube amplifiers by RCA or Western Electric? I would be happy to pay copying and postage to get copies of such information.
    I build/repair older tube amps as a hobby and have been collecting old transformers where I can. Often with RCA & WE stuff, I have trouble figuring out the specifications. By the way, I'd be interested in audio output transformers as well.
Thanks much.

I believe Eimac still makes them. I bought one in 1986 for ~C$130.00.
Try an electronic parts distributor.

******************** MILITARY RADIO OPERATIONS ********************

I'm passing this along to the Amateur Operators here on the echo.
There has been a rash of patriotic amateurs operating on the military
frequencies and on the MARS frequencies. Although the intention of
the amateurs on the frequencies are good, their activites on these
frequencies are prohibited.

          ****

On CNN, there was an operator from NYC operating on 11.176MHz using
his amateur call, contacting a MAC flight headed to the war zone.

          ****

Please keep from transmitting on the military and MARS frequencies
as it interfers with operations.

          ****

The other day we had an amateur asking for a signal report on a
MARS phone patch frequency, while a patch was in progress. He was
more than 50KHz out of band and caused some confusion between the
serviceman and his family. Put yourself in the serviceman's shoes
and how you would view the situation.

          ****

If you know of anyone doing this, please ask them to listen only.
You can SWL all you want, just refrain from keying up, please.

          ****

If you are interested in helping, contact the MARS operators in
your area and take the training for your certificate.

Thanks for your time. KB4YLY / AFA2GN

Subject: VOTE RESULTS: rec.ham-radio reorganization
Message-ID: <4600@lib.tmc.edu>
Date: 28 Jan 91 12:22:34 GMT
Sender: usenet@lib.tmc.edu
Followup-To: news.groups
Organization: University of Texas Medical School at Houston
Lines: 280
Xref: gmdzi news.groups:24389 rec.ham-radio:19908 rec.ham-radio.packet:3466
rec.ham-radio.swap:941
Nntp-Posting-Host: thesis1.hsch.utexas.edu
Originator: jmaynard@thesis1.hsch.utexas.edu

The voting period for the rec.ham-radio.* reorganization is now over.
The proposals to be voted on were:
Proposal #1: Rename rec.ham-radio to rec.radio.amateur.misc
Proposal #2: Rename rec.ham-radio.packet to rec.radio.amateur.packet
Proposal #3: Rename rec.ham-radio.swap to rec.radio.swap
Proposal #4: Create rec.radio.amateur.policy
Proposal #5: Create rec.radio.cb

The results are as follows:
Proposal 1: 172 to 47...margin 125, percent in favor 78.538813
Proposal 2: 178 to 42...margin 136, percent in favor 80.909091
Proposal 3: 177 to 44...margin 133, percent in favor 80.090498
Proposal 4: 173 to 44...margin 129, percent in favor 79.723502
Proposal 5: 160 to 49...margin 111, percent in favor 76.555024

As you can see, all five proposals have passed, since all five have a margin of yes votes over no votes of greater than 100, and all five have more than 67% (2/3) of the votes cast being yes votes.

The five-day period of checking for duplicates and invalid votes begins as of the time that these results appear in news.announce.newgroups, per the Guidelines for Newsgroup Creation. If no problems that change the outcome of any proposal are found, then I will ask Eliot Lear to issue newgroup messages for rec.radio.amateur.misc, rec.radio.amateur.packet, rec.radio.swap, rec.radio.amateur.policy, and rec.radio.cb. In a month, I will ask him to repost the newgroup messages, and post rmgroups for rec.ham-radio, rec.ham-radio.packet, and rec.ham-radio.swap. I would ask sysadmins on the net to alias rec.ham-radio to rec.radio.amateur.misc, rec.ham-radio.packet to rec.radio.amateur.packet, and rec.ham-radio.swap to rec.radio.swap when they receive the newgroup messages - but not before.

Thanks go to all who provided input into the process of shaping this proposal. It started out as one man's idea, but quickly grew to encompass just about every input even remotely compatible with the overall objective. Thanks also

go to all who voted - as you can see, every vote counts, as just 6 votes the other way would have defeated rec.radio.cb.

For those who keep track of when votes are received, 85 were received the first day, 128 by the fourth, 148 by the tenth, and 33 the day after the second call for votes was posted. Only 14 were received in the last week.

I wound up writing a shell script to massage ballots received into the format you see below, and an awk program to generate the report at the top of this message. Anyone who's interested in those pieces of cruft (really, they're not pretty - they just work), just drop me a note and I'll pass them along.

The votes received are listed below: (Y=yes, N=no, A=abstain)

Subject: Handi-Talki for Sale
Message-ID: <Qbd3Egy00UhWI0y1Np@andrew.cmu.edu>
Date: 28 Jan 91 14:24:44 GMT
Organization: Computing Systems, Carnegie Mellon, Pittsburgh, PA
Lines: 63

I have a Regency MCPH256A Handi-Talkie for sale or trade.
This is an older XTAL-Controlled model with 6 switchable crystal-controlled
channels. The good news is that it is FCC Type Accepted for Commercial
Land Mobile Service (Read: "built like a brick you-know-what").
The handi-talki was originally on commercial frequencies, and I retuned
and re-xtaled it up for 2-Meters. (I have an FCC First Class Radiotelephone
License, and have been fixing 2-way commercial gear for 15 years now).

Here are the vital stats:

Manufacturer: Wilson (Regency)
Model: MCPH256A
Channels: 6 crystal controlled pairs (holds 12 crystals in all)
Freq-Range: 134-174 Mhz
Dimensions: 6.25 X2.45 X 1.8 inches
Weight: 16 oz
Antenna: Rubber Duck
Rated Output: LOW 1 watt   High 3 watt
Receiver Sensitivity: .25 uV for 12 db SINAD
Spurious and Image rejection: 60 db
Modulation: FM +/- 7.5 khz
Audio Output: 500 mw
IF Frequencies: 10.7Mhz and 455 khz.

Controls: On/Off/Volume
           High/Low Power micro switch

Squelch
Channel Selector
Battery Condition Led Indicator
BNC Antenna Jack
Plug for optional Tone Encoder Unit

The Handi-Talki comes with the Regency owners manual, the factory service manual, rubber duck antenna, good nicad battery pack, nicad trickle charger, and the following 2-meter crystals installed:

Transmit	Receive
146.46	146.46
146.01	146.61
146.03	146.73
146.19	146.79
146.07	146.67
147.69	147.09

Crystals are about $6 each from Jan Crystals in Fort Meyers, Fla.

NOTE The nicad charger is NOT the original charger for the unit.
I made the charger from a .5 amp plug-in power module.
It works fine, and trickle charges the battery pack to full
charge overnight. IT WILL NOT FAST CHARGE THE BATTERIES.
Full charge requires 8-12 hours at the trickle rate.

I am looking for $100 cash for the Handi-Talki, but I need an antenna tuner. If you would like to swap your tuner for the HT, we can haggle over the cash difference.

Hello...

I'm looking for a used Kenwood TM-321 or -331 220 Mhz mobile rig.
(specifically looking for a Kenwood so I can make it go crossband
with my TM-421.)

Please send e-mail direct....

Thanks,
Thad

<>

I am in need of any available information, especially a service manual,
operator's manual, or schematic of a Nems-Clarke Special Purpose
Receiver, Type 167-J-2. This is a VHF Tube-type rack-mount receiver
that covers 55 - 260 MHz. I know very little about this receiver,
except it is PROBABLY early 60's vintage, and may have been commonly
used for MARS work in the 60's. Any help would be appreciated.

Try this address for him: anasaz!rusty@asuvax.eas.asu.edu
If that fails, try: rusty%anasaz@asuvax.eas.asu.edu

If both fail, send me exact copies of the complete bounces and I will
try to diagnose what is wrong.

I am looking for old EF Johnson transmitters in any sort of shape,
non-working but complete and repairable preferred.

I wont make you rich, but I will pay a fair price and guarantee
a good home to any of these old anchors that you may have
holding tower guys down with.

~~~~~~~~~~~~~~~~~

Initial guidelines for the Microwave and RF GROUP Conference.

1) As of present, this conference shall be open ended. As things progress, we'll see how the Conference is developing and then determine if there is a need to fine-tune our scope of discussion.

2) It is possible that this Forum may become an important motivator of the Microwave and RF industry as a whole. Ideas shared in one place strangely seem to find their place in an application later on. Discussions on this forum and the contents of all message traffic promulgated herein are declared Public Domain. Furthermore, this conference is a Public Conference and makes no provision for private messages.

3) The Owners/Operator of RES-Q (TM), hereby declare themselves not responsible in any case of posted information which may be proprietary, confidential or secret. In any such case, liability shall be reverted to the originating BBS's owner/operator and poster. RES-Q (TM) will in no way be responsible for filtering such information but retains the rights to do so.

4) Participants of the Microwave and RF GROUP Conference are solely responsible for what they do with information obtained from the Microwave and RF Conference. RES-Q (TM) makes no warranties express or implied as to our performance as Top Star for this GROUP.

5) Access to the Microwave and RF GROUP Conference is not restricted. A professional, yet congenial, atmosphere is desirable.

6) The Microwave and RF GROUP Conference may not be "ported" outside of GroupMail without prior consent of RES-Q.

7) Finally, let's make this Conference one of the Top 5!

Your Moderator is Bill Kreps

For sale:

Sony ICF-2010 AM/FM/AIR receiver, $250/OBO. I'll pay reasonable shipping expenses.

Unit is 1 year old and in very good condition. It has a minor scratch on the display (one must look at an angle to see it). It comes with all original accessories and documentation (antenna plugs, AC adapter, carrying strap, owner manual, SW program booklet).

I will also include a service manual with schematics (unit has never been opened or tampered with).

Reason for sale:

1) Upgrading to full ham transceivers
2) Sensitivity at 10 m and 160 m is less than desirable. SW sensitivity
   and selectivity is very good.

Gotta unload a KLM Echo II 432 mhz transceiver, SSB/CW, 10 watts PEP.
Originally intended for OSCAR Mode B.

I need the money and will sacrifce it for $100 plus shipping/COD/insurance.

 Jim Grubs, W8GRT

I know of a Johnson Transmitter for sale
here in the S.F.Bay Area. The fellow
doesn't know if it works, but it looks
clean and complete. He wants $150 for
it. The only problem would be shipping.
The thing weighs a ton!

Best Regards,

Jim Allen

Glad you saw it, Ken. I had you in mind when I posted it.

First, it orginates (Sure!) originates as a groupmail conference in a fidonet technology net. Groupmail is somewhat analogous to a moderated newsgroup. I was planning on gatewaying it into a mail list until and unless there are enough takers to warrant setting up a newsgroup.

Of course, if you have a Fidonet compatible mailer (FrontDoor, Binkleyterm, SEAdog, D'Bridge, etc., and GROUP.EXE, you can pick it up directly from the moderator.

+
+If you take it to the FCC lab and get it type accepted, yes.
+

 None of the existing Amateur gear  could  pass..the  controls  allow  for
other  than  fixed-transmit  frequencies.  The  power output is adjustable
above the limits, the modulation can be run above limits, most  rigs  have
FM - a mode that is illegal...nope, you couldn't get it type certified; it
```

just won't qualify! The rules were designed to force the manufacturers into selling radios without those capabilities, and of such design that it is difficult to add such capabilities...like why do you think that Dynascan/Cobra keeps on making the Cobra 148GTL??? Because it's *very* easy to modify...and that's why people keep on buying them! Because of the way in which the rules were written, once a design is type certified so long as there are NO CHANGES, the company can keep producing and selling them..if they change something it's a new set of rules! The latest set insists on making it damn near impossible to modify the rig for increased frequency coverage (the '148 can go from 26.965-27.405 to 26.815-28.045 with just 3 silly jumper wires and 3 switches added to the existing PLL!) more power (the '148 can be turned up to almost 20w PEP SSB and 10-12w RMS for AM use!) or additional modulation modes. (again, the '148 can be made to do FM by adding a little kit that costs $20!)

In addition, it's pretty obvious that the manufacturers would rather sell millions of radios than thousands...hence they decided to do both by building units like the HR-2510/2600 - Ham radios...sure! A simple jumper, a cap or a new PLL chip and either of those units can operate on 26.00-30MHZ...presto! ..no type acceptance laws to worry about! It's NOT a CB! Yeah RIGHT!

The FCC hasn't got the time to bust hams for running their gear on 11 meters, and your risk-factor is small PROVIDED:

1) you DO keep it turned down to 3 or 4 watts RMS - otherwise you stick out like a sore thumb! Just like the guys that run linears only cleaner! ..if your antennas are really good on 10 & 11, crank it down more!

2) Watch your modulation % - most stock CB's have 65-70% max...a preamp mic (I use the Cobra Dynamic Plus..) turned DOWN to 2 or 3 will make you sound pretty much like a *verrrryyy clean* CB radio...most amateur mics sound pretty awful on AM..great for SSB but thin or hollow on AM, especially if the people listening to you are listening on CB receivers..which are not the greatest!

3) AVOID THOSE "funny freqs"...lot's of CBers insist on using the band between 27.405 and 28.0 You (as a HAM) should never operate there! You could lose your license in a flash! Most CBers never get caught..but I've know some Hams that have! A word to the wise...if they ask, just be cool..tell 'em you don't have "freqs"! Stick to the 40 channels...plenty of people to talk to there, besides some of the freebanders have been known to use their equipment for illegal acts - something you'd just hate yourself for if the FCC nailed you and decided that you were in on it!

4) You don't cause problems...TVI, RFI and the like, even complaints from other 11 meter users can be the catalyst for a complaint. Remember that most of the people on CB are non-technical, they tend to carry around a lot of misconceptions about the science of radio...don't abuse them for this: TEACH THEM! ONE AT A TIME! INVITE THEM OVER (if you trust them..) AND OFFER TO LET THEM BE A GUEST OPERATOR! YOU'LL BE AMAZED! Some of them will be so jazzed they'll go out and get a Novice ticket with a little encouragement from you! (I'm rather proud of the 12 people

I did this with - they're good hams, they wern't bad CBers...)

5) Keep a low profile! The FCC is sooo overworked, and sooo underfunded it's unlikely that they will be doing much about 11 meters any time soon. They'd probably like to just ignore the problems there unless there is a reason to do otherwise...like those clowns that shout obscene remarks into their mics..or run a gallon of power...if you're cool about it, no one will ever know you're running ham gear..unless you tell them! And if someone *does* ask..tell them you're running a Stock Cobra 148GTL with a power mic!...there's millions of those things out there and it won't arouse a bit of interest..

It depends on condition. I've seen
mint ones going for $700 - $1000.
I think the upper part of the range
is extreme.

This may be a dumb question, but is there any reason to modify a CB to
use FM?

This might be a dumb response, too (I'm not exactly sure what you mean),
but 10 meter FM is a whole lot of fun, especially through repeaters ... it's
a whole different type of QRM and QRN that, to many people's ears, is just
as much fun but without the "SSB Headache" I get after a few hours of
over-used speech processing and tin voices.

I wonder if any of these FM radios allow you to work "splits" for repeaters.
I have heard many stories about eliminating the "skip zone" by using
repeaters - sounds like fun!

Rick,
  I can't seem to find a mail path to you. I need some HRM from the
early 80s to fill out my collection. My need is from the time that
Jim Fisk passed away until Rich Rosen took over as editor. I'll be in
CA early next month and could pick them up in person. Find me a good
mail path or send your day time phone number via email.

Thanks,
  Ron Todd, K3FR

>>> Re "Microwave and RF Forum as a mailing list/newsgroup

I'd really appreciate it if this were possible. I tried to send some
mail to (I think) Jim Grubbs on Fidonet but it was bounced (even using
the REPLY command from the Usenet reader :-).

From New Zealand, Fidonet access via phone (I'm guessing - we don't have
it here) would be cripplingly expensive - like a choice between reading
the group and eating :-), whereas Usenet and Internet mail are already
available.

To Summarize: One (informal) "Yes" vote for either a mailing list/newsgroup.

Cheers
Giovanni - ZL2BOI

Seems to me Bob Heil was a source for many components to perform the
10m fm conversions. I have ordered several items including the wb filter
and the costs were always quite reasonable. I don't know if he still
does this, but if there is interest, I could look up the info...

Provided nothing. There is no way to police the 10 meter band. As long as they
sell the radios the band is lost to hams.
>
> 5) Keep a low profile! The FCC is sooo overworked, and sooo underfunded
> it's unlikely that they will be doing much about 11 meters any time soon.

They won't be doing anything soon. The solution according to a fellow New
Hampshireite in the current administration is to do nothing long enough for the
QRM on HF to get bad enough for the media to notice it. The congress at the
urging of the administration can then step in with public support and pull the
plug on all, and he says ALL HF transmission. Mr HIGH UP in the POWER STRUCTURE
knows I'm a ham and he said with a shrug that there will be no way to clean
all private use of HF off the bands without including hams. The plan is to ban
ALL private transmission. Then they don't have to go after specific violators
they can just swoop around and RDF the easiest violators..by the thousands..
if necessary and pass out big,and he said BIG fines. No jail..no room, but,and
these are his words...."The fine structure will allow a self-sustaining police
action to continue as long as necessary without departmental fiscal impact."
When I brought up the failure of the drug war he laughed and said "drug dealers
are mobile. They are like rats. They hear you coming and can hide. And they
don't have a lifestyle that can be damaged by big fines. You radio
types live in houses and drive cars that can be attached along with your
paychecks. Your lives can be destroyed by being caught on the air by a van
with a couple of guys and the 'probable cause' of RF coming out of your house."
And then because we went to college together and have been friends for a long
time he said,"Sorry Dickie, we need the room, we need the money and the
pressure from the commercial sector is building. You hams did a great job when
we were young but there is nothing you can do now that is so valuable to the
public that they can save you. I'm really sorry".

Then I asked about VHF/UHF and he thought that was really funny.

Porky said it all...."That's all folks"

Atari 520 ST (512K) (Manuals INCLUDED!)
- Original TOS in ROM with external power supplies (Higher power capacity)
- SM124 (Monochrome) 600 x 400 display
- Built-in RF modulator for use with color TV (great for games)
- Atari SF354 360K (3.5-inch single-sided) floppy drive
- Future Systems GT100 720K 3.5-inch double-sided floppy drive
- MIDI port, RS232 port, Centronics Parallel printer port (all with industry-standard connectors!)
- Mouse
- 2 joystick ports for standard Atari/Commodore joysticks
- DMA port for hard disk

Software (commercial titles include documentation - NO PIRACY!):
- Microsoft Write (with GDOS)
- Publishing Partner 1.03

  - PageStream 1.51
  - Magnetic Images Postscript Screen Fonts
  - GFA BASIC 2.0
  - ST BASIC
  - Typing Tutor/Word Invaders
  - The Black Cauldron
  - Time Bandit
  - Uniterm 2.0e
  - KA9Q Amateur Packet Radio with SLFP mods
  - PE1CHL Amateur Packet TCP/IP with conferencing and support for dual-port KAM or KPC-4 TNCs
  - Gulam, Gemini, Sozobon C, UnixTkit, tons of other utilities
  - UUCP package
  - etc, etc, etc. Over 100 disks worth of stuff!

  $750 or best offer - you pay shipping outside of Metro Detroit

---

Kantronics KAM TNC
  - Full multi-mode TNC
  - Supports simultaneous HF and VHF (or dual VHF) operation
  - KISS mode
  - Version 2.85 firmware
  - 32K static ram with battery backup
  - Smart Watch timekeeper
  - Cables, manuals, original box!

  $250 or best offer - you pay shipping outside of Metro Detroit

>>>>>>>>S P E C I A L<<<<<<< Buy both of the above together for a complete Packet Radio station for $900!

Heathkit HW-8 QRP CW
  - Only modification is a BNC instead of an RCA antenna jack
  - Original builder - original manual.

  $65 or best offer - you pay shipping outside of Metro Detroit

---

Kenwood TR2200 portable 2-meter FM rig
  - All 12 channels crystalled
  - Manual
  - Needs new NiCad packs

  $45 or best offer - you pay shipping outside of Metro Detroit

Sorry to digress, but I'm looking for information for a friend who wants to
get a camcorder for baby pictures. She's torn between 8 mm and VHS. Anybody
know of a newsgroup or mail list where I can find out more about the pros and
cons of each?

```

How comprehensive is "comprehensive"? I would hate to see Novice level entry eliminated altogether. On the surface, it looks like your plan would do just that.

Also, I would reduce maximum power to 200 watts for everyone. There's no earthly need for more than that and hasn't been since hams quit operating on 600 or 700 meters with rotary spark gap transmitters.

Just have her pick up a VHS camcorder and then an 8mm camcorder. Regardless
of technical merit, 8mm is a big plus in weight. In addition, the 8mm cameras
all seem to use those little tiny batteries available at Radio Shack for
$30, not the mucho-bucks of the big camcorder batteries.

You can get super VHS, or super-Beta camcorders, but 8mm gives as good
a picture as your likely to see with home recording, and the sound is
not linear on the tape. I bought a cheap 8mm and they do cost a lot
more than most VHS stuff, but just have her TRY one, and you won't
want anything else.

Picking a camcorder isn't as easy as choosing the lightest unit. There are many tradeoffs and due to the significance of the investment it is worthwhile to do some investigation. The 8mm units are small and light but overpriced due to the manufacturer's monopoly on the format. Their tapes cannot be played back in the home vcr. They use nicad batteries that have very limited capacity, easily develop memory, and self-discharge rapidly (which means that

when you pick up the camera after not using it for a month the batteries are half-dead and will expire just as junior blows out the candles). The cameras are small and due to their design the weight must be borne completely by the hand rather than resting on the shoulder as the larger units do. They tend to bob around alot when handheld because of the way they are held. The resulting movies are hard to watch. The larger VHS units are easier to hold steady, especially for long periods. They cost much less than 8mm for the same features. VHS Tape is much cheaper and plays directly in the home vcr. The batteries are gelled lead-acid and don't develop memory or self-discharge quickly. They are much cheaper (for a given capacity). One inexpensive GE VHS camcorder I looked at recently would run for 3+ hours on one battery. The 8mm units generally poop out in way under an hour. The VHS batteries are generally available for around $40. The large capacity batteries the 8mm units need to run even one hour cost closer to $100 and stick way out the back of the camera and make it much heavier than it was with the stock battery.

Still, the 8mm may be the best for her -- but some thorough investigations are warranted.

If I remember correctly the original post was for info on a newsgroup that might have more info on picking a camcorder, try rec.video.

Icom IC-781 for sale... all options (voice synthesizer, narrow ssb filter,
external speaker) if interested, you can mail via CBA, or call me at
(512) 282-8271 (home) or 462-5213 (work), or email reed@mozart.amd.com

my reason for selling is to upgrade my remote base to battery backup with solar charging; this makes it easiest to use 12V rigs, and the 781 has its finals funning at a higher voltage.

  What does all this have to do with rec.radio.shrotwave, rec.ham-radio.packet, rec.ham-radio, and rec.ham-radio.swap???

  PEOPLE, PLEASE check the Followup-To: and Newsgroups: lines before you blindly post! Even better, email direct unless what you have to say is really of general interest!

  sigh

(Yes, I know I'm guilty of adding to the noise, but wading through
all this junk gets tiring!)

I am looking to buy a used 100 or 200 XLT handheld scanner by
Uniden, or comparible models. If you have one for sale, please
let me know.

My apologies. I'll check it out. The software I use is a bit of a kludge at best. It may be posting in all of the areas listed in messages I reply to. Thanks for pointing it out.

I am thinking about developing a package deal for amateur radio in the near future, and I am wondering how this would sound to the amateur radio crowd.

Would there be a market for a portable packet set-up, totally self sufficient, that would weigh less than 5 pounds, and cost less than $1000? This set-up would include simple bbs functions including message storage, but would unfortunately be limited to a small screen display, and for power/price conservation, would also be limited in power. The power supplies (batteries) are included in the ~5 pound weight.

I would go into more detail, but the plans are still in the thinking stage, and there is a need to develop software, and dealer priviledges to get ahold of the equipment. This is not an advertisement, by anymeans, just sort of a market survey. Please give me input if this sounds like an interesting

concept (ie for emergency, weight worthy applications).

I have the following equipment for sale:

    2 ea. TRS-80 Model 4P computers with LS-DOS and Montezuma Micro CP/M

    1 ea. TRS-80 10M hard disk for Model 4

    1 ea. TIPC plus much software

    1 ea. KAYPRO 10 computer (CP/M) with much software

    1 ea. DWP-210 printer

1 ea. Dataproducts LZR-1300 laser printer (only 1932 pages printed)

Model 4's: asking $350 each

Hard disk: asking $100

TIPC: asking $500

KAYPRO: Make me an offer I can't refuse

Laser printer: $1300 firm, I'll cover shipping.

Don't forget the moonbouncers, they still need the power for that path unless
they use truely monsterous antenna arrays and/or lots of DSP. And when they

have the monster arrays and lots of DSP the truly wacko will want to try
Mars bounce. :-)

Even at HF in the late summer when atmospheric noise is at maximum, extra
power is sometimes needed on 160 and 80 to make the circuit work. Power
is not evil, misuse of power is evil.

A comment by someone who uses cameras professionally. In broadcast news gathering, we find that the home cameras are too small and light to be used properly. The major thing that differentiates the amateur and the professional TV photographer is the steadiness and smoothness of the professional's pictures. The very small, very light home cameras are nearly impossible to operate steadily and smoothly. Our people prefer a camera that weighs at least 15 pounds and is balanced to be carried on the shoulder. Some of the latest professional cameras are considered to be too light by many of our people and you will see extra batteries taped to their cameras to regain the mass needed for steady work. So beware the tiny cameras, the shaky results may disapoint you. The picture quality is pretty good though.

Well, I'm not convinced that it has no relevance to amateur TV and/or Novice training tapes, but in any event my question has been answered, and I'm grateful to all who offered suggestions.

Well, make that 200 watts for HF and non-moonbounce. But if you're going to

make an exception for EME, why stop at ONE KW? Why not 20? One wonders what ingenious work with antennas, DSP, etc., would have been tried and perfected if the KW was not available. Mars? Hmmm, lessee what's the pathloss for that...

Hmm, that's a point I hadn't considered. But when you're stalking a toddler, it's rather like combat photography. The amazing thing is you get it done at all. [:-)

STeve, however, is a vibrant, living, and still powerful machine.
For STeve without the monitor: $300 (1040ST main unit w/mouse)

I'd just venture to say that over 90% of those who are selling their
STs are upgrading to the STe.

My last posting before I graduate in three weeks.

Looking for ANY hallicrafters transistor receivers--

Includes the Tr-800 El Diablo AM radio and the S-120A from
the early '70s.

Email before December 9, or write/call the usual ways.

I am looking for back-issues of QST and Ham Radio. I am going back home
soon (to Spain) and I would like to carry some "good stuff" (please
no flames) for my fellow "radiopitas" (the folks at my hometown radioclub).
I am not a very wealthy student, but I think it's fair to compensate for
your time and (of course) for the shipping.
Please let me know what you've got and how much do you ask.
Use Email if possible to iza@umaecs.bitnet or iza@ecs.umass.edu
or phone (413)-256-4586 evenings.
Gracias, amigo!

Me, too, but what good is it if everyone does multiple posts? With RARE exceptions the only time I post an article in two or more newsgroups is in reply to someone else who did (and I'm therefore uncertain which one he's actually reading). But some people do it habitually. That would tend to defeat the purpose.

When we say rec.ham-radio.legal, are we including tower cases, etc., or only FCC regulatory matters? If the latter, then rec.ham-radio.fcc might be more descriptive.

Right. Guys in Chicago in the Good Old Days would kill to get Gould to slip
their ham callsigns into the Dick Tracy comic strip, which he did regularly.

Some other drawbacks are shorter recording time for the 8mm camcorders due
to the smaller tapes.
Also, if you want to play 8mm tapes back through your VCR using VHS tapes,
you must record the 8mm onto VHS tapes. This naturally reduces the quality
of the final playback due to the addition of noise.
I think the rule of thumb is that every cope of a copy will have twice the
noise in it so that a copy of the orginal will have twice the noise of the
orginal making it look much grainer or fuzzy.

Piffle! A good EDMEESE type program should catch 99.9% of the possible improper messages. As long as we make a good faith effort to comply, the FCC won't nitpick if an occasional clinker slips through.

   *** 8MM tapes are available up to two hours long. That's a _LOT_
       of taping! It's the VHS-C tapes that are super-short.

>Also, if you want to play 8mm tapes back through your VCR using VHS tapes,
>you must record the 8mm onto VHS tapes. This naturally reduces the quality
>of the final playback due to the addition of noise.

 *** You shouldn't need to do this, because most 8mm units can hook up
     to your TV, either through the A/V inputs of your VCR, or through an
     accessory video modulator.

In article <1990Nov19.211452.171@cs.rochester.edu> ray@cs.rochester.edu (Ray Frank) writes:
>
>Some other drawbacks are shorter recording time for the 8mm camcorders due
>to the smaller tapes.

8mm tape are typically 120mins long with no necessity to reduce speed.
To get the same portability, the VHS-C is comprimised in terms to record time.
They typically get 20min in standard play and 1hr in slowest speed, and
naturally the worst video image. Even in its fastest speed given camcorders
in the same price/feature catagory, 8mm is still better than VHS-normal, abeit
only slightly so...

Kenwood R2000 Short Wave and VHF Receiver FOR SALE

Frequency coverage 100Khz - 30MHz HF and 118 - 174MHz (has Kenwood's internal VHF (VC20?) option). All modes (AM, FM, USB, LSB, & CW) on all frequencies. VHF coverage includes Aircraft, Satellite, 2M ham, VHF-Hi (Police, Fire, etc.) , National Weather Service, etc. HF coverage includes AM Broadcast as well as all ham and broadcast short wave bands.

Has 10 memories, scan/search, flourescent readout for frequency and 2 clocks, LED indicators, illuminated S-meter, built-in speaker, headphone jack. DC adapter for mobile use also included.

Like new. A super receiver, but need to sell to help pay for UHF receiver.

Lists high because it's good! Found advertised lowest (w/options, by phone) for $850.

$600 O.B.O. -- shipping from Colorado Springs and insurance additional.

Call David Banks (N0ION) at 719/548-2045 days or write him at banks@genral.enet.dec.com. All mail written to the poster of this article will be forwarded, but I'd prefer that you write him directly.

Hi,

I am a relatively young ham (I've had my ticket for only a couple of years) looking to upgrade my station (thank goodness for bonus money).

My current station consists of an Heathkit HW-101 general coverage transceiver, with appropriate power supply, speaker, and mic. In addition, I might be persuaded to part with my backup antenna, a 10 meter inverted v wire + coax. I am not sure what this is all worth, but my asking price is $350.

In terms of what I am looking for, it is something along the lines of a kenwood ts-430. I am most familiar with the kenwood line and like the 430. The 440, although a nicer machine, is a bit out of my budget range. Anyone having such equipment available can post here or email/call me direct. Thanks for your help in advance.

By the way, let me note, I am not trying to start a debate over which manufacturer's/models are best, although well intentioned advice is always most welcome.

Selling a good condition Spectrum Analyzer - HP model 8551B and the matching display unit, HP 851B. The unit starts at 10 Mhz and ends at 42 Ghz with options. Seems to work OK, as I am able to watch my cordless telephone transmit and FM stations (88-108) with a short whip antenna.

This is an older unit, but seems to function well. No manuals, but they are available through HP or other dealers. Selling for $750, or,

lets make a deal!

Jim, unless you can get your program licensed by the FCC as a control
operator, it does NOT comply with the rules requiring a control operator
to screen traffic before it goes on-air.

Show me where in the regs it says a control operator may not employ
mechanical aids to facilitate the screening process by marking for human
review all messages containing certain key words and phrases he has selected
for use in a grep process.

Let's not try to be more British than the British here. As I said, the FCC
expects a good faith effort, but they're not dumb enough to expect 100%
accuracy EVEN WITH 100% EYEBALL INSPECTION. No matter how it is done, a tiny
percent will slip through when somebody yawns or blinks.

I am not replying to your comment everywhere you posted it. People jump on ME
for answering articles in all the newsgroups the originals appeared in. Go
figure!

Hello everyone,

A friend of mine is looking for a radio, something like a Kenwood TS520S,
or eve a Yaesu FT101Z (or ZD). If anyone has anything like this for sale,
please let me know, so I can forward your message to him.

Thanks.

ForSaleForSaleForSaleForSaleForSaleForSaleForSaleForSaleForSaleForSaleForSaleForSale

Ham Radio Tranceiver For Sale

One Kenwood TS-140S, HF 100W transceiver.

Excellent condition, only problem is that the hexnut on the tuner knob
is stripped (a new one costs about $10 direct from Kenwood..).

This rig cost me $1100 when new, it has very little air time, and I
wouldn't sell it except I am getting a new apartment and I really need
the $$$.

I will accept any offer over $800.

Since you ask...

```
     97.115(b) The third party may participate in stating the
                   message where:
                     (1) The control operator is present at the control
                         point and is continuously monitoring and
                         supervising the third party's participation...
```

Note the use of the word "continuously." That means the control op must
review (monitor) *all* of the third-party communications, not just some
portion thereof marked mechanically.

> Let's not try to be more British than the British here. As I said, the FCC

They expect a good-faith effort to follow the rules, not to (mis)interpret
them to "allow" us to do whatever we damn please.

ForSaleForSaleForSaleForSaleForSaleForSaleForSaleForSaleForSaleForSaleForSale

This is an update to a previous post, as several folks pointed out that the list price for the TS-140S has come down since I got mine.

Ham Radio Tranceiver For Sale

One Kenwood TS-140S, HF 100W transceiver.

Excellent condition, only problem is that the hexnut on the tuner knob is stripped (a new one costs about $10 direct from Kenwood..).

This rig cost me $1100 when new, it has very little air time, and I wouldn't sell it except I am getting a new apartment and I really need the $$$.

I am looking for $700, obo

Also, I have an Alinco (alse excellent condition) dual band (2m/70cm) rig for sale -- $225, obo.

implementation of routing algorithms for packet radio networks.

I need to build a test bed to study the performance of the proposed landmark routing algorithms.

I need to get in touch with local groups in the state of Maryland especially
Baltimore. I also need to become a certified operator.

Any useful information would be appreciated.

Thank you in advance.

ps. Send mail to abdallah@umbc3.umbc.edu

I use my trustee Realistic PRO-2005. Any scanner should do just fine.
The results are excellent. You may get a bit of noise at the extreme
edges of the passes though, but on 12-15 minute passes, you'll get a
nice clear display.

Hello everyone,

A friend of mine is looking for a radio, something like a Kenwood TS520S,
or eve a Yaesu FT101Z (or ZD). If anyone has anything like this for sale,
please let me know, so I can forward your message to him.

Thanks.

Would he be interested in a Swan 500 ???? I have one that is fully functional
but lacks the outer metal case. A wooden case or sheet metal case could be added.

Its a real classic with lots of power and a extra set of new finals. If interested
leave me a message. Thanks. BB.

for sale:

Kenwood TH-21AT 2m mini ht
        TH-41BT 440mhz mini ht

BC-6 dual desktop rapid charger for above HTs.

4 batteries

The 41BT has CTCSS encode.

Both radios have touch-tone pads.

$400 Canadian for everything or make me an other. Would consider trading for
other radio gear.

I thought it might be of general interest to many of you if I made the
announcement of a new Conference - The Microwave and RF Forum. Accessable
directly from RES-Q (tm) (201) 881-7421.

(Also available as Group Mail from 9:100/9 & 9:833/7 as MW_RF)

MW_RF is made available by Compact Software, Inc. soley for the purpose of
furthering knowledge within the Microwave and RF community, [and my assurance

 of no commercialism].

CSI designs CAD/CAE software for all phases of design and development, so
there
are many engineers here who would enjoy the opportunity to participate in
roundtables and such...

If you are interested in bringing a forum such as this to it's feet, ask your

 local SysOp to obtain the Microwave and RF Forum.

Bill Kreps, SysOp of RES-Q (tm)

I would like to get a TEK 561A CRT with a P7 (GM) phosphor.
It needs to be intact with graticule and unburned. I can
trade you a tube with P31 (GH) or cash.

Send e-mail if you have one.

Thanks.

Wanted: A cheap desktop scanner. Preferably synthesized, but crystal probably OK.

I'm looking for a cheap scanner I can use at my home to monitor a few services. It should have a minimum of 10 memories, but more are not necessary. If you have an old scanner that never gets turned on any more, or one that you would like to get rid of, please let me know.

It has become time for me to upgrade my HF rig, and to improve my VHF capability to include UHF... SO:

First: I'm looking for a "good" HF rig, I'm tending toward a TS440S. Make suggestions, make offers... I want 100-200 watts, all-mode, with general coverage recieve. Some kind of memory AND band scan would be nice as well. Mobile operation would also be nice.

Second: I'm looking to upgrade from 2m only to something more. I've had suggested a (kenwood?) 701 dual-bander, but I'm fairly open on that one too. Would *really* like to get 220 as well as 440, but at the moment I'll take what I can get (limited budget and all, you know). Must be mobile, would like crossband repeat, scan, extended recieve (at least the weather stuff, anyway), memories, 25 watts or more.

I also have a limited budget - and the more one thing costs the less I have to spend on the other! SO, make offers, make comments, but PLEASE don't make flames :-)

Rusty N7IKQ (yup, its me again, finally getting a tiny bit more active
         here in rec.ham-radioland).

I want to buy a linear 28/432 MHz transverter to be used with the
WA4DSY modem. I am running a low budget here, so I need your help.

I am especially interested in the Microwave Modules MM-28/432, but any
other transverter will do nicely, if it has

     input 1 mW, output a few watts, minimum and
     fast T/R switching (PIN diodes, no relays).

Please don't hesitate to offer even if you are overseas. I am more
than willing to pay the postage, customs, etc.

If you don't have one for sale, but you know a place that has these in
stock, please send me their address. They can't be found in Finland
any more.

Help! Thank you.

Yaesu FT-767GX Tranceiver

This is a CURRENT MODEL high end all mode rig, covers HF, and includes
modules to cover 2m & 440 all-mode as well.

Features:

- 160-10 meter HF capability
- Optional 6m/2m/440 capability (2m & 440 included)
- SSB, CW, FM, AM, RTTY
- Auto antenna tuner with digital VSWR readout.
- 100+ watts output on all bands, continuous duty
- Triple conversion receiver
- Notch, RIT, IF shift, Noise blanker
- Variable speech processor, TX shift
- Full & Semi break-in QSK
- Built in iambic keyer
- Much more.

Includes the following options:

- SP-767 matching speaker with audio filters
- Matching desk microphone
- 2 meter plug-in module (provides 2m all-mode capability)
- 440 mhz plug-in module (provides 440 all-mode capability)
- CTCSS Tone encoder/decoder module

I have original packaging & all documentation.
Cost over $2500 new, asking $1650.

Looking for used, working Palomer Tuner-Tuner PT-340. Please send
condition and asking price.

Thanks, in advance.

Mark

FOR SALE: Ham Radio books

Adventure books by Walter Tompkins:

CQ Ghost Ship
DX Brings Danger
Death Valley QTH
Grand Canyon QSO
SOS at Midnight

These books make excellent gifts for a young teenager.
The list price is $5 each or 5 or $20. I'm selling them
for $3 each (plus $1 for shipping). They are brand new.

Extra Class License Manual, 4th edition (good until 10/31/91)
This, too, is brand new. The list price is $8, and my price
is $6 (plus $1 for shipping).

> phones, or use cellular, should realize that they are "transmitting".

Why? The average layman doesn't know beans about the technology of HOW those things work. The "expectation of privacy" concept of someone whose only knowlege of radio is that it's like TV only without pictures is totally different from a ham's or an engineer's. I once tried explaining to a friend that her baby monitor could be heard as much as 1/4 mile away. She refused to believe me ("because I've got the other half of the pair").

> IMHO if "their" transmissions are in "my" air then they are "mine".

Aside from the question of whether it's "your" air exclusively, there's the question of whether the information content ownership is a separate issue from the possession of the signal by which it is transmitted. So far, the courts have agreed that it is.

I think swls are going to have to get used to the idea that as radio use for such applications increases, the pressure to guarantee privacy is going to increase.

Moreover, there is the fundamental issue: why would any decent person WANT to eavesdrop on the private lives of others?

Considering that Congress created the FCC to act in its behalf, I'd say, YES.

There will no doubt be a contention that transmitting certain types of radio signals (such as baby monitors and cordless telephones) ENLARGES the personal space. I grant the right to determine if an RF signal entering my space harms me in some way. I doubt that that requires that I inspect the information contents of that RF signal.

> Think about it ... If monitoring cordless phones is illegal, then what

No, only the information.

> It should be noted that authoritarian regimes tend to place

Strange, but the U.S. is one of the very few places where people feel this
way. In most other countries, including very democratic countries, the
attitude is that the public only has the right to listen to radio
transmissions that are the public's business. Listening to "private" radio
transmissions is forbidden. ("That's rude, old boy!")

If you are speaking of 'phone patches, yes, it must originate there. If you mean can you send a MARSgram, the answer depends on whether the APO/FPO zip is on the approved list. This is not automatic for all APO/FPO numbers everywhere. It depends on whether there is a MARS station for that immediate area.

Recreation contacts (other than overseas morale 'phone patches) are never authorized.

Short of banning ANY type of general coverage receiver, I can't

see what outcome any pressure would have on the radio listener,
be that an swl or simply someone that has a radio. At this point,
there must be millions of very broad coverage receivers in the
hands of the public (Both regular types and scanners). Are we
to expect confiscation? Legislation limiting future receivers/scanners
manufactured from being able to receive certain frequency ranges
(that's done now with the cellular on scanners, but it's a
simple task to modify most of those scanners after ownereship.)?

At some point, if there is a call to restrict receiveing of a
multitude of frequency ranges and specific frequencies, it becomes
(IMHO) almost impossible to design a cheap scanner/receiver.
Note also, the use of the radio spectrum is not static. What
you find in a particular frequency range today may not be the same
10 years from now.

So what's it all mean? Again, IMHO, I really doubt that much
will happen in the area of prohibiting general coverage
receivers or significantly limiting multiple ranges of
frequency coverage. Having said that, it does remain incumbent on
all of us, hams AND swlers to remain vigilant and sound the
alarm immediately at even the first sign of any such global
restrictions in equipment design being instituted.

>Moreover, there is the fundamental issue: why would any decent person WANT to
>eavesdrop on the private lives of others?

This is an excellent example of how asking the question will influence the response. The fundamental issue is NOT whether decent people want to snoop on others. Rather, its a division in philosophy between freedom and privacy. On the one hand, people are generally ignorant about the technology they use. As I recall, many congressmen were stunned to find out that anybody with a Radio Shack scanner could listen in on the cellular conversations. That realization (plus a little high power bribing -- no *campaign contributions* -- from the cellular industry) led to the ECPA. On the other hand, this country has (at least historically) prided itself on its emphasis on individual freedom. Virtually unenforcable laws like the ECPA are an attempt to restrict one's freedom, something that most Americans still value pretty highly. I like to pick up a copy of Orwell's _1984_ and reread it every few years. Partly to enjoy it, but partly to remind me to keep my guard up against our benvolent government (grin). Freedom is hard to win and easy to lose; one minor loss leads to another, which leads to another, and so on.

This is the last computer stuff I could scrounge out of my basement:

- 2 Apple][Floppy Drives - $20/each or make offer

- Apple][16K Memory card for][+, the floppy controller, and the
  parallel printer card - make offer

- "Dead" Apple][+ clone - make offer (good keyboard and case)

- 45 41256 Memory Chips - 90 cents each or make offer
  (I would rather sell in lots of either 9, 18, 27, 36, or 45, and
   I won't listen to offers if you want fewer than 18).

Thanks in advance.

It seems to me that if someone broadcasts their private life, either by
voice (yelling) or by electronic means (PA system, radio waves) then they
have no right to complain when others "listen in".   It's rude to expect
others to turn a deaf ear to your excessively boisterous lifestyle, eh.

If is against the law to listen to cordless telephone transmissions, I guess I better stop turning my cordless phone into a speakerphone by listening to my signal on my scanner!

I have an ICOM R-7000 I bought last year at Christmas for myself.

The radio works as advertised.

I just don't use it enough. I bought it primarily for NOAA polar orbiting satellite reception, in the 137Mhz range and for GOES Wefax reception in the 1691Mhz range. The radio has too narrow an IF bandpass for either of the two above functions as it is sold. I am not currently interested in aftermarket IF filters. I still have my Vanguard FMR-260-PL and will continue to use it for Polar Orbiters and perhaps down the road get a down converter for the 1691Mhz stuff.

The radio has NOT been opened by me and comes only with the standard items. Power cord, miniature phone plugs and operator's manual with schematic. I will include the 'N' to PL-259 female adapter that was purchased separately. It probably has been use for less that a total of ~100 hours.

I paid $1073.00 on 28 Dec 1989 and will not accept anything less than $950, you pay the freight/ins. Payment by money order or certfied bank check. If no one wants to purchase it, I guess I'll look into the aftermarket filters.

If you are interested, contact:

Still no pointers as where to get a Microwave Modules MM 28/432
transverter. Please, if YOU don't have one for sale, tell me where to
get one! Even brand new - the model is discontinued by Microwave
Modules and it is very hard to come by in Europe. At least in Finland
it is.

I would be more than happy to order it from overseas if necessary.

Thank you for your time,

     Luru

I need the original factory service manual for a Philco T-9 Transworld,
hopefully with a wiring diagram. One of the people who had this SW set
before me tried to fix it, but has miswired it somewhere.

I don't need Photofacts--I already have those.

Also looking for the owner's manual and logbook for this set.

Just a thank you note to all of those who helped me with suggestions to
find a manual/schematic for a Hallicrafters SX 122. I pulled it from

a trash can and now, for about $9.50 total, I have a really decent little receiver. Thanks again, all.

Hi,
     Back about a million years ago, my grandmother gave me a pocket sized AM radio that looked for all the world like a transistor radio, only it used subminiature vacuum tubes. Well I did what any kid who was destined to grow up to be an electrical engineer would do, and took the radio apart REPEATEDLY!!! After about the ten dozenth time that I disassembled and reassembled the radio, it stopped working, and in trying to fix it, sob... I Broke It Badly!

     It really was quite a marvelous receiver. It was made by Emerson, I think, and was about 4"x6"x1.5" in size. the front was metallic gold in color, and the case was maroon. It had a little carrying handle on top, and was powered by a 1.5v C cell and a 22.5v photo flash battery.

     In a nostalgic sort of way, I would like to get it back. If anyone has such a beast, or knows where I might find one, I would like to hear from you. Thanks.

          Chuck Harris -WA3UQV

Hi,
     For the umpteenth time, I have a need for a manual. I am looking for a manual for a Sweep generator that Singer/Alfred made in the late '70s.

Singer 6600 Sweep generator mainframe and
Singer 6606D Oscillator Plug in module (100kHz - 110mHz)

I also would like to find any Oscillator plug in modules for this sweeper. If you have any of the above, I would appreciate hearing from you.

>John.

Nope! The fence is not high enough for the drive-in movie, and the people at the next table should just sut-up and stop all the acoustical interference. :-)

For Sale:

Motorola PT300

This is a commercial grade 5 Watt crystal controled transceiver.

It is about the size of a child's lunch box and runs off of C cells.

It's last used frequency was 143 Mhz. It can be tuned for any frequency
from abut 135 to 150 Mhz.

It would be most useful to someone who needs a single frequency radio in a
rugged weather resistance package will long battery life.

It would also be useful to anyone who wanted a cheap single frequency radio.

For Sale

KAAR DT76 Service manuals are included.

This is a commercial grade 110 Watt transceiver designed for 148-174 MHz but which I have used as amateur transceiver at 146 MHz without having to modify it inorder to tune it.

The DT76 is crystal controlled and will handle 6 channel.s I have built a separate frequency synthesizer to use with it. The synthesizer is similar to the Model 400B Channelizer and is in a separate cast aluminum box.

This is an all transistor except the transmitter has one tube as its final. The radio is a 5x12x18 (approximate) box with home built control head. Signal reports have always included complement on excellect audio quality.

I have not used the rig for some time. I pulled it out once and tried it but could not transmit (I think due to loose connection in sysnthesizer.) Reciever did work.

This rig would be most useful to someone who wants 100 Watts cheap and is able to work on radios. Also it would be useful to someone who want a radio in which the transmit and receive circuits are on separate printed circuit boards thereby allowing completely separate operation (20% duty cycle repeater?).

For sale

Motorola HT-220 , many HT-220 manuals included, batteries not included
Home built charger is included.

This is a commercial grade 2 Meter, 2 Watt, crystal controlled hand held
transciever.

It can handle 6 channels. It was built up from replacement parts.

This would be most useful to someone who wanted a rugged low power rig
that does not eat up batteries. It would also be useful to someone who
wants manuals for the many different variations of the HT-220.

For sale or swap of some sort (want some kind of 220 rig):

2 meter HT:
Kenwood TH 21AT with new PB 21 battery
includes a large battery case (for extended use)
includes a standard sized dry cell case
includes a BNC adapter for the antenna connector
No PL unit installed, you may need one if you live in a city.....
Otherwise a delightfully simple, tiny 2 meter transceiver; rugged and
dependable. In good condition after a few years of good service to me.

Asking $100.00 - but would REALLY like to swap (and/or cash) for 220 rig
of any kind (will even consider something that needs repair.)

Yaseu 726R Multiband-VHF/UHF-multimode radio with 2m, 430 and 440
     modules.   Includes PL encode/decode and deluxe desk mic,
     book. This is a great rig for getting on satellites with.

Asking $999

         ----

2 Motorola MX-350 Gov't band (403-430) 2 channel HTs. Clean, with service
     book, 4 batteries and drop in charger. No elements. Note that
     these will work in the 420-430 amateur band, I just couldn't
     find a use that fit the bandplan.

Asking $250 for all.

Icom BC-35 drop in charger with Periph-X BP-8s and "several" BP-3s.

Asking $99

Fisher VCR and Mitsubishi 13" color TV. Both have infrared remotes.
     The VCR sometimes doesn't start cold. Both are "cable ready".

Asking $225 for both.

WANTED:
Drop in charger, batteries and accessories for the Icom "u" series.

"Fickt nicht mit der Raketemensch!"

My interests in ham radio have changed a bit in the last few years, and I doubt that I'm ever going to put up another big antenna farm now that I've moved from the old one. Accordingly, I have <lots> of miscellaneous antenna parts I'd like to sell. I'm not going to list specific prices or quantities here, because I <don't> want to sell this stuff piecemeal. The stuff listed as "maybe" might be available, depending on my mood and whether it's part of a complete package. In other words, it's stuff that I am half-hearted about selling because I figure that somewhere, sometime, I will use it again.

If you're interested in the concept, I'll get exact lengths and quantities, and put together a package price.

I have several hundred feet of 1/4 EHS guy wire, cut to non-resonant lengths from about 6 to 54 feet. I also have a hundred or so feet of 3/16 EHS.

I have about 80 guy insulators -- all of them good size, usable on 1/4 guys and up. I have a few smaller insulators that'll work with 3/16, but none of them are tiny.

There are maybe 30 1/4 inch preforms (twisties) used but in good condition. I also have a few 3/16 inch twisties as well.

9 very large (15 inch?) turnbuckles.

Lots and lots of 1/4 and 3/16 cable clamps.

Full size 160M and 80M inverted vees, made with 12 guage Copperweld.
80M sloper, also of Copperweld (and some other, brand new Copperweld pieces are also available -- all this came from a single 1000' roll).

Maybe -- three sections of Rohn 25, in pretty good condition. If I sell this, I also have a couple of rotor plates and two sets of torque arms -- one extended for 36 inch arms -- that I would want to sell along with it. One of the Rohn sections is cut to use as a top section, with rotor plates mounted.

Maybe -- one 24 foot mast -- 2 inch OD, made up of three concentric pieces of 1/8 inch wall steel tube.

Maybe -- Wilson 24' boom 4 element 20M beam. (This is identical to the HyGain 204, but with gamma instead of beta match. It shows a wider VSWR bandwidth than the HyGain).

Maybe -- Cushcraft 402 26' boom 2 element 40M beam.

Maybe -- Mosely DB1015 10/15M dual band beam -- 3 elements on a 12' boom.

Maybe -- 150' spool of 7/8 inch aluminum hardline. Brand new, jacketed,
believed to be 50 ohm (but we're not sure...). I also have two connectors
that will work with it with a bit of kludging.

Yaesu FT-70G general coverage HF packset transceiver. Very rugged all metal construction with gasketed controls and case seals. Synthesized in 100Hz steps from 100Khz to 30Mhz (receive) and 1Mhz to 30Mhz (transmit) in USB, LSB, CW and AM(E) modes. 10 W PEP output from internal (snap-on) 5Ah Ni-Cd battery. (A Yaesu rep. said these were built for the military of some small country. Apparently something happened to the contract or the country and a limited number of the radios were offered on the commercial market.)

Also included is an equally heavy-duty Southcom SC-804 base power supply/charger/speaker. This will charge the internal Ni-Cd battery (or gelled lead-acid) while powering the radio. It will also charge 8 "D" Ni-Cd's (or 2 Southcom 6V battery sticks for their packset) in a built in holder.

Includes speaker/mic, external power cords, operator's manual (with a nice section on HF propagation) and complete service manual. Send an SASE for a description and picture w/specs. All equipment like new. $995.

I have a BIG transformer for sale. Looks to be about a 5KVA pole peg (or is it pig?) with a tape wound core. This one appears to have never been used (or dipped in oil) as it is still attached to some original packing wood. Physical dimensions are approx. 11"x11"x6". There are two 120V windings (#12 wire) and one 2450V (approx) winding. Should be good some 3-500Z's. The HV winding is on top and could be easily stripped off and re-wound to power one of the new solid state kilowatt amps. It develops about one volt/turn on the secondary. Weight is 62lbs. UPS shipping would be about $14 for 1000mi. $95.00 Ken WB0QNA (314)894-1822

HI Manuals (P.O. Box 802, Council Bluffs, IA 51502) has manuals on just about every popular piece of old gear. Their catalog costs $2.00.

The SX122 manual is $12.25, postpaid in USA. They do not accept COD, credit cards, or personal checks. Send bank draft or money order.

Their list of old manuals is HUGE.

I'm trying to join the other AMers on the high end of 10,
and need some help finding manuals and/or schematics for a Johnson
Viking Pacemaker AM/SSB transmitter. This is a large xmtr with
a 6146 final. Any help would be greatly appreciated!

I heard somewhere that one can still get copies of documents
from Johnson.... is this true? I thought they ceased to exist some
time ago.

It is a KLM 440 LINEAR (so it'll work on SSB). 10 in 70 out. Also KLM Echo II
432 SSB/CW transceiver. 10 watts. A good combo for OSCAR work.

Want $275 or will trade for a PK-232 or equivalent. For direct sale will pack and ship UPS/COD.

Proof of license required.

I have a Grove "Power Ant III" antenna pre-amp that I'd like to sell.
It has a max gain of 30dB and the gain is continuous (as appossed to
a switch where you select a specific gain like 5dB, 10dB,...). It
uses type F connectors (one for antenna input and two receiver outputs)
and it comes with an AC wall adaptor. Dimensions are: 4"Wx2"Hx3"D.
The preamp also comes with two coax leads to the receiver(s) with the
following connectors: PL-259, 1/8" mini-jack (for portables), and a
BNC connector (for scanners).

To summarize, here is what's included:

    Grove Preamp
    AC wall adapter
    Two coax leads (about 2 feet in length, F connectors at both ends)
    One F to PL-259 connector
    One F to 1/8" mini-jack connector
    One F to BNC connector

List price is $79.95 (for the preamp) plus 12.95 (for the cables and
connectors). I'll sell it to the best offer. Oh, I'm selling the preamp
because my newest radio (an ICOM R70) has a built-in preamp which works
quite well so I no longer need the Grove preamp.

I am looking for surplus equipment that I may use to build a radio-telescope.
The RF end should work in the 1cm-1m range and I also need to find 1/10 wave
paraboloids of whatever diam is possible. Also, I will need some test equip for
this wavelentght and would like to know if there are any ham-fests planned for
the Tucson, AZ region. Also, are there any good surplus spots nearby us?

Check out HI Manuals. They have manuals for most old gear. Their price for the Pacemaker manual is $22.25 postpaid in the USA.

You can get their extensive catalog for $2.00. They do not accept credit cards or personal checks....the want money orders or bank drafts.

For Sale:

I have a good quantity of IC's removed from new, unused pc boards
(they were socketed). I'm not in the same place they are right now,
so I can't remember exactly what I've got, but here's a clue:

LM324's, LM339's, and optoisolators (Don't have the pns on me)

E-mail if you''re interested. I'd say probably about 10cents a chip.

New three lead bicolor LEDs with long (>1") leads from same boards $.25ea

In addition to this stuff,I have lots of new and used relays, 4116s,4164s,
  82xx chips, z80 family and other new and old chips and parts. Ask, I might
have what you need.

A couple months ago, I posted a request for a VOX circuit. I would like to
thanks those who helped me find that info I was looking for.

I am now looking for a used FM band exciter (88-108 Mhz) and a stereo generator
or schematic and construction information for such devices. Used devices
would have to be cheap and working. The schematics would have to be solid state
and of recent vintage. ANY help would be appreciated! You can mail any info to:

I am looking for general coverage transmit mods for both the Kenwood TM-621
and TM-731. The mod for the 621 is a specific one. The 621 will transmit up
to 151.995 with the mere CAP mod. I am in search of the mod to go above
152 (to about 155.00 MHz). Now I am aware the the 721 will go the full swing
when 2 shorts are applied to the board which is behind the front panel.
I have attempted this same mod to the 621 and it does not work at all.

If anyone knows if the shorts are different in the 621 or of another process to extend it I would appreciate it.
With regard to the 731, I am interested in the mods for both UHF and VHF. Any other mods would also be appreciated. If you can help me, please contact me here or at PO Box 1286
Lakewood, NJ 08701

Many thanks, Chris

I have recent acquired a Drake TR-7 and wish to add some optional crystal filters. In order of preference: 500 Hz, 300 Hz, 1800 Hz. These are for a 5645 kHz IF (I think the same as the R4A/B/C).

I could also use an NB-7 noise blanker.

For sale, Hewlett Packard 8551B Spectrum Analyzer and HP 851B
Spectrum Analyzer Display System. The unit covers 10Mhz to
42 Ghz in multiple bands. In fair condition, the unit seems to work
well as the FM radio peaks are noticed in the 88 to 108 Mhz with a
short wire antenna.

Complete for $750.00

I'm looking for some kind of low-profile 6-meter base antenna. It
is going to be placed at a repeater site that happens to be a
friend's house in the hills, and they have "rules" in the
neighborhood against large antennae. I tried a simple dipole (two

54" pieces of coax, center-fed, vertically stapled to the side of
the house), but it doesn't work worth a darn.

I guess a simple ground plane may be in order. Does anyone have
such a beast they'd be willing to part with?

Or plans on how to build one?

Ignore if you're not the person mentioned above.

Get in touch with me. Been trying to reply, but the mailpath keeps bouncing.

Still interested in the radio.

When you get in touch, send me your address, mailpath, and phone #. That
way we can keep in touch.

I thought it might be of general interest to many of you if I made the
announcement of a new Conference - The Microwave and RF Forum. Accessable
directly from RES-Q (tm) (201) 881-7421.

(Also available as Group Mail from 9:100/9 & 9:833/7 as MW_RF)

MW_RF is made available by Compact Software, Inc. soley for the purpose of
furthering knowledge within the Microwave and RF community, [and my assurance
of no commercialism].

CSI designs CAD/CAE software for all phases of design and development, so there
are many engineers here who would enjoy the opportunity to participate in
roundtables and such...

If you are interested in bringing a forum such as this to it's feet, ask your
local SysOp to obtain the Microwave and RF Forum.

Bill Kreps, SysOp of RES-Q (tm)
--- GroupMail 2.17

I am looking for some 1-5/8" Heliax, such as Andrews LDF-7/50A or
similar. 120 feet would be ideal. Terminated in 'N' connectors would
be even better. I think this stuff is used in Cellular Telephone
construction, so perhaps a reel-end might be had. Shipping might be
a hassle unless the cable is still on it's wood reel, in which case
it could be truck shipped. Anything out there? Thanx.

I am unable to reply my mail so I am posting, sorry everybody else.

Charlie
I have a complete set of schematics for a 11something or other. 114 I think.

I think the battery section is the same for all the 11x series. I could
mail you the schematics for that section for the shipping costs.
You can also call up Wavetek and order a complete set for your model, but
be prepared, they charged me $50.

Hello....

  I'm looking for a used autopatch which has the capability of
being used as a simplex patch with an enhanced VOX. An recent CES
etc. model would be fine. Hoping to put this up on 220Mhz to promote
some local activity. Will be linking it up to a 220Mhz repeater
in the future.

  Would also like info on a method which would allow
several different bands to be selected by a user ie have the system
be listening on several bands, lets say 2metres and 125 cm and have
a means where the user could select a duplex cross_band mode or
shut off one or the other band xmt.

Your info and help is much appreciated.

 I have for sale a Radio Shack TRC-11 six channel mobile CB and a TRC-87
 100mW talkie, both in like-new condition and set up for 26.620 MHz. In
 Missouri we still use this freq. for low-power ground operations. Both
 radios for $25.00. (CAP is the "Civil Air Patrol". If you are not in CAP
 I will send the radios set up on CB channel 10.)

I have a dosimeter and charger for sale. The charger is a CD V-750 (Jordan) and the dosimeter is a CD V-742 (Bendix). Both are in good working order and the product line is still manufactured by the Dosimeter Corporation. I charged the dosimeter (0-200 Roentgens scale) last year and it is still zeroed. A dosimeter is used to measure total radiation dose to your body. It's the size of a fat pen and you put it in your pocket. $35 for the set.

One isn't enough, I want another!

I posted earlier looking for an VHF HT (is that the correct terminology), and got one that I am very happy with. However, I buddy of mine on the department saw mine and said he would like to have one for himself, sooooo, I am posting this request for a 5 watt ~150-160MHz VHF transceiver with at least 6 channels. If you have one, contact me at:

In going through my tube stash, I found that I have
16 type 6J7 (metal octal with grid cap) and 10 type 12AY7
(miniature) tubes. My tube book lists them as
"low-microphonic" for audio use. If you need them, in
one lot, make an offer.

I am looking for a ground plane antenna for a CB base station.

(Remember, that "AM" mode of transmission that was so ever popular
years ago that is now gathering dust in the closet [or basement] ?)

If you have one you want to sell, please contact me.

Since I've sold my Sony 2010 I have an AN-1 indoor/outdoor active
antenna that needs a new SWL home. I originally paid $75 so make
me an offer if you are interested. The antenna comes with attachments
so that it can be connected to just about any radio that has a telescoping
antenna or a mini plug antenna jack. It has 25 feet of coax with it.

Please include UPS COD shipping in your offer (I believe that the COD fee
is around $4); unless you want to send me the money first.

Thanks.

I would like to buy a used Bencher paddle, suitable for use on an
electronic keyer. I am not too familiar with the models available, but
I want something in reasonable condition. Will consider other brands too,
(are there any other brands?)
Don't want a keyer with built in paddles, want a seperate paddle set.

FOR SALE: Kenwood 2-meter HT, TR-2500. The unit is in good condition with
wear basically only on the back, where the belt clip is. This HT has all
the common features including 10 memories, with scan of the memories, or
between a lower and upper frequency limit, high/low power output, TT pad,
and has been modified to cover the whole 140.0-149.995 range.

Included are two BP-25 batteries (worth $50 each), and an MFJ-313 converter
which allows the HT to receive up to 167+ mhz.

Asking $200 (includes UPS shipping), or best offer.

Reply to Kirk Baxter, Via e-mail at address at top of this message,
BAXTER at UKANVAX, or home phone (913) 345-1380.

Hi gang!
Well, I need some more manuals to buy or copy:

1) HP-5065A Rubidium Vapor Frequency Standard
2) Singer 6600 Sweeper with 6606D RF plug in
3) Diablo 630 Printer (you know, the one OEM'd by everybody)
4) DANA 6900 DVM
5) Pacific Measurements 1018 Microwave Power Meter
6) Logimetrics 925-S125 RF Signal Generator
7) Keithley 616 Digital Electrometer
8) Rockland 5100 Programmable Frequency Synthesizer

Enough! If you have any of these manuals and would be willing
let me buy or copy them, I would appreciate it greatly.

Thanks,
Chuck Harris - WA3UQV

After looking around for many years I was able to pick up a
Marconi Q meter on the weekend. Unfortunately, as is often
the case, all of the ancillary gear that went with it was nowhere
to be seen.
Therefore I am looking for a source of standard inductors to use
with the Q meter. It is set up to take either the Marconi or US
standard inductors.
If anyone knows a source (reasonably priced) please e-mail me.
(I am also looking for the VHF high frequency oscillator, TF1247
that was an optional extra)(I dare say a Gen-Rad oscillator could
make a suitable alternative if available)

IF there are any transistor radio collectors, here's your chance to stock up.

Cleaning out some of the deadwood in my collection. Most are handheld AM
sets, but there are a couple of AM/FM/SW parts sets as well.

For instance, I am trading/selling:

1963 Emerson 888 Titan, excellent shape, plays (after you fiddle w/ the batt. pack.

1960 vintage Crown 6 transistor radio, blue, slide-rule dial, with wire handle/stand, with leather case--case is falling apart, radio is superb. Doesn't work.

1966 Philips AM/FM/Deluxe parts set--this is the "James Bond set" everyone talks about. It won't work, but if you have one that needs parts, this is the one.

Other sets as well, but memory doesn't serve me on what's for sale.

Will trade for early American AM, AM/SW sets, 1955-1962.
IF interested, contact me by email or phone--leave message with address and name if I'm not around. I'll send a list.

 For sale, Hewlett Packard 8551B Spectrum Analyzer and HP 851B
Spectrum Analyzer Display System. The unit covers 10Mhz to
42 Ghz in multiple bands. In fair condition, the unit seems to work
well as the FM radio peaks are noticed in the 88 to 108 Mhz with a
short wire antenna.

Complete for $750.00

Awhile ago I was in a radio store and I was reading through a magazine. I
came accross a neat article, but I ended up not buying the magazine and then
forgetting about the article. Now I find that this article might be very
useful to me. Murphy's law... Anyways if you recognize the article that I am

about to describe then please E-mail me. I would like to know the name of the magazine and the issue date. I would also be willing to pay for you to send a photo-copy to me.

The article described how to build a cheap video frame grabber for the Commodore 64 computer. The author was using the video digitizer as a sort of cheap slow scan TV system by transmitting the bit map via packet radio. I thought that the quality was rather poor, but the entire circuit was very simple and inexpensive. The article included a grainy picture of the author in his ham shack. I think info was included for ordering kits and PC boards. The surprising thing was that I have seen audio digitizers that looked more complicated than this video digitzer.

I am pretty sure that the magazine was Ham Radio, but I can't be certain. The issue date was late 1988 or early 1989. The local library does not have this magazine (or any other radio magazines).

If you can help, Thanks.

OK, I hope you read the summary line above. Here goes:

I've used networks, online services, and BBS's for years, but I've never
really paid much attention to packet radio. This may change... depending
on what kind of feedback I receive.

Basically, I'm starting from scratch, and need to have some idea of where to
begin. I have a list of rudimentary questions like:

1) Just what *is* packet radio?
2) What kind of equipment due I need, and how do I use it with my PC?
3) How much technical (hardware) proficiency is requied to manage a
   packet radio system? (I have a general understanding of computer
   hardware, but am more comfortable programming.)
4) Just what's out there for me to access via packet radio? (This is

   VERY important. I'm not interested in this as a pure hobby, I'm more
   interested in the resource potentials.)
5) How much will a packet radio set-up cost me? How COST EFFECTIVE is
   packet radio?
6) What legal issues do I need to consider regarding packet radio? Do I
   need a license?
etc.

Pointers to reading materials such as books and magazines that my campus or
local libraries might carry would be nice.

Personal comments and insights into the world of packet radio would also be
appreciated. I've tried reading the ham-radio newsgroups, but a *lot* of it
is Greek to me.

Any packet radio operators from central New York out there??

Thanks in advance,

-Tim

Greetings all:

I have found a Hallicrafters SX-122 receiver in a trash can, and seek
any schematics/manuals which may exist out there. I have tried the back
of QST and 73 with no helpful replies so far. I would dearly love to
resurrect it. It seems to have a loose wire or two and a resistor charred
beyond recognition.

I just got one of those "deals you can't refuse" at the local flea market.
A guy had an old Eico grid dip meter forsale, minus the coils for $5 so I
cut him to $2 and took it home. Now I am wondering if there is any one
out there that may know if I can get or make coils for them and how???

You can order just about and
tube you need from Antique Radio
Supply in Tempe, Arizona. Most
of the tubes they sell are very
reasonable as far as price.

Their telephone is 602-894-9503.
They will take your credit card
over the phone.

Check the classified section of
the QST Magazine at your local
ham radio dealer. There is a
company that lists in there every
month. They sell manuals for
Hallicrafters equipment.

I am looking for a 5 watt VHF (154 MHz) two way hand-held radio with several
channels. I am able to get a new Midland 145DXT (16 channel) for $380, but it
doesn't cover the weather frequencies. I would like to be able to include
these. If anyone has a programmable they would like to get rid of, please let
me know.

Thanks,
Alan Moore

Try writing ARRL. They have (used to have) a good-sized file of
ham equipment schematics which they will photocopy for a nominal fee.

>swood

I sure do love flea markets!

The socket on the Eico looks just like that on the old Heath GD-1A which I too picked up at a flea market. I know what the Eico looks like because I also saw one, sans coils, at Weird Stuff surplus in San Jose (a wonderful store, just like Eli Heffron's back in my Boston/Cambridge days, *sigh*!).

The coils are basically just wound onto a plastic tube (about 1" dia.), with a couple of pins riveted into place at the bottom. Empty prescription medicine containers of the correct diameter oughta work just right.

How to get the right values for the coils: open up the case and measure the maximum value of the variable capacitor (plates fully meshed). You'll need either a capacitance bridge or one of the newer digital multimeters with a capacitance scale. From that value, compute:

$$L = \frac{1}{4(\pi^{**}2)(f^{**}2)C}$$

[L in henrys, C in farads, f in Hertz]

where f is the extreme lowest frequency in the band you're making the coil for. Then wind the coil according to the standard single-layer formulas found in the ARRL Handbook. #26 - #30 enamelled wire should do fine.

The UHF-band inductor is a U of thick brass wire (#8 or #6?) about 1 inch across, no coil form. That one will be a little trickier. I suppose there are formulae for such things somewhere in the ARRL Handbook, but you could always do the cut-and-try method. Your TV set can be a decent calibrator there: the picture will be overwhelmed by the GDO's signal when the GDO is in the same room with it. (Careful you're not actually looking at a harmonic.)

Grid dip meters don't have to be exact, but if you'd like to calibrate it, you'll need a frequency counter or a receiver with a digital readout or a crystal calibrator. My GD-1A is off by a few hundred kHz, but if I want more precision I just tune my SWL receiver with digital readout to the correct frequency and adjust the GD-1A to zero beat. You can also add/remove a coil turn to decrease/increase resonant frequency, if you wish.

You may be able to get a copy of the Eico manual from Hi Manuals (address in the ARRL Handbook).

Good luck!

Aaron

There is a possibility of obtaining blank PC boards for the PacComm
PC100. This is an 8530 board similar to the DRSI, with two channels
available for either SDLC or asynch use. Each channel can be configured
with onboard 1200/300 baud modem (7910 on channel A, TMS3105 on channel B),
or for external modem. TTL or RS-232 interface is selectable on each
channel as well. Multiple boards can share an interrupt line, using
the 8530's daisy-chained interrupts.

The board interfaces in a manner similar to the Eagle and DRSI boards.
This board is supported under NOS (scc driver) for 300 and 1200 baud
operation. It should also work with the "hs" driver under NOS for
operation up to 56 Kbaud, and I should have an opportunity to test this
soon.

There is a possibility that PacComm might sell a quantity of these boards
at a reduced price. They currently want about $25 in single quantities,
I believe. I would appreciate hearing from anyone interested in a board.
I have no intention of making any money on this, and would like to avoid
any work associated with this as well...

1. Hallicrafters SX-62A. 550 khz to 109 mhz continuous coverage.
   AM/FM/SSB/CW. 6 bandwidths. Huge slide-rule dial. 2 tuned RF stages.
   Hi Fi audio. Works fine. With Manual. $100.

2. National HFS. 27 to 250 mhz continuous coverage. AM/FM/SSB/CW. Also
   has 10.7 mhz if output for use as converter. HRO-style dial. Works fine.
   With Manual. $75.

Bob

PS - The Hallicrafters is now connected to a Heath spectrum display unit (panadaptor), at the 455khz IF. I'll throw that in too for $25. It works most of the time.

That's what I meant. Outside it is in excellent condition. Obviously
the one that isn't operational needs some repairs on the inside, but
they are in excellent condition. If you bought a brand new Porsche and
the battery was DOA, wouldn't the car still be in excellent condition?

Jeez, try to be a nice guy and post and ad for a club and get harshed on.

Still.

The model I'm in search of is an S-19, circa 1938. It had a large whitish tuning knob on the front panel, and a round speaker panel of the same size. The speaker had an 'h' (for Hallicrafters) across it, too.

The spectrum spread was .55 to 18.4 MHz, and the radio had 5 (I think) tubes. The radio had a blue metal case.

Have been searching high and low - and even had a couple *just* slip through my fingers. A couple of kind net souls are looking for one on my behalf also - but haven't seen a posting here yet.

Any ideas?

Handie talky (might be "handy"). Way back when... motorola was the main
supplier of hand helds and that was their product name.

Models were of the form HT-100, etc.

HT is an abbreviation for Handie-Talkie, a hand-held radio. Hams
say "HT" much more often than Handie-talkie.
Hams like to use use abbreviations whenever possible, even if it
obscures the meaning. :-)

"HT" = Handie Talkie. At one time, a trademark of Motorola. It may
still be one, even though it seems to have gone the way of aspirin,
cellophane, fridge, touch-tone, etc.

OK, I accept "handy-talkie". But I always thought that a more
likely derivation was "handheld transceiver".

I am looking for UHF mobile and repeater duplexers.

Small, Medium and Large!

I need duplexers that cover both 420-430 MHz AND duplexers
that cover the 440-450 NHz band.

Thanks.

I'm on the lookout for a used receiver, probably an R5000 or perhaps an
R2000 or 8800. If you've got one you're thinking of upgrading from, drop me
a note and we can discuss it.

thanx,

chuq

I would like to buy a FULL DUPLEX phone patch controller that has, or can be
easily modified by adding a small circuit, a VOX detector that will reset the
timeout timer on receipt of voice from the radio (not from the phone line).
It needs to accept plain audio from the radio speaker output, and connect to
the transmitter via microphone and PTT. It must have DTMF access control and
toll-restriction. I don't need an ability to defeat the toll-restrict. I do
need the ability to change the access code and DIP switches will do fine. I
only need one access code.

This is NOT for a repeater.

All the commercial models these days are processor controlled, and there is no longer a circuit point that can reset the time-out timer, so I cannot even ADD VOX to one. No one makes one (anymore anyway) that is VOX controlled and FULL DUPLEX. So it has become apparent I need an older and simpler controller, one that works on a timeout basis, where I can tie the VOX into the circuit line where the timeout timer is reset to 0 (usually done via a separate line from the DTMF decoder).

If you have a newfangled microprocessor controlled full duplex VOX phone patch controller, or know where to get one, I'm interested. I've called all the major supplies advertising in QST, 73, CQ/HR, and MRT, and none of them have this capability (but just about everything else).

FOR SALE: Brand new, factory sealed Alinco DR-110T. All accessories are included, and has warranty card. (All accessories still in original wrappings.)

The DR-110 is a 45 watt 2-meter radio (low power of about 5 watts). Has 14 memories, call channel, priority channel, and 4 different scan modes. Also has subaudible tone encoding and DECODING on any channel. Memories memorize offsets, tones, etc.. Microphone has up/down switches and 16 key tonepad for autopatch use.

Radio came from dealer in exchange for equipment.... and I want to upgrade to a dual bander.

Firm $280. Same radio will cost $300+ elsewhere, plus your costs of tax shipping, etc....

I have grown tired of my Yaesu FRG9600 and find myself using my
PRO-2004 more and more. I'd like to have a second PRO-200x
for my car instead of using the Yaesu.

The Yaesu has a couple of nifty options: RS232 control of frequency and
mode with feedback of signal strength, and video output (when tuned to
appropriate TV frequencies). I'll throw in some listings of programs
I used to search for new frequencies and find new cable-TV channels.

Here are some specs on the Yaesu FRG-9600:

    60-905 MHz continuous coverage
    CW, SSB, AM, FM modes
    tuning dial (don't find these on scanners very often)
    digital entry panel
    100 channel memories (10 banks of 10 channels)
    FM MPX out (for stereo, with MPX decoder)

Asking $500 complete, or trade for PRO-200[456] + ca$h.

There is a scam going on to deprive hams from using 220 Mhz by making
both used and new rigs for this band unavailable. Let us know what
success you have in finding one. I managed to find one once, but just
at the edge of having given up.

> I'm on the lookout for a late-model 220 MHZ HT.

this was originally intended as a reply to dave, but the address above
doesn't work properly:

i have the following packages for sale:

ft33r
touch tone pad
pl encode/decode
7.2V, 600 mAh pack, wallcharger
12V, 500 mAh pack, wallcharger
case

$280

or, same without touchtone, pl and 7.2V pack and charger, for $180.

let me know if you're interested.

I'm looking for an exciter capable of producing 100-200mW at
  450.000MHZ. Does someone out there have an exciter from
  an otherwise-broken UHF (commericial/amateur) that they'd
  be willing to let me have for cheap?

I don't need anything synthesized--crystal is good enough.
  I'm interested only in frequencies in the range 449-451MHZ.

I originally asked for a used 220 HT, but I guess my nodename
was wrong. Sorry, the above should be correct.

Brian, thanks for your offer, it's a little higher than I
wanted to pay for the complete (incl tone pad) rig.

As to the other reply, you're right, I'm having trouble
finding one. They were supposed to be all over the place
once Novices were granted voice privileges. But manufacturers
seem to be dropping them from their catalogs.

Wonder if UPS is buying them all up, to own 220MHZ :-)

Anyhow, I'm still on the lookout.

I just bought the Kenwood TH315 220 HT from AES in Las Vegas. My local
HRO also has them in addition to a dozen or so Icom 3SAT's.

Good luck!

Neither of these fit my battery collection.

While Icom has added the miniture line of HT's and betteries, they have
kept the old line.

Kenwood and Yaesu keep CHANGING their battery pack mounts. The TH-X15/205
series do NOT match the previous models.

But now Icom, though continuing to manufacture HT's for the full size packs,
hasn't made a new 220 Mhz one. But I'm interested in an IC-3AT and waiting
to see an IC-3GAT.

Hmmm...

I have a Yaesu that I've been thinking about selling. It's been fun,
but I'd like to turn it back into cash to get on to either 2m or 10m.

Here goes:
     Yaesu FT-109RH 220 Mhz hand held
     'The large NiCad battery pack' - I forgot the model number
     Larson 'HOT ROD' rubber duckie replacement.
     'Bull mic' style separate mic/speaker, made by Yaesu.
     letherette case - fits w/large battery pack.

   For the car:
     12 VDC adaptor for auto use.
     holder which fits on car door.
     1/2 wave vertical on Larson mag mount.

   For the home qth:
     120 VAC adaptor for home use.
     1/2 wave J-Pole for roof mount.
     Approx. 35 feet of coax.

If your interested, make an offer.

Jeff KB6TDU - I'm 'in-the-book'

FOR SALE: Kenwood TR-2500 2-meter handi-talkie. Unit covers the full
140.000 to 149.995 range in both transmit and receive. Unit comes with
two BP-25 batteries, and wall charger. Features include 10 memories,
scanner function of memories, and scan between two user set limits.
Standard repeater offsets, plus user-defined offset feature.

ALSO included will be a MFJ-313 converter, which fits on top of the HT
(fits via the BNC connectors), and allows reception from 140 thru 166 mhz
(and then the unit can be used as a "scanner").

Original box and manual included.

Radio plus accessories (and the 2 batteries) -- $200.

Contact Kirk Baxter via e-mail (reply to this posting) or
call (913) 345-1380 after 6pm CDT.

Can anybody help with a manual, drawing or any other material that describes
how to assemble a VS81W antenna made by Hidaka Denki Works in Japan.
I bought a VS81W sealed in its original box from a dealer but there were
no reads in the box and since I had opened the box the dealer did not
take the thing back. !@!!*^^!
I called Hidaka-Denki in Japan but these people did not respond to call
or FAX. Summary: Hidaka people are polite but their service stinks!

In case you can help - please send a note.

FOR SALE: Info-Tech M200F RTTY/CW decoder. This unit connects to your
receiver's audio output (or accessory output), and decodes morse or RTTY
(either baudot or ascii code). The unit connects to a video monitor, or
a RF modulator could be used to utilize a standard TV for viewing the
output.

Unit is in new condition, with original box, manual, and I'll include a
RF modulator. Asking $175 or best offer.

Contact via e-mail at address listed on message header, or call in
evenings home phone # at (913) 345-1380.

I would like to buy or borrow the issue of Ham Radio with the article about
how to extend the receive frequency range of the Icom IC02AT. I believe
this issue is June or July 1986. If anyone is willing to loan or sell be
the issue, please contact me. If there are no photographs, then I would be
happy with a photcopy and would be willing to pay for same.

Sincerely
Bill Thomas, WB0ALN

Hi,
     I'm looking for copies of manuals for the following pieces of
equipment:
          Keithley 616 Digital Electrometer
          Systron-Donner 7244A DVM
          Tektronix 326 Oscilloscope
          Logimetrics 925-S125 Signal Generator
          Dana 6900 DVM
          Rockland 5100 Freq Synthesizer

     If you have any of these manuals, please let me know. Thanks.

Hi,
     I'm looking for the plugin AC Power Supply/ Battery pack module for
a Tektronix 326 portable oscilloscope. My scope works fine off of the external
DC supply, but I would like to make it more "portable" by having the module
that Tektronix designed for it. (picky, picky...)

     If you have such a module that you would like to get rid of, let me
know. (It doesn't matter too much to me if it is broken, batteries dead etc.)

Thanks.

Hi,
Do you need a good, hardworking, calibrated stable HF/VHF/UHF signal generator??

Well, If you do, and aren't afraid of TUBES, I have just the signal generator for you:

HP-608FR For Sale or Swap.

Clean, with manual
Fully Calibrated for frequency and attenuation
10Mhz - 455Mhz
-127dBm to +7dBm (that's 0.1uv to 0.5v @ 50ohms)
Amplitude fully leveled.
frequency is Phase Lockable (with the addition of HP8708A)
Built in Xtal calibrator.
400Hz and 1000Hz Amplitude Modulation
Pulse modulation
CW (of course)
Rack mountable.

This is the workhorse that made RF what it is today. The HP608 Has probably been used in all RF labs of significance in the USA.

The HP-608FR was the top of the line, and was sold by HP up until around 1980.

Make me an offer, and figure out how to ship, and this fine signal source can be yours.

I'm looking for a BCD-frequency programmable 2-meter mobile, to be
used as a remote base at our UHF repeater site. Something like a
Kenwood TR-7400 or an ICOM 22U would be perfect. If you've got one
laying around looking to be put to good use, please send me mail, or
call me voice at (916) 381-4127.

For sale: Cushman CE-70 frequency selective levelmeter. This is the rackmount
version with digital LED display (0-25.9999Mhz, 1db step digital attentuation,
selectable impedances, probe power provision, etc).

     Cash or trade desired (RF/Microwave/test equip., etc)

          Kirk Bailey, N7CCB

PS: For those who aren't familiar this is a special form of rcvr (AM/LSB/USB
etc), designed for use with broadband FDM carriers. Of course it has other
more mundane uses...

When it comes to aligning receiver front ends and other tuned circuits
a sweep generator seems very useful. Strangely enough, these beasts
are hard to find at hamfests. What do people do for sweeping i.f.'s
and front ends? Does anyone remember this apparent lost art?
Anybody out there have a sweep generator they use regularly that
would like to comment?

-Thanks in advance,
 Charlie Thompson WB4HVD

Wanted- Collins KWM380 info/equipment

(I am posting this for Jim-W9NB but you should direct
 replies either to me or rec.ham-radio)

COLLINS KWM380 INFO and EQUIPMENT WANTED
Does anyone know where I can buy or swap modules for
the KWM380? Is there a KWM380 net or club? I have a
speech processor board and need a noise blanker.
Also...
Does anyone have any info on the new modifications for the
KWM380? (I checked mods-database and found nothing)
Thankyou,
Jim-W9NB

Yes I regularly use a sweep generator for several areas...primarily it
is very useful when couple with the spectrum analyzer to set up cavities
for repeaters and front ends for radios. First I use the sweep generator
as a crude alinement point to get the filters shaped the way I want them,
then I use cw to check the notches and rejection at the 6 db points...
It makes setup time remarkably fast and easy. Sweepers are great for
checking out coax for flatness(as well as using a TDR)

The sweeper I currently use is a PM model 1042   5 to 500 mhz generator

delivers approximately +18 dbm across the entire spectrum, it is fairly
flat in amplitude but has a high degree of phase noise... thus I use it
with some caution when alining things. There are several nice features
on this unit such as the F1, F2 and Marker are all variable and the sweep
rate is free running, line or can be triggered. Pretty much all you need
for quick and dirty set up of if filters and the like.
As to seeing many units at hamfests I have not encountered many of them
lately nor is the use of sweep generators a dying art, they are used every
day in our company to setup they equipment we manufacture.
(Forgot to add the sweeper has a variable pad in 10 db steps)

I had some experience with government surplus when I was in USAF MARS. After
a US government agency is through with a radio (or anything else), it goes
through a series of availability periods for various entities to claim it.

 1. Other units of the same agency;

 2. Other US government agencies;
 3. State governments (especially state Disaster Services Agencies);
 4. Local governments and educational/charitible institutions;
 5. Public sale.

By sheer conjecture, I presume state governments have an analogous process.

Well, I have about as simple a rig as you can find -

Its a durable, working Heathkit HW-101 -

I have the matching speaker, power supply, microphone, phone patch, SWR Meter, MFJ Antenna tuner and manuals for all above -

Everything is a matching piece except of course the Antenna tuner which is MFJ stuff!

Make me an offer!

I would be willing to swap for something below:

Yaesu FT-727 Dual Band Hand Held with CAT
Yaesu FT-747GX HF Radio
Kenwood TS-140S HF Radio
Icom 725(735) HF Radio
Dual Band Mobile

Also looking for simple 2 meter handheld for packet use and about a 7 Amp power supply for a 2 meter auto linear for house use -

73's de N8MPV Joey

The origin line if my BBS is you wish to contact me!

(226/160) - 1/614/421-3015

For sale: Large number of TeleType model 43s. About half are RS-232,
the other half have built-in 300 baud modems. Price is $15 each, $25

per pair, F.O.B. Pasadena, CA. All are in good shape, and were in good
working order when removed from service.

     Alex

Wanted: Yaesu FRG-9600 manual. I just bought one, used, and got nothing
          but the radio. I have no idea what cables, power adaptors,
          software, or whatever should have come with it. The first step,
          of course, is to get a manual, but I am interested in any other
          "accessories" which belong with the radio.

          The radio did come with the NTSC video adaptor card, so I don't need
          that. 73.

KNIGHT KIT - now THAT sparks some memories! I would also be interested in any Knight T-60 out there and/or the matching receiver. I just found a Hallicrafters SX-122 in the trash ... and it has most of its guts, I am just waiting to find the manual. Then a manual key, and presto! I will relive my beginning years in radio. (Well, maybe I need an old Johnson Matchbox, too). So, if anyone has more than one Knight Kit to get rid of (I don't want to upstage Mike Hudock), let me know too.

FOR SALE

A Kenwood TR-2600A Transceiver with CTCSS Tone Board. Adjusted & aligned in June by Kenwood. Works great as a general-purpose 2M transceiver, and includes a telescoping antenna and car adapter battery pack. Also includes a voice-activated microphone/headset. For more information, contact selig@udcps3.cps.udayton.edu or call (513) 298-1304 (Nights, EDT).

Asking $200 for everything!

I am looking for recommendations for a good price for a Kenwood TS-440S.
The cheapest mail order I have run across is $1189.

I would also consider a good used model.

BTW, I hear of good deals from people who picked up radio gear in Japan.
Is it possible to order directly from Japan and save significant $? If
so, how do I go about it?

Thanks in advance for any pointers.

I'm looking for crystals. I just got a rock-bound rig for packet, but would
like to find a few more crystals for it. If you have any of the following, I
would like to buy them, or can trade for some frequencies I'm not using.
The radio is a Regency HR-2 that uses the "standard" size crystals found in
most CB's, scanners, etc.

I'm looking for:
Repeater pairs
147.210 RX 147.810 TX
147.375 RX 147.975 TX
145.290 RX 144.690 TX
Simplex
145.590 RX 145.590 TX
145.070 RX 145.070 TX
144.970 RX 144.970 TX
144.950 RX 144.950 TX
RX only:
162.550
162.475.

I am in need of a modern, simple VOX circuit. The last circuit I
located was vintage 1980 and I would hope there is something simpler
than 8 transistors! Maybe a couple of IC's ??? If you have any circuits
of recent vintage for VOX circuits, I would like to see it. I need this
circuit for keying a transmitter from an external command receiver
(scanner). Supply voltage of 12VDC and 12VDC relay to key PTT.
If you could send me a photocopy or give me a reference, I
would appreciate it. I can be contacted at KA2RAF@NN2Z.NJ or at the
following postal address:

Wanted: Manual and/or schematic for Collins 75A2 receiver. Xerox OK.
Also, looking for old copies of ARRL technical publications, esp. Handbooks.
Particularly interested in 80 - 89, 71, 74, 76, 78, 61, 62, 64, 66, 67,
or anything earlier, will consider any year, though.

Tnx & 73

          Excellent condition
          $ Best offer

--- Jeff

                              ?
       one needs minor work = Excellent condition

What in the world is your definition of "excellent condition"? It
is supposed to mean difficult, but not impossible, to distinguish
from new-out-of-the-box.

My pal Paul Bates (x-WA7FDF) is getting back into ham radio and just
passed his General. He wants to buy an HF linear amplifier, something
at least as heavy duty as the Heath SB220.

Any offers?

You can reach Paul in Seattle at:

I am looking for an RF sweep generator:
     -Typical specs-
- Frequency range 100KHz-500MHz (or close)
- With H/V oscilloscope connections
- Marker generator optional
- Preferably solid state (i.e. not huge)
- Max price range $500 (for the right one)

Knight Kit used to make a decent little sweep generator
with markers built-in. I'd be interested in one of them
if anyone has one.

I'm building a 1930s style TRF broadcast/shortwave receiver, and
I need a few authentic parts to complete the set.

If you have any of these items for sale (or swap), please
let me know. Thanks very much.

o Coil set, Hammarlund SWK-4 (set of four 4-pin coils, covering
   17 to 270 meters); included coils numbered 41, 42, 43, 44 coils

o Coil set, Hammarlund SWK-6 (set of four 6-pin coils, covering
   17 to 270 meters); included coils numbered 61, 62, 63, 64

o National Velvet Vernier Drum Dial, Type H

o National Velvet Vernier, flat type -- any style, but preferably with
   illuminated dial (need two of these)

I happened into a Lafayette 100 watt Linear amp for CB. Model HA250
A friend diagnosed the tubes as tired. (remember tubes? |-)   )
I have almost no information about the amp and the numbers have long
since worn off of the tubes. :-(

Stuff I do know about it:
large heat sink on the right side
2 tubes
Still makes about 35 watts
A nice way to make local obscene idiots change channels |-)

Can anyone out there identify what the tubes are (and if they're still
available?)

ADVthanksANCE

The best way to restore full operation is to immerse the linear in
salt water for two weeks.

>Can anyone out there identify what the tubes are (and if they're still
>available?)

Let's get this straight... ...you want us to help you violate the law.
Is that right?

Now, if you'd like us to explain to you (once you get your license)
how to put it on ten meters, come back then.

Greg

Don't forget to wire up a PL259 connector to a 220 DC AMP arc welder,
and connect it for about 2-5 minutes. Does a WONDERFUL repair job
on it.

I just noticed your message to that guy. Seems he wants to go in that
famous 11 meter self-proclaimed "ham" net <GRIN>.

I know this should go into rec.ham-radio instead of rec.ham-radio.swap,
but since it's here already... I have one quick question... how does
one reverse the modification back to 10 meters? I was at a ham fest
last summer, and I happened across a Bishop Linear that was modified to
11 meters. Now since I'm within a couple of weeks of my novice test, I'm
curious on how to revert it back. Heck, I don't know if the crazy thing
works, but if it does it'd make a nice piece for my upcoming shack..
Any information would be appreciated...

Rather than suggesting the salt-water and arc-welder repair technique,
I suggest getting a copy of the ARRL Amateur Handbook.

In it, you'll find pin diagrams for tubes, along with a good discussion
of how RF linear amplifiers are built. After taking apart the HA250,
determine what circuits are around the tubes (grounded grid, grounded
cathode, screen grid power supply, ...). Once you determine that,
you'll be able to match the tube pinout with something you see in the
Handbook.

Of course by this time, you'll probably know enough to get your ham
license and do it right. Anyway, that's how I got started.

I need schematics and manual for a five year old Sony ICF-7600.

Seems that Sams Photofacts does not carry it.

This set is a 7 band AM/FM/SW handheld--very good sensitivity, but it needs tweaking, and there are WAY to many trimmers in there to identify.

any help? just email

thanx

Folks,

I want to buy a used 128 K RAM card for an original IBM PC/AT. This is often called a "backfill" card. I don't want 2 or 3 Meg. This machine has 512K RAM on the motherboard and can hold no more.

I need only 128 K; my purpose is to get Minix running from a set of XT distribution discs. The computer belongs to an educational institution; this RAM card will be a donation to the school. Therefore, I'm not interested in paying $100-300 or more.

If you have what I need lying around, please drop me a note describing the item and containing your price. Also, let me know how to contact you and how you'd get the thing to me.

Many thanks,

>I need schematics and manual for a five year old Sony ICF-7600.

Try calling information (area code for kansas city mo.) 555-1212
and asking for the Sony parts Dept. in Kansas City. They will take
orders over the phone for Sony parts and documentation (with a credit
card number) and ship them to you U.P.S.

I bought a real expensive radio, with built in antenna tuner, keyer, power
supply, and kitchen sink, and to afford it, I need to sell my....

    ICOM 725 compact HF station, hardly used, 4 months old.
     Includes AM/FM (all mode) upgrade and 250hz cw filter
     options.   This is the new compact HF rig that has

band stacking registers, 100W RF out, DDS, etc.
Original packing box and documentation.
Excellent condition, $685.

ASTRON RS-20A 20 amp power supply $80

MFJ Deluxe electronic keyer $35

Give me a call weekdays at (206) 882-4720.

or send me e-mail to: garthh@microsof.uucp (or uunet!microsof!garthh)

YAESU FT-470

I need some computer equipment more than
I need a second talkie. This 470 was purchased
in November and has been kept in its carrying
case. My wife (WA4WLM) uses it to keep in touch
with me morning and evenings while I transit
to and from work.

Talkie with battery,
soft case
charger
antenna
owners manual

$400

For Sale: A whole lot of electronic junk

Examples of the goodies I have to offer:
Large computer power supply filter capacitors,
10000-25000mfd, 15-75vdc
Power transformers
About 30 BNC patch cables of various lengths
Loads of power transistors on heavy heatsinks
A tek scope CRT
A few 20vac-->10kvdc high voltage power supplies
And more...

I'll sell whatever you want or everything I've got, just make an offer.
It's all gotta go sooner or later, so please inquire!

Also, I have a HP 200d audio frequency sinewave generator (1W output)
for sale, $50.

Email me or phone 607 273 1957. Thanks.

Yaesu FT-727R Dual Bander: 2m & 440. Comes with just about every
accessory:

   Two 12v FNB-4A Battery packs for .5/5W out.
   Base charger. Charges batteries 50 min.

Encode/Decode PL board installed.
MH-12 Hand Mic
Case

A couple of home made accessories:

A battery adapter that slides on top of these 12v batteries to allow them to slide onto Kenwood radios accepting packs such as the PB-6. These are radios like the TH-25/45 or TH-75.

A 2"x3" box that interfaces the FT-727 to a 8-pin Kenwood mic. I use the 727 as a base unit and have it interfaced to the Kenwood MC-85 mic. Works great.

PK-232 cable for Packet.

Everything is in great condition and I have all original boxes. Asking 350.00 for the whole lot.

Contact Gene at 408/377-2638 (please leave message).

I have acquired Collins 72S1, 32S1 and 516F2 receivers, transmitter
and power supply in need of restoration.
Next I need to get a copy of the manuals for each of these.
Can anyone out there help? I'll pick up reasonable cost.
Thanks Henry G4NOC/W6

YAESU FT-470

2m/70cm Dual-band FM Tranceiver

Features:

- o Dual Band 2 meter and 70 centimeter band coverage.
- o Simultaneous reception on both bands. and receive on one band while transmitting on the other.
- o Programable 21 memories and 2 vfos on each band.
- o CTCSS (subaudible) encode/decode.
- o Up to 5 watts on each band.
- o Small size and many other features.

I need some computer equipment more than
I need a second talkie. This 470 was purchased
in November and has been kept in its carrying
case. My wife (WA4WLM) uses it to keep in touch
with me morning and evenings while I transit
to and from work.

Talkie with battery,
soft case
charger

antenna
owners manual

$400

On behalf of a radio-club here at Chalmers, I'm looking for equipment
for the frequency band of 50 MHz. What's of primary interest is a
transverter and PA-gear.

Of course it would also be interesting to get in touch with other
50 MHz hams, to exchange information and setting up SKEDs.

I can be reached at d6jvb@dtek.chalmers.se

Hi,

I'm looking to buy a 2 meter (or dual-band 2m/440, but I doubt
they exist) linear amp that can be powered by 1-2 watts from
my HT. Output should be > 20 watts.

An RFC 2-23 would be ideal.

Thanks,

I'm not sure what the going rate on Collins equipment is -- look in the ham ads in QST or the Yellow Sheets to get an idea.

The round emblem (the "meatball") was used by Collins in later years, the winged emblem was an earlier logo. Ergo, round emblem = later production unit.

You got my curiosity so I looked in back issues of QST. 'One advertised
in March 1990 but no price mentioned (KWM-2).

30L1 in Feb. 1990 at $600.00

30L1 in Nov. '89 at $650.00

Had to go all the way to June, '89 to find the KWM-2. Ross' listed one
at $499 (sounds too cheap).

In same issue (6-89), one listed w/power supply, Noise Blanker, Portable supply,
case, wattmeter in original boxes at $1100.00.

These things are scarce. 'Heard one on a local swap a few weeks ago at
$800.00

These rigs are great and a good value (if you can find one).

'Good luck.

Once again, I call out for any transistor radios made between 1954-1965.

Anything from the Regency TR-1 to later Sonys.

Would also like AM/SW portables, like the Philco T-9 and the RCA Strato-
World Mark 3.

European sets would also be appreciated as well, especially if they have
the above bands as well.

Shirtpockets also appreciated.

I have a STORNO model CQF662 UHF repeater that I wish to place in service on the amateur band here in London, Ontario. The problem is that I am in dire need of the service manual and any other documentation that may be available.

I will pay ANY expenses incurred to get such documentation to me. Please reply to VE3ZAV Anthony Varga

Hi, I'm just studying for my novice and looking for a
good afordable rig. The fella that's kind of been my
mentor in this amateur radio stuff says he will sell
me his Kenwood FS180 for $400. No AC power supply, No VFO.
My question is: is this a good price?
Of what vintage is this radio. He said it goes from 160 to 10.

As a prospective novice, should I go used or new?
What would a descent antenna cost for the FS180?
What would a power supply cost?

Thanx,

Jim Disbrow

FOR SALE:

Commodore SX-64 portable computer, excellent condition.

This system is 100% C-64 compatible and includes a computer, keyboard, 1541-compatible 5.25" floppy drive, and a built-in 5" color monitor.

This particular SX-64 has also been modified to work with the famous DIGICOMM 64 amateur packet radio system. (See Sept. '89 73 for details.)

Prices:

SX-64 alone	- $300
Assembled Digicomm modem and diskette	- $50
SX-64 with above modem internally installed	- $350

Terms UPS COD, cash, bank cashier's check, or US postal money order.

Prices do not include shipping. I will split UPS brown in the continental US with you. If you want it sent differently, you'll have to pick up the difference.

Contact me at:

(205) 730-7015 (8-5 M-F CST)

A friend of mine has about 20 Motorola P-10 Handhelds, all crystalled
the same and all with Chargers, Antennas, etc... He is considering
selling them however he would like to get a feel for how much people
would pay for them. These are all brand-new units with 2 year
warranties.

If you are interested in them please send you mail to my address and I
will forward it to him. Please no UNREASONABLE offers, he does not need

to sell these units.

I have two terminals for sale:

Zenith Z19 (just like the Heathkit H19):
     This is a green screen terminal. I don't have a manual for it, but I can tell you what the dip switch settings are (for changing the baud, etc.) For those who don't know much about these things, it is a smart terminal, meaning that is has the functions needed to work with Unix systems or some of the BBS's. It also makes a good general purpose terminal. I have seen surplus Z19's sell for $75 in Computer Shopper, so I figure $50 is a good price. Offers will be considered though.

Hazeltine 1510:
     This is also a smart terminal. It is a white screen terminal that works very similar to the H19. I don't have a manual for this one either, but the dip switches are labeled and easy to figure out. This terminal is a little older than the Zenith, but would also make a good general purpose terminal. I would like to sell it for $30. Again, offers will be considered.

Both terminals are working fine and were in use up until a couple of months ago. Now they are taking too much space, and I need to get rid of them. If you want one, you must pay shipping, or, if you live in Western Oregon or Northern California (the Bay area and up), I may be able to deliver it to you on one of several trips I will be making to these area during the next month.

**** Yaesu 726R Multi-Band Multi-mode VHF/UHF Radio ****

A great way to get on the Satellites. Features:

- 2M, 430-440, *and* 440-450 Band modules
- FM, USB, LSB and CW
- Desk Mic *and* DTMF hand mike
- Built in 115 power supply and 12v cord
- PL Encode *and* Decode board
- Satellite board for full duplex crossband operation

$1200

**** Icom IC-04AT UHF Handheld Radio ****

- 10 memories, PL, scanning, LCD display, 5 watts, etc.
- Good condition, original antenna, charger, book.
- Icom Speaker Mic
- Padded nylon HT case (actually someone said its a glucose meter case, with the ant pocket for needles, etc)
- Several BP-3s (newly replaced cells) *and* BP-7 high power battery pack

$260
Option: +$90 for Drop in charger, Periphex BP-8S and more BP-3s

**** Equipment/repeater Rack/Cabinets ****

- Rack 1: a smaller "half" size rack with handles, a bit dinghy and some surface rust.

FREE: Make arrangements to get it before the dump does.

- Rack 2: Full size, blue computer rack. Has added shelves. Used to house the Pack Monadnock 440 repeater. Good condition, looks nice (from a distance) and has a removable door.

$25 <or> FREE if you convince me its a worthwile project.

**** Tandy 1000 PC clone ****

- Works, 512K, includes monitor, kbd etc.
- Has only 1 floppy (1 was canibalized)

$65

**** 73, QST and Monitoring Times Back Issues ****

- 2-3 years back issues including the old newspaper style MTs.

$5 each stack

Shipping is *not* included. Swap *offers* are welcome.

That price may be a little high (unless the battery is a deep discharge type). The last time I was in Radio shack, they were selling a 6 Volt 2.5 Ah sealed Gates lead-acid battery for $9.95 as a replacement for their portable cellular phone battery. These batterys have an internal resistance of ~ .01 ohms when fully charged, so their short circuit current is ~ 200 A ! Treat them with respect.

Here's an old (OK, REAL old) list that I found laying around. As you
can see, it was originally posted to notes by someone else.

-- Bob Cutler KE7ZJ

Ham Radio Phone BBS List 3/88

The following is a list of some telephone BBS's that support Amateur Radio.
Some of these are strictly for hams, while others support "SIG's" (special
interest groups) for hams or have radio-related files or message sections.

If you call one of these BBS's and find nothing to indicate it's relationship
to Ham Radio or find that it has been disconnected, let me know so I can
archive it and clean up the list. I can't gaurantee the accuracy of this list,
but I do strive to keep it as up-to-date as possible. Please send any updates,
changes, or comments to me. 73, Tom Brown KA2UGQ.

     Packet: KA2UGQ @ KA2UGQ-4 (Node:NNJ, Zip:07922)
       UUCP: ..!ihnp4!mtune!ky2d-2!ka2ugq
       ARPA: mtune!ky2d-2!ka2ugq@rutgers.ARPA
       ICBM: 40 40' 47" N, 74 25' 03" W

Baud rates are as follows: 3=300 baud, B=1200 baud (Bell 212A),
     C=2400 baud (CCITT V.22 bis)

A symbol after the phone number indicates the status of the bulletin board
since the last verification. The symbols are as follows: '*' - verified OK;
'+' - probably OK (line busy when called); '?' - questionable. If there is
no symbol after the phone number, it has probably not been checked out yet.

NEW numbers (since 2/88 list) are listed with a ':' after the phone number.

For sale:

Henry Radio UHF RF linear amplifier
2watts in, 40 watts out. Henry part no. 40d02
Tuned for 459 Mhz, but may be retuned for 440.
Operates from 12 VDC.

Originally cost 530.00; Asking 200.00

Hello, good people,

I am looing for a used Butternut Butterfly antenna. Does anyone have one that's willing to part with?

Thanks,

Wanted: AM, CW, and narrow SSB filters for a Kenwood TS-430S. The Kenwood
filters are YK-88A, YK-88C, and YK-88SN. The IRC versions are 88H6.0C,
88H400C, and 88H2.1C or 88H1.8C.. I don't know the Fox-Tango numbers.
If anyone has any of these filters for sale, please let me know. Thanks
and 73.

I have a JRC NRD-525 receiver that I would like to sell.
It is 6 months old. I bought it from Universal Radio in Columbus
for $1239, and am willing to sell it for $950 plus UPS COD to
your location.

For those of you who are not familiar with this unit, it is the cadillac
of the PLL general coverage receivers (.1 to 34MHz). It has:

     Digital frequency readout to 10 Hz
     AM, FM, CW, USB, LSB, FAX modes
     3 bandwidth selections for AM: 2,4,12 KHz
     Upgraded 4 KHz filter ($59 high Q filter)
     Noise blanker
     Pass Band Shift
     Notch Filter
     BFO
     RIT
     Squelch
     Keypad frequency/memory channel entry
     100 channels of memory
     Fantastic specs
          .5 uv sensitivity for 10db S+N/N
          >70 db Image ratio, IF rejection

+- 3 PPM Frequency stability
Fantastic audio

Am I crazy? Yes.

I just became a ham and now own an expensive transceiver with a GC
receiver that is not as good, but good enough. And I have to finance my
future 10 meter portable rig, 2 meter handie-talkie etc etc.

If you are interested, please contact me by email.
My address is:

twt@hpfclp.sde.hp.com

A few years back it seems that one of the "game" computers, atari,
commodore, or something had an attatchment, two electrodes to the
head and some software by which the user could control movement on
the screen. You might check with some atari, etc. gurus on this.

Just make the check out to ;-)

I am still looking for a very hard-to-find item. I want a Heathkit
SB-102 transceiver which has never been assembled. Preferably
still in the original packaging. I want to put one of these
'old' radios together, what else can I say?

I have an unassembled (like new in original packaging) HW-101 I
will trade toward the SB-102(plus cash), or will pay cash. If
I can't find an SB-102 I will assemble the HW-101 instead, so
don't contact me if all you want is the HW-101!

Please email or call me.

Thanks in advance. WA6MUO - Steve.

Please, does someone have the model number for the mobile charger/power suply for the Yaesu FT-208/R, 2 Meter handheld transceiver? Mine was stolen from last week. I am trying to locate another one and don't even know what to ask for.

Incidentally, if you have one which you'd like to sell, please contact

me.

Thanks

I have a 3month old Yaesu FRG9600 with NTSC decoder for sale.
This unit is as good as new and even includes the original
box, accessories etc.

If purchased elsewhere, expect to pay at least $575 for it
with the NTSC decoder.

I'll sell it for $450.00

I've decided to get a more expensive GC receiver (NRD525)
and need the bucks.

BTW, it does a great job on the cellular bands too!

Tried to send this via mail but couldn't get to you...

My FT-208R manual shows a PA-3 charger, which consists of a cig-lighter, a
little box with the charging innards, and a plug into the radio. Don't know
if this is the same one you mention...

Now, I have a question for you: Do you have a pl board in your 208, and if
so, what is the model #? Mine doesn't have a pl board, and the one mentioned
in the manual (FTS-32) seems to be both a pl squelch on receive as well as pl
encode on transmit, and I would like to be able to turn the pl squelch off as
I only need to encode it. Thanks for any info.

I am listing two transceiver radios for a friend who wishes to sell them. They are
as
follows.

1) STS model AV7600VOR handheld 118.000 to 135.975 mhz
   vor freq 108.000 to 117.975
   manual included

2) Ten Tec TT920 Aviation band handheld good condition
   no manual but manufacturer can provide one.

Please e_mail your offers. These are both excellent tools for emergency air
to ground communications as well as navigation backups incase of nav
equipment failure. Scanner fans will enjoy the programming features of
both radios.

Thanks e Guinn

     Greetings. Posting this for someone without access to
     the net. All things listed are no older than 2 years.

     Prices have been lowered since last post.

****

     1) Oberheim Xpander, 6 voice analog synthesizer module.
     Included are 2 Midi and 4 1/4" cables. SOLD!

     2) Unique DBK, 72 key (unweighted) Midi keyboard controller.
     Included are 2 Midi cables. $550

     3) Yamaha TX216, 2 digital FM synthesizer modules (called
     "TF" modules, 16 voices each) in a rack mountable case
     capable of holding 6 more "TF" modules. Included are 2 Midi
     and 2 Mic cables. $1150

     4) Fostex Model 80 1/4" multi-track (8) recorder. Includes
     one RCA to RCA snake, 14 blank reels of tape, Teac head
     de-magnetizer, head and rubber cleaner, remote foot switch
     for punching in/out, Fostex 8031 remote control unit, leader

tape, and splicing block. $1575

5) Fostex model 450-16 16 input mixer. Includes 2 RCA to 1/4" snakes, 5 RCA to RCA cables, 2 mic and, 4 1/4" cables. $950

6) Fostex RM780, 2 studio monitoring speakers. Included are 2 Monster speaker cables. $295

7) 360 System Midipatcher, Midi patch bay. (4 in/8 out) $135

8) Audioarts Parametric EQ, 2 channel 4 bands. $325

9) Kahler Human Clock (capable of basic synchronization to audio input). $225

10) Roland Pad-8, Midi percussion controller. Includes 2 Midi cables, new plastic-tipped Vic Firth drumsticks, Pearl stand, and Roland APC-66 clamp. $295

11) Halfer 220 stereo amplifier. Includes rack-mount attachment. $295

12) Roland MPU-104 Midi input selector. $90

13) Invisible KB3, 3 tier keyboard stand with LSA 10 narrow instrument attachment. $325

14) Kramer Imperial Pacer electric guitar with Floyd Rose tremolo system. Includes Boss NS-2 noise reduction pedal, Boss FU 50H volume pedal, guitar stand and case. $495

15) Nanyo Bass Collection bass guitar. Includes Ibanez compression pedal and Boss Chorus pedal, guitar stand, and soft case. $550

The person for whom this is posted has decided to pursue a film career and he no longer needs the above instruments. If you want more information or want to comment on the above prices, please reply to me and I will give you his phone number so you can discuss the details with him.

Thank you. (My e-mail address is fmgst@unix.cis.pitt.edu)

I am looking for an older all solid state low band SSB tranciever.
I am not too familiar with the model numbers, but what I had in mind was
one of the older Icoms or Kenwoods. I am looking to spend in the $500 -
$900 dollar range. Memory, dual vfos and other extras are not important.
I would like to pick up a basic 200 Watt pep (100 watt cw) ALL SOLID STATE
tranciever, preferably with power supply, and maybe a CW filter.
(Rig will primarily be used on 20 meter CW). Condition is not that important,
as long as it is working ok. If you have something that you think I might
be interested in, please EMAIL me the particulars along with the price you
REALLY want.I really don't go for long bargaining sessions. Give me the
bottom line price that you will accept for your rig.

Paul, in this prcie range, you can go quite a way.....i think the

500 price point will get you the older rigs, such as a kenwood
ts130s. for about 750 to 900, yoou can get an icom 735 which has
dual vfos, is a great rig, and you can run full key down at full
power.....

look at the ham trader yellow sheets....several of these rigs each
week. give me a call, if you want.....the next trader comes out
monday, and i can give you a call that evening with info.

Looking for a company that carries tubes of all sorts...

The Drake TR-4C needs...

2 6EA8
1 12AV6
1 6EJ7
2 6BZ6
1 12BY7A
3 12BA6
2 12AX7A
1 13DE7
1 6GX6
1 6AQ5A
1 6EV7

And of course, 3 6JB6's, but I have a good source for those. You used to be
able to get tubes at Rack Shack (back in the old days! Maybe you still can!),

but what ham companies carry decent (ie-ANY) tube stocks?

Thanks, and if you have any of these (must be unused or VERY good condition)
let me know and maybe we can swing a deal!

Mark C. Lowe - KB5III

I purchased an ICOM R7000 last Christmas and have finally decided to
sell the Radio-Shack PRO-2004, with 800mhz restored.

I'am asking $300.00, which includes the Operator's and Service Manuals.

Prefer to sell to someone in the Austin, Texas area.

Now *YOU* can have your very own 2m repeater.

I want to sell a home-built (not by me) 2m repeater. It is crystal-controlled (currently on 146.11 rx, 146.61 tx) and was crafted from ready-built transmitter and receiver modules. It is rack-mountable and has a builtin speaker and a microphone. It has a COR circuit to operate the transmitter, but no id-er and (I suspect) no timeout timer. The wires for an id-er are present, as though one had previously been installed. It puts out 10-15 watts. I haven't tested it except on the bench with a dummy load, but it seems to work just fine.

I will accept any reasonable offers. I bought it because I was planning to put it on the air, then gave up due to a number of personal considerations, like, having a place to put my bed, let alone an antenna :-)

Duplexer !NOT! included. Your parents put it together.

I have inherited from an old partnership, about 100 miscellaneous items that can be used in 6 GHz, 11 GHz, and other frequency bands. I also have items that can be used on BNC, SMA, and "N" type cables. These items include mundane things like adapters and cables, as well as some more

exotic things like circulators, issolators, flex waveguide, Couplers, attenuators, and other stuff that might be useful. I will guarantee (30 day money back) all items purchased through me. I have a list of the stuff that I will E-mail to you, but don't want to take up space in a conference unless there is interest.

Please remember that this stuff is used, but in good working order. Prices are obviously reduced greatly from book value for quick sale. Mose of the waveguide stuff is either WR-75 or WR-137. If you would like a list of the items or know where I might find someone who would be interested, please, PLEASE, _PLEASE_ send me e-mail!!

I have an inoperative Johnson Viking 4740 CB/SSB radio.
It is 40 channels. It has no receive audio at the present time.
I am in need of a schematic/PC layout for the radio so I can get
running so I can convert it to 10 meters. Anyone having any
info, please contact me at:

Chris Crosby KA2RAF
P.O.Box 1286
Lakewood, NJ 08701
201-905-9843

p.s. I would be interested in any mods for the radio. I heard the 10 meter mod is a "ground the pin on the synthesizer" mod. That and any others would be greatly appreciated ! 73 de Chris, KA2RAF@NN2Z

This radio is available brand new from mail order places for about $300 also. I have seen ads from Executive Photo in NYC (ad usually found in the science sections of NYTimes) for $304. IMO the price Pete is asking is too high.

Just FYI.

I have a bunch of N to BNC adapters I'm selling to help finance
our radio club. They have a male N and female BNC (so you can
plug them onto an N connector on a chassis and attach a standard
BNC cable). These are new surplus, still in the plastic wrap.
$2 each or $15 for 10, postpaid in US. E-mail first to insure
that we still have them, or I'll return your check if we are out.
Checks to "HPLSARC".

I am looking for a set of manuals for a Motorola Motrac "L" series solid
state receiver, part number TLD1340AFSP20, with a recieve channel element
number TLN1086A. This unit was built in the late 1960s, and was retrofitted
into a J74XB12101AT repeater. Please if you know where one might find
a service manual, or you have one you would be willing to copy or sell, we
can pay for it. We have called motorola already, and they can't find it!
They know they HAD manuals for it, but they can't find them!!

Jon Albers

I have several professional-quality sound system power amplifiers for sale. These are a Dukane Model 1A911C, are in excellent condition, and are approximately 12 years old. These amplifiers are 19" rack mount and occupy 8-3/4" of rack height. These amplifiers are intended for commercial sound installations in concert halls, theaters, auditoriums and other places of public assembly.

With a suitable output matching transformer and external oscillator, these amplifiers may also be used as variable frequency AC power supplies (50 to 400 Hz) for testing and evaluation of power systems.

Specifications are as follows:

POWER BANDWIDTH (EIA)	150 watts RMS, 100-5,000 Hz with < 5% THD
	125 watts RMS, 30-20,000 Hz with < 2% THD
	125 watts RMS, 80-8,000 Hz with < 1% THD
	100 watts RMS, 30-20,000 Hz with < 1.5% THD
	100 watts RMS, 50-15,000 Hz with < 0.4% THD
FREQUENCY RESPONSE	20 to 20,000 Hz +/- 1 dB
	flat as a pancake between 50 and 12,000 Hz
NOISE LEVEL	80 dB below rated output
INPUT SENSITIVITY	0.4 volt for rated output
INPUT IMPEDANCE	100,000 ohms (600 ohms with accessory transformer)
LOAD IMPEDANCE	50 ohms (70 volt) balanced or single-ended
	25 ohms (50 volt) balanced or single-ended
	6.25 ohms (25 volt) balanced or single-ended
OUTPUT REGULATION	< 1 dB from no load to full load
CONTROLS	input level control
POWER SOURCE	105-125 volts AC, 50-60 Hz
WEIGHT	36 pounds

NOTE: This is a power amplifier only, and requires a pre-amplifier for use with microphone or other inputs. These amplifiers are of the highest quality and are designed for 24-hour per day use in demanding applications; there is no comparison between this amplifier and, say, a Radio Shack 100 W PA amplifier costing $ 200.00.

PRICE is $ 100.00 each, FOB Buffalo, NY. Price is firm, although I might consider a slight "quantity discount". This price is less than 20 cents on the dollar for a new commercial amplifier of comparable quality.

     I'm cleaning out our storage building, and have the following
for sale in two lots:

LOT 1   2 ea Tektronix 4012 graphics terminals (minor troubles, CRT's okay)
     2 ea Tektronix 4013 graphics terminals (working okay)
     1 ea Tektronix 4014-1 graphics terminal (minor trouble, CRT okay)
     TOTAL PRICE: $ 150.00, FOB Buffalo, NY

LOT 2   1 ea Tektronix 4631 hardcopy unit for 401X and 402X terminals
     (excellent working condition)
     PRICE: $ 200.00, FOB Buffalo, NY

     Lot 1 is not a bad deal if you are trying to keep some 401X
terminals running; how can you go wrong at 30 bucks apiece? :-) Lot 2
is not a bad deal either, since if you don't have any Tektronix terminals
to use it with, you can convert this unit to a line scan recorder.

     Shipping expense for Lot 1 could be a problem, but it all depends
upon how much of a bargain you think my price is... :-)

I'm still doing housecleaning...

Genrad Model 1910A Wave Analyzer, used for frequency response measurements in the range of 20 Hz to 54 kHz, with built-in recorder, solid-state 1970's vintage, excellent condition. Tucker Electronics asks $ 3K for this instrument, which is admittedly an absurd price.

Our price is $ 600.00, FOB Buffalo, NY. If you know what this unit is, it's not a bad deal.

I have just purchased a Kenwood TM-621-A 144/220 MHz Dual-Bander and
have found the extended VHF transmit will not go above 151.995 MHz.
Other owners have found the same result. Is there any way to get the
radio above that frequency without major modification? If anyone
has this information, it would be much appreciated.

you can send any info to: C. Crosby

Kenwood TR-2400 2m Handheld for sale

EQUIPMENT

Kenwood TR-2400 2m Handheld with the following accessories:

- Rubber duck antenna
- Vocom 5/8 wave extendible antenna
- extra battery pack
- Kenwood speaker mike
- Kenwood base stand (see below)
- thick Kenwood/Bianchi leather case
- PL tone (1B) encoder installed
- Kenwood trickle charger

PRICE

$200.00 + shipping (will only sell as complete system)

FEATURES

This radio is a fully synthesized radio covering the whole 2m band. Frequency entry is accomplished by using the arrow keys, or simply typing in the desired frequency. The radio has 10 memories, and will scan through its memories. Provision is made for one nonstandard offset to be stored in memory.

The base stand included makes this radio especially versatile. When the radio is set in the stand, it is angled up for easy viewing. The base stand has connectors for an external antenna and a hand mike (included). Then, short jumper cables connect the base stnd to the radio. With these connections, the radio can be charged by the base stand power supply and use the external antenna and hand mike. So, you have the convenience of a base unit as well. The radio will quick-charge the battery and operate off the base stand power

simultaneously, allowing continuous operation.

This radio is not a new radio. So, the philosophy is a little different than the current models. The keys are large and easy to hit. The display is large and easy to read. There are not lots of different operating modes or funny entries. Basically, type in the frequency or memory number you want, and you're there, every time. There are slide switches to selectively lock out the PTT or the keyboard, or both. And the display can be lighted with another switch. The case is two plastic halves connected to a metal band which runs all the way down both sides, the top and the bottom.

This is the radio you want if you're interested in an easy-to-use radio that's versatile but without tons of features. And, the components inside are big enough, you may even be able to work on it yourself if you want.

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS

SPRING FLEA AT MIT
Sunday, April 15, 1989
9AM-4PM

Come to the city for a great flea - plenty of free parking.

MIT's semi-annual electronics and ham radio
flea will take place on the Sunday of Patriot's
Day weekend again this year.

There is tailgate space for over 200 sellers and
free, off-street parking for 1000 cars!

Buyers admission is $1.50 (you get 50c off if
you're lucky enough to have a copy of our add)
and sellers spaces are $6.00-each at the gate

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 4PM, with sellers set-up
time starting at 7AM. Have no fear of rain, a
covered tailgate area is available (6'8" clearance).

Talk-in: 146.52 and W1XM/R-449.725/444.725 (PL 114.8/2A).

Sponsors: MIT Electronics Research Society
MIT UHF Repeater Association (W1XM)
MIT Radio Society (W1MX)

USENET MEETING PLACE AT DAYTON HAMVENTION

It's that time of year again! Year after year we see postings on USENET asking, "Where can USENET radio afficinados get together for an old fashioned eyeball at the Dayton Hamvention?"

In 1990 we have a place of our own.

Come to the Digital Suite on Friday, April 27 at the downtown Stouffers Hotel, room 425. I have a large suite reserved for packet, RTTY, USENET and Fidonet hams, so we can all get together and see what each other looks like (scary!).

This is at Stouffers, where many of the DX clubs host the infamous hospitality suites. . .where you can gab with famous DX and contest hams until the wee hours. And now we have our own hospitality suite!

Show up after 8pm, room 425, downtown Stouffers in Dayton, April 27th.

BYOB and non-smoking, please.

See you there!

Tad Cook

I'm posting this for a friend with no net access.

WANTED

Engineering Drawings and Installation Instructions for an E-Z Way Crank-Down/ Tilt-Over tower, Model RBS-50 (circa 1969).

E-Z Way Towers, Inc. of Tampa, Florida is no longer in business.

Drawings and instructions are needed for a height variance and building permit in the village in which I reside, in upstate New York.

Thanks in advance for any help from the net.

73, Doug McManus KB2IAY

Anyone with any of this information, PLEASE email me, or call me (collect if you must) at (716) 272-1582 in the evening, or write me at:

2118 W. Jefferson Rd.
Pittsford, NY 14534

Doug (or I) will pay the necessary costs of reproduction of these documents. Please help if you can.

Thanks, 73 Dave Hallidy KD5RO/2

>tucker@uiucvmd.bitnet

And, now, an unsolicited endorsement from the peanut gallery:

I own a TR2400 myself, have used it for packet and for all my
mobile work. I don't use it as an HT anymore because the
battery pack has died and I'm too cheap to buy a new one...
(I use my homebrew battery eliminator instead, which of
course ties me to a source of power, so no more walkie while
talkie :-)

I found it to be a good radio. When using a 5/8 wave mag
mount on the car, I find that by amplifying the output to
about 15 watts that I can talk and hear about the same
distance. Translation - it is pretty sensitive, as also evidinced
by the fact that I could use it to CONNect to a packet station
in Tucson while in my house in Tempe (AZ for both), when
another HT could not pull the Tucson packets out of the noise.

I have heard that it likes to eat batteries for lunch, but since
I've got a bad battery pack, I don't know if it was because of
the design or because of the person who had the radio before me...

In any case, I think it is a pretty good radio. I got mine,
with a bad lcd and without all the nifty other stuff Jeff
has for sale, for $100 at a swap. Cost to repair mine,
including getting a new battery pack and LCD would be about
$100. So, not a bad deal, I'd say....

Oh, one other thing - I *have* had to replace the BNC connector
a couple of times...

Try the Swap net at 1PM-3:30 or so PST on 7240. There is a fair amount
of demand for the TEN-TEC stuff. Also tune in to the "Old timers net"
AKA "Rigs that glow in the dark" net immediately following. IT deals

mostly in Collins gear.

I just(3 days ago) got my technician ticket in the US Snail, and now I want a car antennae to use with my IC-32AT. Best would be a 2-meter/440 MHz dual band, but considering the current usage state on 440 in Ithaca, I could probably get by with a 2-Meter 5/8's or the like. I don't want to drill any holes in my car, plus I'd like to have the option of moving the antennae to other vechicles easily, so a Mag-mount would be best.

> (2) Periphex BP-8S 8.4 volt 1200 ma Battery Packs
> Periphex Wall Charger (for Periphex Batteries)

These batteries are really 9.6 volt 1200 mah. It's the Icom BP-8 that is 8.4 volt. BTW, the Periphex Wall Charger will also charge the W&W and other similar batteries. They slide over the top contacts and don't require any special charger jacks.

> The Periphex batteries are, at this time, less than two weeks old and I
> will provide the buyer with a copy of the sales receipt if requested.

If I didn't already have 3 Periphex and 1 W&W (they are identical) I might be interested. But I can attest to the fact that these units can run your HT for 2 days solid, and much longer in power saver modes.

> Reason for sale... especially after forking out ~$130.00 for batteries?

> I got crazy last Thursday at the candy store and bought a Yaesu FT-470
> (such is life).

If you had gotten an IC-32AT you would have dual bands and been able to use those batteries. But I do believe Periphex, W&W, and maybe some others are now starting to make Yaesu batteries.

[see previous posting to buy the IC-02AT and the big batteries]

I am looking for manuals, or a good source for manuals for a couple of 40s era
shortwave radios. if you know of one.
please reply by e-mal

Thanks

I am looking for a very hard-to-find item. I want a Heathkit
SB-102 transceiver which has never been assembled. Preferably
still in the original packaging. I want to put one of these
'old' radios together, what else can I say?

Please email or call me.

Thanks in advance. WA6MUO - Steve.

Looking for information about the Alinco DJ-200T 220mhz HT. Just bought
it at the Hamvention here in Dayton, Ohio. It seems to be working real
well, got it for a song but it didnt come with a manual. If anyone
out there happens to have one, I would appreciate you sending me a copy
of it. I would be more than glad to pay all postage, fees for copying

it and a little something extra for the assistance.....

Leave your name/number and/or address here so I know who I am responding
too!

------------Next Part 2

What does everyone know about the popularity of Packet radio use for
Novice's on the 220mhz rigs? VERY interested in it but before I
purchase the TNC (I could use it on 144 I guess) but would like to be
sure that Packet is practical! (BTW, I'm located in Columbus, Ohio if
area makes a difference)

Thanks guys! 73's!

No call yet! Gettysburg is SLOW!!!!!!!!! (Can't wait!!!!)

N0

Wanted!

   Looking for a good dual bander HT or Mobile (Base if possible).
Heres the catch, I want 2meter and 220mhz.....Rare from what I
understand but I know Kenwood makes a mobile that is 2/220 but it is
VERY expensive....Like $600 and for only 25 watts due to 220mhz...

   Anyways, I am also looking for an inexpensive swr/power/tuner
combination for VHF and UHF; must be able to at least cover the 2 and
220 spectrum..... How about a dual band base antenna? Know of any? I
have a dual 2/220 mobile antenna I picked up at the Dayton Hamvention
and got it for only 19 bucks! Couldn't refuse.....If ya have any of the
above or any ideas where I may locate one...Please let me know...

73's   Joe   -   (No call yet, FCC says its in the mail!...Sigh...)

I'm looking for a Daiwa CN-520 wattmeter. This is the small HF wattmeter
with the 200/2KW switch.

I'm also looking for a Collins 30L-1 amplifier. This is for DXpedition
use, so cosmetics are not important but price is. It will be modified,
so a non-working unit would be considered.

I picked up a Heathkit HM102 RF power meter at the Foothill flea market
last Saturday, but when I got home I discovered that the manual that

goes with it is for some other HK power meter! (Caveat Emptor!)
Anyway the HM 102 seems to be a HF power meter with 200W and 2000W ranges, as well as an SWR function. I'd like to calibrate it. On the sensor is a switch labelled CAL-NORM, as well as a trimpot R6 and a trimcap C4.
Does anyone know the Cal. instructions for this beast or have a copy of the manual please?

Does anybody know what a used PK-232 goes for? Is $200 too much?
What about PK-FAX? what's the price for this software (used version).

Thanks ,

Tektronix Oscilloscopes! Yeah!

I have several for sale, all in excellent condition:

- 585 (100MHz) sweep delay, dual timebase, etc.,
  with fast rise preamp
- 545 (30MHz) (2) sweep delay and dual timebase, each with
  differential preamp
- 555 (30MHz) twin fully independent beams, twin timebase
  generators, sweep delay, two CA dual-trace plug ins
- 551 (30MHz) dual beam, separate vertical amps, single
  timebase & horizontal amp. Two differential preamps
- Heathkit 5MHz scopes: two tube-type, one solid state
  with trigger

The 585 and 545s operate perfectly and have been calibrated recently. The Tektronix are big, tube-type, benchtop models, very reliable and sturdy. The two dual beam scopes also work perfectly when connected to external power supplies, which I unfortunately do not have. The Heath scopes are good for general radio and television work, while the Tek ones are of lab quality.

Prices: Tek scopes -- $100-$150; Heath scopes -- $20-$40.
Something you might be interested in? Then call me evenings at
(607) 273-1957.

I'm looking for a used Kenwood 721 or 731. It doesn't have to be in
top shape, just working perfectly. I'll trade a Kenwood 4100a +
something else for it. The 4100a cost about $600 new. I've got a
bunch of stuff to trade, including stereo equipment. I live in the
Sacramento, California area, but would be willing to ship anywhere.

Hi netlanders!

I have the following HAM gear forsale:

   ICOM 27A 2 meter transceiver - $250
         25W out, PLL synth tuning
         VFO A & B, 10 memories,
         PL tones with DTMF mic.

         The rig is in excellent shape. Manual included.

         Will throw in a Telex 5 element 2 meter beam
         that has never been out of the box.

   Spectrum SCR 2000 X   440 Mhz repeater - $850
         This is a great deal!   A working full featured
         repeater complete with duplexers, and a BRAND NEW...
         (*READ NEVER OUT OF THE BOX*). Hustler G6-440 base
         antenna. Repeater features touch-tone remote programming
         of various features, 40W output, auto-patch, 110V power supply,
         terminals for 12V backup power, 8 aux inputs (for patching
         to other repeaters, westlink, etc). I also have
         manuals that describe in detail the transmitter, receiver,
         duplexer, and control circuitry.

         NOTE!!! this repeater has the callsign of the original
         owner - W7SRZ - burned into the CPU along with the
         access codes. You can turn the CW ID volume completely
         down and patch in your own CW IDer very easily. Spectrum
         no longer makes the CPUs.

         I have tested the repeater to see if it would handle
         packet transmissions and it will.

The prices on both of these are firm but I do have to move both
pieces of equipment rapidly. I will pay shipping within
the continental US based on the prices above.

Does anyone have the mobile mounting bracket (I think is called the MB-11)
which is for the Kenwood TM-621/631/721/731 and doesn't plan to use it?
I would like to buy one. I have not checked into what the price is by
mail order yet because I thought I'd give someone a chance to unload one
they didn't need.

Ok, one last try before I place a QST ad...

I'm looking for an external VFO. You know, those old ones that were used
to replace crystals...

It is to be used with a Drake 2NT. I need 3.8 (80M) and 7 MHZ. output.
Power supply should be self contained.

Eico, Halicrafters and ??? made 'em.

A friend is looking to sell his ICOM IC04AT 440mhz handheld. This is a
5 watt, 10 memory, LCD display unit that will run off 12V direct. Unit comes
with radio, battery pack, and wall charger. I believe it also has the
extended xmit/rcv mods. I tried to tell him it was too cheap, but he only
wants $175.00 for it. Seems like a real bargain!

Call Ed, KA1SRD, at 508-345-6664 after 5:00PM or between 8:00AM and 9:00AM (EST)
if your interested.

I recently bought an R390A receiver for the whopping price of $200. It is in
what appears to be superb condition, all bands work well, seems nice and
sensitive, lightbulbs work, no corrosion and even the front panel doesn't
have any real scratches etc. I'd sure like to get the govt. type manual for
it. You know schematics, principles of operation, maintenance procedures,
repair etc. Does anyone know where such a book can be obtained?

I think the guy I got it from has two more, but I think the rest will
be $295 as he said that he will put some time into the rest (like check them
out, replace tubes that are out etc.) If interested, drop me a line and I'll
put you two in touch with each other.

These radios were just obtained from some D.O.D. sale and are still
"mothballed" in plastic.

I sure like mine!

I would like to buy a Yaesu FT 301 Tranciever in "decent" condition.
It need not be mint. I would also be interested in a 12 V power supply
for same. I will consider any rig that is functional on all bands and
has no major electronic problems. Scratches on case ..etc not important.
Tell me what you've got and how much you want for it.

A friend is looking for a 220Mhz HT or Mobile, something around $200.00
give or take. Need not be overly fancy, but must be operational.
Call Ed, KA1SRD at 508-345-6664, or I will forward any email on the subject.

I have a Yaesu FT209RH HT. I use the Radio Shack electret mic.
element with a 9 volt battery in a small minibox (aprox. 1" by 1.5"
by 2.5") for a mobile mic. The battery is necessary because of
the amplifier contained in the mic. The current consumption is 1 ma. so
the battery will last near-forever (going over 1 year so far).

I use a spring loaded DPST switch to turn on power/key the mic. The
Yaesu triggers into Xmit mode when a 1K resistor is detected across
the 2 conductor mic. jack.

Audio quality has been reported "excellent". Cost is approx. $6.00
for all of the components. The amplified mic. signal may provide the
extra audio that you require but I AM NOT an Icom expert.

Barry

I am a graduate student working on a biological neural network circuit
analysis and modeling dissertation. I have a Tektronix 5111A storage

scope with one 5A14N Four Channel Amplifier. I am trying to monitor
eight channels of data being recorded/reproduced by an eight channel
analog to digital to pcm to vcr tape deck. I would be most gratefull
for any leads on where I might be able to get another 5A14N amplifier
for the second slot in my storage scope. I'm not rich ... but I can
afford to contribute a few dollars toward the cost of this amplifier
... if the cost can be held down.

Thanks, AJ

For what its worth:

    I am looking around for a used tower. At least 48ft high and
will handle 18 sq ft of loading. It doesn't have to be tilt-over and
I could handle either a guyed or free standing tower.

    If its within a few hundred miles of Washington D.C. I'll come
and get it personally. (Or disassemble it).

    If you can help or know of some one who can, please e-mail to me.
    (include your price. (reasonable))

My girlfriend has been listening with me to my Icom R-71A, my Kenwood
R-600 and/or my Radio Shack DX-440 and she's decided she likes
SWL. While not interested to the same degree I am, she has decided
she wants to listen to BBC, Radio Moscow, VOA, Radio Habana and other
major broadcasters you can almost pick up on a long piece of wire
and a hunk of gallium.

What I'm saying is that she needs a good basic radio to hear the big boys
and so sensitivity, for example, is not a big concern. I'm looking
for a good used radio for her as even the DX-440 at 189.99 (Actually
ATS 803A at that price) is a bit much. I'm looking to buy a good
used receiver under $100.00 for her to listen to.

I visit ham fests and swap meets and am just wondering what brands
and models of receiver I might look for.

Of course if anyone has a receiver they want to sell in this catagory,
please email me.

I am looking for a used all solid state SSB tranciever at a good price.
I really don't know exactly what I want, just so it is all solid state,
and runs around 100 watts cw and 200 watts pep SSB. I want it mostly for
20 Meter cw/rtty and 75 SSB, so it's not important if it has the new bands
on it or not. It should also have pass band tuning, a notch filter, and a
cw filter. A friend of mine suggested that I look for an ICOM IC-740.
SO WHAT SAY...are there any IC 740's for sale out there? If not, tell me
what you do have, and want to get rid of. The rig need not be in mint
condition. I'll consider ICOM, Kenwood or Yaesu type stuff. Will also
be looking for a power supply to run it.

Paul

Hi there:
     I recently bought an IC-4GAT HT rig (used) from a posting on this
net, but did not get a manual with it. (I need it badly!!)
If someone can send me one i would greatly appreciate it. I can pay for
postage. Even a xerox copy would do! (Or I can copy it and mail the
original back to you.)
     Please email to: menon@ccwf.cc.utexas.edu
     Or call(collect): (512)476-3965. after 8pm.
(EMAIL is BETTER!!)

     Thanks y'all.

Sorry about the mistake in the previous posting about
needing a manual for the ICOM HT.

Actually my set is a 2GAT <<+++++++++++++++
             ^^^^^

Please note this typo!!
Thanks.

I'm interested in purchasing a good, used, solid state dip meter. It must
be in reasonably good condition (working, stable, no duct tape).

I'm also interested in a good 100w antenna tuner. Preferably with SWR and
power meters.

I have an ICOM IC-32AT Dual Band HT that I no longer need. Some features:

- 5.5 watts on 2 meters, 5.0 watts on 70 cm.
- Receives 138-174 and somewhere well below and above the 70 cm band (It has the extended rcv mod)
- 20 memories with rptr offsets of 40 without
- Runs of 12v direct
- Tone feedback (beeps when you push the buttons, can be turned off)
- DTMF of course
- PL encode included, decode optional
- Simple mod for x-band repeater
- Scanning with lockout
- Comes with a BP-70 *AND* a BP-5 (and a wall chgr for the BP-70). (The BP-70 allows full output) oh yea, and the rubber duck of course.
- Much more I can't think of off hand...

Asking $465.00 shipping included! I just called HRO and they want $549.95 for the radio and $65.00 for the battery. This rig is less than a year old!

A friend of mine owns a Yaesu FT-208R 2-meter handheld transceiver and is
planning to use this rig with a TNC for packet operations.

Does anyone know where the mini microphone connector that plugs into the HT
can be obtained??

Thanks in advance!

I want a PK-232 tnc... Thought about buying one from AEA, but noticed
that Heath has a kit version that sells for $289.90 including technical
manual. Is this a good deal? Can I buy an AEA assembled tnc for less?
if so, where? All info appreciated...

Incidentally, if anyone in the San Francisco bay area wants to sell his
or hers PK-232, I'd be interested.

I recently purchased a Drake T-4xc transmitter, r-4c receiver, and ac4/ms4
speaker and power supply. I am interested in completing my station. I am
looking for the following items.

L-4B Linear Amplifier
C-4 Station Console
MN-4 Antenna Matcher
W-4 Wattmeter
Noise Blanker (or schematic of one) for the R-4c receiver
.25 khz cw filter unit

I have immediate cash for the above items. I will pay your asking price plus
shipping for any of the above in good condition. You can email, or call
daytimes (615) 684-4490 ext 434. All hints and pointers are appreciated.

I have a mint condition AOR AR-900 Scanner for sale......reasonably priced...

Features: 27-54,108-174,406-512,830-950 (continuous) MHz coverage
            AM/FM
            5 scan banks (20 channels per for 100 total channels)
            5 search banks
            Priority channel
            Channel lockout
            Low battery indicator
            LCD display with switchable back light (green)
            Small size (5.5x2.0x1.5")

Accessories: Rechargeable NiCd battery and charger
              Two flexible antennas (VHF and UHF)

If seriously interested, please e-mail or give me a call.

I was given an old Heath Kit short wave some time ago which has since
passed away. I noticed the Shortwave echo and thought I'd toss out a
few questions for you aficionados.

I used to be able to listen to overseas broadcasts on my old system
and found it quite enjoyable. I'm thinking about buying a new or used
one. Frankly I really don't know how to go about it. I don't need a
space shuttle version, just something that works good and maybe has
auto-search if there is such a thing. How would I go about finding
something decent and what kind of minimum antenna requirements are
there? I took three years of Russian in college and I would like to
listen to overseas Soviet broadcasts to practice a little. What kind
of an investment am I looking at?

Any help would be greatly appreciated. I'd hate to go out and buy the
wrong equipment.

Thanks

John

Icom IC-04AT 440 MHz HT:
     has extended coverage mod, currently tuned to receive 442-460 MHz
     with BP-5 battery pack
     has mod for improved receiver volume (I only turn it up halfway
     in my truck)
     keypad frequency entry
     4 watts output on 13.2 volts
     4-column TouchTone (tm somebody) generator
     10 memories
$250 or best offer.

The Kenwood TR-7800 2 meter mobile I mentioned in an earlier article has
been sold. Never underestimate the power of the net!

I'll pay shipping in the continental US.
You can call me at (713) 332-3376; best times are 6-10 am, or 9-11 pm Central.

For those of you not familiar with it, this is an EXCELLENT quality
receiver. Very sensitive, good selectivity (rejects unwanted signals),
and high quality audio. Basically the same as the R-5000, except with
fewer memories. Best new street price for this setup would be around

$850-900.

I'm selling it to buy a ham HF transciever (which has a general coverage
receiver built-in).

What can be heard:

  .1 to 30 MHz covers AM broadcast, shortwave broadcast, ham, military,
  shipping, international air, wire service, time standards, CB, WEFAX,
  and more.

  118-174 MHz covers aircraft, satellites, police, fire, ham, business,
  mobile phones, railroads, government, military, paging, marine, taxi,
  ambulance, and much, much more.

Features:

      - 100 KHz to 30 MHz
      - Digital tuning, all-mode (AM, FM, USB, LSB, CW)
      - VC-10 installed for added 118-174 MHz coverage
      - 110/120/220/240 VAC, 12 VDC kit installed
      - 10 memories, various scan modes
      - selectable rate tuning
      - selectable bandwidth
      - YG-455C 500Hz CW narrow filter installed
      - all-mode squelch, audio tone adjust, S-meter, RF attenuator
      - dual clocks, with timer & recording controls

    Like new condition, with AC & DC cables, original manuals and packing.
    $625 obo, Shipping and method of payment negotiable.

I've been using a Heath SW 7800 for quite a while. It is a good
performer with 150 khz - 30 Mhz coverage, LSB, USB, CW, and wide/
narrow selection on AM. Kit price, if memory serves is about $300.
One other nice feature is a rec out connector, for easy taping of
strange or unusual signals. -MWP

For Sale:

Heathkit SB-200 600W output HF amplifier

This amplifier was assembled and then put in storage by the previous owner. It has very few hours on it by me, and is in mint condition. No mods, and I have all manuals. E-mail to albers@ka3ovk.UUCP, or call Dave, KA3PGN, at (301)916-9521, who is storing it for me. He has used it and can answer and questions. Asking $325 or best offer.

MFJ-1278 Multi-mode controller/TNC

This is a computer interface for VHF and HF packet, RTTY, CW, ASCII, FAX, and SSTV. This also has a built-in mini-packet BBS/mailbox which will work while you computer is turned off. Mint condition, with all manuals, and some software for the IBM-PC computer. Asking $175 firm. This one is also Dave's, so you can E-mail me or call the phone number above.

Daiwa NS-663AN cross-needle power/SWR meter.
This is the 140-500 Mhz model with N connectors.

This unit is MALFUNCTIONING or WAY out of adjustment.
The forward reading is way low, about 2-5% of what the
real level is. Reverse seems to be fairly close.

If you know how to fix, repair, and adjust these things,

here is you chance to pick up a bargain. Make me an offer
that includes the shipping cost.

I'm looking for a used telephone interconnect (also known as a simplex
autopatch). Anyone know where one might be gotten? I need something
that will work with a single, half-duplex radio, not a repeater.

Subject: Morse/RTTY receiver/converter

Info-Tech M-200F code receiver/converter. It accepts Morse and standard RTTY codes (both Baudot and ASCII) and convert them to readout on a video monitor or printout on a serial printer.

Details:

DATA CODES:

Morse - 5 to 105 words per minute (automatic speed tracking).
RTTY - Baudot @ 45, 50, 57, 74, and 100 bauds.
       ASCII @ 110 and 300 bauds.
Shift - High tone set standard, 170, 425, and 850 shift.
External demodulator required for 300 baud.

VIDEO OUTPUT:
Composite video, 1.5 p-p,neg. synch, 5 x 7 dot matrix, white on black.
32 or 72 characters per line, 16 or 25 lines per screen, 50 or 60 hz vertical rate, scrolling, and word wrap.

This is a receive only unit. Useful mostly for monitoring or SWL use.

$225 - firm.

Subject: KLM Echo II 432-436 mhz xcvr and linear amp

This 70 cm transceiver (SSB/CW) was originally designed for OSCAR satellite work. 10 watts PEP output. I also have a KLM 70 watt solid state linear to go with it. This a real linear, i.e., it works on SSB. Not a Class-C, FM-only amp.

Xcvr - $200
Amp - $125

Subject: KLM 2 meter amp.

For Sale - KLM two meter external amplifier - 10 in, 100 out.

$180 - firm.

I would like to purchase a FACTORY SERVICE MANUAL for the ICOM IC-R70
reciever.(Not the user or instruction manual -- I already have that.).
Ifyou have a service manual for this receiver, I would like to purchase a copy
of it from you. You copy it for me, or send it to me and I'll do the
copying and return your original manual.

WANTED: ICOM IC-3AT (the 03 will not be considered) HT
Condition: Good to Excellent (not abused)
Price: $90-$140 depending on condition

(This is your chance to upgrade to the new IC-3SAT)

I would also be interested in buying it W/O the battery pack if you would

rather keep it. I might consider a BP-8 in place of the original BP-3 (with the wall charger). Accessories I probably don't need, but you might mention what you want to sell.

There have been a number of rather confusing messages posted about the situation in Pueblo West, Colorado. To see if I could sort things out a little more clearly, I called Chris Knight, N0IJK. The story as he related it to me is this:

First, we are definitely dealing with a situation involving a homeowners' association architectural committee attempting to sue in court to get a real estate deed restrictive covenant enforced against an amateur, Mr. Charles Landers, W5QZS, and order him to dismantle his Butternut HF6V antenna and remove his transmitting equipment from the premises.

The removal of the antenna is being sought on the grounds that it is an ugly eyesore. The removal of the equipment is being sought as apparatus that creates a nuisance by causing interference with telephones and entertainment devices.

The amateurs of Pueblo West (12 in number) have all been ordered to submit applications for covenant restriction variances. Mr. Knight stated that the W5YI Report statement that all 12 have already been ordered to take down their antennas and get rid of their equipment is in error. Two of them have already knuckled under and removed their antennas and radios. Mr. Landers is so far the only one legal action has been initiated against. This is because he announced he would refuse to submit an application, which later may prove to have been a tactical error.

Mr. Landers and Mr. Knight have been in contact with ARRL HQ and the League's

counsel, Chris Imlay. The latter is reported to have stated that the situation is very grave because in the case of deed covenants the homeowner is presumed to have read the covenant and agreed to its terms before purchasing the property. Landers and Knight have also been supplied with the League's "PRB-1 Kit".

Mr. Landers is reported to be willing to spend up to $15,000 in his own legal defense. However, preliminary estimates of legal fees and other costs have been set at approximately $65,000. Mr. Landers is therefore willing to accept donations. The details of when, where, and how to make donations will be announced later. Mr. Landers has also been quoted by Mr. Knight as stating that he will donate a portion of any damages he may receive from any countersuit to the ARRL Legal Fund.

During my conversation with Mr. Knight he stated that the home owners' committee is being used by one of its members to settle a personal grudge against Mr. Landers. Three dogs owned by the committee member and roaming at large attacked Mr. Landers' dog while he was walking it near the committeeman's home. Mr. Landers reported him for violation of the leash law, and the vendetta ensued. Since the committee member apparently realizes he can't get away with selective enforcement, he is converting it into an attack against all hams living in the subdivision.

The committeeman is also charging that Mr. Landers' radio equipment interferes with his telephone. However, he refuses to permit tests by the telephone company, and even his wife is reported by Mr. Knight to have denied the interference story. Mr. Landers is not without his local supporters. More than 360 of his neighbors have signed a petition stating that they do not consider the antenna to be an eyesore and that they have suffered no interference.

How this all will turn out, I do not know, but I will try to keep you up to date. I have urged Mr. Knight and/or Mr. Landers to acquire DIRECT access to Fidonet/Usenet for the purpose of providing more direct and more timely contact with us. I hope they will be able to do so soon.

This posting is aimed more for anyone in the United Kingdom, but if anyone
from anywhere else can help me with this, I'll be just as happy.

I just got hold of a 1961 vintage Dynatron 'Tourist' transistor radio, and
I would like to get a schematic or any related history to this set.
I believe the model number is 'S.A. 5935B', as there are no other markings
on the set. The serial number on the board is 97764.

I would also like to know the history behind this set--particularly the
manufacturer of Dynatron--they make a hell of a set--best tone and clarity
I've heard out of such a set in ages.

Finally, I'd like to hear from anyone who has had experience with this
set--any quirks, or unique features that I haven't found yet?

Send replies by Email or Snailmail--your choice.

At the request of a friend, I am posting the following:

I am looking for one or more, NEW or USED, EIMAC 8930 tetrodes.
These are the "big brother" to the 4CX250 series and were
most often found in the so-called "FAA" amplifiers which have
been heavily used by amateurs on 144, 220 and 432 MHz since they
were surplussed by the FAA a few years ago.

My friend just purchased a couple of these amps, less tubes.

Although the 4CX250 can be made to work, he would rather have
the real thing because of the higher RF output available.

If you have, or know of a source for these tubes, let me know by
email, or by phone. Phone # is: Day- (716)482-5000 ext. 2345,
Nite- (716)272-1582.

Thanx in advance. 73 Dave Hallidy KD5RO

/* ---------- "Motorola HT 220 For Sale" ---------- */
A classic work horse hand-held radio! You can drive nails
with this puppy. It is tuned for 2M (146.16/.76 and
146.94). It is in mint condition and contains a 6 freq.
deck (room for 4 more freqs.). This is a basic HT-220 Omni
short style body and includes charger and battery.

Ross Chapman (206) 867-3936

or uunet!microsoft!rossc
/* End of text from uxa.cso.uiuc.edu:rec.ham-radio.swap */

Is this radio commercial type-accepted? Can it be tuned to public service
(154-156) by simply putting in crystals or would it require modifications?

I am looking for 2 527B or 4 811A tubes for a amp that I was given.
I would like to find these tubes at a inexpensive price or possibly trade for
them.

Unfortunately the budget and finance comittee, my wife, feels that new 572B's at
$85 are
too much money.

Any information or suggestions would be appreciated.

I am also looking for 811's or 572B's. I have a Collins 30L1 which lost an 811 in the earthquake. However, I vaguely remember reading something decades ago about putting in 572B's in place of 811's and getting more power. You had to change the bias or something. Does anyone have any info on this conversion, and whether it is useful on the 30L1 (like does the power supply have enough headroom to keep up with the 572's.)?

A used Drake TR-7 (there are no more new ones) is a good buy. Darn good receiver section. 100 watts, USB/LSB/CW (RTTY by AFSK). 100% duty cycle at full power if it has a fan. I sold mine last summer or I'd offer it.

Holiday Greetings from Jim Grubs, W8GRT

I have the following for sale/trade:

    TH-25AT 2meter handheld.
    Drop-in rapid charger.
    12v battery pack.
    extra 7.2v pack.

All in excellent shape, and only 10 months old.

Why, you ask?

I have a serious case of lust for an Icom IC2SAT.
(If only I had waited for a year....)

I am therefore asking $425 (HRO price + tax) or Will trade straight across
for an IC2SAT.

This price is firm since I have no extra cash to make up the
difference between a price that is lower than the cost of the Icom.

Send E-mail or phone me. My home # is (602) 323-1262

Lee

Hello all --- I have the OSCAR LINK antenna system by Hygain for sale.
Just bought it a week ago and found out couldn't fit in my attic. Just
assembled the 2m antenna. Never put out yet. Comes complete with 2m
crossed yagi (11.5 dBdc), 70cm crossed yagi (14 dBdc), and fiberglass

crossboom. The system is polarity switchable.

Model no. 218S

Lists for $383.00 but will sell it for $267.00 and I'll ship.

For further info e-mail to afz1@psuvm or by packet to N3FLX@WA7SSO.PA.USA

Tnx es 73 de Ahmad, N3FLX/9M2DX

This is a long shot, but...

Does anyone have the EPROM for the Kenwood interface that I could borrow for
a few days?

And for all those wondering: Yes, I know you don't need an EPROM for the
<<440>> (so I've been told :-)). But you <<DO>> for the 940 (ditto comment).

Please e-mail responses to:

pff@thumper.bellcore.com

Many Thanks,

I am looking for option boards, and schematics for option boards, for the
SYT TeleConnect 870 Simplex Autopatch. Boards may be working or not.
I am interested in any of the available boards, but the ones which I
particularly want are the following:

    8721 Coded Access/Disconnect PC Card
    8719 Ring Detector PC Card.

If you have any of these, or know of a source, please let me know. 73.

I have a friend who would like to purchase an YAESU FT-707 (or
equivalent model) antenna tuner. If you know of one for sale or have
one you'd like to let go for a reasonable price, please e-mail the info
to me and I'll relay the info to my friend.

Hi to all on the NET.
I'm trying to help a ham friend, W3DJS.
Wilkes, (who just turned 80 yrs old last month) has gotten the hots for
packet radio. It seems that last summer, he purchased a multi-io card for
his PC at a local hamfest here in Pittsburgh. It was a clone type card
that has a floppy controller, serial port, parallel port, game port and

real time clock on it. The card works fine and he DID receive the manual
with it. HOWEVER, he is unable to use the real time clock on the board
because he didn't receive the software disk that is supposed to come in
the package. (Wilkes is partially blind). Maybe someone out in net-land
has this same board and can supply a copy of the software disk.

I looked the board over and I can't see any real identification on it.
The manual that came with it is grey in color and has 27 pages. The card
itself looks like it might be an "MCT" type that JDR Microdevices sells.
The card has a floppy controller, and ports on it, as well as the real-time
clock. The manual refers to "SETCLK.COM" and "RDCLK.COM" as being the
two files needed to drive the clock.
Sound familiar ??
If you think you may have the same card, and can supply a copy of the software
(or just these 2 files), please send me E-MAIL.
I will send you a blank floppy, or, I could FTP them from your system.

Thanks in advance
Paul WA3TLD   pauld@fs1.ece.cmu.edu   or paul@andrew.cmu.edu

I have a Icom R71A receiver with the 250Khz CW filter and the
Icom C64 High stability crystal unit I would like to trade
for a Kenwood R5000.

The Icom has just been tested and benched by Electronic Equipment
Bank in Vienna, VA and has and continues to be a fine performer
for catching weak signals, DX'ing, and cutting out just about
any type of noise you can imagine.

Why do I want to trade it for a R5000? All my friends have a R5000,
I own an old Kenwood R600, and in general, I like the operation
and ergonomics of the Kenwood products better.

I got the Icom at a wonderful price, but still prefer Kenwood products.

So, if anyone is willing to talk trade, I'd like to listen. I'd
pay shipping on both ends and would be open to either a straight
one-for-one trade, or a trade plus equipment or cash... from either
of us.

Make me an offer, let's see if you can make me a deal.

A while back a Ten-Tec Titan amplifer was advertised as being for sale.
I didn't save the note at that time and it is no longer on our system.
Could the seller repost, email, or call me.

FOR SALE   ---   EICO TRI BANDER transciever for 20m,40m, and 80m
                   with LARGE over-rated power supply!

Since I moved into an apartment I've been using only my 20m
singlebander and my EICO tri-bander has been left laying around
at my parents house ... they want rid of it so I'm looking to
sell it A.S.A.P.

The power supply is MONSTROUS - some may want it only for the supply
which includes a LARGE a.c. power rheostat! The transciever itself
is in bad need of a good alignment - the manual is included. All
the tubes are in good condition and all it needs is a bit of work.

PRICE : $75 or best offer ....

CALL : Derek at 519-725-0935 in Waterloo Ont. during evenings

The radio itself is in Toronto.

WALT,
       This HAS become a problem. The problem is that the HOSSTRADER organizers tell us one thing, but actually DO something else. Why is that? This spring people started showing up at 8:00 am. Don't the owners lock the grounds ? Almost every time we hear of the 4 PM opening we hear the same stories of people in before noon, set up and selling. I fully respect the right of the organizers to close the area to everyone till a given opening time. BUT if they are going to talk about it please do it. Just don't give us conflicting stories. I like to get the deals like everyone else. I hate showing up after 4 just to be told that "you should have been here around noon"!
    BTW Please thank Joe and his crew for doing a great job with the flea market. We all deeply appreciate it !!!!

C U around noon ??
73

I need to re-tube my Hewlett Packard 608D and would like to buy the rf oscillator and power amplifier tubes, type 5675 and 5876. Sure would appreciate any help as to a source of these old, hopelessly obsolete triodes (other than

buying a junker for parts - which I've already thought of.) Thanks

I recently picked up an old Heath 2 meter for use on packet. No manual though.

The darn thing quits transmitting at 145.6 or so and I can't get the lower standard 2 meter freqs. Soldering Iron is hot, I'll fully fund a copy of the complete manual set. Thanks in advance, Steve N5OWK. P.S. Send mail first. I'll contact nearest help (if any).

I am looking for a 440 linear amp for use with my FT-736R. I'd like at least 100 watts out (the 736 has 25 watts out). This will be used for SSB satellite work.

This was originally posted to misc.forsale...I felt this may interest others as well. If this has been posted to the wrong group, sorry!

95% of these tubes are in their original boxes! If you are interested, please forward me a note. These tubes have been visually, not electronically, inspected. Therefore, no guarantees.

I can only say that the gentleman who purchased about 15 of them about a month ago has not called back with any complaints. (yes, he has my home phn and address). So...if any of these little babies catch your eye...let's talk!

[Tube list followed]

I guess old age is when you can look down that list and visualize a radio,
outside, inside, circuit, and socket, for each of those tubes!

I am looking for a 440 Transmitter and receiver (preferably
separate or separable devices) to use for a repeater. I have
an RCA carfone, which has been adapted for 440 Mhz, however,
it appears that the driver and/or PA tubes are not working.
If you have access to or know where I can get a transmitter
and/or receiver, I would appreciate the information.

Yes, most of these tube numbers evoked memories for me also.

But the tube with filament voltage number 117 (117Z6GT) really caught my eye;
I don't remember it. Was this an amplifier tube? Why would there be only one
tube type that whose filament was neither series-string nor transformer
powered? Or is my memory defective?

Just curious,

The 117Z6GT is a rectifier (dual-diode). Probably the power supply for all
the other tubes.

For those of you not familiar with it, this is an EXCELLENT quality
receiver. Very sensitive, good selectivity (rejects unwanted signals).

For those not familiar with what can be heard:

  .1 to 30 MHz covers AM broadcast, shortwave broadcast, ham, military,

shipping, international air, wire service, time standards, CB, and more.

118-174 MHz covers aircraft, satellites, police, fire, ham, business, mobile phones, railroads, government, military, paging, marine, taxi, ambulance, and much, much more.

Features:

- .1 to 30 MHz
- Digital tuning, all-mode (AM, FM, USB, LSB, CW)
- VC-10 installed for added 118-174 MHz coverage
- 110/120/220/240 VAC, 12 VDC kit installed
- 10 memories, various scan modes
- selectable rate tuning
- selectable bandwidth
- YG-455C 500Hz CW filter installed
- dual clocks, with timer & recording controls

This is an excellent receiver! Like new condition, with original manuals and packing. $650 obo

I have a Kenwood TR-2600 A that I have a couple of questions about. First of all, I was wondering how to use the Telephone Autopatch system for business and/or personal use, i.e. extra licences needed, who I need to contact, how to operate it on my unit, where to find out the frequencies, etc. Is the TU-35B tone unit needed for this? Do I need to buy one, or is it something different entirely. Secondly, I would like to know if there are any mod.s available to increase the scan speed of the TR-2600 A. It is very slow as is stands. Anyone with answers to either of these questions I would appreciate email to me. Thanks!!!!

I am looking for any information on a JVC model SR-6600 portable
shortwave receiver.

Has anyone out in `net-land' ever heard of one? Bought one?

If so, how does it perform?   Does it meet the specs? Any
problems?   Where did you purchase it and what was the cost?

Please respond via e-mail or phone me directly.   I would
appreciate any response.

Tnx es 73.

Wanted: Icom IC-745 HF Transceiver

I would like to purchase a new or used Icom IC-745 HF Transceiver in good to mint condition. If you would like to sell yours, or know of someone who would like to sell theirs, or know of an amateur radio store that still has a few on the shelf, then let me know via email.

I will pay cash or I am willing to swap my Kenwood R-1000+cash for an IC-745.

Upgrade your rig--unload your IC-745 on me!

N0JVP

I'm looking to buy a reasonable external VFO for use with a Drake 2NT
CW transmitter that I obtained at a swap.

It requires 3 MHz. output for 80M and 7 MHz. output for the others.

I only paid 50 bucks for the Xmtr and anything in an equal price range
would be acceptable. Presently, I'm "rock bound".

thanks

********** FOR SALE **********

ICOM R-70 shortave radio. The predecessor to the R-71A (and in my opinion
  a better radio than the 71A). .1 Mhz-30 Mhz, passband tuning, notch filter,
  2 VFO's, CW/USB/LSB/AM. Like new and with less than 100 hours total use.
  With factory users manual. $500.00

HEATHKIT SB-401 CW/SSB ham transmitter. 100 watts. Can be used with just
  about any SW radio for a ham station. This is last model Heath made with
  solid-state innards with tube finals. $100.00

HEATHKIT HW-8 QRP rig, 80/40/20/15 meters. With assembly manual and a
  manual of modifications possible. Radio is stock/unmodified. $85.00

  I would prefer local inspection/pickup at my Santa Clara, CA QTH.

```

Hello All,

I recently bought a mint condition Icom IC-740 along with a Ten-Tech 229 200w/2kw antenna tuner from a friend. The 740 had the IC-PS740 builtin power supply, the IC-EX242 FM option, the IC-EX243 electronic keyer, and the FL-52 455kHz CW/RTTY filter installed.

I am interested in trying to locate some of the other options such as the FL-44 455 kHz SSB filter, the FL-45 9.0115 mHz CW/RTTY filter, and the IC-EX241 marker unit. Also, the manual mentions using a transverter for VHF/UHF when the FM unit has been installed. In particular, I would like to know what transverter (ICOM #?) could be used with it and if they mean theirs or some third party transverter in general, and if it is some third party unit, whos would work and where could one be gotten? Of the filters mentioned above, I am particularly interested in the FL-44 SSB filter.

Also, the unit has receive only on 17 and 12 meters, but being a micro-processor controlled type radio, and that it has specific coverage of those bands, I sort of figured that there was probably some sort if transmit inhibit diode or something. Can anyone elaborate on this? Has anyone succeeded in enabling transmit on these bands?

Any information on anything above would be greatly appreciated. As I

said the unit is in mint condition and as a new licensee, I am eager to gather as much information on it as possible. Any hints and tips from other 740 owner would be highly valued too! I noticed that the 740 was replaced by the 745 only a year or two after it was introduced (in the December 1982 ICOM catalog I think). My guess is that with the new bands, and desires for general coverage, and improvements in computer controls and memories, the 745 was quickly needed. Does anyone know of any other reasons that brought this about?

Please email responses. Thanks in advance!

Mark.

For those of you not familiar with it, this is an EXCELLENT quality receiver. Very sensitive, good selectivity (rejects unwanted signals).

What can be heard:

  .1 to 30 MHz covers AM broadcast, shortwave broadcast, ham, military, shipping, international air, wire service, time standards, CB, and more.

  118 to 174 MHz covers aircraft, satellites, police, fire, ham, business, mobile phones, railroads, government, military, paging, marine, taxi, ambulance, and much, much more.

Features:

- .1 to 30 MHz
- Digital tuning, all-mode (AM, FM, USB, LSB, CW)
- VC-10 installed for added 118-174 MHz coverage
- 110/120/220/240 VAC, 12 VDC option also installed
- 10 memories, various scan modes
- selectable rate tuning
- selectable bandwidth
- YG-455C 500Hz CW narrow filter installed
- dual clocks, with timer & recording controls

This is an excellent receiver! Like new condition, with original manuals and packing. $625 obo

Yaesu FT-101EE for sale or trade for IBM/CLONE PARTS.
Rig is in excellent condition in original box.
Has optional 600 cycle CW filter installed,otherwise it is stock.
I bought this radio new in 1980 and it has been well taken care of.
I will sell out right or trade for IBM/CLONE XT/AT boards, parts, etc.
There are 3 spare sets of finals and driver tubes that go with the radio.
I also will include the Yaesu factory service manual in the package.
Make offer. I will ship. I am located in the Pittsburgh area.

     i am thinking about selling my ICOM 260A 2m All Mode;
     yet i really dont know what it is worth.

     anybody out there have any idea what a fair price
     for it would be ?

     it is in excellant condition, and is good enough for
     satellite usage...

I found my "dream" general coverage receiver (a Drake R7) so I'm selling my Sony 2010 portable in very good (new) condition with all original boxes, packing material, knick-knacks etc. I want $255 (you pay shipping). New price is in the $310 range as far as I've been able to tell.

Hi gang,

I'm looking for a National receiver -- either an NC-270 (the old baby blue beast) or a NC-303. These have (gasp!) tubes in 'em.

Call me at 617 491 6536. Many Thanx!

This brings up what I think is an interesting point. I keep hearing
about the so called "yellow sheets", a peridical which is a kind of
blue book for used ham gear. Yet I've never seen an advertisement
for this in either QST or Ham Radio. Does any one know how to get
in touch with these "yellow sheet" people? I would like to subscribe
if they are still in business.

Thanks in advance.

Hmmm, maybe you're reading the wrong magazines?! :-)
I just picked up an issue of _73_ at random, and found:

Ham Trader Yellow Sheets
published twice a month
Send business size SASE for sample copy
$13 for one year (24 issues)
PO Box 2057
Glen Ellyn, IL 60138-2057
-or-
PO Box 15142
Seattle, WA 98115

Hey, maybe I'll check them out too! :-)
Cheers, Andy.

PS. I am only providing info - I'm not connected with Ham Trader Yellow Sheets.

I have recently discovered that the GE 6JB6's I purchased will
not work in my Drake TR-4.

Does anyone know a reliable, reasonably priced source for SYLVANIA 6JB6's???
The Drake instruction manual specifically mentions SYLVANIA for the
replacement brand on the 6JB6's used in the final amp. They must have
had a reason for mentioning a specific brand. Obviously the new GE's
I put in don't work....low plate current and low output...hmmm.

Thanks in advance,

Charlie Thompson WB4HVD

Could this be yet another ham bitten by the GE 6.7-volt filament fiasco? You know, it's really hard to believe GE would do something so insane--what equipment do they think people are going to put them in that would have a 6.7-volt filament supply? Sigh.

In any case, I don't know what brand they carry, but Amateur Electronic Supply carries 6JB6s for (only) $24.95 each. If you don't find a less expensive source, it's probably worth a toll-free phone call to them at 1-800-558-0411. If anybody's interested, they also have 6146Bs for $23.50 each, as well as matched pairs of certain tubes for old Swan, Galaxy, etc., plus a matched set of four 6LQ6s for amplifiers that use those tubes. Such a deal!

The R-1000 is a general coverage receiver for broadcast, shortwave, and amateur listening. It covers 200 kHz through 30 MHz for reception of SSB, CW, and AM with digitally synthesized tuning. It has 3 selectivity modes:

2.7 kHz for SSB/CW
12 kHz for AM (wide)
4   kHz for AM (narrow, shortwave)

This last mode is provided by an upgrade of the standard 6 kHz filer which came with the set.

I've owned this set for four years, and it is *hot*. I'm selling it because I decided to upgrade to another Kenwood, the R-5000, to take advantage of the digital memory presets which that (much more expensive) receiver offers. I paid $400 originally for the reciever, and the better filter cost about $50.

I'm willing to sell it for $300, plus the cost of UPS COD (should be no more than $15). The instruction manual is included.

Write me a note or call if interested. I'm:

Is the swap meet at Foothill College (Los Altos Hills, CA) happening
this weekend on the 9th? Second Saturday in September, right?

Mark

THE LARGEST HAM RADIO AND ELECTRONICS
FLEA MARKET IN NEW ENGLAND
OCTOBER 6-7 1989

The fall edition of the HOSS TRADERS ham radio and electronics flea market will be held Saturday OCTOBER 7 starting at DAWN at the DEERFIELD FAIR GROUNDS, DEERFIELD N.H. The fair grounds are located on RT-43, a few miles off of RT-101. RT-101 is directly accessible from RT-93 in New Hampshire. Talk-in is available on 147.00 (rpt) and 146.52.

The spring edition of this flea was the best ever with some estimated of as many as 8000 people attending ! There is plenty of food, and parking available.

For REAL hams, the flea market actually begins FRIDAY at about NOON and continues into the night. Bring a flashlight, a smooth and phillips screw driver and a jacket. (HINT: the best deals go down on friday !!). Camping is available.

Admission is $5.00. ALL PROFITS go to the Shriners CHILDRENS BURN CENTER in BOSTON. There is NO additional fee for sellers. Now is the time to clean out the old ham shack !!

Dear friends,

     Currently we need some information on SSTV,
1. How it works (general info on the system), is it possible
   to use it in VHF/UHF band.
2. We are interested to purchase the SSTV unit with/without camera
   made by ROBOT, or other company(if you have one or more pre-owned unit(s))
3. Also if anyone have the address, phone number of the robot(manufacturing comp
any)
   we would really appreciate it

Since we planned to use for experimental purposes, more than one unit might be
needed.

PS: If you have any of the info above
    pse send email to pranata@udel.edu or adi@pyr1.acs.udel.edu
    we will need it soon.

Thank you in advanced

                                        Sincere,
                                   Adi Pranata (YB 3 CVA/W3)

I'm looking for one (or more) RS-232/ASCII to current loop/Murray code (i.e. TTY interface). I know these are pretty ancient, but I have an application where I need to drive an old TTY from a micro. Please reply by e-mail - I doubt this is a widely applicable request. :-)

How much and does this rig support continuous transmit (so the radio
could be used from an aircraft talking to New York Radio)??

You again? My gosh Mike, You're in fidonet and now in Usenet - they'll
let anyone one won't they?

I picked up a TNC from AES back when I lived in Orlando - as I remember
it as a MFJ-1274 - and it worked just fine.

Nice to see you in the nets..

Larry

I doubt you could get it licensed, Larry. It has digital frequency counter
type display, but the frequency CONTROL is an old-fashioned analog VFO.

I want to be able to draw 13.8 volts @ 20-40 (or more) amps while driving my car (I'm trying to power a linear amplifier). I know that the current alternator/battery comnbination in my Taurus SHO cannot handle this (even though I have the Ford factor heavy duty alternator/battery).

Can anyone supply me with information on after market HEAFTY duty alternators and batteries? Any suggestions as to precautions, limitations, considerations regarding this type of hook-up wouild be appreciated. For example, should I be running another battery in parallel? Should the connections be direct to the battery or battery + and metal (chasis) ground?

I am looking for someone who has an L-tronics LH series
L-per that is collecting dust and would like to sell it.
I am looking for a model that was engineered for the
aviation band.

For those who have never heard of an L-per, it is a device
used for direction finding on RF signals. They are commonly
used by search and rescue teams to find transmitting ELT's.
They are used also on other bands to find sources of RF
interference.

Anyways, If you have one you are willing to part with, give
me a call or send mail and I will discuss further.

THE LARGEST HAM RADIO AND ELECTRONICS
FLEA MARKET IN NEW ENGLAND
OCTOBER 6-7 1989

The fall edition of the HOSS TRADERS ham radio and electronics flea market will be held Saturday OCTOBER 7 starting at DAWN at the DEERFIELD FAIR GROUNDS, DEERFIELD N.H. The fair grounds are located on RT-43, a few miles off of RT-101. RT-101 is directly accessible from RT-93 in New Hampshire. Talk-in is available on 147.00 (rpt) and 146.52.

The spring edition of this flea was the best ever with some estimates of as many as 10,000 people attending !! There is plenty of food, and parking available.

For people who want the BEST DEALS, the flea market actually begins FRIDAY at about NOON and continues into the night. Bring a flashlight, a smooth and phillips screw driver and a jacket. When selling, I usually sell out by friday night. Camping is available.

Admission is $5.00. Camping fee is slightly more. ALL PROFITS go to the Shriners CHILDRENS BURN CENTER in BOSTON. There is NO additional fee for sellers. Now is the time to trade your junk for someone elses :-)

NEW EQUIPMENT DEALERS will be there also ! No SALES TAX in NH !
^^^^^^^^^^^^^^^^^^^^^

Get there early !!!
73
GENE WA1UXA

DISCLAIMER: I have no connection with the flea market or the Shriners. I just love big flea markets with lots of junk !! :-)

My recommendation is to leave the alternator alone. Unless you are
transmitting at a very high duty cycle you shouldn't have to change it.
You should however get a deep cycle battery. They are intended for
heavy loading and withstand many more discharge/charge cycles than a
standard battery. I personally have two batteries tied to my alternator
via a battery isolator. This allows me to use one battery for my
accesories while the other takes care of the engine, lights, etc.

The connections should be made directly to the battery using heavy guage
wire. #10 should do the trick, considering the current draw. Perhaps
two #10 in parallel would be better. I suggest two #10's rather than
one #8 for ease in routing, etc.

Connecting directly to the battery will also allow the battery to act as
a larger capacitor and filter out any whine you may get from the alternator.

Also, be sure to fuse the positive lead(s) near the battery as well as
in a place convenient for you to access.

Hope that helps.

This is ok...

> For REAL hams, the flea market actually begins FRIDAY at about NOON and
> continues into the night. Bring a flashlight, a smooth and phillips screw
> driver and a jacket. (HINT: the best deals go down on friday !!). Camping
> is available.

Whoa! Stop! Halt! ^c ^c ^c ^c!

In recent years this has become a serious problem. The fairground does
not open until 04:00 pm Friday. The gates will be closed and the curios
will be turned away. Don't plan on arriving before 04:00 pm.

This article has been posted on behalf of Joe, K1RQG, Hamfest Chairman.
If you have any questions about this, please contact him. Thank you and
hope you get to Deerfield this year.

73,

N1FKO
Walt

You might consider a used Drake TR-7. It listens GOOD! And with the AUX board it'll run crystal controlled. I don't know if it can be licensed in the civilian commercial aviation services, but it sure was popular in the government/military applications for a while.

I'm a collector of antique radio equipment and books. I'm looking for
old (pre-1950, probally pre-1940) books on radio theory, repair, etc.
Though not a primary area of interest I'd consider books on early TV,
general electronics/scientific (e.g. The MIT Rad Lab series) or
radio related fiction.

If anyone has material they'd be willing to part with please send a list
(specifying Author, Title, Date and Price) to me vi email or US mail.
If a list seems like too much trouble (and you have several titles), just
send your phone number & I'll get back to you.

Thanks much,
---Tom Adams---

I have a Drake TR3 for sale. Output is 300W PEP on CW and 275 in AM, SSB,
etc. on 80-10m. A perfect rig for beginners. Key and phone included.

Also included are misc boxes of function known (CW monitor, ant matcher/meter,
etc.) as well as boxes of unknown function.

Also included are TV filter and dipole for 80/40/10 m operation.

Asking $300 O.B.O. or swap for ?????

(trying to work myself into the packet scene)

mail to   stein@eniac.seas.upenn.edu

I have need for the schematic for a Tektronix model 132 power supply. This is
the external power supply for the letter and "1" series of oscilloscope
plug-in units (such as for the 535/545 series of 'scopes). I do not need the
full manual unless someone wants to sell one at a very reasonable price - after
all, how complicated can the 132 be? I will be happy to reimburse photocopy
and mailing cost. Thanks & 73.

I am looking for a cheap used tunable bandpass filter similar to the

Krohn Hite Model 3700 which allows one to set high and low pass limits anywhere in the .2 Hz to 20 KHz range. It would also be helpful if the filter provided switchable 20 db gain like the Model 3700.

I am a Ph.D. graduate student in the USC Neurobiology Program. I am trying to find this filter to complete my experiments. I will pay for this filter out of my own pocket, so I'd like to get one as cheap as possible. On the other hand, maybe someone would donate one to USC for my use. I think we could get an official acknowledgement letter for such a donation if someone was willing to contribute the filter.

In any case, I hope someone out there in hamland has one of these filters in his shack ... or knows where I might be able to obtain one. Thank you very much for your kind attention to my request.

Thanks again, AJ

I'd like to restore one that I picked up. It needs some buttons and a bezel, and the walnut cabinet is scratched. If you have one of these sitting in a closet somewhere, I'll pay shipping plus some "resonable" price (given its 20 year old technology).

I have just received a Radio Shack Scanner, PRO-2021 Model 20-113.

It does not scan all the newer frequencies, however a friend suggested
that there may be modifications that I could do to increase the range.

It was also suggested that this news group would be a good starting point.
If anyone has modifications that can be done to this scanner to increase
the scan range, would you be kind enough to send them to me.

Thanks in advance.

A friend of mine has an opportunity to purchase a Kenwood TS-440S with the automatic antenna tuner. I would like to advise him on what he should expect to pay. The unit is used but I'm not sure how old it is. Please reply direct via e-mail accordingly.

Thanks es 73

The R-1000 is a general coverage receiver for broadcast, shortwave, and amateur listening. It covers 200 kHz through 30 MHz for reception of SSB, CW, and AM with digitally synthesized tuning. It has 3 selectivity modes:

2.7 kHz for SSB/CW
12 kHz for AM (wide)
4   kHz for AM (narrow, shortwave)

This last mode is provided by an upgrade of the standard 6 kHz filer which came with the set.

I've owned this set for four years, and it is *hot*. I'm selling it because I decided to upgrade to another Kenwood, the R-5000, to take advantage of the digital memory presets which that (much more expensive) receiver offers. I paid $400 originally for the reciever, and the better filter cost about $50.

I'm willing to sell it for $300, plus the cost of UPS COD (should be no more than $15). The instruction manual is included.

Write me a note or call if interested. I'm:

I have a YAESU 2700 for sale.

It was purchased new in 1987. It was used occasionally for approximately two years in my wife's car. We traded car and I now want a rig with remote head.

Included are the FTS-8 Encoder/Decoder [retail $50] and an Avanti AP 450.3g antenna [I paid $31].

Perfect shape. The 440 board was repaired within first two weeks of ownership under Yaesu warrenty by Yaesu -- no problems after that.

Entire collection $400 firm.

My brother (a ham) died in '85 in an air wreck, and left me the following.

Kenwood TS-120S SSB Transceiver
MC-50 Microphone
SP-180 Speaker
PS-30 DC power supply

Drake TV-3300-LP Low Pass Filter

Bird Hame-mate Thruline Wattmeter

At the time I carefully packaged it up thinking my kid was going to get
into ham radio, but it never happened.

I'm asking $450 + shipping from Houston for the package.

I don't have one, but I just ordered an IC for a friend in
barbados...and was able to find a place that sells in "no minimum
order" quantities. Be glad to arrange an order for you, if you
wish. I will look up the chip tonight, and let you know the
details, should this help.

Sorry for cluttering the net with this, but my "reply" option is
not functioning.

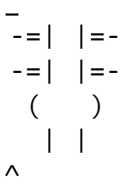
Subject: What is a VT-127A tube?
Message-ID: <1811@sw1e.UUCP>
Date: 28 Jul 89 14:33:09 GMT
Organization: Southwestern Bell Telephone Co
Lines: 26

I'm a radio collector and just aquired several boxes of old tubes, mainly

early receiver tubes. One tube among them is unknown to me & I appeal to
the net for answers or pointers to references.

Is anyone familiar with a VT-127A tube? An odd looking fellow, I assume
it to be a transmitting tube with four separate lead-outs on the side &
two on the bottom.



EIMAC is the manufacturer, and I find no mention of them in
"Saga of the Vacuum Tube", "70 years of Tubes and Valves" or the tube
itself in the RCA tube manual.

I'm interested in specifications, dates of manufacture & original applications.
As an aside, I posted a request earlier for radio manuals, books etc. and
got a mixed response. I'm still looking for Radio Stuff if anyone is looking
to get rid of same.

 Ill health forces me to sell the following top-quality
 commercial hf receiving equipment, all in first class
 condition, with technical manuals:
 a) RACAL 6790 receiver, has low-freq option for 0-30MHz
 coverage, 1 Hz readout resolution. One of the quietest
 synthesizers available and very low distortion. Spinner
 knob tuning plus two keypads for freq. and mode entry.
 Have two units available at $2,500 each.

 b) AEA ATU-1000 RTTY modem, built to commercial standards,
 continuously variable xmit and receive freqs., with

digital frequency display and is VERY sharp on band-
width. $600

c) Dovetron MPC-1000R regenerative RTTY modem, has tuning
scope, in-band diversity reception, and call sign ID
generator. $500

I am having trouble locating the base insulator support for the old
style Hy Gain Hy-Tower vertical antenna. This is the piece that the
base insulators mount to, and you then clamp this part to the pipe
sections in the concrete. This part is attached by two U-bolts. I
have the insulators, but the piece they mount to has rotted away.
I communicated with Hy Gain, but they said they changed the design,
and had no parts in stock. Does anyone out there have an old style
hy-tower hanging around with broken insulators who would be willing to
part with the insulator-mounts? I only need one, as the other two are
in good shape. Thanks.

FOR SALE: Complete hump-mount MOBILE STATION including antennas.
          HF (Kenwood TS-120-S), 2M (Icom IC-2AT w/Mirage amp),
          220 (Icom IC-3AT w/Mirage amp), and Bearcat scanner.
          HF includes Kenwood bumper mount and MA-5 antenna, and
          MC-50 hand mic. VHF/UHF operates off switch on external
          mount with (Pipo) touch tone pad and Icom hand mic. The
          trunk-lip mount antennas are both black teflon Larsons.
          Scanner uses ordinary automobile receive antenna through
          Hustler matching unit for VHF/UHF receive-only operation.
          Installs in a full size 1983 Oldsmobile, under the dash.
    ==> $900 firm; $800 without scanner/match at buyer's option.
          Please call Alex (KX9I) at 471-1616 (days), or 338-1621.

 Does anyone have any historical information on the "spy radio"
 series RR-6, RT-6, RP-6?   I am trying to get approximate dates
 of use, technical data, etc. Does anyone know when this series
 was replaced? Any sources of information appreciated. Come on you
 former spooks, this will make a good ham article, as the rig works
 great, and is perfect for SKN.
     Schematics would especially be helpful. Has this rig been de-classified?
      Thanks.

 I am looking for a source of Santec ST-20T battery packs.
Has anyone out there procured a new ST-20T pack? There are some
clones that are supposed to fit but I tried one at a hamfest and
it would not latch correctly on the bottom of the '20T.
Thanks in advance,

Charlie Thompson WB4HVD

Charlie,
        You might try giving Williams Radio a call at 1-800-523-0347 (12n to 10pm edst). Wayne Williams (K4MOB) sells'em em and he usually has them in stock. The mailing address there is 600 lakedale Road, Colfax, NC 27235. 73

I have the following HTs for sale. These units were bought brand new. I have all of the original shipping cartons and will ship either US mail or UPS. The reason for selling is to collect sufficient funds to purchase the new Kenwood dual-band HT. The 2m unit was purchased June 1988 at the Manassas (VA) Hamfest and the 70cm was purchased August 1988 at the Virginia Beach Hamfest. Following is a description of each:

Kenwood 2m TH-215A HT:
  1 - Rubber-duckie antenna
  2 - PB-2 batteries
  1 - Wall charger unit
  1 - Belt clip

Condition: Very good to excellent, it has a few scratches from use, but nothing cosmetically drastic. It has been carried in both a leather case as well as carried on the belt clip.

The 2m unit has the out-of-band mods implemented. If you want this option defeated, I will add the jumpers to keep the transmitter in the ham bands. Transmit/receive is from 141.000 Mhz to 162.995 Mhz.

Kenwood 70cm TH-415A HT:
  1 - Rubber-duckie antenna
  2 - PB-2 batteries
  1 - Wall charger unit
  1 - Belt clip

Condition: Excellent, it has stayed on the shelf more than its been used and has been carried in a leather case when in use.

No modifications have been made to the TH-415A. Transmit and receive are standard from the factory.

Both HTs have had a 4 mil clear tape placed over the LCD lens to prevent scratching of the lens. The tape can be removed if desired. Both HTs have the 16 key touch-tone (tm) pad as standard and also have CTCSS receive capability.

Asking prices are:

TH-215A - $275.00 + shipping
TH-415A - $310.00 + shipping

I will consider a lower overall price if both units are purchased together. I also have one SMC-30 speakermic which is compatible with both units. It may/may not be for sale depending on whether it is compatible with the dual-bander. I may be reached at home after 6PM EST at 804/487-7773.

73,

Jeff

I won the pre registration prize at the Texas VHF-FM Summerfest
in Austin, Texas on 5 Aug 1989.

The radio is a Kenwood TH-75A Dual Band HT.

It covers the 2meter amateur band and also the 438-449.95mhz
portion of the 70cm band.

The radio is quite nice, but currently I do not have a license and
when I do get one, I plan to work more in the HF bands.

So the radio is for sale.

Kenwood list is $549, Austin Amateur Radio, sells it for $475, and
one of the dealers in '73 had it listed for $469.

I would like to sell it for $450 or trade if for one of the following:

     ICOM 735 or 725 (Note, an IC-735 was the Grand Prize won by
                          a nice retired TSTI instructor, couldn't
                talk him into a trade. :^)

     Kenwood TS-140 or TS-680
     Yaesu FT-575GX

I would like to reiterate, this is a very nice radio and if I was planning
2m/70cm activity I WOULD KEEP IT! If I don't get the $450, I might anyway.

I'd also like to thank the Texas VHF-FM Society for the VERY NICE prize!
(Yes, Joe Makeever, I still plan to get my license   :^)   )

If you have a unit to trade or would like to buy this FM HT, contact
me at home (512)-244-0625 (ans. machine) or e-mail to me.

I am looking for a signal generator with CALIBRATED output...like an
HP-608 or a Measurements 80. The generator should not leak RF at the
microvolt level since I am trying to use it for receiver sensitiviy tests.
The frequency range should be from 10-470 MHz or so.

Thanks,
Charlie Thompson WB4HVD

I am interested in purchasing some of the old Icom IC-202, 502, 402 (I think these are the correct model numbers). These rigs operate SSB and CW, included a battery compartment and shoulder strap. There have been a few similar models by Kenwood and others. Suffice it to say I am looking for very portable SSB/CW equipment for 50, 144, 432. Price will be based on condition naturally. Yes I am interested in "basket cases".

P.S. I am also looking for 220Mhz. skeds (FN03VF), running 500w and a 16 el "K1FO".

For Sale Yaesu FT-767GX with 2 meter module. Mint condition, no problems
I never use the 2 meter and I just bought a much smaller rig.
This thing has lots of bells and whistles, auto antenna tuner, keyer, cw filter
speech processor, a host of filters built in 10 memories, computer interface,
no external power supply needed. One can put up to three uhf/vhf modules in it
(the 2 meter module is one of these). All this stuff is standard except
the 2 meter module.

I have the technical reference that I will include as well as an pretty
new AEA isopole 144 Mhz antenna. I have actually keyed the 2 meter module
3 times to see if it works. By the way the 2 meter band just looks like
another band (real nice eh) and works all mode. I got the box too.

Price $1300 with the isopole as a bonus.
Price $1300 with no isopole.
Price $1800 with a $500 cash rebate.
        .

I'm looking for:

* a relatively inexpensive all-band HF set, something
like a Kenwood 430

* 2m HT with touch-tone pad and subaudible tone, something like
an ICOM 02-AT

* TNC, preferably an all-mode box such as a KAM or MFJ 1278 or
a PK232

Contact Richard Kaplan at (305) 325-8311 [voice] or at any
of the e-mail addresses below.

Experience has shown me that the hams were the first to enter the
microcomputer fields. Hams are also known for keeping that old
terminal around forever because "someday I'm gonna make that old
teletype receiver." Hence, I ask you....

I will pay $50.00 for an Intel 4004, or whatever it takes. I will pay
$25.00 for an Intel 8008.

Name your price if mine is too low.

These were early microprocessors from the mid 70's. They are in many
terminals, micro's, calculators and controllers in the mid to late 70's.
(**CHECK ALL THAT JUNK IN YOUR BASEMENT**).

If you have any board containing a 4004, and other chips such as
a 4001 or 4002 memory, or a 4003 shift register, that could be
worth over $100. Let me know what you have.

   The Fifteenth Annual Eastern VHF/UHF/SHF Conference will be held
May 19-21 on the grounds of Rivier College, Nashua New Hampshire. Nashua
is centrally located with easy access via road (RT-3 or RT-93), Bus,
or AIR, (Nashua Airport, or Manchester Airport with connections to New York,
Boston, Chicago, Washington).
   Accomodations will be available on the grounds at a rate of $27.50/night
single or $45.00/night double. Morning coffee is included. Many other
accomodations are available ranging from the Red RooF INN to the Sheraton
Terra Hotel. All are within an easy drive. Meals are available locally.
The saturday evening banquet featuring prime rib of beef is available
by reservation only. The cost for the meal is $18.00 p/p.
   Conference highlights include the hospitality room starting at 2000 friday
evening, Tech Talks starting sat at 0900 featuring discussions on satellite
receivers, antennas, VHF, UHF, & SHF operation, etc. Also the ever popular
antenna gain contest, for 70, 33, 23, and 13 cm starts saturday at 1100.
Additionally there will be technical exhibits along with some dealers,
photo displays, pre-amp noise figure measuring contest on sunday, as well
as many, many door prizes after the banquet on Saturday evening.
   Contact Dave Knight KA1DT 15 Oakdale Ave, Nashua, New Hampshire 03062
for more details or to register. If you have an interest in VHF, UHF, or
SHF operation, this conference is for you.

                                                    73

Subject: National HRO Coils for Sale
Message-ID: <8300001@hplsla.HP.COM>
Date: 26 Apr 89 18:07:45 GMT
Organization: HP Lake Stevens, WA
Lines: 99
Posted: Wed Apr 26 19:07:45 1989

I have a number of early National HRO plug-in coils for sale. Most
are for the National RAS recievers (military version made for the
US Navy; i.f. of 175 kHz). One coil is for an RAW (similar
military version but with a standard i.f. of 455 kHz). The
remainder are for a standard, civilian HRO, probably pre-war or
just post-war (these coils do not have bandspread).

Excellent condition means that the coil is clean and complete, with
no holes, gouges, or visible modifications. However, due to the age of
these coils, the clear plastic shield over the calibration label and
station log may be yellowed and/or slightly buckled.

Help me clean house! I will ship UPS if possible. These prices do not
include shipping (approximate weight of each coil is 2 pounds).
If you prefer another way to ship (or are outside the U.S.) please
specify.

Prices are firm -- but we can talk if you're interested in several items.
Thanks ... and hope you find something you can use.

o Complete set of coils for National RAS-5 (Type CNA-47156 through
  CNA-47162), contract date Jan 7, 1943. This includes coils #1
  through #7, covering 190 kHz to 30 MHz. The front-panel of the #3
  coil has white paint over the original black crackle. All other
  coils are in excellent shape. All coils are serial #650, with
  a contract date of Jan 7, 1943.

$125.00 (will not separate)

- Set of general coverage coils for non-military HRO. All coils are in excellent condition. The set of four covers 1.7 - 4.0 MHz, 3.5 - 7.3 MHz, 7.0 - 14.4 MHz, and 14 - 30 MHZ.

  $100 (will not separate)

- Coil #1 (190-450 kHz). CNA-47156, contract date Jan 7, 1943, serial #809, for RAS-5. Excellent condition.

  $20

- Coil #2 (450-900 kHz). CNA-47157, contract date Jan 7, 1943, serial #764, for RAS-5. Excellent condition.

  $20

- Coil #6 (7-14 MHz). CNA-47161, contract date Jan 7, 1943, serial #753, for RAS-5. Excellent condition.

  $20

- Coil #1 (190-450 kHz). CNA-47156, contract date Jan 7, 1943, for RAS-5. Corrosion on aluminum name plate obscures serial number. Otherwise, good condition.

  $12

- Coil #2 (450-900 kHz). CNA-47157, contract date Jan 7, 1943, for RAS-5. Corrosion on aluminum name plate obscures serial number. Otherwise, good condition.

  $12

- Coil #5 (4-7 MHz). CNA-47160, contract date Jan 7, 1943, for RAS-5. Corrosion on aluminum name plate obscures serial number. Otherwise, good condition.

  $12

- Coil #6 (7-14 MHz). CNA-47161, contract date Jan 7, 1943, for RAS-5. Corrosion on aluminum name plate obscures serial number. Otherwise, good condition.

  $12

- Coil #7 (14-30 MHz). CNA-47162, for RAS-4. Corrosion on aluminum name plate obscures serial number. Otherwise, good condition. The RAS-4 was a slightly earlier receiver with a contract date in 1942.

$12

o Coil #2 (450-900 kHz). CNA-47164, serial #5, for RAW (contract date of June 7, 1939. Excellent condition.

$25

I'm looking for a Swan transmatch in real good condition. I don't
know the model number but Swan only made one of them.

Please write me via e-mail or P.O. Box 16
                    Penryn, Ca. 95663

if you know of the whereabouts.

Thanks,
Barry

From article <85595DDP100@PSUVM>, by DDP100@PSUVM.BITNET:
>
> Does anyone know of any Ham-fests scheduled to take place in
> the Washington DC area?

Washington D.C. area hamfest list (tentative dates).

I have extrapolated these dates from last year's list to
this year's calendar. The dates may not be accurate, but
with 12 years of hamfest experience around this area,
there is a good possibility that these are accurate.

May 28 Howard County, MD: Maryland FM Association; although
 I don't have a write-up here listing this one,
 it is one of four hamfests traditionally held
 at this site off Route 40/144/I-70 @ Rt 32. Moderate
 turnout if weather is good (everyone at the beach),
 moderate turnout if weather is bad (who wants
 to hamfest in the rain?).
 Talk-in: 146.76, 146.52

June 4 Manassas, VA: Ole Virginia Hams; at the Prince William
 County fairgrounds, Route 234 south of Manassas, Va.
 W4PVA, "he does from his home, through the relay station
 there" on his bicycle. Bigger each year; tailgating
 in huge grassy field.

Talk-in: 146.97, 146.52

July 30 Howard County, MD: Baltimore Radio Amateur Television Society???;
another one of the four hamfests held at this site (see
May 28 above). A good, hot, buggy, local-type hamfest
which grows a little larger each year. Get there early
to beat the heat and gnats.
Talk-in: 146.76?, 147.03?, 146.52

August 6 Winchester/Berryville, VA: Shenandoah Valley ARC;
Clarke County Ruritan Fairgrounds just off Route 7
2 miles west of the town of Berryville, Va. Enjoy
a beautiful day in the Virginny hills, have a
barbecue chicken half, catch up on 6 meteors with
Jethro and Capt. Kirkwood, and buy some junk!
Talk-in: 146.82, 146.52

No-Code Buttons - Get yours Now!

At last, and like all good political campaigns, buttons are now available.

The unofficial No-Code button is an attractive 1 1/2 inch button with the slogan in red lettering on a crispy white background. Below is the button text:

Just Say
"YES"
To
NO-CODE

You too can be the proud owner of one of these buttons and get strange looks from other people in the supermarket checkout line. Wear one at the next ham club meeting. Wear one to the local hospital emergency room, listen to the comments from the medical staff. Wear one everywhere, even to work, but not in the shower.

If you hate the concept of No-Code and think it is the work of Satanists, Pederasts and all that is bad in society today, get a No-Code button too. You as a No-Code hater can gather with like minded acquaintances and desecrate a button. Hey, barbecue 100 just for fun.

If you can't resist having your own No-Code button, just send a dollar and an S.A.S.E. to the address below:

Buttons
742 1/2 North Hayworth Avenue
Hollywood
California 90046-7142

Bulk orders available. Send $1 per button and 1 S.A.S.E. per order.

  The "HOSS TRADERS" Ham Radio and Electronics flea market will take

place June 2 and 3 at the Deerfield Fairgrounds, RT-43 Deerfield N.H. Doors open at 4 P.M. Friday afternoon for early deals and camping. The doors stay open all night for late arrivals. The major activity starts saturday morning at dawn.

   This marks the return of the flea market to Deerfield after a two year absence.

I am looking for a VFO that I can use with a Drake 2NT CW transmitter.

Required frequency output range is ~3.8 Mhz. for 80 meters and
7 Mhz. for the other bands. I used to have an Eico that worked
pretty well in the old days. Heathkit also makes one that would
do the job (used with the HW16 and DX 20 I believe.)

It needs to be a clean one and in operating condition.

Barry Fowler
Box 16
Penryn, CA 95663   or e-mail : barry@hpromkg.HP.COM

Thanks.

Wanted: >=500ma at 2000V   (>=1KW)

I have diodes, but need caps and transformers. I'm particularly interested
in 2KV-2.5KV oil-filled caps. I suppose I could wire electrolytics together,
but the string would be a little unwieldy and unreliable.

If you know where to find stuff like this on the surplus market, let me
know. I just love homebrewing.

Regency HX-1500 For Sale

55 Channel - Fully Programmable Hand Held
Scanner. Frequency Range 28-60,108-170 and
408-520. Includes Mobile Mount Magnetic
Antenna, Rubber Duck antenna, Nicads,
charger and the Latest Edition of Betty
Bearcat Frequency Directory from Uniden.

This unit is in good condition and works
great! My final price is $150.00 Plus
shipping. If it dosen't sell at this price
it's not selling. I will also trade for a
20 MEG or larger Hard Disk for an IBM Clone.
(Which is why I selling it!)

Please, I know someone can use this and I
can't stand using dual floppies again!

Please call collect to Randy at the Number
below, or leave a message here. (I prefer you
call)

I have the following items forsale or trade. Prices are
just a starting point, make an offer. I will consider trades
for amateur radio equipment and other electronic equipment.
I am looking for (220/450/902)transverters, UHF/VHF traceivers
and AMPS. 902 transmitters, TNC's and recievers. Also looking for
an AT/XT, laptop. What's ya got? lets talk.......
